2012-2013 Catalog

LOS ANGELES TRADE-TECH
A Community College
Los Angeles Trade-Technical College
400 West Washington Boulevard
Los Angeles CA 90015-4181
Telephone (213) 763-7000
www.lattc.edu

Getting to
Los Angeles Trade-Technical College

• FROM THE HARBOR FRWY. SOUTH
  Exit Adams Blvd. to 23rd Street, turn left to Grand Ave., turn left to college

• FROM THE SANTA MONICA FRWY. EAST
  Exit on Grand Ave., turn right to college

• ON THE BLUE LINE
  Grand Ave. Station; for information, www.metro.net

• ON THE METRO LINE
  23rd Street Station; for information, www.metro.net

• FROM THE SANTA MONICA FRWY. WEST
  Exit on Los Angeles Street to 17th Street, turn left on Grand Ave., to college

• FROM THE HARBOR FRWY. NORTH
  Exit on Adams Blvd., turn right to Grand Ave. and left to college
Los Angeles Trade Technical College is a public tax-supported educational institution which offers post-high school opportunities for men and women and is administered by the Los Angeles Community College District.

Accreditation
Los Angeles Trade Technical College is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, 10 Commercial Boulevard, Suite 204, Novato, CA 94949 (405) 506-0234, an institutional accrediting body recognized by the Commission on Higher Education Accreditation and the U.S. Department of Education.
Welcome to Los Angeles Trade-Technical College.

This is the place where you can obtain your dreams. As you look through this course catalog, you will see all of the choices you have for higher education. We are unique in that we offer a substantial number of career-technical courses that prepare you to successfully compete in today’s workforce within two years. Trade Tech has some of the most prestigious and cutting-edge training anywhere in the country and many of our programs are ranked number one! If you choose to take advantage of our transfer programs, you will find a robust list of courses that can become the foundation for your transfer degree to a four-year university. We transfer students to colleges all over the world.

Los Angeles Trade-Technical College is an excellent choice for whatever career path you choose. We have a very talented and hard-working faculty and staff, committed to your success. Please sample all that we have to offer at L.A. Trade Tech.

Dr. Roland “Chip” Chapdelaine

President
RESPONSIBILITY TO BE INFORMED

It is the student’s responsibility to read the information presented in this catalog and to know and observe all policies and procedures related to his/her program. Regulations will not be waived nor exceptions granted because a student pleads ignorance of policies, procedures, or deadlines.

2012-2013 ACADEMIC CALENDAR

FALL SEMESTER 2012
Fall semester begins ......................................................... August 27, 2012
Saturday classes begin .................................................. September 1, 2012
Labor Day ................................................................. September 3, 2012
Last day to apply for graduation for students completing in Fall 2012 .... October 5, 2012
Veterans Day (College closed) ........................................ November 12, 2012
Thanksgiving Holidays (College closed) ......................... November 22 - 23, 2012
Final examination period ............................................. December 10 - 15, 2012
Fall semester ends ....................................................... December 16, 2012

WINTER INTERSESSION 2013
Winter intersession begins ........................................... January 2, 2013
Martin Luther King’s Day (College closed) ....................... January 21, 2013
Winter intersession ends .............................................. February 3, 2013

SPRING SEMESTER 2013
Spring semester begins ............................................... February 4, 2013
Saturday classes begin ............................................... February 9, 2013
President’s Day (College closed) .................................. February 15 - 18, 2013
Last day to apply for graduation for students completing in Spring 2013 .. March 24, 2013
Cesar Chavez Day (College closed) .............................. April 1, 2013
Spring recess ............................................................ March 29 - April 5, 2013
Memorial Day (College closed) .................................... May 27, 2013
Final examination period ........................................... May 28 - June 3, 2013
Spring semester ends ................................................ June 9, 2013

SUMMER SESSION 2013
Summer intersession begins ........................................ June 10, 2013
Independence Day (College closed) ............................... July 4, 2013
Summer intersession ends .......................................... August 18, 2013

Trade Tech: A Proud History

Los Angeles Trade-Technical College (LATTC) has been proud to serve the greater Los Angeles community for more than 85 years.

Our history began shortly after the close of World War I, when members of the Los Angeles Board of Education, the Chamber of Commerce, and business and labor leaders held a series of conferences to talk about Los Angeles’ need for a centralized vocational training program. Out of those meetings came the initial concept of what would become Trade Tech, modeled on a class in power sewing offered to downtown garment workers. By the end of 1924, training programs in “beauty culture”, printing, plumbing, and the building trades were offered at various locations around the city and briefly consolidated in a soon-to-be outgrown building located at Eighth and Grand Avenues.

In the early Spring of 1925, the Los Angeles Board of Education created the Frank Wiggins Trade School, naming it after a prominent Los Angeles Chamber of Commerce member who had been a driving force in promoting the development of vocation training. The school relocated to a new building at 1646 South Olive Street in 1926, and through the ensuing years gained a reputation for the success of its graduates in industrial careers as well as the dedication of its faculty and staff.

The advent of World War II created an exponential demand for the college’s training programs in support of the war effort. The college’s Aircraft and Welding Trades departments operated directly under the supervision of the federal War Production Training Program, while the majority of other programs were quickly reformatted to provide short-term training of six to ten weeks’ duration, often at war production plants located throughout the city.

The end of the war and the return to a civilian economy, together with the infusion of federal funds for training veterans, led to an expanded demand for education and training at the college. In July of 1948, in response to veteran’s retraining needs as well as Los Angeles’ post-war population boom, the college was granted the authority to expand their curriculum and offer an Associate in Arts degree in vocational disciplines as well as academic and Liberal Arts areas.

LATTC moved to its current location in 1957. In 1966, an existing educational institution with a strong business program, Metropolitan College, was merged with Trade Tech, resulting in an even broader range of educational offerings. Finally, in 1969, LATTC joined the newly formed Los Angeles Community College District (LACCD), making LATTC one of the nine colleges that comprise the District.

Trade Tech occupies a unique position among institutions of higher education. Throughout eight decades, the college has remained true to its founding premise of vocational education, while expanding to provide transfer programs, adapt to rapidly changing technologies and remain responsive to the needs of the surrounding community. Students come from all over the Los Angeles basin to participate in our unique mix of programs, some of which have been in existence since the school’s inception. As of Fall 2006, the campus is undergoing massive renovation and building programs under the auspices of Proposition A and AA bond funds, and we look forward to serving our community for another 85 years.
MISSION STATEMENT AND VISION

Our Mission
We provide our students and community with high-quality academic, technical, and professional educational opportunities that:
• Meet their career development and academic goals;
• Foster a climate of life-long learning;
• Prepare our students to participate effectively in our society; and
• Generate economic development with our educational, governmental, community and business partners.

Our Vision
LATTC will be a global leader known for effectively incorporating leading-edge theories, proven educational practices, hands-on experiences, and technology into our career technical and professional programs, as well as our offerings for our transfer students.

To achieve our vision:
We will be known for our experimentation with new ideas and innovations to improve student success.
LATTC graduates will be in high demand. Many will become community and business leaders and innovators.
We know that a single positive experience – a course, a program, a service, or a person who cares – can be transformational for a student.
We are transforming our institution from being “good” to being “great” – a national and international leader in meeting students’ needs, particularly those at “ground zero” of socio-economic levels.

LATTC Core Competencies – Institutional Learning Outcomes
Los Angeles Trade Technical College students who have completed their designated coursework should expect to have gained competency in the following areas:
• Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions
• Students will use visual, numerical, verbal, written, and practical skills to create useful and original products
• Students will demonstrate technical skills that meet industry and/or employment standards
• Students will demonstrate effective communication and comprehension skills
• Students will demonstrate ability to interface in a culturally diverse socio-economic environment
CODE OF ETHICAL CONDUCT

Los Angeles Trade Technical College is committed to compliance with the law and regulations to which it is subject and to the policies and procedures established by the college. In order to encourage ethical conduct and strengthen and promote ethical practices among college employees, members of the college community, and those who conduct business with the college, LATTC hereby adopts this Code of Ethical Conduct. This Code of Ethical Conduct is an integral part of the college policies and procedures, which also includes the College Vision Statement. LATTC believes that a shared statement of ethical values will strengthen the overall quality of the college community, promote proper conduct among college employees. It is a vital component in the pursuit of the college vision, mission, and values.

LATTC employees shall:

• Uphold the highest standards of intellectual honesty and academic, professional, and personal integrity in the conduct of instruction, research, college services, and all other functions of the college.
• Act in a way that promotes healthy working relationships based on mutual trust and support among one’s fellow employees.
• Abstain from knowingly making slanderous and libelous statements against colleagues while upholding the principles of freedom of speech.
• Act as good stewards of the resources and information entrusted to our care.
• Perform assigned duties and professional responsibilities in such a manner so as to further the LATTC mission.
• Treat fellow employees, students, and the public with dignity and respect.
• Comply with laws, rules, regulations, and professional standards that prohibit discriminating against, harassing, or threatening others.
• Respect the intellectual property rights of others.
• Respect differences of opinion and approaches to issues and problems.
• Avoid improper political activities as defined in law.
• Protect human health and safety and the environment in all LATTC operations and activities.
• Refrain from using our employment to improperly advance the interests of a friend or relative and comply with nepotism policies as defined in Board Rule 10108.
• Comply with conflict of interest codes as defined in Board Rule 14000.

COLLEGE ADVISORY COMMITTEES

The demands of industry determine the various phases of business, technical and trade training carried on by the college. Placement and successful progress of students are the measures of effectiveness of the pre-employment training. Increased productivity, job satisfaction, and advancement of the employed trainee attest to the effectiveness of the program. For these reasons all training is developed and carried on with the advice and assistance of the college advisory committees.

Membership in each of the groups is composed of community-wide representatives from labor and management, and from federal, state and local agencies who are concerned with the business, trade and technical programs offered. These advisory committees meet on the invitation of the college administration at least once a year and on additional occasions when considered necessary. They give counsel and advice in regard to evaluating training programs, approve plans to meet current training needs, review past accomplishments, and forecast trends affecting training and employment. Members of the various advisory committees are an important part of the educational program of the college. The people who serve on the committees are selected because of their leadership in the economic life of Los Angeles. The advisors bring to the college expert advice and sound thinking on business, trade and technical problems. Thus the work of the classroom reflects the rapid changes in community and industry.

ACCREDITATION

Los Angeles Trade-Technical College is accredited by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, 10 Commercial, Ste. 204, Novato, CA 94949, (415) 506-0234, an institutional accrediting body recognized by the Council of Higher Education Accreditation and the U.S. Department of Education.

ACCURACY STATEMENT

The Los Angeles Community College District and Los Angeles Trade-Technical College have made every effort to make this catalog accurate and may, without notice, change general information, courses, or programs offered. The reasons for change may include student enrollment, level of funding, or other issues decided by the district or college. The district and college also reserve the right to add, change, or cancel any rules, regulations, policies and procedures as provided by law.

ABOUT THE LOS ANGELES COMMUNITY COLLEGE DISTRICT (LACCD)

EDUCATIONAL PHILOSOPHY OF LACCD

The Los Angeles Community Colleges affirm the principle that individuals should have opportunities to develop to their full potential. To that end, our main responsibility is to students and to the provision of education, which benefits students and enables them to contribute to society.

Our colleges, therefore, should be accessible to all individuals who have the capacity and motivation to profit from higher education. Curricula and services of our colleges should provide means for fulfilling the promise of open access.

We recognize the necessity to adapt to the changing educational needs of the Los Angeles Community Colleges’ communities and to the growing diversity among students. The quality of the educational experience is to be judged by its value to students and communities, not merely by quantitative appeal. We further recognize that academic freedom is essential to excellence in education.
FUNCTIONS OF THE LOS ANGELES
COMMUNITY COLLEGE DISTRICT

Consistent with the educational philosophy and mission of the Los Angeles Community Colleges, Los Angeles Trade-Technical College offers the following types of educational programs and services:

- **Transfer.** A college transfer program which enables the student who completes two years of study to continue upper division (third year) work at accredited four-year colleges and universities through careful and continuous articulation with accredited collegiate institutions and high schools.

- **Occupational.** An occupational education program planned to offer the student basic business, technical, and professional curricula to develop skills which can lead to employment, job advancement, certification, or the associate degree.

- **General Education.** A program of general education comprised of associate degree programs and other planned experiences which develop knowledge, skills, and attitudes necessary for the student to be effective as a person, a family member, a worker, and a citizen, thereby enhancing the quality of life for the individual and for the society-at-large.

- **Transitional Education.** A program of remedial and basic skills education for students needing preparation for community college level courses and programs; and English as a Second Language instruction for immigrants, foreign students and other students with limited English proficiency.

- **Counseling and Guidance.** A counseling and guidance program incorporating academic, career, and personal counseling and assistance in matters of admissions, financial aid, job placement and student activities; to assist the student in the establishment of educational goals and in the selection and pursuit of a life work compatible with his or her interests, aptitudes, and abilities.

- **Continuing Education.** A program of continuing education comprised of graded and un-graded classes to provide opportunities for personal and occupational competence that supplement formal full-time college attendance.

- **Joint Programs.** Joint programs with business, industry, labor, education, government and other institutions which are of mutual benefit to sponsoring institutions, enhance the educational opportunities of program participants, and advance the mission and functions of the District.

MISSION STATEMENT OF THE LACCD

“Changing Lives in a Changing Los Angeles”

In an era of civic renewal, economic change, and cultural revitalization that is unprecedented in the history of Los Angeles, we—the faculty, staff, and administrators of the nine Los Angeles community colleges—dedicate ourselves to the goal of expanding access to educational opportunity across the many, diverse communities that contribute to the greater Los Angeles area.

We serve all Angelenos by providing an unparalleled array of educational offerings, including programs that prepare students for successful careers, for transfer to four-year colleges and universities, for the improvement of essential life and workplace skills, and for civic engagement and life-long learning.

To achieve this mission, we strive to create supportive instructional environments that challenge students to meet rigorous academic standards, to become active, self-directed learners, to develop critical and creative habits of mind, and to develop an abiding appreciation for other peoples and other cultures.

District Guiding Principles...

**Access & Opportunity**—We are committed to expanding educational opportunity and access to everyone who has the desire to learn, and we welcome all students, including those from communities that have been traditionally underserved.

**Excellence & Innovation**—In all of our services and institutional activities, we strive to create a culture of excellence and innovation, and we challenge our students to meet the highest educational standards.

**Student Learning & Success**—All of our institutional efforts and resources are dedicated to one central purpose—the support of our students as they work toward the achievement of their academic and professional goals.

**Free Inquiry**—We value the vigorous, critical and free exchange of ideas and opinions, and we work actively to create communities of mutual respect and shared concern that support and sustain open debate and constructive, democratic discourse.

**The Power of Diversity**—We embrace diversity as a central part of our civic and institutional identity and as a powerful element in the education and development of every individual.

**Community Connection**—Our colleges must be rooted in the communities they serve, and we are determined to build and maintain strong, durable, and responsive collaborations with our educational partners across Los Angeles, and with business, labor, and other organizations that contribute to the fabric of our larger community.

**The Promise of Technology**—Technology plays a critical role in all of our institutional operations and educational programs, and we are committed to keeping both our district systems and classrooms on the forefront of technological innovation and efficiency.

**Public Accountability**—We are accountable to the public for all aspects of our mission, and we owe the students we serve, the people of Los Angeles, and the State of California regular and timely assessments of all of our efforts in support of student learning and student success.
EMERGENCY INFORMATION

The college is concerned about your safety in case of an emergency. Detailed instructions are posted in every classroom and throughout the LATTC campus. Additionally, you may visit the Environmental Health and Safety Website for more information: http://college.lattc.edu/safety/

In case of emergency, remember these key points. “S.A.F.E.”

- **S**ecure yourself
- **A**ssess the situation
- **F**orward information
- **E**nact according to the campus disaster plan

EMERGENCY RESPONSE INFORMATION

LATTC-Sheriff Telephone Numbers For Emergency

In case of an emergency, you should immediately contact the College’s Sheriff’s Office on campus. Dial Ext 3611 or 911 to reach the College Sheriff’s office from any campus phone.

- You may also press the extension button marked “EMERGENCY”, on all campus phones.
- Pick up the campus emergency blue telephone station “dial direct” to the College Sheriff’s Office.
- If you are using a campus pay phone, you may dial *80 to reach the College Sheriff’s office.
- If you use your cell phone you may dial 213-763-3611 to connect to the College Sheriff’s office.

Please note if you dial 911 from your cell phone or pay phone on campus, it will not connect directly to the College Sheriff’s, but it will connect to outside emergency services.

MEDICAL EMERGENCY

- Call the College Sheriff if the injury is life threatening and calmly provide detailed information to the Sheriff’s Office;
- Stay on the line to answer any questions.
- Comfort the injured person by talking to them until help arrives.

EARTHQUAKE

In the event of earthquake:

- **Stay Calm.**
- **If inside**
  - Stay inside.
  - IMMEDIATELY get away from windows and large objects that may topple; **DROP, COVER, and HOLD ON**
  - **DROP** to the ground.
  - **COVER** by getting under a sturdy desk or table, and
  - **HOLD ON** to it until the shaking stops.
- **If outside**
  - Stay outside.
  - Go to an open area away from buildings, trees, and power lines.

FIRE/SMOKE

If you detect fire or smoke

- Immediately activate the nearest fire alarm pull station.
- Call the College Sheriff and notify them of the location of the fire.

If you hear a fire alarm

- Immediately EVACUATE the area.
- Turn off all equipment and close doors as you leave.
- Proceed to the nearest exit and to your designated “Evacuation Area”.
- Remain calm and await further instructions from Emergency Coordinator.

ELEVATOR ENTRAPMENT

If you become trapped in an elevator, remain calm.

- Press the red emergency button to activate the audible elevator alarm system which automatically notifies College Sheriff and Physical Plant Ext: 3612, then
- Wait for qualified personnel to respond and assist. **DO NOT ATTEMPT TO STEP OFF THE ELEVATOR** unless specifically instructed to do so.
ADMISSION AND REGISTRATION

Phone: (213) 763-5300
Location: JH-Lobby
Hours: Monday – Thursday 8:00 a.m. – 7:00 p.m.
       Friday  8:00 a.m. – 3:00 p.m.

The following procedure should be followed to enroll in Los Angeles Trade-Technical College: Students must disclose any previous enrollment in institutions of collegiate level. Failure to list any school, college, or university which you previously attended, or any deliberate falsification of information, is basis for dismissal from the college. Obtain an Application Packet and Enrollment Appointment from the Information Center in JH-Lobby.

APPLICATION is submitted and completed online at www.lattc.edu. A new student identification number will be assigned to all students because of recently passed state laws. Once a new student I.D. number is assigned, this number shall be used when students apply at another LACCD campus. Non-U.S. Citizens should bring proof of their immigration status so that the College may determine their residency for tuition purposes. You may also submit your application on line at www.lattc.edu. If you are a returning student or have attended one of the LACCD colleges, you may submit your application online.

ORIENTATION is designed to introduce our many educational programs, services and explain how to complete the enrollment process.

ASSESSMENT will help students determine which courses are most appropriate for your skill level. This is NOT a pass or fail nor a graded test. It will be used with other factors to help the counselor or faculty mentor assist students with course selection. Please allow approximately 2 hours for this portion of your enrollment. NOTE: If students have an Associate degree or higher, completed a college level English or Math class, or have taken an assessment within the last two years, they may be exempted from this assessment. You may also submit your application on line at www.lattc.edu. If you are a returning student or have attended one of the LACCD colleges, you may submit your application online.

During the Orientation and/or the Assessment, students may speak to a counselor. Counselors will recommend appropriate courses based on educational goals; students may then register for classes. See class schedule or college website (www.lattc.edu) for exact registration dates.

After registration students can proceed to the Business Office, JH-Lobby, to pay all fees. Student I.D. Cards with the student I.D. number will be issued in JH-Lobby.

COLLEGE DEADLINE POLICY
The college strictly enforces the published deadlines for admissions application, dropping, adding classes, fee refunds and graduation applications.

RESIDENCY REQUIREMENTS

California Residence Requirement
To attend any of the Los Angeles Community Colleges as a resident of California, a student is required to have been a California resident for more than one year immediately preceding the Residence Determination Date. The “Residence Determination Date” is that day immediately preceding the opening day of instruction of the semester or summer session. Residence is defined as a union of act and intent.

Non-Resident
A non-resident student is one who has not had residence in the State of California for more than one year immediately preceding the Residence Determination Date.

Residence is defined as a union of act and intent. Physical presence alone is not sufficient to establish California residency nor is intent when not coupled with continuous physical presence in the State. Certain non-U.S. citizens are permitted to establish residency and certain others are not. Check with the Admission Office regarding your particular status.

A student classified as a non-resident will be required to pay nonresident tuition fees as established by the District Board of Trustees.

IMPORTANT INFORMATION
Effective January, 2002, all students regardless of their immigration status, who meet all the requirements set under the new law AB540, can be exempted from Non-Resident Tuition. Please see Admission Office, JH-Lobby, for details.

Residence Reclassification
Students who have been classified as non-residents must petition to be reclassified as residents if they feel their status has changed. The Residence Reclassification forms are available in the Admission Office and must be submitted prior to the semester in which reclassification as a resident is to be effective.

ADMISSION ELIGIBILITY
You are eligible to attend LA Trade-Technical College if you meet any of the following criteria:

1. You have graduated from high school or have successfully passed the California High School Exit Examination.
2. You are over 18 years of age and are no longer attending high school and are capable of benefiting from the instruction offered.
3. You are under 18 years of age and not a high school student, with special permission as a full-time student, or concurrently enrolled student.

CONCURRENT ENROLLMENT AT LA TRADE-TECHNICAL COLLEGE
As a high school student you may enroll concurrently at L.A. Trade-Technical College. In addition to the application for admission, you must submit a separate concurrent enrollment form, approved by your high school guidance counselor.
ENROLLMENT POLICIES

Adding Classes
Only students who have been admitted to the college and are in approved active status may add classes. Enrolled students who wish to add a class prior to the first day of classes should use the internet system at www.lattc.edu.

Auditing Classes
Students may be permitted to audit a class under the following conditions:

1. Complete an application and be authorized to register in the college.
2. Obtain permission of the instructor of the class at the beginning of the semester.
3. Pay a fee of $15 per unit. Fees may not be refunded. Students enrolled in classes to receive credit for ten or more semester units shall not be charged a fee to audit three or fewer semester units per semester. Students who drop below ten units will be required to pay the 3 units audit fee.

No student auditing a course shall be permitted to change his or her enrollment in that course to receive credit for the course. Students taking course for credit shall not be permitted to drop to audit the same course. Priority in class enrollment shall be given to students desiring to take the course for credit.

Enrollment in Same Course
Concurrent enrollment in more than one section of the same course during a semester is not permitted with the exception of certain Physical Education classes on a limited basis. Concurrent enrollment in courses which are cross-referenced to each other is not permitted (i.e., courses designated “same as” in the District Directory of Educational Programs and Courses). Violation of this regulation will result in exclusion from class and denial of course credit in both courses. Enrolling in classes scheduled or conducted during overlapping times is not permitted. Students will be excluded from both classes and denial of credits and subject to disciplinary action (See Standards of Student Conduct).

Dropping Classes
Students wishing to drop one or more classes must do so through the registration system, at www.lattc.edu.

It is the student’s responsibility to officially drop from class by the Trade Tech website or in person. Students must drop by the end of the second week of semester-length classes to avoid fees. Any drops or exclusions that occur after the no penalty drop date (under last day to drop without a “W”) and up to 75% of the time the class is scheduled will result in a “W” on the student’s record which will be included in the determination of progress probation. Withdrawals are not permitted beyond 75% of class meeting time.

A grade (A, B, C, D, F, P, INC, or NP) will be assigned to students who are enrolled past the last day to drop even if they stop attending class, except in cases of extenuating circumstances. After the last day to drop students may withdraw from class upon petition demonstrating extenuating circumstances and after consultation with the appropriate faculty.

Verification of Enrollment
Verification of the Student’s Enrollment may be obtained upon written request. Verification Request forms are available in the Admission Office. District policy prohibits the acceptance of a Verification Request over the phone. Please allow ten (10) working days for processing. The first two verifications or transcripts (see Transcripts section on this page) EVER requested are free. Each additional request is $3.00 per copy. Students may request same day processing to expedite their request for an additional fee of $7.00 per verification. Verification Request by agencies or individuals other than the student must be accompanied by a signed release permitting the College to release that student’s information. A valid photo ID is required when picking up the transcripts.

INTERNATIONAL STUDENTS ADMISSION (F-1 VISA)

F-1 International Students Admission
Los Angeles Trade-Technical College (LATT) welcomes applications from international students. We also accept transfer applications for F-1 Visa students currently studying in the U.S. as well as Change of Status applications for visitors who currently have other visas. Applications may be obtained by contacting the office or on-line.

F-1 International Students Application Deadlines:

- Fall Semester: July 1
- Spring Semester: December 1

F-1 students transferring from schools within the United States (US) and students who are applying for a Change of Status have a more flexible deadline. Call our office for more information.

The applicant must provide:

1. The supplemental International Students Application.
2. Official TOEFL scores sent directly from Educational Testing Services – this may be waived if you are from a country that uses English as its primary language of instruction or if you are transferring from a school within the United States. We also accept the International English Language Test Skills (IELTS) report and the Step Eiken in lieu of the TOEFL. Please contact us for all test cut scores.
3. Two recent passport-sized photographs of applicant.
4. Official transcripts and/or diplomas from secondary school or colleges attended – Student must be a high school/secondary school graduate. If these documents are not in English, an official translation must also be submitted.
5. The LATT Affidavit of Support with an attached official bank statement or letter with a minimum of $17,000 USD in available funds dated within the last 6 months.
6. Non-refundable $35 application fee – check, cash, or money order (do not send cash in the mail).
7. Copy of valid passport identification page.

8. Transfer students must also submit the following documents: the LATTTC Transfer Eligibility Form, a copy of your current I-20, a copy of your visa, and a copy of the front and back of your I-94.

Please allow 2 – 4 days for application processing time once ALL documents are received by the college. Eligible students will be issued an I-20A form by LATTC. This document can be used by the student to obtain an F-1 Visa from a US Embassy in his/her home country. Students who are already in the country may use this new I-20 to change their visa status or to complete their transfer process from another educational institution.

International student fees are approximately $243 per unit, which is subject to change by the California legislature. Health care in the United States can be costly without proper insurance coverage. Starting the Fall 2007 semester, LATTC International Students will automatically be enrolled in an insurance plan through Renaissance Insurance. The cost for a 6-month period of coverage is $474, which is subject to change. The $474 will be included as part of your LATTC fees every Fall and Spring Semester (no waivers). Please visit our office for a copy of your benefits.

Per U.S. Citizenship and Immigration Services (USCIS) regulations, all F-1 International Students must maintain a full-time course load during the Fall and Spring semesters—certain exceptions apply, please see your Designated School Official (DSO) for more information. A full-time course load is defined as a minimum of 12 units. Dropping below 12 units without PRIOR written permission from the DSO places your student status at risk. F-1 students are not required to attend the Winter and Summer sessions but may do so if they wish.

**MATRICULATION SERVICES**

<table>
<thead>
<tr>
<th>Phone:</th>
<th>(213) 763-5348</th>
</tr>
</thead>
<tbody>
<tr>
<td>Location:</td>
<td>Building JH-303</td>
</tr>
<tr>
<td>Hours:</td>
<td>Monday 8:00 a.m. – 7:00 p.m.</td>
</tr>
</tbody>
</table>

Matriculation is a process that brings LATTC and students (who enroll in credit courses) into an agreement to assist students in attaining their educational goal through the college’s programs, policies and requirements. It involves a partnership between the student and the college which begins when students apply for admission and ends after completing your studies.

**ASSESSMENT**

LATTC offers a self-paced computerized assessment placement test. LATTC also offers a timed paper and pencil assessment placement test (Companion). Students receive an assessment summary that may be used to select their courses and to plan their educational career goals. Course recommendations are advisory and should be discussed with a counselor.

The Assessment Center provides services to complete the Prerequisite/Co-requisite Challenge Exams and course prerequisite/co-requisites clearances. The Assessment Center offers “Tests of Adult Basic Education (TABE)” a diagnostic test. This test will measure the student’s grade level in Language, Math, and Reading. This is not a pass/fail test. This is a timed test. Testing is available through department referral. Please see the Assessment Center for further information.

**ORIENTATION**

Orientation – provides students with a variety of programs and services at LATTC. Students who would like to speak directly with college representatives and receive information regarding the programs and services may attend an in-person orientation (see Matriculation webpage at [http://college.lattc.edu/matriculation/orientation/](http://college.lattc.edu/matriculation/orientation/) for dates).

**EARLY ALERT**

Early Alert provides mid-semester evaluation and feedback of a students’ academic progress according to their classroom instructors. Referrals to support services are made when needed or requested and College Success workshops are offered throughout the semester (see Matriculation webpage for dates).
ASSOCIATED STUDENT ORGANIZATION (ASO) FEE

ASO programs are supported by a $7.00 membership fee, available at the Business Office, for day and evening students. These fees are necessary to utilize ASO services. Any student, upon enrolling, is eligible to become a paid member of the Associated Student Organization. Associated Student Organization members are entitled to all rights and privileges, including preferred parking, loan application, dances, athletic contests, and all activities of the Associated Students. Also, all students must also pay one dollar Student Representation Fee that supports student issues, policy and procedures, and advocacy activities that benefit students.

ENROLLMENT FEE

The State Education Code requires Community Colleges to charge enrollment fees* of each student enrolling in college. The fee prescribed by these sections shall be forty-six dollars ($46) per unit per semester with no maximum amount per semester. For example, if you enroll for ten units, the fee will be $460. If you enroll for fifteen units, the fee will be $690. See the Financial Aid Office prior to payment for enrollment fee waiver assistance. Non-resident students paying non-resident fees are required to pay the forty-six dollars ($46) per unit enrollment fee. All students who pay fees are provided with a Registration Fee Receipt at the time of payment. Los Angeles Trade-Technical College does not automatically drop students from a class for nonpayment of enrollment fees.

ENROLLMENT FEE REFUND POLICY

For full term courses: a student may receive a full refund for classes dropped (and refunds requested from the Business Office) through the end of the second week of instruction. There will be no refunds for classes dropped after that, unless a class is canceled or rescheduled by the college administration. After the second week of classes, the student may drop a course and use the fee previously paid that semester to add another class. Therefore, we advise the student to drop and add at the same time.

For short term, Summer session, and Winter Intersession courses, students may receive a full refund for classes dropped (and refunds requested in the Business Office) through the end of a period of time equal to 10% of total class time usually during the first week of classes. There will be no refunds after that, unless a class is canceled or rescheduled by the administration. Students are required to request refunds at the Business Office at the time they drop their classes even if dropping by telephone. If college expenses have been paid by federal financial aid funds, any refund due will revert to the financial aid program rather than to the student. Expenses paid by financial aid may be subject to a special pro-rata refund calculation.

Contact the Financial Aid Administrator or the College Financial Administrator for specific information regarding refund calculations for financial aid recipients.

HEALTH SERVICES FEE

The Board of Trustees has required that each college collect a mandatory eleven-dollar ($11) health services fee during the Fall and Spring semesters and an eight-dollar ($8) fee during Summer session and Winter Intersession. This fee must be paid at the time of registration. Los Angeles Community College District Policy exempts the following students from paying the student health fee: (a) students who depend exclusively on prayer for healing in accordance with the teaching of a bona fide religious sect, (b) students who are attending classes under an approved apprenticeship training program, (c) non-credit education students, (d) students enrolled in District colleges exclusively at sites where student health services are not provided, (e) students who are enrolled District colleges exclusively through Instructional Television or distance education classes, (f) student who are enrolled in District colleges exclusively through contract education. Students exempted under the provisions of (b), and (c) above are eligible to receive the services of the college health program; all other exempted students are not eligible to receive the services of the college health program. Students who are exempted may obtain a Health Services Exemption Form from the Admission Office (JH-Lobby). Completed forms must be returned to the Admission Office for approval. See the Financial Aid Office (JH-214) for other possible exemptions.

INSTRUCTIONAL MATERIALS

Students may be required to provide and/or pay for instructional and other materials for credit or noncredit courses. Such materials shall be of continuing value to a student outside of the classroom setting and shall not be solely or exclusively available from the District. If class materials are provided, the student may be assessed those costs for materials. Payment and verification of material fees is to be completed at the college Bookstore, CH-102 or Business Office, JH-Lobby.

NON-RESIDENT TUITION FEE

The 2012-2013 tuition for non-resident students is $190 per unit plus the $46 per unit enrollment fee. Fees must be paid at the time of registration. The 2012-2013 tuition for foreign students is $190 per unit plus the $46 per unit enrollment fee and the Board of Trustees adopted $22 per unit fee pursuant to Education Code Section 76140. These fees are subject to change each year. International students must first pay a non-refundable $35 application fee. The Board established a twenty-five dollars $25.00* per semester processing fee for students classified as nonresidents who are both citizens and residents of a foreign country. These fees are subject to change each academic year.

*Subject to change by the California Legislature

Notes:

1. Fees paid by federal financial aid funds will be subject to a special refund calculation.
2. Non-resident students are also required to pay the community college enrollment fee.

A non-resident student who formally drops or otherwise separates from part or all of his/her enrollment may request a refund of previously paid non-

Los Angeles Trade-Technical College

2012-2013 GENERAL CATALOG
respective tuition in accordance with the schedule below. Such request must be made in writing at the Business Office at the time the classes are dropped. The date used for non-resident refund purposes is the date on which such request is filed and time stamped, regardless of when separation may have occurred. All non-resident refunds will be made by mail.

Non-resident refunds will be computed as follows:

<table>

STUDENT REPRESENTATION FEE

The student representation fee is a mandatory $1.00 (one dollar) per semester fee to provide support for students/representatives who support student viewpoints before various governmental offices and agencies. Students may for religious, political, financial or other reasons, refuse to pay the fee in writing on a form provided for this purpose.

PARKING FEE

To encourage membership in the Trade Tech Associated Students’ Organization (ASO), the College Administration has entered into an agreement with the ASO whereby students who pay both the District parking fee and join the ASO will receive as a benefit of membership preferred parking privileges in Fall and Spring Semesters. A limited number of Preferred Student Parking Permits sold on a first come basis are available for purchase at the Business Office for $27.00 (includes $7.00 ASO fee). General Student Parking Permits cost $20.00 at the 18th Street & Grand Avenue Lot and at Glory Church located at Washington Boulevard & Grand Avenue. General Student Parking for Winter and Summer Session is $10.00. Parking in areas marked “parking by permit only” is restricted to vehicles displaying a valid permit. Vehicles parking on college property without a valid permit will be subject to citation.
ACADEMIC FREEDOM
The Faculty shall have the academic freedom to seek the truth and guarantee freedom of learning to the students.

CAMPUS SECURITY ACT
As required by the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act ("Clery Act"), the college’s Annual Security Report contains policy statements and crime statistics for the campus. The Annual Security Report includes statistics for the previous three years concerning certain reported crimes that occurred on campus, in off-campus buildings or property owned or controlled by the college, and on public property within or immediately adjacent to the college. The report also includes institutional policies concerning campus safety and security, such as policies on drug and alcohol use, crime prevention, the reporting of crimes, sexual assault, and emergency response and evacuation procedures. You can obtain the college’s Annual Security Report online at http://college.latc.edu/sheriff/crime-statistics. You may also request a paper copy by contacting Dr. Mary Gallagher, Vice President of Administrative Services, JH-532.

CONOCIMIENTO LIMITADO DEL INGLÉS
Las clases para aprender oficios están abiertas a todos los estudiantes, aún para los que tienen dificultad con el idioma. Aunque la falta de conocimiento del idioma inglés no es una barrera para matricularse en estas clases, se recomienda a los alumnos que utilicen los servicios queel colegio ofrece con este fin.

DRUG-FREE WORKPLACE POLICY
In accordance with SECTION 22 of the DRUG-FREE SCHOOLS AND COMMUNITIES ACT OF 1989, Los Angeles Trade-Technical College strives to maintain a drug and alcohol free campus for its students and employees. The unlawful manufacturer, distribution, dispensation, use or possession by students and college employees of illegal controlled substances or alcohol in all buildings, property, facilities, service areas, or on District business is prohibited (per Board Rules regarding Standards Of Conduct, Section 9803.19).

The College shall maintain a drug and alcohol free awareness policy to inform students and employees about the dangers and health risk of drug and alcohol abuse in the workplace, on the campus and during college sponsored activities. Students and employees will be informed of the sanctions that will be imposed for policy violations and the availability of drug/alcohol counseling, treatment and rehabilitation assistance. This information will be distributed yearly to all students and employees.

All students and employees are required to comply with this policy as a condition of their continued student status or employment. Any student or employee violating this policy may be required to participate satisfactorily in a substance abuse rehabilitation program, and/or may be subject to disciplinary action, up to and including dismissal or exclusion under applicable District policies. In addition, an employee convicted of any workplace drug crime, must notify the college personnel office within five (5) days of conviction.

FAMILY EDUCATION RIGHTS AND PRIVACY ACT (FERPA)
See Student Records and Directory Information on page 18. For more information on student rights under the FERPA, please go to our LA Community College web link http://www.laccd.edu/admin_regs/documents/E-105.pdf.

EQUAL EMPLOYMENT OPPORTUNITY
The policy of the Los Angeles Community College District is to implement affirmatively, equal opportunity to all qualified employees and applicants for employment without regard to race, color, national origin, ancestry, religion, creed, sex, age, handicap, marital status, medical condition (cancer related), sexual orientation, or veteran status. Positive action will be taken to ensure that this policy is followed in all personnel practices, including recruitment, hiring, placement, upgrading, transfer, demotion, treatment during employment, rate of pay or other forms of compensation, selection for training, layoff, or termination. A vigorous Equal Employment Opportunity Program will be maintained to ensure appropriate utilization of certain protected groups in specific areas and levels within the district workforce through the implementation of specific result oriented procedures and activities (Board Rule 101301). Inquiries regarding Equal Employment Opportunity at Los Angeles Trade-Technical College should be directed to the College Equal Employment Opportunity Representative, Dr. Mary Gallagher, (213) 763-7040.

FREEDOM OF SPEECH AREA AND PROCEDURES
Board Rule 9902, Article IX, States, “The college president shall designate an area or areas on the college campus as areas for free discussion and expression by all persons. A Free Speech Area may only be located where there is a normal flow of student traffic with unlimited accessibility. Necessary campus rules governing the operation of such areas shall govern only the time, place and manner in which said areas are to be used. All such rules shall be applied equally and fairly to all persons desiring to use the Free Speech Areas. No restrictions shall be placed on subject matter, topics or viewpoints expressed in Free Speech Areas.

In compliance with the above Board Rule, the college president has designated the CH-Mall Quad as the Free Speech Area. All individuals or organizations wanting to use the Free Speech Area, fill out an application and approval from the Vice President of Student Services office, located in JH-512, prior to use of this area. The guidelines and rules for use of this area, along with time, place, manner will be distributed to the interested party. This procedure does not apply to activities sponsored by the college.
GRADUATION RATES

More information about Student Right-to-Know Rates can be found at the California Community Colleges "Students Right-to-Know Rates Information Clearinghouse Website" located at http://srtk.cccco.edu/index.asp.

HIGHER EDUCATION OPPORTUNITY ACT/PEER-TO-PEER – (HEOA P2P) COMPLIANCE IMPLEMENTATION (ILLEGAL FILE SHARING):

Unauthorized distribution of copyrighted material, including unauthorized peer-to-peer file sharing, may subject students to civil and criminal liability. Civil liability for copyright infringement may include payment of monetary damages to the copyright owner. Criminal penalties for copyright infringement may include fines up to $250,000 and imprisonment up to ten years. Students who violate the District's computing facilities usage policy (LACCD Administrative Regulation B-28) may also be subject to college disciplinary action, including, but not limited to, suspension or expulsion.

LIMITED ENGLISH PROFICIENCY

Occupational education classes are open to all students. Although the lack of proficiency in English is not a barrier to enrollment in occupational education courses, it is recommended that students needing remedial English assistance utilize the services of the college that are provided for persons who are limited in English proficiency or have English as a second language as a bridge for entry into the vocational program.

NONDISCRIMINATION POLICY

All programs and activities of the Los Angeles Community College District shall be operated in a manner which is free of discrimination on the basis of race, color, gender, national origin, ancestry, religion, creed, pregnancy, marital status, medical condition (cancer related), gender orientation, age, disability, or veteran status (Reference: Board Rule 1202). Inquiries regarding Equal Employment Opportunity issues should be directed to Dr. Mary Gallagher, (213) 763-7040. Inquiries relating to disabilities and special accommodations per the Americans with Disabilities Act should be directed to Ms. Klaudia Macias, Director of Disabled Students Programs and Services, (213) 763-3778, TDD (213)763-5375.

SEXUAL ASSAULT

In compliance with AB 1088, the Los Angeles Community College District is committed to providing a safe environment for its students, faculty, and staff. The Los Angeles Community College District Board of Trustees condemns any act of sexual assault committed on any of its facilities. The Los Angeles Community College District is committed to providing a safe environment for its students, faculty, and staff. The Los Angeles Community College District Board of Trustees condemns any act of sexual assault committed on any of its facilities. In the event of sexual assault committed on the grounds or in facilities maintained and or used by the District, any victim of a sexual assault who is one of the District’s students, faculty, staff, or visitors shall promptly receive appropriate treatment and full and accurate information. Individuals who commit sexual assault while on properties within the control of the District shall be subject to appropriate criminal prosecution and/or District disciplinary procedures. Confidentiality is fundamental to all aspects of cases dealing with sexual assault. The names of sexual assault victims shall not be revealed by persons responsible for implementing and enforcing the provisions of this Chapter, except with the consent of the victim. District Office of Equal Employment Opportunity/Diversity (213) 891-2315 or College Sheriff (213) 763-3600. LATTC HART (Healthy Advocacy Response Team) provides information resources and referrals on sexual assault and domestic violence. For more information contact HART Co-chairs Ashraf Hossein, (213) 763-7157, Klaudia Macias, (213) 763-3779, or Angles Abraham, (213) 763-7117.

SMOKING/NON-SMOKING POLICY

In an effort to preserve the rights of both smokers and non-smokers, the college has designated both smoking and non-smoking areas. This policy ensures that drifting smoke will not be sucked into classrooms, offices and other non-smoking areas. Non-smoking areas of the College are designated as any classroom, building or other enclosed facility, including hallways, porches, decks, arcades, and sidewalk adjacent to the building which any student is required to occupy or which is customarily occupied by non-smoking students.

POLÍTICA SIN DISCRIMINACIÓN

Los Angeles Community College District ofrece igualdad de oportunidades en todos los programas y actividades educativas, libre de discriminación en cuanto se refiere a raza, color, lugar de origen, ascendencia, religión, creencias, sexo, estado de gestación, estado civil, estado de salud (tratándose de cáncer), orientación sexual, edad, incapacidad física o estado como veterano. (Referencia: Board Rule 1202). Las indagaciones o
District and College Policies

Summary of The LACCD Policy 2012

Prohibited Discrimination and Harassment

Los Angeles Community College District • 770 Wiltshire Boulevard • Los Angeles • CA • 90017 • (213) 891-2317

The Policy

It is the policy of the Los Angeles Community College District to provide an educational, employment and business environment free from Prohibited Discrimination. Employees, students or others persons acting on behalf of the District who engage in Prohibited Discrimination as defined in this policy or by state or federal law shall be subject to discipline, up to and including discharge, expulsion or termination of contract.

Academic Freedom

The Board of Trustees reaffirms its commitment to academic freedom, but recognizes that academic freedom does not vitiate District policies. The discussion of ideas, taboos, theories or language which is an essential part of the course content shall not be considered Prohibited Discrimination, though such ideas may cause some students discomfort. It is recognized that academic freedom appears the faculty’s right to teach and the student’s right to learn.

Definition of Prohibited Discrimination

Prohibited Discrimination is defined as discrimination on the basis of race, color, national origin, sex, age, sexual identity, gender identity, age, sexual orientation, or physical or mental disability, as well as sexual harassment.

Definition of Sexual Harassment

Sexual Harassment is unwelcome sexual advances, requests for sexual favors, and other verbal, written, or physical conduct of a sexual nature, made by a superior, in the workplace or in the educational setting.

Retaliation

Retaliation occurs when adverse personal, employment or academic decisions are made against an employee who makes a complaint.

False Allegations

False complaints are considered as the filing of a complaint in which there is no reasonable basis for believing that the facts alleged are true.

Confidentiality

Confidentiality shall not be expected to maintain the confidentiality of the matters discussed, except as may be required or permitted by law, which include the rules and regulations of the District.

Complaint Procedure

The procedure for handling complaints for prohibited discrimination is as follows:

1. The complaint must be filed within 180 days of the date when the complainant knew or should have reasonably known of the facts underlying the complaint.
2. The complaint must be submitted in writing to the director of diversity programs.
3. The complaint will then be investigated.
4. If the investigation determines that the complaint is not valid, the complainant will be notified in writing.
5. If the investigation determines that the complaint is valid, the respondent will be notified in writing.

Appeals

If the complaint is not satisfied with the written decision, an appeal may be made to the chancellor of the college.

Additional Remedies

The complainant may pursue any other legal remedies available, including, but not limited to, mediation, arbitration, or court action.

Copies of the policy and procedures may be obtained from the LACCD Office of Diversity Programs, District and Campus Website, the Compliance Office (JH-532) at Los Angeles Trade Tech College for students/employees of LATTC or by calling the Office of Diversity Programs at (213) 891-2315 or (213) 891-2317.
STANDARDS OF STUDENT CONDUCT

A student enrolling in one of the Los Angeles Community Colleges may rightfully expect that the faculty and administrators of the colleges will maintain an environment in which there is freedom to learn. This requires that there be appropriate conditions and opportunities in the classroom and on the campus. As members of the college community, students should be encouraged to develop the capacity for critical judgment and to engage in the sustained and independent search for truth. All persons shall respect and obey civil and criminal law, and shall be subject to legal penalties for violation of laws of the city, county, state and nation.

All visitors making use of the facilities or grounds of any college of the District will be asked to sign a statement that they have received the Standards of Conduct and the rules relating to campus visitors adopted by the Board of Trustees. A signature will not be a prerequisite to activities on campus. A record will be kept of all persons who use the facilities or grounds of the college.

Conduct in all of the Los Angeles Community Colleges must conform to District and college rules and regulations. Violations of such rules and regulations may result in disciplinary action depending on the individual’s status as student, faculty, staff or visitor. Violations of conduct on campus rules and regulations include but are not limited to the following:

Board Rule 6201.12

COMPETENCY REQUIREMENT: Students entering prior to Fall 2009 must demonstrate competence in reading, in written expression, and in mathematics. This requirement may be met by achieving a grade of “C” or better in appropriate courses, recommended by the District Academic Senate, and approved by the Chancellor or by achieving a passing score on an examination or examinations recommended by the District Academic Senate and approved by the Chancellor.

Effective for all students entering on or after the Fall 2009 semester, competence in written expression shall be demonstrated by obtaining a satisfactory grade in English 101, or another English course at the same level and with the same rigor as recommended by the District Academic Senate and approved by the Chancellor. Competence in mathematics shall be demonstrated by obtaining a satisfactory grade in Mathematics 125 (Intermediate Algebra), or another mathematics course at the same level and rigor, or higher, and with elementary algebra or higher as a prerequisite, as recommended by the District Academic Senate and approved by the Chancellor.

The competency requirements in written expression or mathematics may also be met by completing an assessment, conducted pursuant to Title 5, CCR, section 55500 and achieving a score determined to be comparable to satisfactory completion of English 101 or Mathematics 125 respectively. That is, students may either place into English or mathematics courses above level of English 101 or Mathematics 125, or they may achieve a satisfactory score on a competency exam or other approved exam as recommended by the District Academic Senate and approved by the Chancellor.

The competency requirements may also be met by obtaining a satisfactory grade in courses with English and mathematics content (but taught in subjects other than English and mathematics), which require entrance skills at a level equivalent to those necessary for English 101 and Mathematics 125, respectively, and are taught at the same level and with the same rigor. The District Academic Senate shall recommend such courses to the Chancellor for approval.

Board Rule 6202.

CATALOG RIGHTS: For these purposes, a catalog year is defined as beginning Fall semester and continuing through the proceeding summer. A Student remaining in the College District may elect to satisfy the degree, certificate or graduation requirements in effect at the college from which the student will either earn his/her degree, certificate or graduate:

1. At the time the student began such attendance at the college, or
2. At the time of graduation.

For the purposes of implementing this policy, the college may develop a policy to:

1. authorize or require substitutions for discontinued courses; or
2. require a student changing his/her major to complete the major requirements in effect at the time of the change;
3. allow students to select an intervening catalog in years between time student began continuous attendance and time of graduation.

The college’s policy shall be developed in consultation with the college Academic Senate in accordance with the provisions of Chapter XVIII of the Board Rules - ACADEMIC SENATE AND THE BOARD OF TRUSTEES SHARED GOVERNANCE POLICY, and published in all college catalogs under appropriate headings.

This policy does not apply to college programs which are governed or regulated by outside government agencies or which require licensure or certification through one of these agencies.

Board Rule 6703.11

Acceptance of Credits.

All courses and units used to satisfy LACCD curriculum requirements, including graduation requirements (Chapter VI, Article II, LACCD Board Rules), educational program requirements (Board Rule 6708) and transfer core curriculum requirements (Board Rule 6600), shall be from accredited institutions, unless otherwise specified in this Board Rule.

For purposes of this Board Rule, “accredited institution” shall mean a postsecondary institution accredited by an accreditation agency recognized by either the U.S. Department of Education or the Council on Postsecondary Accreditation. It shall not mean an institution “approved” by the California Department of Education or by the California Council for Private Postsecondary and Vocational Education.

Courses which have a grade of “C- (C minus grade)” do not satisfy any LACCD curriculum requirement that requires a grade of “C” or higher.
Board Rule 9803.10
Willful Disobedience. Willful disobedience to directions of College officials acting in the performance of their duties.

Board Rule 9803.11
Violation of College Rules and Regulations. Violation of College rules and regulations, including those concerning student organizations, the use of College facilities, or the time, place, and manner of public expression or distribution of materials.

Board Rule 9803.12
Dishonesty. Dishonesty, such as cheating, or knowingly furnishing false information to the colleges.

Board Rule 9803.13
Unauthorized Entry. Unauthorized entry to or use of the college facilities.

Board Rule 9803.14
College Documents. Forgery, alteration, or misuse of college documents, records, or identification.

Board Rule 9803.15
Disruption of Classes. Obstruction or disruption of classes, administration, disciplinary procedures, or authorized college activities.

Board Rule 9803.16
Theft of or Damage to Property. Theft of or damage to property belonging to the college, a member of the college community, or a campus visitor.

Board Rule 9803.17
Interference With Peace of College. The malicious or willful disturbance of the peace or quiet of any of the Los Angeles Community Colleges by loud or unusual noise, or any threat, challenge to fight, fight, or violation of any rules of conduct as set forth in this Article. Any person whose conduct violates this section shall be considered to have interfered with the peaceful conduct of the activities of the college where such acts are committed.

Board Rule 9803.18
Assault or Battery. Assault or battery, abuse or any threat of force or violence directed toward any member of the college community or campus visitor engaged in authorized activities.

Board Rule 9803.19
Alcohol and Drugs. Any possession of controlled substance which would constitute a violation of Health and Safety Code section 11350 or Business and Professions Code section 4230, any use of controlled substances the possession of which are prohibited by the same, or any possession or use of alcoholic beverages while on any property owned or used by the District or colleges of the District. “Controlled substances,” as used in this section, include but are not limited to the following drugs and narcotics:
- opiates, opium and opium derivatives
- mescaline
- hallucinogenic substances
- peyote
- marijuana
- stimulants and depressants
- cocaine

Board Rule 9803.20
Lethal Weapons. Possession, while on a college campus or at a college sponsored function, of any object that might be used as a lethal weapon is forbidden for all persons except sworn peace officers, police officers, Sheriff, and other governmental employees charged with policing responsibilities.

Board Rule 9803.21
Discriminatory Behavior. Behavior while on a college campus or at a college-sponsored function, inconsistent with the District’s non-discrimination policy, which requires that all programs and activities of the Los Angeles Community College District be operated in a manner which is free of discrimination on the basis of race, color, national origin, ancestry, religion, creed, sex, pregnancy, marital status, sexual orientation, age, handicap or veterans status.

Board Rule 9803.22
Unlawful Assembly. Any assemblage of two or more persons to 1) do an unlawful act, or 2) do a lawful act in a violent, boisterous or tumultuous manner.

Board Rule 9803.23
Conspiring to Perform Illegal Acts. Any agreement between two or more persons to perform illegal acts.

Board Rule 9803.24
Threatening Behavior. A direct or implied expression of intent to inflict physical or mental/emotional harm and/or actions, such as stalking, which a reasonable person would perceive as a threat to personal safety or property. Threats may include verbal statement, written statements, telephone threats or physical threats.

Board Rule 9803.25
Disorderly Conduct. Conduct which may be considered disorderly includes; lewd or indecent attire or behavior that disrupts classes or college activities; breath of the peace of the college; aiding, or inciting another person to breach the peace of the college premises or functions.

Board Rule 9803.26
Theft or Abuse of Computer Resources. Theft or abuse of computer resources including but not limited to:
- a. Unauthorized entry into a file to use, read, or change the contents, or for any other purpose.
- b. Unauthorized transfer of a file.
- c. Unauthorized use of another individual’s identification and password.
- d. Use of computing facilities to interfere with the work of a student faculty member or college official, or to alter college or district records.
- e. Use of unlicensed software.
- f. Unauthorized
- g. Use of computing facilities to access, send or engage in messages which are obscene, threatening, defamatory, present a clear and present danger, violate a lawful regulation and/or substantially disrupt the orderly operation of a college campus.
- h. Use of computing facilities to interfere with the regular operation of the college or district computing system.

Board Rule 9803.27
Performance of an Illegal Act. Conduct while present on a college campus or at a location operated and/or controlled by the District or at a District-sponsored event, which is prohibited by local, State, or federal law.

Board Rule 9804
Interference with classes. Every person who, by physical force, willfully obstructs, or attempts to obstruct, any student or teacher seeking to attend
or instruct classes at any of the campuses or facilities owned, controlled or administered by the Board of Trustees of the Los Angeles Community College District, is punishable by a fine not exceeding five hundred dollars ($500) or imprisonment in a county jail not exceeding one year, or both such fine and imprisonment. As used in this section, “physical force” includes, but is not limited to, use of one’s person, individually or in concert with other, to impede access to or movement within or otherwise to obstruct the students or teachers of the classes to which the premises are devoted.

**Board Rule 9805**

Interference with performance of duties of employees. Every person who attempts to cause, or causes, any officer or employee of any of the Los Angeles Community Colleges or any public officer or employee to do or refrain from doing, any act in the performance of his/her duties, by means of a threat to inflict any injury upon any person or property, is guilty of a public offense.

**Board Rule 9805.10**

Assault or abuse of Instructor. Every parent, guardian, or other person who assaults or abuses any instructor employed by the District in the presence or hearing of a community college student or in the presence of other community college personnel or students and at a place which is on District premises or public sidewalks, streets, or other public ways adjacent to school premises, or at some other place where the instructor is required to be in connection with assigned college activities is guilty of a misdemeanor.

**Board Rule 9806**

Unsafe Conduct. Conduct which poses a threat or harm to the individual and/or others. This includes, but is not limited to, the following types of conduct: Unsafe conduct in connection with a Health Services Program (e.g., Nursing, Dental Hygiene, etc.); failure to follow safety direction of District and/or college staff; willful disregard to safety rules as adopted by the District and/or college; negligent behavior which creates an unsafe environment.

**STUDENT DISCIPLINE PROCEDURES**

Community college districts are required by law to adopt standards of student conduct along with applicable penalties for violation (Education Code Section 66300). The Los Angeles Community College District has complied with this requirement by adopting Board Rule 9803, Standards of Student Conduct (See above).

The District has adopted Board Rule 9804, Student Discipline Procedures, to provide uniform procedures to assure due process when a student is charged with a violation of the Standards of Student Conduct. All proceedings held in accordance with these procedures shall relate specifically to an alleged violation of the established Standards of Student Conduct. These provisions do not apply to grievance procedures, or residence determination and other academic and legal requirements for admission and retention.

Disciplinary measures may be taken by the College independently of any charges filed through civil or criminal authorities, or both.

Copies of the Student Discipline Procedures are available in the Vice President of Student Services Office, Student Services Building, JH-512.

**CONFLICT RESOLUTION**

The College has approved a student conflict resolution process where if there is an issue between student and instructor, that student is to complete the required form at the following link - http://college.lattc.edu/student-conflict-resolution/. The Department Chairperson over the area will respond to your request within two business days (Monday-Friday) regarding your situation. If the issue is not resolved on campus, the student can request for a formal grievance.

The student grievance procedure is designed to provide a prompt and equitable means to resolve student grievances, including but not limited to, the grading process. The grievance procedure may be initiated by a student or group of students who reasonably believe that they have been subject to unfair action or denied rights that adversely affect their status, rights, or privileges as a student. To initiate a student grievance, please contact the Dr. Mary Gallagher, (213) 763-7040.

**STUDENT GRIEVANCE PROCEDURES**

The purpose of the Student Grievance Procedures is to provide a prompt and equitable means for resolving student grievances, per Board Rules 91101-91102.

The procedures enumerated in Administrative Regulation E-55 shall be available to any student or applicant for admission, who believes a College decision or action has adversely affected his or her status, rights, and/or privileges as a student. The procedures shall include, but not be limited to, alleged violations of Title IX of the Higher Education Amendments of 1972 (and applicable regulations), grievances relating to disabled students as defined by Section 504 of the Rehabilitation Act of 1973, and grievances relating to course grades to the extent permitted by Education Code Section 76224(a). Section 76224(a) provides:

“When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student’s grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetency, shall be final.”

For additional information regarding the procedures for filing a student grievance, or for copies of the adopted Student Grievance Procedures, contact Vice President of Administrative Office, Student Services Building, JH-532.

**STUDENT RECORDS AND DIRECTORY INFORMATION**

The Los Angeles Community College District, in compliance with Federal and State law, has established policies and procedures governing student records and the control of personally identifiable information. The Los Angeles Community College District recognizes that student records are a confidential matter between the individual student and the College. At the same time the District has a responsibility to fulfill public information needs (i.e., information about students participating in athletics, announcement of scholarships and awards, etc.). To meet this responsibility the District may release Directory Information unless the student states in writing that he or she does not want it released. The responsibility for carrying out these provisions is charged to the College Registrar, designated by the chief administrative officer on each campus. The Registrar may be contacted via the Office of Admissions. Copies of Federal and State laws and District policies and procedures are maintained by the Registrar and are available for inspection and inquiry.

All student records maintained by the various offices and departments of the College, other than those specifically exempted by law, are open to inspection by the student concerned. The accuracy and appropriateness of the records may be challenged in writing to the Registrar. A student has the right to receive a copy of his or her record, at a cost not to exceed the cost of
reproduction. (Requests for transcripts should be made directly to the Office of Admissions & Records).

No student records, including Directory Information, will be released without the written consent of the student concerned except as authorized by law. A log of persons and organizations requesting or receiving student record information is maintained by the Registrar. The log is open to inspection only to the student and the community college official or his or her designee responsible for the maintenance of student records.

Directory Information includes the student’s name, city of residence, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. This information will not be released to anyone if the student marks “NO” on question “permission to Release Student Information” on the College Application or if the student marks “NO” on the College’s Release of Directory Information form. This form is available in the Admission Office.

In addition, under federal law, the military is entitled to receive the following student information for recruitment purposes: student directory information as defined above, student address, telephone number, date and place of birth, and major field of study. This information will not be released to the military if the student marks “NO” on question “permission to Release Student Information” on the College Application or if the student marks “NO” on the College’s Release of Directory Information form.

All inquiries regarding student records, Directory Information, and policies for records access, release, and challenge should be directed to the Registrar via the Office of Admissions. Students have the right to file a complaint with the United States Department of Education concerning alleged violations of Federal and State laws governing student records.

**STUDENT RIGHT-TO-KNOW**

Los Angeles Trade-Technical College in compliance with the Federal Student Right-To-Know and Campus Security Act of 1990 provides campus crime statistics in the college schedule of classes and on the college website at www.LATTC.edu.

---

**ACCESS TO CAMPUS FACILITIES**

Most campus buildings are open from 6:00 a.m. – 10:00 p.m. Monday through Thursday. Persons may be asked to produce identification if there is a question regarding their authorization to be in a certain area. Campus buildings are normally locked from 5:30 p.m. Friday to 6:00 a.m. Monday. The college Sheriff will open specific areas for Saturday classes and special events.

**POLICY FOR RESPONSIBLE COMPUTING USE**

The Los Angeles Community College District and Los Angeles Trade-Technical College provide computing facilities (computers, networks, software and computerized records) for use by students and college personnel to facilitate education, research, academic development and service to the public. Each individual user of these facilities is expected to do so responsibly, to use computing resources ethically, to respect the rights and privacy of others, and to use computing facilities so as not to violate copyright or patent protections or license agreements.

College computing facilities are not to be used for commercial purposes or non-College related activities without written authorization from the College. The College reserves the right to limit, restrict, or extend computing privileges and access to its information resources as it deems necessary to ensure the rules and regulations of the District and College are followed.

Students receive computer lab user guidelines as part of their course information. To obtain more specific information about College policies and standards for computing use, or to obtain a copy of the full text of Los Angeles Community College Administrative Regulation, E-76, Use of District and College Computing Facilities, contact the Administrative Projects Office/College Computing, JH-532, (213) 763-7040.
ATTENDANCE AND ENROLLMENT

ATTENDANCE
Only students who have been admitted to the college and are in approved active status may attend classes.

Students should attend every meeting of all classes for which they register. To avoid being dropped from class, students should contact the instructor when they are absent for emergency reasons.

PLease Note: Students who are pre-registered in a class and miss the first meeting may lose their right to a place in the class.

Students are responsible for dropping a class that they stop attending. If the class is not dropped, the student may receive an “F” in that class and be responsible for enrollment fee. Any drops or exclusions that occur between the 4th week and the 12th week will result in a “W” on the student’s record. Drops are not permitted beyond the 12th week. A grade (“A”, “B”, “C”, “D”, “F”, “P”, or “NP”) will be assigned to students who are enrolled past the 12th week even if they stop attending class. For further details, refer to “W” section of “Grading Symbols and Definitions.”

FINAL EXAMINATIONS
Final examinations are required in all courses; no student will be excused.

UNITs OF WORK/STUDY LOAD
Maximum and minimum unit requirements may apply, as follows:

Unit Maximum
• The maximum study load is 19 units during a regular semester, 12 units in two summer sessions, and 7 units during winter session. The normal class load for students in the Fall or Spring semester is from 12 to 18 units a semester for full-time students. Students who desire to take 19 1/2 or more units must obtain approval from the Registrar through petition.

• Those students who will be employed while attending college should consider reducing their programs accordingly. It is suggested that those students who are employed full-time should enroll in no more than one or two classes or 9 units maximum.

Full-Time Definition
• A study program of 12 units or more (4 units or more in Summer and Winter session) is considered a full time study program.

Minimum study loads for specific programs:
• Veterans and veterans’ dependents: 12 units
• Social Security benefits: 12 units
• Foreign Students (F-1 visa): 12 units
• Athletes: 12 academic units

The Veterans Administration uses the following definition for eligibility:
• full-time benefits: 12 or more units
• 3/4-time benefits: 9 — 11 units
• 1/2-time benefits: 6 — 8 units
• less than 1/2 time: 3 — 5 units (Reservist and National Guard)

ACADEMIC STANDARDS

ACADEMIC PROBATION

Academic Standards - Probation
The following standards for academic and progress probation shall be applied as required by regulations adopted by the Board of Governors of the California Community Colleges. Probation shall be determined based on all student course work dating from Fall, 1981; course work completed prior to Fall of 1981 is excluded from probation calculations. A student shall be
placed on probation if any one of the following conditions prevail:

a. **ACADEMIC PROBATION**. The student has attempted a minimum of 12 semester units of work and has a cumulative grade-point average less than a "C" (2.0).

b. **PROGRESS PROBATION**. The student has enrolled in a total of at least 12 semester units and the percentage of all units in which a student has enrolled for and for which entries of "W" (Withdrawal), "I" (Incomplete), and "NP" (No Pass) are recorded reaches or exceeds fifty percent of all units attempted.

c. **TRANSFER STUDENT**. The student has met the conditions of “a” or “b” at another college within the Los Angeles Community College District.

**Units Attempted**

"Units Attempted," for purposes of determining probation status only, means all units of credit in the current community college of attendance for which the student is enrolled.

**Removal from Probation**

A student shall be removed from probation upon meeting the criteria specified in this section.

**Academic Probation**

A student on academic probation for a grade point deficiency shall be removed from probation when the student’s cumulative grade-point average is 2.0 or higher.

**Progress Probation**

A student on progress probation because of an excess of units for which entries of No-Pass (NP), Incomplete (I), and/or Withdrawal (W) are recorded shall be removed from probation when the percentage of units in this category drops below fifty percent (50%).

**Academic Standards - Dismissal**

A student shall be subject to dismissal and subsequently be dismissed under the conditions set forth within this section. Dismissal shall be determined based on student course work dating from Fall, 1981; course work completed prior to Fall of 1981 is excluded from dismissal calculations.

**Academic Probation**

A student who is on academic probation shall be subject to dismissal if the student has earned a cumulative grade-point- average of less than 2.0 in all units attempted in each of 3 consecutive semesters. A student who is on academic probation and earns a semester grade-point-average of 2.0 or better shall not be dismissed as long as this minimum semester grade-point-average is maintained.

**Progress Probation**

A student who is on progress probation shall be subject to dismissal if the cumulative percentage of units in which the student has been enrolled for which entries of No-Pass (NP), Incomplete (I), and/or Withdrawal (W) are recorded in at least three consecutive semesters reaches or exceeds fifty percent (50%). A student who is on progress probation shall not be dismissed after a semester in which the percentage of units in which the student has been enrolled for which entries of "W," "I," and "NP" are recorded is less than fifty percent (50%).

**DISMISSAL**

A student who is subject to dismissal, and who has not been continued on probation through the appeal process, shall be notified by the College President, or designee, of dismissal which will become effective the semester following notification. Dismissal from any one college in the District shall disqualify a student from admission to any other college in the District.

**Appeal of Dismissal**

A student who is subject to dismissal may appeal to the College Dismissal Committee by submitting a Return From Disqualification petition to the College Admissions Officer (see a counselor to initiate petitions). Dismissal may be postponed and the student continued on probation if the student shows significant improvement in academic achievement but has not been able to achieve to a level that would meet the requirements for removal from probation.

**Readmission After Dismissal**

A student who has been dismissed may request reinstatement after 2 semesters have elapsed. The student shall submit a written petition requesting Return From Disqualification in compliance with College procedures. The College Dismissal Committee will meet in the first week of August and the first week of December each year to review these petitions. See the current College schedule for the date of the next meeting. Readmission may be granted, denied, or postponed subject to fulfillment of conditions prescribed by the college.

PLEASE NOTE: Students may file a Reinstatement Petition at any of the nine LACCD colleges that they are attempting to enroll in for the term.

**ACADEMIC RENEWAL**

Students may submit a petition to the Office of Admissions and Records to have their academic record reviewed for academic renewal action of substandard academic performance (less than “C”) under the following conditions:

1. Students must have achieved a grade-point-average of 2.5 in their last 15 semester units, or 2.0 in their last 30 semester units completed at any accredited college or university. These units must be completed after the coursework to be renewed; and

2. At least two calendar years must have elapsed from the time the course work to be removed was completed. If the above conditions are met, academic renewal shall be granted, consisting of:
WITHDRAWING FROM A CLASS IS A SERIOUS DECISION

New statewide regulations are now in effect that change the way students should think about enrolling in, and then withdrawing from classes.

Community colleges get most of their money from the state based on enrollment. Your fees cover only a fraction of the cost. Each class you enroll in results in compensation to the college is funding from the state, and that is how the college stays open.

In the past a student could withdraw from the same course up to 4 times, and in addition repeat the course up to two times to try to improve a grade of D or F. In other words, you could get a “W” in the same course 4 times and complete the course up to three times until attaining a grade of “C” or better.

AS OF JULY 1ST, 2012, A WITHDRAWAL “W” COUNTS AS AN ATTEMPT AND YOU ONLY GET THREE ATTEMPTS AT ANY ONE COURSE.

After that, the state won’t pay the college for you to take the course again.

What this means for LATTC students

- Students who drop or are excluded after the last day to drop without a grade of “W” will have a “W” appear on their transcript. The “W” will count as an attempt for that course.
- A course on a student’s transcript which currently shows a recorded “W” counts as an attempt for that course.
- Students will not be allowed to register for any course within the LACCD if there are three recorded attempts for that course in any combination of W, D, F, or NP grades.
- Add permits for a course within the LACCD will not be processed if there are three recorded attempts for that course in any combination of W, D, F, or NP grades.
- For courses specifically designated as “repeatable,” students may repeat up to three times. (See Title 5 California Code of Regulations sections 55040, 55041, 58161).
- You may petition through Admissions and Records for one more try citing “extenuating circumstances;” however, for the most part the only extenuating circumstances that are allowed are military deployment or natural disaster.
- If your registration is blocked because of this rule; getting an add permit will not help.

WHAT YOU SHOULD DO

- If you must drop a course, drop before the specified deadline for dropping classes without a grade of “W”.
- Be sure you’re academically ready for classes in which you enroll.
- See a counselor to help you make good decisions about your educational plan.
3. Eliminating from consideration in the cumulative grade-point average up to 18 semester units of course work, and

4. Annotating the student academic record indicating where courses have been removed by academic renewal action. Academic renewal actions are irreversible. Graduation honors and awards are based on the student’s cumulative grade-point average for all college work attempted. This policy is adopted for use in the Los Angeles Community College District only. Other institutions may differ and students planning to transfer to another college should contact that institution regarding its policy.

**Academic Petition/Administrative Petition**

Students should file an Academic Petition form when they are requesting assistance with: course repetition, course substitution, enrollment in more than 19 units, catalog rights and other related concerns. The petition forms may be obtained from the Counseling Office. Petitions must be signed by the counselors before submittal to Admissions and Records Office, Building JH-416. Students should file an Administrative Petition form when they are requesting assistance with Academic renewal, return from disqualification (dismissal), and other related concerns. Administrative Petition forms are available in the Office of Admissions and Records, JH-Lobby and submitted in the same office. When filing for return from disqualification, the petition forms must be reviewed and signed by the counselors before submittal to Admissions and Records Office. Specific petition forms are available for requesting permission for: grade changes, Credit By Examination, and lining out successfully repeated course.

**CREDITS AND GRADES**

**CREDIT FOR ADVANCED PLACEMENT (AP)**

The College offers credit for grades of 3 or better on a variety of College Board Advanced Placement Exams. Students should file a General Petition in the Admission Office, JH-Lobby and have an official copy of their test results sent to the school.

**COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)**

The college grants credit for scores of 500 points (or 50%) or better on a variety of CLEP examinations. Students should contact counseling (JH-416) or Admissions (JH-Lobby) for additional information.

**CREDIT FOR PREREQUISITES**

Students may not concurrently enroll in and receive credit for an advanced course and its prerequisite(s). Students may not enroll in and receive credit for the prerequisite(s) to an advanced course if they have previously completed the advanced course. Violation of this regulation will result in exclusion from class and denial of course credit.

**CREDIT BY EXAMINATION**

Some courses in the college catalog are eligible for credit by examination.

1. **Methods of obtaining credit by examination**
   a. Achievement of a score of 3 or higher on an Advanced Placement Examination administered by the College Entrance Examination Board.
   b. Credit by satisfactory completion of an examination administered by the college in lieu of completion of a course listed in the college catalog.
   c. Achievement of a score that qualifies for credit on an examination administered by other agencies approved by the college.

2. **Determination of Eligibility to take College Administered Examinations**
   a. Must be currently registered in the college, in good standing, and with a minimum grade point average of 2.0 in any work attempted at the college.
   b. Must have completed 12 or more units in the LACCD.
   c. May petition for credit by examination if they are eligible to take such course for credit under existing regulations.
   d. Have not completed a course or are not in the process of taking a course which is more advanced than the course for which credit is requested. This requirement may be waived at the discretion of the appropriate administrator.

3. **Maximum credit allowable for credit by examination**

The maximum number of units allowable for credit by examination for the Associate Degree shall be fifteen (15) units. Credit by examination transferred from other institutions is counted towards this maximum.

4. **Limitations**

Credits acquired by examination are not applicable to meeting such unit load requirements as Selective Service deferment, Veteran’s or Social Security benefits.

5. **Recording of Credit**
   a. If a student passes the examination, the course shall be posted on his/her cumulative record indicating “Pass” in the “Grade” column.
   b. The number of units of credit recorded for any course may not exceed those listed in the college catalog.

6. **Acceptance Towards Residence**

Units for which credit is given pursuant to the provision of this section shall not be counted in determining the 12 units of credit in residence requirement.

7. **Recording of Grade**

Students who successfully pass an approved examination shall have the record of such examination entered on their record as “P” as provided by the District Grading Symbols and Definitions Policy. The student’s records shall also be annotated “Credit By Examination”.

PASS/NO-PASS OPTION

The College President may designate courses in the College Catalog wherein all students are evaluated on a “Pass/No-Pass” basis or wherein each student may elect on registration or no later than the end of the first 30% of the term, whether the basis of evaluation is to be “Pass/No-Pass” or a letter grade. These courses will be noted in the College Catalog as being eligible for the Pass/No-Pass Option.

1. USAGE FOR SINGLE PERFORMANCE STANDARD. The Pass/No-Pass grading system shall be used in any course in which there is a single satisfactory standard of performance for which unit credit is assigned. A grade of Pass (P) shall be assigned for meeting that standard, and a grade of No-Pass (NP) shall be assigned for failure to do so.

2. ACCEPTANCE OF CREDITS. All units earned on a “Pass/No-Pass” basis in accredited California institutions of higher education or equivalent out-of-state institutions shall be counted in satisfaction of community college curriculum requirements.

3. RECORDING OF GRADE. A student who is approved to be evaluated on the “Pass/No-Pass” basis shall receive both course credit and unit credit upon satisfactory completion of the course. Satisfactory completion for credit is equivalent to the grade of “C” or better. A student who does not perform satisfactorily will be assigned a “No-Pass” (NP) grade.

4. GRADE POINT CALCULATION. Units earned on a “Pass/No-Pass” basis shall not be used to calculate grade-point averages. However, units attempted for which “No-Pass” (NP) is recorded shall be considered in probationary and dismissal procedures.

5. STANDARDS OF EVALUATION. The student who is enrolled in a course on a “Pass/No-Pass” basis will be held responsible for all assignments and examinations required in the course and must meet the standards of evaluation which are identical for all students.

6. CONVERSION TO LETTER GRADE. A student who has received credit for a course taken on a “Pass/No-Pass” basis may not convert this credit to a letter grade.

7. COURSE REPETITION. A student who has received a grade of “No-Pass” (NP) may repeat the course by meeting the requirements set forth by the District Course Repetition to Improve Substandard Grades Policy.

Academic Standards and Policies
Los Angeles Trade-Technical College 2012-2013 GENERAL CATALOG
CREDIT FOR COURSES COMPLETED AT NON-ACCREDITED INSTITUTIONS

Students transferring from non-accredited institutions may, after successful completion of 30 units with a “C” or better grade-point average, apply for up to 15 units of credit in courses which parallel the offerings of the College. The following exceptions may be made to this regulation:

1. Credit for Graduates of Diploma Schools of Nursing
   The following amount of credit is authorized for graduates of Diploma Schools of Nursing who enter the Los Angeles Community Colleges:
   a. Thirty (30) semester units of credit will be given to graduates of Diploma Schools of Nursing under the following conditions:
      i) The student presents a valid, current California certificate as a licensed registered nurse to the designated administrative officer;
      ii) The student has completed at least 12 units of credit at the College to which application is made.
   b. The work of graduates of Diploma Schools of Nursing outside California will be recognized if the student has a valid, current California license. Credit will be given even though the license was obtained on the basis of reciprocity with another state rather than by examination.
   c. Candidates for the Associate of Arts or Associate of Science Degree are exempt from Health Education as a general education requirement. No other general education requirements will be waived.
   d. Additional courses in Nursing may be taken for credit only upon approval of the Nursing Department.
   e. The transcript is not to reflect the major field nor should the diploma, where given, indicate Nursing as a major.

2. Credit for Military Service Training
   Students who are currently serving in or have served in the military service, should, after successful completion of at least one course with the Los Angeles Community Colleges, request an evaluation of credit earned through military service training schools and/or military occupational specialties.

3. Credit for Law Enforcement Academy Training
   Credit for basic recruit academy training instructional programs in Administration of Justice or other criminal justice occupations shall be granted as follows:
   a. Credit will be given for training from institutions which meet the standards of training of the California Peace Officers Standards and Training Commission.
   b. A single block of credit will be given and identified as academy credit.

c. One (1) unit of credit may be granted for each 50 hours of training, not to exceed ten (10) semester units or their equivalent. Credits granted by an institution of higher education for basic recruit academy training, under the above provisions, shall not be identified as equivalent to any required course in the major.

COURSE REPLICATION

Course Repetition to Improve Sub-standard Grades

No specific course or categories of courses shall be exempt from course repetition. This policy applies to courses taken at colleges within the Los Angeles Community College District. Courses completed through the provisions of Board Rule 6704 - Credit by examination may not be used to remove a substandard grade.

First Course Repetition to Remove a Sub-standard Grade

Upon completion of a repeated course the highest grade earned will be computed in the cumulative grade point average and the student’s academic record so annotated. All grades awarded will show on student’s permanent records to insure a true and complete academic history. It is the student’s responsibility to file a petition for removal of the substandard grade.

Second Course Repetition to Remove a Sub-standard Grade

Upon completion of the second repetition, the grade used in computing the student’s cumulative grade point average shall be the highest grade earned, and the student’s record so annotated. The two lower substandard grades will not be used in the computation of the grade point average. All grades awarded will show on student’s permanent records to insure a true and complete academic history. It is the student’s responsibility to file a petition for removal of the substandard grade.

Third Course Repetition to Remove a Sub-standard Grade

A student may repeat the same course for a third time provided the student has:
1. Received two substandard grades for the same district course
2. Filed a petition specifying the course(s) to be repeated and stating the extenuating circumstances upon which the petition is based.
   “Extenuating circumstances” are verified cases of accidents, illness, or other circumstances beyond the control of the student.
3. The petition is approved by the Department Chairperson, if denied, petition is forwarded to Dean for review.

Upon completing the third repeat, the grade earned will not be used in the computation of the grade point average. All grades awarded will show on student’s permanent records to insure a true and complete academic history.

Course Repetition: Special Circumstances

Repetition of courses for which substandard work (less than “C”) has not been recorded shall be permitted only upon advance petition of the student and with written permission of the College President or designee based on a finding that circumstances exist which justify such repetition. In such repetition under special circumstances, the student’s permanent academic record shall be annotated in such a manner that all work remains legible. Grades awarded for repetition under special circumstances shall not be counted in calculating a student’s grade-point average.
**Academic Standards and Policies**

**Campus Procedure**
Student will be notified of an Administrative Exclusion from a class if the student is enrolled in a class under above circumstances and has not filed a petition in advance and received approval. In this case the student may file a petition to repeat under special circumstances in the Student Services Building, JH-Lobby following receipt of a Drop notice.

**Course Repetition and Activity Repetition**
Certain courses in the Catalog may be repeated for additional unit credit. These courses, marked “RPT” in the Course Section of the Catalog, allow the student an expanded educational experience each time the student enrolls in the course. Enrollment in these courses is limited in any similar activity to a maximum of three repeats for a total of four (4) enrollments, regardless of the repeatability of individual courses. The activity limitation also applies to courses which are not repeatable in themselves but for which similar activities exist. For example, there are several similar course titles in Art, Music, Theater, and Physical Education which are considered to be the same activity. A student may enroll four times in courses which are considered to be the same activity, such as twice in Theater 279, Musical Theater (RPT 3), and twice in Theater 280, Musical Theater Workshop (RPT 3). Any combination may be used as long as four enrollments in one activity is not exceeded.

This activity enrollment limitation begins with the Fall 1983 term. Excess enrollment will result in administrative exclusion. Consult a counselor for the latest restricted activity enrollment list.

**NOTE:** Whenever the student’s record is reviewed for the purpose of determining his or her unit credits, all of the student’s record is reviewed, not just the course work since the beginning of Fall 1983.

---

**PETITIONS**
Students should file a petition form when they are requesting assistance with: academic renewal, course substitution, enrollment in more than 19 units, return from disqualification (dismissal), and other related concerns. Specific petition forms are available for course repetition to improve substandard grades, grade change, and lining out successfully repeated courses. The petition forms may be obtained in the Office of Admissions and Records, room, JH-Lobby, and filed in the same office. Students must consult a counselor, advisor, mentor or Department Head when filing a petition.

---

**GRADES AND GRADE CHANGES**
The instructor of the course shall determine the grade to be awarded to each student in accordance with the preceding Grading Symbols and Definitions Policy. The determination of the student’s grade by the instructor is final in the absence of mistake, fraud, bad faith, or incompetency. The removal or change of an incorrect grade from a student’s record shall only be done upon authorization by the instructor of the course. Petitions for grade changes are obtained and filed in the office of Admissions and Records, JH-Lobby. Grade Change Petitions must be submitted within one year after the grade was assigned.

---

**GRADING SYMBOLS AND DEFINITIONS**
Only the symbols in the grading scale given in this section shall be used to grade all courses offered in fulfillment of the requirements for an associate or baccalaureate degree, a certificate, diploma, or license. Grades shall be averaged on the basis of the point equivalencies to determine a student’s grade-point-average, using the following evaluative symbols:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Definition</th>
<th>Grade Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>Passing, less than satisfactory</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>Failing</td>
<td>0</td>
</tr>
<tr>
<td>P</td>
<td>Pass (at least equal to a “C” grade or better - units awarded are not counted in GPA)</td>
<td></td>
</tr>
<tr>
<td>P-CRX</td>
<td>Credit by exam</td>
<td></td>
</tr>
<tr>
<td>NP</td>
<td>No-Pass (equal to a “D” or “F” grade - units are not counted in GPA)</td>
<td></td>
</tr>
</tbody>
</table>

PETITIONS

The grading symbol shall remain on the student’s permanent record in order to satisfy enrollment documentation. The appropriate evaluative grade and unit credit shall be assigned and appear on the student’s record for the term in which the required work of the course is completed. The “IP” symbol shall not be used in calculating units attempted nor for grade points.

**Symbol Definition**

(1) Incomplete
Incomplete academic work for unforeseeable emergency and justifiable reasons at the end of the term may result in an “I” symbol being entered in the student’s record. The condition for removal of the “I” shall be stated by the instructor in a written record. This record shall contain the conditions for removal of the “I” and the grade assigned in lieu of its removal. This record shall be given to the student, with a copy on file in the college Admission Office until the “I” is made up or the time limit has passed. A final grade shall be assigned when the work stipulated has been completed and evaluated, or when the time limit for completing the work has passed. The “I” symbol shall not be used in calculating units attempted nor for grade points. THE “I” MUST BE MADE UP NO LATER THAN ONE YEAR FOLLOWING THE END OF THE TERM IN WHICH IT WAS ASSIGNED. The student may petition the instructor for a time extension due to unusual circumstances. Note: Courses in which the student has received an Incomplete (“I”) may not be repeated unless the “I” is removed and has been replaced by a grade of “D” or “F”. This does not apply to courses which are repeatable for additional credit.

(IP) In Progress
The “IP” symbol shall be used only in those courses which extend beyond the normal end of an academic term. “IP” indicates that work is “in progress,” but that assignment of a substantive grade must await its completion. The “IP” symbol shall remain on the student’s permanent record in order to satisfy enrollment documentation. The appropriate evaluative grade and unit credit shall be assigned and appear on the student’s record for the term in which the required work of the course is completed. The “IP” shall not be used in calculating grade-point averages. If a student enrolled in an “open-entry, open-exit” course is assigned “IP” at the end of an attendance period and does not complete the course during the subsequent attendance period, the appropriate faculty will assign an evaluative symbol (grade) as specified above to be recorded on the student’s permanent record for the course.
(W) Withdrawal
Withdrawal from a class or classes shall be authorized through the last day of the twelfth week of instruction or 75% of the time the class is scheduled to meet, whichever is less. No notation (“W” or other) shall be made on the record of a student who withdraws during the first four weeks, or 30% of the time the class is scheduled, whichever is less. Withdrawal between the end of the fourth week (or 30% of the time the class is scheduled to meet, whichever is less) and the last day of the twelfth week of instruction (or 75% of the time the class is scheduled to meet, whichever is less) shall be authorized after informing the appropriate faculty. A student who remains in class beyond the twelfth week or 75% of the time the class is scheduled shall be given a grade other than a “W”.

STUDENT GRADE CHANGE PETITIONS
The instructor of the course shall determine the grade to be awarded to each student. The determination of the student’s grade by the instructor is final in the absence of a mistake or fraud. Petition for grade change forms can be obtained and filed in the Office of Admissions and Records.

A grade change petition can be submitted if you feel an error has been made on your record. These petitions must be approved by the instructor of the course specified, and must be submitted within one year after the grade is assigned.

STUDENT GRADE GRIEVANCE PROCEDURES
Education Code Section 76224(a) defines the circumstances under which a student may initiate a grade grievance. Section 76224(a) provides: “When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student’s grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetence, shall be final.” For additional information, contact the Vice President of Administrative Service at (213) 763-7040.

STATE COMPLAINT PROCESS
Final federal regulations published October 29, 2010, and effective July 1, 2011, included in the State Authorization section of the package a new requirement that eligible institutions have and disclose a state administered complaint process (HEA Title IV, CFR, Sections 600.9 and 688.4(3)(b)). The intention behind the new requirement is that students and others have a method and process outside of the institution that takes, investigates and responds to complaints regarding the institution.

For more info. regarding the State Complaint Process, please go to californiacommunitycolleges.cccco.edu/ComplaintsForm.aspx.

TRANSCRIPTS
Upon written request of the student, a copy of the student’s academic record shall be forwarded to the student or his or her designated addressee in ten (10) working days or less by U.S. mail or other responsible forwarding agency.

A student or former student shall be entitled to two free copies of the transcript of his or her record or to two free verifications of the student’s records or combination of both. Additional copies shall be made available to the student, or to an addressee designated by the student at a cost of $3.00 each. Students may request same day processing to expedite their requests for an additional fee of $7.00 per transcript. These transcripts are NOT sent via Fed Ex or special postage service; they are sent only via U.S. mail. Transcripts from another institution are not available for copying.

The student’s transcript may be withheld if 1) any library books or other library materials are charged to the student and are unreturned, or 2) there are any unpaid fees, charges or other obligations due to the College or District. The transcript may be withheld until these obligations of the student are discharged.

Incoming transcripts: Academic official transcripts submitted to the college will only be honored if they are addressed and directly mailed from the institution to the Los Angeles Trade-Technical College, Admission Office.

PREREQUISITE POLICY
Many courses listed in the class schedule will indicate suggested prerequisite, co-requisite/concurrent enrollment or recommended preparation/advisory listed after the name of the course. These recommendations were made after careful consideration by the faculty of that department. The Los Angeles Community College District has adopted a policy based upon a model developed by the State Chancellor’s Task Force in conjunction with the State Academic Senate and Chief Instructional Officers and based upon Title V Article 2.5 Section 55200 and Article 4 Section 55530 of the Matriculation Regulations. In other words, your success is our primary goal. Your rights entitle you to file a “Challenge Form” to challenge any prerequisite if you believe one or more of the following:

1. I have the knowledge, ability or skill to succeed in the course despite not meeting the prerequisite or co-requisite.
2. I will be subject to undue delay in attaining the goal of my educational plan because of the enrollment limitation, or because the prerequisite or co-requisite course has not been made reasonably available.
3. The prerequisite or co-requisite has not been established in accordance with applicable college policies and procedures.
4. The prerequisite or co-requisite is in violation of Title 5, Section 55200-55202 of the California Code of regulations.
5. The prerequisite or co-requisite, or enrollment limitation is either unlawfully discriminatory or is being applied in an unlawfully discriminatory manner.
6. The basis upon which the college established the enrollment limitation does not exist. Note: You have the right to participate in all activities related to matriculation components whether eligible for exemption or not. The matriculation program is our plan to ensure your success. For more information contact the Matriculation Department in Student Services Building, JH-303, Tel. 213-763-5348 or the Assessment Center, JH-303, 213-763-5339.
Challenge Process Information:
1. Complete the Challenge Application; provide an explanation and supporting documentation for your reason to challenge. You will need to present a valid photo ID to the Assessment proctor at the time of challenging.
2. Complete the Subject Exam of the prerequisite course you are challenging. This exam is to be completed in the Assessment Center in JH-303.
3. This is a one-time test. You will not be given any credit or grade for successfully passing the Challenge Exam. You will need to receive at least 70% to pass. If you are challenging several levels within the same subject you will need to pass the first test before you can challenge the next level.
4. Once you have completed the Challenge Exam it will be reviewed for approval by the Challenge Committee.
5. The Matriculation Department along with the committee has five business days (working) to notify you of your results. The committee consists of the following: Matriculation/Student Services Dean, General Counselor, and a Faculty of the subject you are challenging. Once your challenge results are in, you will be notified by phone or in-person. You will also receive a copy of the challenge application for your records.
6. Deadline to challenge: If you plan to enroll for the course in the most current term you will need to complete the challenge exam one month before the semester begins. Otherwise, you will need to wait for the next semester to enroll in the course.

For more information contact the Matriculation Department in JH-303, 763-5348 or the Assessment Center in JH-303 at 213-763-5339.

ACADEMIC HONORS

DEAN’S HONOR LIST
Each semester (Fall and Spring) - an Honor List is composed of students who have satisfactorily completed 12 or more units in a given semester with a 3.5 grade point average OR have completed 6 to 11.5 units in a semester with a 3.5 grade point average and have completed a cumulative total of 12 or more units with a 3.5 grade-point average in all work attempted. In recognition of this scholastic accomplishment, each student is honored and awarded a Dean’s Honors Awards Certificate. For more information visit RH-105, or call 213-763-7200.

PRESIDENT’S HONOR AWARD
Students who have met the requirements for the Dean’s Honor List for three consecutive semesters qualify for the President’s Honor Award.

DISTINGUISHED GRADUATE AWARD
The Distinguished Graduate Award is one of the most significant and prestigious honors available to students at Los Angeles Trade-Technical College. This honor is bestowed on graduates during the College Commencement exercises. In order to be considered for the award, a candidate must:

- Petition for the Associate Degree.
- Achieve a grade-point-average of 3.70 or better in all college work completed at the time of petition, and is in good standing.
- Complete fifty percent of all units utilized for the award within the Los Angeles Community College District.
- Achieve a grade-point-average of 3.70 or better in all college work completed at the end of the Fall semester if graduation requirements will not be completed until the end of the Spring semester.

Students who have earned an Associate Degree or equivalent or advanced degrees are not eligible for the award.
FINANCIAL AID

Phone: (213) 763-7082
Location: Student Services Building, JH-214
Hours: Monday – Thursday 8:00 a.m. – 2:00 p.m. & 4:30 p.m. – 7:00 p.m.

FINANCIAL AID STAFF ASSISTED LAB
Location: Student Services Building, JH-314
Hours: Monday – Thursday 8:00 a.m. – 7:00 p.m.
Friday 8:00 a.m. – 3:00 p.m.

GOAL
The goal of the Financial Aid Program is to provide access to various types of post-secondary education for those who otherwise would be unable to start or continue their schooling and/or training.

FINANCIAL AID - WHAT IS IT?
Financial Aid is funding provided by the federal and state governments, and private sources in the form of grants, scholarships, loans and employment. These funds are available to make it possible for students to continue their education beyond high school even if they and/or their family cannot meet the full costs of the post secondary school they choose to attend. The basis for such programs is the belief that students and their families have the primary responsibility to meet educational costs. Financial aid is meant to supplement your existing income and/or financial resources and should not be depended upon as your sole mean of income to support all educational and other non-educational expenses.

WHO CAN APPLY?
To be considered for financial aid, a student must meet the following minimum requirements:

- Be a U.S. citizen or an eligible non-citizen. An eligible non-citizen is a U.S. permanent resident as determined by the Immigration and Naturalization Service verifying that their stay in the U.S. is for other than a temporary purpose.
- Show financial need.
- Enroll as a regular student in an eligible program.
- Make satisfactory progress in a course of study leading to an AA or AS degree, certificate, or transfer to a baccalaureate degree program.
- Must not be in default on a Federal Perkins Loan (formerly National Direct Student Loan), Stafford Loan (formerly Guaranteed Student Loan (GSL), Supplemental Loans for Students (SLS), or Direct Loan at any school the student attended.
- Must not owe a refund on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG) or Leveraging Educational Assistance Partnership (LEAP) Grant.
- Register with the Selective Service if required to do so.
- Have a valid Social Security Number (SSN).

- Have a valid State picture ID or Driver License.
- Have a high school diploma or its equivalency, such as GED, CA Proficiency Exam or approved Home Schooling.

WHEN TO APPLY
- January 1 of each calendar year is the beginning of the application period for Federal and State financial aid.

PRIORITY and DEADLINE DATES FOR 2012-2013:
- March 2, 2012 - CAL GRANT DEADLINE for both high school seniors and community college students
- September 2, 2012 – Second deadline for community college students to apply for CAL GRANT B
- June 30, 2013 is the deadline for filing a Free Application for Federal Student Aid (FAFSA) for 2012-2013
- May 2, 2013 – is the Priority date for Fall & Spring

Students should continue filing their Free Application for Federal Student Aid (FAFSA) even if they miss the PRIORITY DATE because PELL GRANTS, ENROLLMENT FEE WAIVERS, JOBS and LOANS will continue to be awarded to qualified applicants throughout the academic year if funds are available.

HOW TO APPLY
Students can apply for the Free Application for Federal Student Aid (FAFSA) on line. The financial aid staff in the Financial Aid Staff Assisted Lab located at Student Services Building JH-314 provides application assistance to students. The web-site for the application is www.fafsa.gov. Make sure you enter the school code: 001227 on your application. Student should come to the Financial Aid Office to submit the required documents and forms to complete the process after applying on-line for about two weeks. An award letter and financial aid disbursements will be deposited into student’s Higher One Debit Card after the application is completely processed.

FINANCIAL AID PROGRAMS
The Financial Assistance Programs available at Trade Tech are:

- FEDERAL PELL GRANT
- FEDERAL SUPPLEMENTAL OPPORTUNITY GRANT (FSEOG)
- FEDERAL WORK STUDY (FWS)
- FEDERAL PERKINS LOAN
- FEDERAL DIRECT LOAN
- CALIFORNIA STATE GRANTS (CAL GRANTS)
- SCHOLARSHIPS
- BOARD OF GOVERNORS FEE WAIVER

Students can apply for one or more of these programs by filing a Free Application for Federal Student Aid (FAFSA). Campus scholarships and the Board of Governors Fee Waiver require separate applications.
ENROLLMENT FEE ASSISTANCE

For immediate enrollment fee assistance, students who are unable to pay the enrollment fee should complete the Board of Governors’ Enrollment Fee Waiver application and submit it to the college Financial Aid Office for processing prior to payment of their enrollment fees. Students who had a fee waiver last year must submit a new application for the new year which includes Summer 2012, Fall 2012, Winter Intersession 2013, and Spring 2013. Applications are available in the class schedule, the Information Center, and the Financial Aid Office.

There are three ways to qualify:

Method A (BOG A) — Proof of these benefits is required.
For families or students who receive TANF/CALWORKS, General Relief (GR), Supplemental Security Income (SSI/SSP).

Method B (BOG B)
For families or students whose family income and size fall with the following limits:

BOARD OF GOVERNORS FEE WAIVER PROGRAM (BOGFW-B)

<table>
<thead>
<tr>
<th>FAMILY SIZE</th>
<th>2011 INCOME</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$16,335</td>
</tr>
<tr>
<td>2</td>
<td>$22,065</td>
</tr>
<tr>
<td>3</td>
<td>$27,795</td>
</tr>
<tr>
<td>4</td>
<td>$33,525</td>
</tr>
<tr>
<td>5</td>
<td>$39,255</td>
</tr>
<tr>

<td>$44,985</td>
</tr>
<tr>
<td>7</td>
<td>$50,715</td>
</tr>
<tr>
<td>8</td>
<td>$56,445</td>
</tr>
</tbody>
</table>

Each additional family member add $5,730

Special Classification Enrollment Fee Waivers:
You are also eligible for a BOG if:

- A dependent of a deceased or disabled veteran of the U.S. Military
- A recipient of a Congressional Medal of Honor or a child of a recipient
- A dependent of a victim of the September 11, 2001 terrorist attack
- A dependent of a deceased law enforcement/ fire suppression person killed in the line of duty.

Method C (BOG C)
Students who do not meet the above criteria, but have financial need as established by the College Financial Aid Office, may also be eligible for an Enrollment Fee Waiver. To qualify, students must complete a Free Application for Federal Student Aid (FAFSA) and provide proof of prior year income. Processing of this type of fee waiver takes approximately five working days.

There are no fee waivers for audited classes. Other financial aid may be available to students who meet the qualification requirements. Students with questions concerning financial aid eligibility should contact the College Financial Aid Office, Student Services Building JH-214.

SCHOLARSHIPS

Because of the nature of the College and the close cooperation with business, industry and alumni, there is an on-going scholarship program available to students of the College. In addition to the availability of college-wide general scholarships, various departmental scholarship opportunities are offered to students majoring in those areas. Specific information on the availability of campus scholarships is located in the Financial Aid Office website.

SATISFACTORY ACADEMIC PROGRESS FOR FINANCIAL AID

To be eligible for federal and state financial aid, students are required by the U.S. Department of Education and the State of California to maintain satisfactory progress toward completing their degrees or certificates. In compliance with prescribed regulations, the Los Angeles Community College District (LACCD) has established guidelines designed to promote timely advancement toward specific degree and certificate objectives. Students’ satisfactory academic progress is checked after each semester. To satisfy academic progress requirements, financial aid students must meet the following:

- Maintain a cumulative Grade Point Average (GPA) of 2.0.
- Have less than 90 units attempted (including not having received Associate’s Degree or higher) at the beginning of the academic year.
- Non-grades (W, INC, NCR) must be 33% or less of cumulative units attempted.

Disqualification – Students will be disqualified and will not receive financial aid if they have one or more of the following deficiencies at the end of each semester:

- Total units attempted (excluding ESL and 30 units of Basic Skill/Remedial classes) are equal to or greater than ninety (90);
- Associate or higher degree has been earned outside of LACCD;
- Cumulative GPA is less than 2.0;
- Cumulative non-grades are more than 33%

Warning letter – Students will receive a warning letter at the end of the fall semester if they have one or more of the following academic deficiencies:

- Cumulative GPA is less than 2.0;
- Cumulative non-grades are greater than 33%
- Number of units attempted reaches forty-five (45).

Appeal – Students who are disqualified from receiving financial aid may submit a written appeal to the financial aid office. The appeal must include an education plan signed by a counselor and an explanation of why the satisfactory academic progress requirements were not met. The appeal form must be received by the Financial Aid Office on or before the deadline day of the semester that the students are appealing for.

If you have any questions, call or visit your college Financial Aid Office. Staff members are available to answer your questions and to help you complete any of the forms. Keep in mind that it takes two months, sometimes longer, between the time you apply for aid and the time your award is completely processed. For additional information related to the programs offered and the application process, contact the campus Financial Aid Office at (213) 763-7062 or stop by the office during our office hours to pick-up a copy of the “Financial Aid Guide”
NEW!!!

• Starting July 1st, 2012, all new students who never enrolled in College before July 1st, 2012 need to have a high school diploma or GED, passed the CA Proficiency Exam or completed approved home schooling to receive financial aid.

• Starting July 1st, 2012, all students have a lifetime limit of 6 years full-time (600%) of Pell Grants.

• Starting July 1st, 2012, all subsidized loan recipients will have to pay the accrued interest during the six-month grace period.

IMPORTANT NOTICE

Students who drop below 6 units or who withdraw from all classes before 60% of the term of enrollment has passed will be required to pay back a percentage of the Federal financial aid grant funds they have received. E-mail the Financial Aid Office at tfinaid@lattc.edu before withdrawing from any or part of your classes! (213) 763-7082, Student Services Building JH-214.

For more information regarding the Financial Aid process, please attend the financial aid workshops held throughout the year. A schedule of workshops can be found on the Financial Aid homepage (http://college.lattc.edu/financialaid/).

IMPORTANT INFORMATION REGARDING GAINFUL EMPLOYMENT DISCLOSURE REQUIREMENTS

To qualify for federal financial aid, the law requires that an educational program at a community college must lead to a degree (associate, bachelor’s, graduate, or professional) or prepare students for “gainful employment in a recognized occupation. Further, federal regulations [75 FR 66832] require community colleges that participate in the Federal student financial assistance programs to report certain information about students who are enrolled in Gainful Employment Programs. At Los Angeles Trade-Technical College, Gainful Employment programs are programs that prepare students for obtaining a Certificate of Achievement.

In accordance with the Gainful Employment disclosure regulations, a website has been developed to provide students with important information on each Certificate of Achievement program (e.g., Gainful Employment program) at the college including, but not limited to: program costs, employment projections and profiles related to the occupation(s) the program trains students for, and program completers. The Certificate of Achievement website is available at: http://college.lattc.edu/certificates/. The information provided for each Certificate of Achievement program on this website fulfills the Gainful Employment federal reporting requirements described above.
STUDENT SERVICES AND ACADEMIC RESOURCES

CAREER AND STUDENT EMPLOYMENT CENTER

Phone: (213) 763-7104/ 7124
Location: RH-107A
Hours: Monday – Thursday 8:30 a.m. – 5:30 p.m.
       Friday 9:00 a.m. – 2:00 p.m.

The Career and Employment Center’s mission is to promote effective career planning for all students. Experienced staff will assist with career options and provide the testing and interpretation of career assessments, career guidance, and develop the student’s awareness of the educational opportunities available. The following career inventories are available: The Myers/Briggs Personality Assessment, the COPS-COPESCAPS career inventory, the EUREKA Career Information System, Career/Life Skills workshops, a library with Career resources and computer aided job development are available to assist with career and job opportunities.

The Center assists students in finding full-time, part-time or temporary jobs. It also provides information on internships, working abroad and summer employment, as well as employment information for alumni. The Center maintains a file of current job bulletins from city, state, county and federal government agencies, as well as school districts and private industry.

Individual employment advising is available by appointment, as well as assistance with resumes and cover letters. Computers and printers are available for students to use for job search and completing their resume and cover letter.

CHILD DEVELOPMENT CENTER

Phone: (213) 763-3690
Location: Corner of Olive and 21st Street
Hours: See below

The Campus Child Development Center is designed to provide a supportive educational environment for children while parents attend classes, job training, or work. The center believes that a warm and nurturing atmosphere is the best for both children and adults to learn and grow. Therefore, our focus is to provide developmentally appropriate activities for children and to provide opportunities for parents to enhance their parental skills. The center is staffed by dedicated teachers trained in the field of early childhood education. Student assistants and college lab students work with the staff to provide an environment that is developmentally appropriate for young children. Activities are planned to meet the child’s emotional, social, physical and intellectual needs. Programs are as follows:

Day Program:
Hours: Half Day Care: Monday – Friday 6:30 a.m. – 12:00 p.m.
       Full Day Care: Monday – Friday 6:30 a.m. – 4:00 p.m.
Ages: Infants through Preschool Children, 16 months to 5 years of age (before entrance to kindergarten)
Meals served: Breakfast, Lunch and Snack

To receive an application contact the Center located on the corner of Olive and 21st Street. Each application is to be completed and returned to the Child Development Center with current income verification in order to establish enrollment priority for your child’s admission. Child care is free for income eligible parents.

COUNSELING SERVICES

Phone: (213) 763-7354
Location: JH-416
Hours: Monday – Thursday 8:00 a.m. – 6:30 p.m.
       Friday 8:00 a.m. – 3:00 p.m.

The mission of the Counseling Department is to provide the opportunity for our students and the community to receive professional counseling services to assist them in the exploration, planning and successful completion of coursework leading toward obtaining their academic, career and personal goals. The Counseling Department supports student success and promotes achievement through persistence, retention and the use of technology in order to foster life-long learning and effective participation in our democratic society. Advisement in Spanish is available upon request. Students may consult with a Counselor to discuss any of the following:

• Student Educational Plan
• Orientations
• Early Alert Workshops
• Financial Aid Advisement
• Transcript Evaluation
• Graduation Requirements
• General Education Certification (UC/CSU)
• Transfer Requirements to Four-Year Colleges and Universities (see “University Transfer Center” for more information)
• Interpreting Assessment Results
• Personal Concerns
• Personal Development Classes
• Substance Abuse Counseling Referrals
• Intervention Planning

DISABLED STUDENTS PROGRAMS AND SERVICES (DSP&S)

Phone: (213) 763-3773
TDD: (213) 763-5375
Location: EL-110
Hours: Monday – Thursday 8:00 a.m. – 4:30 p.m.
       Friday 8:00 a.m. – 3:30 p.m.

The services provided by the DSP&S program are designed to minimize the effect a disability may have on a student’s academic, social and cultural performance while attending Los Angeles Trade Technical College. A primary goal of the statewide Disabled Students’ Program and Services is to assure
an equal educational opportunity for students with disabilities. DSP&S is an integral part of the college and provides the following support services to students with long-term and short-term disabilities:

- Specialized counseling and advisement for students with disabilities.
- Priority Registration - Assistance provided in scheduling classes and completing the registration process.
- Parking - Issued to students with medical documentation of a physical disability or health impairment. A disabled placard is usually required.
- Special accommodations: Sign Language Interpreters, tutors, test proctoring, readers, and note takers available upon request.
- Materials available in alternate media format upon request.
- Liaison with the College’s Instructional Staff.
- High Tech Computer Center Lab that offers computer-assisted instruction in a format accessible to students with disabilities. The tables and computer keyboards can be adapted, and text may be enlarged and/or read aloud. Voice activated systems are available for students who may not be able to use a keyboard. The computers may be used for coursework or skill-building activities. Internet access is also available.
- Liaison with the State Department of Rehabilitation and other agencies providing services for the disabled.

To request services please call 213-763-3773.

***ATTENTION DISABLED PLACARD HOLDERS ONLY***

If the building elevators are not functioning. Please contact the Sheriff’s Office at 213-763-3600, or you may also use the emergency blue phone next to the elevator.

The Extended Opportunity Programs and Services (EOPS) is a college success, counseling support program for low income and educationally disadvantaged students. EOPS students receive assistance and support with their college education. Special attention is given to identify, plan, develop and achieve the academic, career and personal goals of our students.

The EOPS Counseling Faculty assists students with various issues relating to their academic, career and personal development. EOPS Counselors understand that students may be unfamiliar with the college environment and culture; therefore, they are readily available to guide you during your academic journey at LATTC. They assist students with the registration procedures, and guide them with class selections, generate a student educational plan (SEP) and acquaint them to the resources available on campus. They also work with students on a personal level as they know that students may encounter many life obstacles and challenges that can interfere with their pursuit toward achieving their academic goals. EOPS Counselors believe that students should be given the appropriate tools and skills to enhance their college experience. They consistently sharpen their counseling skills, techniques, interventions, logic and intuition to help students in making decisions that lead to a successful college and life experience.

The CARE (Cooperative Agencies Resources for Education) Program is targeted at providing educational opportunities and enhancing personal growth to students receiving CalWORKS. CARE students must be single head of household, a CalWORK recipient and meet EOPS eligibility. It is our commitment to extend support services to CARE students in order to help them achieve their educational goals at LATTC. The concept of “over & above” in assisting CARE students is embraced and exercised among our dedicated staff.

**Services:**
- Childcare Assistance
- Counseling
- Educational and Developmental Workshops
- Access to Community Resources
- Meal Tickets
- Resource Referrals
- Transportation Assistance
- Educational Supplies

</tbody>
</table>

GAIN/CALWORKS is a job training program that provides extensive services for the participants receiving Temporary Aid for Needy Families (TANF). Educational services include instructional programs in Adult Basic Education, GED Preparation, Tutoring, English as a Second Language, Vocational ESL, AA/AS Degree Programs, Career Technical/vocational educational training and Personal Development.
Student Services and Academic Resources

The GAIN/CalWORKs staff provides extensive services for the participants receiving Temporary Aid for Needed Families (TANF). Our highly trained staff provide academic, career and personal counseling and case management. Job development including career/lifeskills workshops, work study, work experience, community service and post employment services are also available. Childcare is provided through our campus Child Development Center.

The collaborative services with the County Department of Public Services/GAIN (DPSS) include: contracts, childcare, transportation, textbooks, and supplies, progress reports, training and employment and outside agency verifications. Collaborative partnerships with the campus Student Employment Center, Employment Development Division (EDD) and County DPSS/GAIN involve: Job Fairs, Job Assistance, Employment Skills and Career Workshops. We work closely with One Stops, Work Source Centers, Workforce Investment Boards and, other community based agencies including our CalWORKs Advisory Board.

The ultimate program goal is to provide quality training and services to all eligible students in their transition from welfare-to-work.

INFORMATION CENTER

Phone: (213) 763-5337
Location: JH-Lobby
Hours: Monday – Thursday 8:00 a.m. – 7:00 p.m.
       Friday 8:00 a.m. – 3:00 p.m.

The College Information Center is the place to visit! The Center provides information about the campus, various programs, and provides assistance with all student related inquiries. The Center issues ticket numbers for department services. The center conducts group campus tours and issues student identification cards. Bilingual assistance is available.

OMBUDSPERSON

Phone: (213) 763-7066
Location: JH-532

The College Ombuds person is available to assist students to informally seek resolution to concerns and problems they encounter.

PUENTE PROJECT

Phone: (213) 763-3771
Location: JH-413
Hours: Monday – Thursday 8:30 a.m. – 4:30 p.m.

The Puente Project is an academic preparation program whose mission is to increase the number of educationally disadvantaged students who:
- Enroll in four-year colleges and universities
- Earn college degrees
- Return to the community as mentors and leaders for future generations.

Puente uses a combination of teaching, counseling and mentoring to achieve its educational objectives. These three components combine to provide a focused and engaging learning community that allows students to achieve greater gain than would be possible using any single component alone-the whole is greater than the sum of its parts. To be eligible for the program prospective Puente students must:
- Attend a Puente orientation in the spring or summer prior to entering the program in the Fall semester
- Enroll in four-year colleges and universities
- Take a half-hour writing prompt the day of the orientation
- Be interested in transferring to a four-year university
- Be eligible to register for English 28 in the Fall semester
- Be willing to make a one year commitment to the program
- Be willing to take Puente English and Personal Development classes during Fall and Spring semesters
- Be available to participate in extracurricular activities

STUDENT HEALTH CENTER

Phone: (213) 763-3764 and (213) 763-3765
Location: EL-102
Fall and Spring Hours:
- Monday & Wednesday 8:00 a.m. – 6:00 p.m.
- Tuesday & Thursday 8:00 a.m. – 4:00 p.m.
- Friday 8:00 a.m. – 2:00 p.m.

The LATTC Student Health Center in partnership with Mosaic Health Services provides many services for currently enrolled students. The Student Health Fee provides the majority of services free of charge.

This includes:
- Non-emergency care, including health screenings, general physical exams and limited treatment of illnesses
- Health and nutrition Information; health education literature
- Free immunizations
- Laboratory tests
- TB skin tests
- Mental health and substance abuse counseling
- Women’s health services
- Health workshops

UNIVERSITY TRANSFER CENTER

Phone: (213) 763-7154
Location: JH-203
Hours: Monday 9:00 a.m. – 6:00 p.m.
       Tuesday 9:00 a.m. – 3:30 p.m.
       Wednesday 9:00 a.m. – 3:30 p.m.
       Thursday 9:00 a.m. – 4:00 p.m.
       Friday 9:00 a.m. – 1:00 p.m.

The University Transfer Center’s primary purpose is to assist students interested in transferring to a four-year college or university. The Center serves as a valuable resource to students who have questions regarding course preparation, admission requirements, transfer admission guarantee
programs, college and university searches, articulation agreements, financial aid, housing, and other transfer issues. Representatives from the University of California System, the California State University System, as well as private institutions such as USC, visit the Center to provide up-to-date information to students via workshops or individual appointments. Catalogs, brochures and applications are available for the UC, CSU, and private institutions, including a wealth of on-line resources. Visit our website: http://college.lattc.edu/transfer/

**VETERANS SERVICES**

**VETERANS STUDENT CENTER**

- **Phone:** (213) 763-5305 or (213) 763-5572
- **Location:** RH-100A
- **Hours:** Monday – Thursday 8:00 a.m. – 4:30 p.m.
  - Friday 8:00 a.m. – 3:00 p.m.

Los Angeles Trade-Technical College courses are approved for the training of eligible Veterans, Reservist, National Guard, and eligible dependents, under Federal and State Assistance programs. In order to start training under any of these programs, eligible students should visit the Veterans Student Center located in Building RH-100A.

All Veterans Administration rules and regulations apply to all eligible students attending a Los Angeles Community College and receiving benefits under Chapter 30, 31, 33, 35 & 1606 and National Guard of the United States. All benefits have to be approved through the Department of Defense (DOD).

**CREDIT FOR PRIOR MILITARY SERVICE**

**TRAINING**

Veterans and other eligible persons who are receiving benefits must provide the College with documentation of all previous educational and training experience, including Military Service Training Schools and/or Military Occupational Specialties. This experience will be evaluated and appropriate credit granted.

**ATTENDANCE AND WITHDRAWAL**

Students are required to attend all meetings of every class in which they are registered. The last day of a student’s attendance in class must be reported to the Veterans Administration (VA) to avoid overpayments. It is the responsibility of the student to immediately inform the Office of Veterans Affairs of any reduction in unit load. It is the responsibility of the instructor to notify the Admission Office of the last day of attendance of students. The Veterans Administration will then be notified in a timely manner of the students who withdraw from class.

**PROGRAM PLANNING FOR VETERANS**

To be eligible for VA Education Benefits the student must select a major and choose courses from those listed under the major in the catalog. The student is advised to seek counseling from Counseling Services. The Veterans Administration will not pay benefits for courses that do not fit in a student’s selected major. If a student has prior training and education from another institution, it is the student’s responsibility to have the transcripts forwarded to the Admission Office.

**ACADEMIC REQUIREMENTS**

All students are subject to the academic standards for probation and dismissal as listed in this catalog. If a Veteran or other eligible person fails to obtain a cumulative grade point average of 2.0 or better after 3 consecutive semesters, the student’s educational benefits will be discontinued.

**60 UNIT RULE AND UNIT WORKLOAD**

Once the student has received units sufficient to equal or exceed the normal program printed in the catalog, the Office of Veteran’s Affairs must certify the additional units needed for the student to complete the Associate degree in any major. The student is eligible for further training at the college only by taking courses which are required for upper division status at a transfer institution, or by changing the objective. These courses must be approved by the Veterans Administration. The 60 Unit Rule requires that an eligible student see a counselor before any more courses can be certified by the Office of Veteran’s Affairs for payment of benefits.

The Veterans Administration uses the following definition for eligibility:

- **full-time benefits:** 12 or more units
- **3/4-time benefits:** 9 through 11 units
- **1/2-time benefits:** 6 through 8 units
- **less than 1/2 time:** 3 through 5 units (Reservist and National Guard)

**ACADEMIC SUPPORT SERVICES**

**CENTER FOR ACADEMIC SUCCESS**

- **Phone:** (213) 763-3754
- **Location:** RH-106

The Center for Academic Success provides students with academic instruction and support services in an environment that facilitates successful retention and persistence during their academic career. The Center focuses on the individual needs of all LATTC students by providing courses, workshops, tutoring, computer access, and instructional resources to help ensure success in their academic, career, and personal goals. A Los Angeles Trade Technical College student ID is required for all Center for Academic Success services.

**Learning Skills/Non-Credit Computer Lab and Classroom Courses**

The Center for Academic Success offers credit Learning Skills and non-credit Basic Skills courses to all students who want to reinforce their skills as independent critical thinkers, analytical readers, and proficient writers, effective mathematic problem solvers with the use of practical study strategies while mastering course materials. The Learning Skills computer lab is available to LATTC students taking Learning Skills/Basic Skills courses in basic reading, writing, math, spelling, vocabulary, computer literacy, and GED preparation. The Lab hours are Monday through Thursday from 8:00 a.m. to 6:00 p.m., Friday 8:00 a.m. to 2:00 p.m. in RH-106. Winter and summer hours may vary. For more information, please call (213) 763-3754.
Tutoring Center
Free tutoring services are available to all LATTC students. Tutoring is conducted in one-on-one and small group formats. Students need an instructor or counselor referral to obtain tutoring services. The Center also provides interactive workshops on a variety of math, reading, writing, and computer literacy topics. Basic Moodle and Mahara assistance is also provided. The Tutoring Center hours are Monday through Thursday from 8:00 a.m. to 6:00 p.m. and Friday 8:00 a.m. to 2:00 p.m. in RH-106. Winter and summer hours may vary. For more information, please call (213) 763-3754.

Reading Center
The Reading Center assists students in the development of reading, spelling, vocabulary, and study skills. Students receive individualized and groups reading sessions that are interactive and content based. Workshops in reading strategies are also conducted. The Reading Center hours are Monday through Thursday from 8:00 a.m. to 6:00 p.m. in RH-106. Winter and summer hours may vary. For more information, please call (213) 763-3754.

Writing Center
The Writing Center provides one-on-one and small group tutoring to all LATTC students. Tutors focus on providing overall critical thinking skills, organizational skills, and error analysis to help students become better writers. Tutoring is provided in 30 minute sessions. With an appointment, DSPS students are provided 45 minute tutoring sessions. The Writing Center hours are Monday through Thursday from 8:00 a.m. to 6:00 p.m. in RH-106. For more information, please call (213) 763-3754.

The Open Computer Lab
The Open Computer Lab (“Open Lab”) is available to all LATTC students and faculty free of charge. Students must be enrolled at LATTC or any college in the Los Angeles Community College District and have a current student ID card. Students may use the Open Lab for general computer use, the Internet, and online class access. Students may receive basic computer literacy assistance in the use of email, Microsoft Office, and other instructional software. Technical assistance for online classes is also available. The Open Lab hours are Monday through Thursday from 8:00 a.m. to 8:00 p.m., Friday 8:00 a.m. to 2:00 p.m. in RH-109. Winter and summer hours may vary. For more information, please call (213) 763-3754.

HONORS PROGRAM
Phone: (213) 763-7158
Location: University Transfer Center, JH-201
Website: http://college.lattc.edu/honors/

The Los Angeles Trade-Technical College (LATTC) Honors Program is designed to encourage the development of talent and ability in highly motivated students as they begin their academic studies and prepare to transfer to a four-year college or university. The program provides:
- Interaction with other highly motivated honors students
- Increased scholarship opportunities
- Enrichment seminars and activities
- Priority consideration when transferring

Approved Honors classes:
- Anthropology 101
- Anthropology 102
- Art 101
- Chemistry 211
- Chemistry 221
- English 101
- English 102
- English 103
- English 205
- English 206
- English 212
- English 215
- English 220
- History 11
- Music 141
- Speech 122

LIBRARY
Circulation Desk: (213) 763-3950
Reference Desk: (213) 763-3962
Location: South Commons - South Campus
Hours: Monday – Thursday 8:00 a.m. – 6:00 p.m.
Friday 8:00 a.m. – 1:00 p.m.
Closed Saturdays, Sundays & school holidays

Summer and winter intersession - Library hours may vary. For more information, please call (213) 763-3950.

The Library is located in the South Commons - South Campus. The Library offers a diverse collection of curriculum-centered, academic and vocational education materials. Research resources include Library subscription databases, books, a selection of Faculty Reserve course textbooks, print periodicals, and internet access. The book collection, research databases and online periodicals are accessible 24/7 via the online public access catalog and the Library research databases remote access available at website: http://library.lattc.edu. The Library offers free, time-limited internet access to currently enrolled LATTC students and individual study areas. Small group rooms are available. Students need a valid, current student identification card to qualify for Library borrowing privileges. Loan periods are four weeks for circulating books and two hours or one week for selected Library Reserve materials.

Faculty Librarians offer individualized research assistance at the Reference desk and educate students in developing research skills to enable them to succeed in their course work and research interests. Library Faculty also offer Library resources instruction in Library workshops, Faculty-scheduled Library orientations, and one-unit Library Science 101 Library Research Methods classes. Library Reference (213) 763-3958.

COMMUNITY PROGRAMS AND ALTERNATIVE EDUCATION

LATTC ON-LINE PROGRAM
For a current listing of LATTC On-Line Program courses go to http://moodle.lattc.edu and click on the Student Information button.

What do you need to take an on-line class?
- Computer access where you can regularly connect to the Internet, plus
- Sufficient computer skills to send/receive email and to navigate the World Wide Web, and
- Ability to log into the Student Information System (SIS) and use the LACCD-issued student email account. Students may forward email from the LACCD account to a personal account.

How to register for on-line classes:
- If you are an existing LATTC student, just enroll in the online class as you would any other class, or
- If you are a new LATTC student, enroll in the college first. Please go to http://www.lacolleges.net/admissions/ to enroll online. Once you
are enrolled in the college, you can proceed to register for your online class. You should print the confirmation of online enrollment page at the end of the process. The online applications take two days to process.

What to do after you register for an online class:
- Go to the LATTC Moodle home page at http://moodle.lattc.edu
- Download the Online Student Guide and read it carefully. A new guide is created for each term, so get the correct guide.
- Be sure to check if your class requires a campus edition of a textbook to coordinate with your online class. If you purchase the textbook at another campus, the key may not work for your LATTC class.
- Check the System Requirements button to get information on preparing your computer to take online classes. You'll need to be able to enable pop-ups and cookies on your computer.

Students who will be using the Moodle course management system will be able to log into one week prior to the start of the class. Login is identical to that for the Student Information System. Login id = Student ID number and password was originally set to mmdd of date of birth. If a student changes that for the Student Information System, then it changes the password for Moodle since they use the same authorization process.

Students who will be using a course management system other than Moodle for their online class will need to either attend the scheduled class orientation or follow all directions on the class home page to set up the software.

Are there any special meetings, either on campus or online? Do I have to log in at a specific time?
Each teacher has the right to request either on-campus or online meetings if they feel it is best to do so. Some of the reasons they may choose to require these meetings is to ensure the student is who they claim to be and is the person actually doing the work. This is a federal mandate. Or, teachers may require an on-campus meeting to provide materials or an orientation to help students get off to a great start.

Most online classes are done asynchronously. This means a student logs in at regular intervals of his/her choosing during the week. Some classes do schedule chats where students gather online at the same time. Some instructors have online office hours at set times for students to log on and get help. Students should log into their class every couple of days and more often for short term classes.

What is considered attendance in online classes?
Online classes consider the weekly submission of assigned work as attendance. Logging into the system and not keeping up with assigned activities is not considered attendance in online or hybrid classes.

Class have already started. How do I get into an online class?
Send the instructor an email request to add the class. This email needs to come from the same ID listed in the Student Information System (SIS). Include your name, student ID number and the class name and section number in your email.

How do I contact my instructor?
The Online Student Guide has a list of instructor phone numbers and email addresses. If you are not successfully contacting your instructor that way, call the department office or the LATTC Online Program office.

What if I need additional information?
You can contact the Online Program Office at 213-763-3733 or 213-373-1167, or email online@student.lattc.edu. If you need to fax forms, the fax number is (213) 406-1237.

---

**INSTRUCTIONAL TELEVISION (ITV)**

Each semester, the District-wide Instructional Television program presents, via television, transferable undergraduate college credit courses. Instructional Television courses are convenient, flexible and especially suitable for college students needing to supplement their oncampus program or to add classes for those times when campus attendance is not possible.

Students enroll by mail, telephone or the Internet. They may view telecourse lessons at home or at a Learning Center at one of the Colleges. Students will complete reading and study assignments, attend seminars held approximately once a month on weekends at a Los Angeles Community College near their home, and complete a midterm and final exam. Interested students are invited to attend the ITV class orientations held at the beginning of each semester or to visit the Instructional Television program on the campus of Los Angeles Mission College, 13356 Eldridge Avenue, Sylmar, CA 91342. Call 800-917-9277 or (818) 833-3594 for information.

---

**BRIDGES TO SUCCESS CENTER**

Location: JH-316

Hours: Monday—Thursday 7:30am – 7:00pm
Friday 7:30am – 1:00pm

Telephone: (213) 763-5560
Fax: (213) 763-5979
E-mail: bridge@lattc.edu

**BRIDGES TO SUCCESS CENTER PROGRAMS AND SERVICES**
- Bridge to College Program: K-12 Concurrent Enrollment
- Provides students the opportunity to concurrently enroll in college courses while still in high school, getting early college experience and take advantage of advanced scholastic and educational enrichment opportunities for eligible students

**High School and GED Diploma Program**
- Instructor-led college preparation courses strengthen students' reading, writing, math, critical thinking and study skills in preparation for college placement, ATB, CAHSEE, GED and HS diploma completion

**Assistance for AB 540 Students**
- Assist and inform eligible nonresident students of existing law establishing that California High School graduates are authorized to attend community college and be exempt from nonresident tuition

**Continuing Education**
- Provides non-credit courses, free of charge, in subject areas such as ESL (English as a Second Language), Citizenship, Basic Computer Skills, and CPR/First Aid Courses.

**Career and Job Training**
- Provides training free of charge to facilitate student entry into various fields such as:
  - Green Construction/Clean Energy
  - Healthcare Prep
  - Bank Teller Training
  - Employment Prep
EARLY COLLEGE/CONCURRENT ENROLLMENT

Phone: (213) 763-5560
Location: JH-316

The Early College Program at Los Angeles Trade-Technical College (LATTTC) provides students the opportunity to concurrently enroll in college courses while still in high school. The purpose of the program is to provide advanced scholastic and educational enrichment opportunities for eligible students. Students who desire to participate in concurrent enrollment must be recommended by their principal or counselor and have parental permission. Early College students can take degree-applicable, noncredit, vocational and transferable courses. Students are required to complete a Special K-12 Admission Application for each semester. Special admissions criteria apply for K-8 students. For additional information contact the Early College Program at 213-763-5560 or by email at bridge@lattc.edu.

21ST CENTURY GRANT

Phone: (213) 763-5509
Location: H-320
Hours: Monday — Friday 8:00am – 4:00pm

The 21st Century Program, funded by the No Child Left Behind Act (NCLB), offers an enriching experience that is specifically designed to boost middle school students’ performance in Mathematics, English, Reading and Science. This after-school program is designed to enhance students’ knowledge and prepare them for future college or university coursework. Students are given the opportunity to take college-level courses that may be credited towards high school electives or an associate’s or bachelor’s degree. For more information call (213) 763-5510. The 21st Century office is located in JH-320.

FOSTER & KINSHIP CARE EDUCATION PROGRAM

Director: Dr. Dione Washington
Phone: (213) 763-3665
Location: CY-324

The Los Angeles Trade-Technical College Foster and Kinship Care Education Program is highly dedicated to meeting the educational needs of foster/kinship youth, foster parents, adoptive parents, relative care providers, non-relative extended-care providers and legal guardians.

Our primary goal is to produce the 4 E’s: Enlightened, Effective, Efficient, and Encouraged care providers and foster youth.

We are currently offering motivating and resourceful events, seminars and workshops. Available workshops include: Foster & Kinship Care Education (FKCE); Independent Living Program – “Project YESS Program”; Working with Special Needs Children (D-Rate Certification & Renewal); Working with The Medically Fragile Child (F-Rate Renewal); and Partnering for Permanence and Safety, Model Approaches to Partnerships in Parenting (PS–MAPP/Foster Parent Certification).

STUDENT ACTIVITIES

Phone: (213) 763-7200
Location: RH-105

The Student Activities Office provides opportunities for students to engage in educational, social and community service activities in and outside the classroom. Services such as the Dean’s Honors Awards Ceremony, club activities, discounts to social events, publicity through the student bulletin and bulletin boards are offered. Other activities handled by this office include: weekly ASO student government board meetings, ethnic and multicultural programs, club fairs, blood drives and scholarships. Students who participate in the activities become familiar with the civic and legislative process.

ASSOCIATED STUDENT ORGANIZATION (ASO)

Membership

ASO programs are supported by a $7.00 membership fee, available at the Business Office for day and evening students. These fees help support the services ASO provides. Any student, upon enrolling, is eligible to become a paid member of the Associated Student Organization. Members are entitled to all rights and privileges, including educational, social and community services programs and all associated activities.

Organization

The governing body of the Associated Students, the Student Council, is composed of the Executive Board which consists of the President, Vice President, Parliamentarian, Treasurer, Historian and the Recording Secretary. The Senators serve as the representative liaisons for every department on campus. Commissioners are also approved as voting board members who serve in specialized positions.

The purpose of student government is best expressed in the preamble to the constitution: “We the students of Los Angeles Trade-Technical College, in order to guide and encourage cultural, social, athletic, and scholastic activities, to promote the welfare of the students, and to provide a representative student government, do hereby establish this constitution, and assume the powers of self-government delegated to us by the President of the College.”

All students are encouraged to become involved in the governance of their affairs by becoming department representatives or by running for an elected office. Governance flow is from individual students to department representatives to the student council and in reverse. Elections are held every spring for the Executive Board positions. Officers are elected for a one year term.

LATTC is a member of the California Community College Student Affairs Association (CCCSAA) and the California Student Association of Community Colleges (CAL-SACC). The two organizations meet separately each semester to discuss topics in Student Government and activities of importance to the member schools. The groups were organized to help promote better relations among the community colleges of the state and to help solve problems relative to each. Trade Tech regularly sends delegates to these statewide and regional meetings.
Qualifications for ASO Officers (Administrative Regulation S-9)
Los Angeles Community College District Administrative Regulation S-9 pertains to elected Associated Student Organization (ASO) officers only. Others appointed such as Senators and Commissioners are governed by the ASO By-Laws.

Regulation S-9 is as follows: "A student cannot be a candidate for ASO office if he or she has served more than four semesters in a student government elected and/or appointed office, or in any office or position where he or she voted on the expenditure of ASO funds in any college. An officer may serve a fifth semester if he or she is eligible at the time of assuming office (e.g., has served three semesters and is a candidate for an office with a one-year term). Ten weeks or more of student service in office or service anytime after the tenth week, will be counted as a full semester. All students running for office must be paid members in good standing in the Associated Students Organization at the college where the election is "held."

A student officer or a candidate for office must be actively and continuously enrolled, attending and successfully completing classes in a minimum of 5 units with a cumulative and current GPA of 2.0 at the College during the semester in which the student government office is applied for or held. All units must be taken at the college where the office is sought or held. Student officers reducing units below the required number automatically forfeit their student office.

Student Trustee Election Procedure
The Los Angeles Community College District conducts an election annually whereby each student in the District has an opportunity to be involved in the process of selecting a student representative to the Los Angeles Community College district Board of Trustees. Student Trustee eligibility requirements can be found on the LACCD website.

STUDENT SERVICES AND ACADEMIC RESOURCES
STUDENT SERVICES AND ACADEMIC RESOURCES

CAMPUS CLUBS AND ORGANIZATIONS

Inter-Club Council
The Inter-Club Council is composed of the ASO Vice-President, who serves as chairman, and the Vice-Presidents of all campus clubs. It is the purpose of the Inter-Club Council to serve as a coordinating and planning body for club activities, for an improved program of student activities and, as a liaison between the college clubs. LATTC has had a number of consistent clubs.

STUDENTS ARE ENCOURAGED TO ORGANIZE NEW SPECIAL INTEREST CLUBS ON CAMPUS. Before a group is recognized officially, a constitution must be submitted and approved by the ASO Advisor and Executive Board. Every club is required to have a Faculty Advisor. An Administrator can also serve as a Club Advisor.

COLLEGE COLORS AND MASCOT
The college colors are purple and gold. The college mascot is the Beaver, and Trade Tech students are known as Beavers.

STUDENT INTERCOLLEGIATE ATHLETICS

Phone: (213) 763-3726
Location: WH-202

Trade Tech College is a member of the South Coast Conference of which there are 10 colleges. The other colleges are: East Los Angeles College, Los Angeles City College, El Camino College, Cerritos College, Long Beach City College, Mt. SAC College, Pasadena City College, Los Angeles Southwest College, and Compton College. In the Fall, sports offered are Men’s and Women’s Cross Country, Men’s and Women’s Water Polo, Men’s and Women’s Basketball and Women’s Volleyball. In the Spring, sports offered are Men’s and Women’s Track and Field and Men’s and Women’s swimming.

To be eligible for intercollegiate athletic program participation, students must be enrolled and attending 12 or more units. Between seasons of competition in a sport, students must complete 24 units and maintain a 2.0 G.P.A.
**BUSINESS OFFICE**

Phone: (213) 763-7225  
Location: JH-Lobby  
Hours: Monday — Thursday 8:30 a.m. — 7:00 p.m.  
          Friday 8:30 a.m. — 3:00 p.m.

Student accounts are managed through the College Business Office. Student fees including enrollment fees, nonresident tuition, health fees, parking, Associated Student Organization, child care, transcripts and Community Service fees are payable at the Business Office. Upon payment of fees, the Business Office then issues student’s official confirmation of course enrollment/fee receipt. In addition, the Business Office accepts, disburses and accounts for some student financial aid, loan and scholarship checks, and issues all student refunds. Metropolitan Transit Authority bus passes and tokens are also available for sale at the Business Office.

**BOOKSTORE**

Phone: (213) 763-7210  
Location: CH-102  
Hours: Monday — Thursday 7:30 a.m. — 6:30 p.m.  
          Friday 7:30 a.m. — 3:00 p.m.

See Bookstore website: http://www.lattc.bkstr.com

**Bookstore Return / Refund Policy**

**A. Textbooks**

Textbooks must be returned within the first 15 school days of the Fall and Spring semester, and within the first 5 days of Summer and Winter Sessions, and short-term courses. Textbooks purchased after the 15th school day must be returned within 24 hours.

All textbooks being returned must be accompanied by an ORIGINAL DATED CASH REGISTER SALES RECEIPT issued by the Bookstore. NO EXCEPTIONS!

Refunds and/or exchanges will not be allowed on textbooks purchased during the last 4 (four) weeks of the semester. No refunds will be allowed after the 1st week of the Summer and Winter Sessions.

Textbooks must be returned in the same condition as when purchased, with final determination of condition made by the Bookstore Staff. New textbooks must be in new condition (no writing or marks of any kind). Textbooks failing to meet the policy will be considered Used and be governed by the Used textbook policy. Catalogs, Class Schedules, Paperbacks, Study Guides, Dictionaries, Clothing, Workbooks, Computer Discs, and specially assembled kits are not refundable.

**B. Supplies and Tools**

Materials required by a specific class may be returned during the first 15 days of the Fall and Spring semesters and within the first 5 days of the Summer and Winter Sessions. Items must be accompanied by a dated cash register receipt and must be in NEW condition. After the 15-day all returns must be made within 24 hours. NO REFUNDS will be given for any clothing, athletic supporters, sweat socks, safety goggles, and other “personal items” governed by California Health Laws.

**C. Policy For Personal Checks**

A current LATTCC Registration Receipt or ASO card must be presented when making purchases by personal check PLUS a valid California Driver’s License or California Identification Card. Checks must be imprinted with the student’s name and current address, and drawn on a local bank. Checks will be accepted only for the amount of purchase.

**D. Book Buy-Back Period**

Book Buy-Back periods occur during the final exam week of each Fall and Spring semester. Summer and/or Winter Buy-back dates are not predictable. Buy-back dates are posted with signs and on the receipt.

**COLLEGE CAFE & GARDEN ROOM RESTAURANT**

Phone: (213) 763-7331  
Location: SA-Building

The LATTCC College Cafe offers a wide variety of exceptional menu choices for your dining pleasure. Students enrolled in the Culinary Arts and Professional Baking programs prepare fresh food daily that is served in the on-campus bakery, cafeteria, and Garden Room Restaurant. Selections include hot entrees, hot off the griddle breakfasts, grab and go sandwiches and salads, as well as a variety of fresh baked goods. Join us in the Garden Room Restaurant on Wednesdays for our international buffet, an all you can eat themed menu based on food from all over the world!! The College Cafe can also provide on-site catering for your special events. Please contact 213-763-7331 for more details.

**SHERIFF’S DEPARTMENT**

Phone: (213) 763-3600  
Location: CY-150

The college contracts with the Los Angeles County Sheriff’s Department for all of its law enforcement services. These officers undergo specialized training through the Los Angeles County Sheriff’s Academy designed to meet the needs and problems of a contemporary college.

The college prides itself on its safety record maintained on campus. However, effective law enforcement and protection require citizen cooperation and assistance. To that end, please follow a few basic safety tips: if you must remain in campus buildings after closing time, make an effort to do so in the company of at least one other co-worker, or student. The campus is well lighted but it is wise, again, to employ the “buddy system” when walking to your car or traveling to other locations. Refrain from using shortcuts, staying on the well-traveled thoroughfares.

Personal property, purses, briefcases, etc., should never be left unattended.
Take such items with you if you are leaving the office, classroom, or library study area. Keep your auto locked, never leave the keys in the ignition, and avoid leaving property where it is visible on the seats. Give your car the quick “once over with a critical eye” before entering, for possible break-in or persons in the rear seat or floor area.

The rapid and successful detection of crime and apprehension of criminals depends heavily on speedy reporting and dissemination of facts to the College Sheriff’s Department. For information, inquire at the “CY” building, Room 150 or call (213) 763-3600.

The lost and found is located in the College Sheriff’s Department, Rm. CY-150. A valid California Driver’s License, California Identification Card or LATTC Student Identification Card is required for claimed property.

**STUDENT PARKING**

*See Also: Parking Fees and Permit Sales*

---

**GENERAL INFORMATION**

Please note: At the time of this publication, every effort was made to indicate available parking at the college. Construction demands will create changes and Information will always be available through the College Sheriff’s Office, CY150, (213) 763-3600, 24 hours per day, 7 days a week.

Parking permits must be displayed at all times when a vehicle is parked on campus, including week-ends. Individuals who are unsure as to where to park, or where a permit is recognized as valid, are encouraged to contact the College Sheriff’s office for clarification prior to parking their vehicle in a College parking lot.

Lot identification signs showing which lots are for use by students, visitors, and/or employees are posted at the entrance to College parking lots unless specifically re-directed by College Sheriff personnel. Students may not park in any space designated for specific use. Parking in a space designated for specific use can result in a citation for failure to display a valid permit.

Vehicles displaying an invalid parking permit are subject to citation. Invalid permits include, but are not limited to: permits that have been altered, reported lost or stolen, or issued to an individual other than the permit holder (in which case are subject to confiscation), and also permits in which the authorization period has expired, or are not clearly and completely visible.

Individuals using or obtaining a permit illegally are subject to administrative disciplinary action.

Student and visitor parking is allowed in designated lots as follows:

- **Preferred Student Parking** ($27.00 and includes $7.00 ASO fee) is in the Olive Street Parking Facility, Ironwood-Building Roof Lot.
- **General Student Parking** ($20.00) is in the 18th Street & Grand Avenue Lot and at Glory Church located at Washington Boulevard & Grand Avenue.
- **Summer & Winter Sessions** ($10.00) for General Student Parking is accepted in Preferred Student Parking areas above.
- **Disabled Parking:** Students/Visitors, Roof Lot and Olive Street Parking Structure or as directed by parking attendant. A valid LATTC parking permit and a DMV placard must be displayed on any vehicle parked in a designated handicapped stall. Students with a verified disability should go to the Disabled Students Program and Services Office, EL-110, to arrange for an accommodation. If for any reason the elevator is not available, contact College Sheriff at 213-763-3600.
- **Motorcycle and Moped Parking:** No permit required; parking is, however, restricted to the designated motorcycle/moped parking area located on the east side of Building D only (enter from Grand Ave.).
- **Bicycle Parking:** No permit required but restricted to designated areas; bike racks are located throughout the campus.
- **Guest Parking:** Guests coming to the campus may obtain a guest permit at the Main Gate (entrance to the Roof Lot) or from the College Sheriff Office, CY-150. Guest permits are issued on a limited day basis only. Parking is available on the Roof.

**Saturday/Sunday Parking Permit Adjustment**

Unless directed otherwise by College Sheriff personnel due to a special event or other College activity, lot designations are enforced on weekends as printed on the parking permit.

---

**PARKING RULES AND REGULATIONS**

Parking rules and regulations are enforced 24 hours a day, including Saturdays, Sundays, and holidays. A valid parking permit must be displayed at all times the vehicle is parked on campus. The permits are made of removable mylar and should be affixed to the inside rear window, (lower right side, facing outward.) Failure to display a valid parking permit will result in issuance of a citation.

Student parking permit regulations are enforced from the first day of classes each semester through the last day of final examinations. Student vehicles parked in places not authorized for student parking are subject to citation or tow away at owner’s expense. Permits are not valid at parking meters.

All traffic and road signs must be obeyed. Speed limit on campus is eight (8) miles per hour. All vehicles shall be parked clearly within the designated lines. Vehicle parking regulations applicable to motorcycles and mopeds will be enforced at all times.

Regulations governing handicapped parking, red curbs, no parking zones, fire lanes, loading docks, special permit areas, and areas having time limitations are enforced at all times. Illegally parked vehicles may be towed away at owner’s expense.

- Trade Tech recognizes other student parking permits in the Los Angeles Community College District.
- Construction zones and special college events may cause access to parking areas and roadways to change. Please follow directions on signs carefully.
- No vehicle, motorcycle, or moped may be parked overnight on campus.

---

**ENFORCEMENT OF TRAFFIC AND PARKING REGULATIONS**

All persons driving a motor vehicle on campus are required to comply with the traffic laws of the State of California and the rules and regulations pursuant to Section 21113A of the California Vehicle Code. Violations of the regulations set forth above will result in a citation being issued. The College reserves the right to remove vehicles from parking lots as follows: abandoned vehicles; vehicles parked in such a manner as to constitute a serious hazard; vehicles which impede the operation of emergency equipment; abandoned vehicles; vehicles which park illegally on a recurring basis. The registered owner is responsible for any removal costs which may occur.
Liability
Los Angeles Trade-Technical College, the Board of Trustees, and the Los Angeles Community College District shall not be responsible for damage to any motor vehicle, theft of its contents, or injury to persons operating a vehicle parked on or off the campus unless liable under Government Codes including, but not limited to Government Code 810 to 9666.6 inclusive (Reference: LACCD Board Rules 7401 and 7402) Direct inquiries to College Sheriff, CY-150, (213) 763-3600.

CITATIONS AND BAIL
Citations will be issued to all vehicles on college property in violation of parking rules and regulations and must be paid within 21 days of the date issued. Parking Citation Appeals: Individuals who believe a parking citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available at the College Sheriff Office, CY-150, or the LATTCC Sheriff Department website under Parking Citations and Appeals). Appeals must be mailed to: Los Angeles Trade Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA 92711. Failure to immediately pay or appeal a citation may result in substantial penalties and a Department of Motor Vehicle (DMV) hold on vehicle registration. Please call or contact the Sheriff’s Department in person to obtain the results of your appeal.

PARKING INFORMATION AND ASSISTANCE
Inquiries regarding the College’s parking program should be directed to the offices listed below during normal business hours. College Sheriff personnel are, however, on duty 24 hours a day, seven days a week to assist with permit use and enforcement issues.

- Parking Rules, Regulations, Permit Use, and Enforcement: College Sheriff, CY-150 (213) 763-3600.

NOTE: The parking information shown above is subject to change without notice.

PARKING FEES AND PERMIT SALES
Parking Fees
A limited number of student parking permits are available for purchase at the Business Office for $27.00 for Preferred Student Parking (includes $7.00 ASO fee), or $20.00 for General Student Parking is in the 18th Street & Grand Avenue Lot and at Glory Church located at Washington Boulevard & Grand Avenue per permit per semester. The purchase of a parking permit does not guarantee a parking space; it is only a license to park one vehicle in designated parking lots as posted at the entrance of each parking lot. Parking permit sales begin at the time of registration for the effective semester on a first-come, first serve basis while supplies last. Student parking permits are purchased at the Business Office, JH-Lobby, as part of the registration process. All enrollment fees must be paid in full before the permit can be issued.

Refunds
Student parking fees are refundable each semester through the enrollment refund period. (Please see the current semester’s schedule of classes for the exact deadline date.) The parking permit must be returned at the time the refund is requested.

Lost or Stolen Permits
There is no replacement for lost or stolen permits. A student may, however, purchase another parking permit should one be available. Lost or stolen permits should be reported to the College Sheriff, CY-150, immediately.

TRANSPORTATION
The college is located near the intersection of the Harbor and Santa Monica freeways, and is directly across the street from the Metro Blue Line’s Grand Avenue and Metro Expo Line’s 23rd Street stations. In addition to the light rail system, there are more than 40 bus lines stopping at or within two blocks of the College. For more information, please consult the College website at www.LATTC.edu.
GRADUATION REQUIREMENTS

ASSOCIATE DEGREE
The Board of Governors of the California Community Colleges has authorized the Los Angeles Community College District Board of Trustees to confer the degrees of Associate in Arts and Associate in Science. The program of study leading to the Associate Degree requires sufficient depth in a field of knowledge (the major) to contribute to lifetime interest and broad exposure to other areas of learning (the general education requirements).

Philosophy of General Education
General Education symbolizes a successful attempt on the part of the college to lead students through patterns of learning experiences designed to develop certain capabilities and insights. Among these are the ability to think and to communicate clearly and effectively, both orally and in writing, to use mathematics, to understand the modes of inquiry of the major disciplines, to be aware of other cultures and times, to achieve insights gained through experience in thinking about ethical problems, and to develop the capacity for, and sense of, self-understanding.

Associate Degree Requirements
The following Associate Degree requirements apply to students entering for the first time after July 1, 1983. Continuing students with uninterrupted attendance and demonstrating satisfactory graduation requirements listed in the catalog in effect at the time of their initial enrollment (Catalog Rights). A continuing student is one who has completed a minimum of one course calendar year, except that completion with a “W” will be accepted for one semester only. Students who interrupt their attendance become subject to any new requirements which are in effect at the time they re-enroll.

I. Unit Requirement
60 to 64 units of degree applicable course credit in a selected curriculum. One credit hour of community college work is approximately three hours of recitation, study, or laboratory work per week throughout a term of 16 weeks.

II. Scholarship Requirement
A “C” (2.0) grade average or better in all college work attempted in the curriculum upon which the degree is based.

III. Competency Requirement.
Students must demonstrate competence in reading, written expression, and in mathematics. The following courses and examinations are approved to meet the competency requirement for the associate degree as defined in Board Rule 6201.12:
A. The competency requirement in reading and written expression may be met by:
1. Completion of a course in College Reading and Composition with a grade of “C” or better. Or
2. Completion of any one of the following courses (or its equivalent at another college) with a grade of “C” or better: English 101; Journalism 101
B. The competency requirement in Mathematics* may be met by:
1. Completion of one of the following courses (or its equivalent at another college) with a grade of “C” or better: Math 123C, 125, 134B or any higher level mathematics with a prerequisite of Mathematics 125 or its equivalent.
3. A score of 3 or higher on one of the following AP Exams: Calculus AB, Calculus BC, Statistics.
4. Completion of the college assessment exam in Mathematics and achieve a score determined comparable to satisfactory completion of Intermediate Algebra (that is, placement in a Math course above Math 125 level)
*Board Rules 6201.14, 62201.12, & 6012.12

IV. Residence Requirement
Completion of at least 12 units of work in residence and attendance at the college during the semester in which the graduation requirements are completed. Exceptions may be made under special circumstances.

V. Course Requirements
Majors requiring 18-35 units complete Graduation Plan A. Majors requiring 36 or more units complete Graduation Plan B. Effective for all students admitted for the Fall 2009 term or any term thereafter, each course counted toward the major requirements must be completed with a grade of “C” or better or a “P” if the course is taken on a “Pass-No Pass” basis.

ASSOCIATE TRANSFER DEGREE (AA-T OR AS-T)
The Student Transfer Achievement Reform Act, Senate Bill 1440 codified in California Education Code sections 66746-66749, guarantees admission to a California State University (CSU) campus for any community college student who completes an “associate degree for transfer”, a newly established variation of the associate degrees traditionally offered at a California community college. The Associate in Arts for Transfer (AA-T) or the Associate in Science for Transfer (AS-T) is intended for students who plan to complete a bachelor’s degree in a similar major at a CSU campus. Students completing these degrees (AA-T or AS-T) are guaranteed admission to the CSU system, but not to a particular campus or major. In order to earn one of these degrees, students must complete a minimum of 60 required semester units of CSU-transferable coursework with a minimum GPA of 2.0. Students transferring to a CSU campus that does accept the AA-T or AS-T will be required to complete no more than 60 units after transfer to earn a bachelor’s degree (unless the major is a designated “high-unit” major). This degree may not be the best option for students intending to transfer to a particular CSU campus or to university or college that is not part of the CSU system. Students should consult with a counselor when planning...
to complete the degree for more information on university admission and transfer requirements.

At the time of catalogue publication, the following AA-T or AS-T have been approved. Please see a counselor for more information.

1. Mathematics
2. Early Childhood Education

**Associate Transfer Degree Requirements**
The following is required for all AA-T or AS-T degrees:

1. Minimum of 60 CSU-transferable semester units.
2. Minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework. While a minimum of 2.0 is required for admission, some majors may require a higher GPA. Please consult with a counselor for more information.
3. Completion of a minimum of 18 semester units in an “AA-T” or “AS-T” major as detailed in the section of the catalog. All courses in the major must be completed with a grade of C or better or a “P” if the course is taken on a “pass-no pass” basis (title 5 § 55063).
4. Certified completion of the California State University General Education-Breadth pattern (CSU GE Breadth) or the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

**Graduation Application for Degree/Certificate**
Applications are available in JH-Building lobby at the Information Desk. Students must complete an application with a Counselor and submit the application in the Admissions & Records drop box located at the Information Desk during the first 6 weeks of the Fall/Spring semester in which the student expects to complete the Degree/Certificate requirements. All students must file an application for degree/certificate evaluation during the first 6 weeks of the semester in which they expect to complete their degree/certificate requirements with a Counselor. Students completing the course work during the Winter/Summer semester Session must submit an application during the first 6 weeks of the preceding Fall/Spring semester. Late applications will NOT be accepted. Applications for Degree/Certificate, of a discontinued instructional program, will NOT be accepted beyond 3 years after the program is removed from the College Catalog. Students should see a counselor for evaluation of requirements for graduation.

Students will be informed by mail of the results of their Degree/Certificate evaluation before the end of the semester in which the application is submitted:
- Fall/Winter Candidate will be notified by December/January
- Spring/Summer Candidate will be notified by May/June

Students who do not meet the graduation requirements must submit a new application during the first 6 weeks of the semester (Fall/Spring) in which they expect to complete all the requirements (excluding Winter/Summer).

By submitting an application the student has the option to participate in the graduation ceremony whether they meet the requirements or not. Students will be notified by mail regarding the Graduation Ceremony held in June.

Students successfully completing all the requirements will be notified through the mail when the degrees/certificates are ready for pick up:
- Fall/Winter semester – will be ready for pick up after June
- Spring semester – will be ready for pick up after August
- Summer session – will be ready for pick up after September

Transcripts from other institutions must be mailed directly to the Admissions & Records Office by the respective colleges for credit.

**STUDENTS MUST PRESENT THE NOTIFICATION CARD AND PICTURE IDENTIFICATION WHEN PICKING-UP DEGREE/ CERTIFICATE.**

Diplomas and/or Certificates will only be held for one year after the Diploma/Certificate graduation date. Qualified graduates who do not pick-up their Diploma/Certificate within the above time frame must submit a request for a duplicate Diploma/Certificate and will be assessed a fee for duplicate preparation.

**CERTIFICATE OF ACHIEVEMENT**
A Certificate of Achievement is issued in State-approved programs designed for students who are looking for instruction with a high degree of specialization. Certificate programs vary in length, but most have 18 or more semester units, and may be pursued on a full-time or part-time basis. Certificate programs are usually one year educational programs that offer courses needed to prepare students for immediate employment. A Certificate program is specific, and no course substitution will be permitted unless approved by the department. A grade of “C” or better is required in each course required for the major.

The Certificate of Achievement shall be granted by Los Angeles Trade-Technical College to any student who successfully completes a sequence of courses established by the department and approved by the college in certain designated programs. That sequence of courses shall include but not be limited to the essential occupational courses required in the major. All courses applied to a certificate program must be completed with a grade of “C” or better.

Application for a Certificate of Achievement must be filed in the semester in which the certificate is granted with a Counselor. Students completing the course work during the summer session must file an application during the first six weeks of the prior spring semester.
2012 - 2013 GRADUATION PLAN “A” STUDENT PROGRAM ADVISEMENT WORKSHEET
for the Associate in Arts or Associate in Science Degree

Student’s Name: ____________________________________________ _________________________________________ ___________________ 
(Please print) Last                                                             First                                                         Middle                                                               Student ID# 

Units Requirement: 60 to 64 units of course credit in a related curriculum. 

Major Requirement: At least 18 semester units of study taken in a single discipline or related disciplines (with a “C” (2.0) grade average or better in all courses). 

Scholarship Requirement: A “C” (2.0) grade average or better in all college work attempted in the curriculum upon which the degree is based. 

General Education Requirements: Successful completion of at least 30 semester units of general education as indicated in the areas below. 

Students who are interested in transferring to a four-year college or university should visit the University Transfer Center, JH-203 or consult with a counselor regarding which courses are transferable.

</tbody>
</table>

#### A. NATURAL SCIENCES
One course (3 units minimum)

- Anthropology 101
- Astronomy 1, 5
- Biology 2, 4, 6, 7, 10, 12, 14, 21
- Chemistry 31, 50, 101, 102, 211, 212, 221
- Chemical Technology 111, 121
- Electronics 2
- Environmental Science 1
- Geography 1
- Geology 1, 6
- Microbiology 1
- Physics 1, 2, 3, 4, 6, 7, 11, 12, 14
- Psychology 2

#### B. SOCIAL & BEHAVIORAL SCIENCES
One course (3 units minimum)

- American Institutions & U.S. History
- History 11, 12, 47, 47, 54
- Labor Studies 1

Students can elect to take a competency exam. The exam is available upon request from the Social Science Dept., room JH-225, (213) 763-3087.

If competency exam was taken and passed, select 3 units from the following courses only:

- Anthropology 102
- Business 1
- Child Development 1, 2, 8, 11, 12
- Economics 1, 2
- Geography 2
- History 80, 87
- Labor Studies 1
- Political Science 2, 7
- Psychology 1, 32, 41
- Sociology 1, 2, 20
- Speech Communications 121, 122

#### C. HUMANITIES
(3 units minimum)

- American Sign Language 1, 2
- Architecture 130, 131
- Art 101, 102, 103, 104, 201, 300, 501
- English 102, 203, 205, 206, 207, 208, 212, 215
- French 1, 2, 20
- Humanities 1, 2
- Labor Studies 21
- Music 101, 111, 141
- Philosophy 1
- Physical Education 741, 742
- Spanish 1, 2, 3, 4, 21, 22, 35, 36
- Theater 100, 210
- Visual Communications 106, 108, 120, 130

#### D. LANGUAGE & RATIONALITY
(6 units minimum)

1. English Composition/English Competency Requirement
   - Completion of one of the following courses (or its equivalent at another college) with a grade of "C" or better
   - English 101

2. Communication & Analytical Thinking
   - To meet the mathematics competency, complete at least one course listed below (or its equivalent at another college) must be completed with a grade of "C" or better
   - Math 104, 115
   - Philosophy 8
   - Speech 101, 151

#### E. HEALTH & PHYSICAL EDUCATION
(3 units minimum)

1. Health 2 or 6 (meets both Physical Education & Health requirements)
2. 1 unit of P.E. and choose one from Health 8, 11, 12, 21

**TOTAL**

**Note**: Nursing students are exempted from the Health requirement. Persons requiring exemption from physical education for medical purposes or extenuating circumstances must file a general petition in the Office of Admissions & Records, JH-Lobby.

Students who take and pass competency examinations are awarded competency credit but no unit credit.

---

You must apply for graduation. Forms and instructions are available in the Admissions and Records Office, Student Services Building, JH-Lobby. Grad petitions must be signed by a counselor.

### Graduation Requirements

2012 - 2013 CALIFORNIA STATE UNIVERSITY GENERAL EDUCATION CHECK SHEET—39 Units Required

Complete at least 30 units of general education including all of Area A and Area B4 which must be completed with a "C" or better for admissions purposes. Students who complete only 30 units will have at least 9 units of lower division courses to complete upon transfer. It is advisable to complete all 39 UNITS OF LOWER DIVISION GENERAL EDUCATION before transfer and to have your GE certified. Full GE certification is required for the AA-T/AS-T degrees. Courses may be used to satisfy both major and general education requirements – the units will be counted only once for the degree.

**Courses listed in more than one area shall not be certified in more than one area.**

**CSU Graduation Requirements**

The CSU graduation requirements listed below are NOT part of the CSU GE Requirements, but may be completed prior to transfer. AMERICAN HISTORY AND INSTITUTIONS – 6 semester units or 9-12 quarter units, with one course selected from each group, may also be credited toward satisfying GE requirements from Areas C, these courses are identified in Area D with this symbol ≠.

GENERAL EDUCATION LEARNING OUTCOMES (GELOs)

GENERAL EDUCATION LEARNING OUTCOMES (GELOS) ASSESSMENT

Because General Education is usually the largest interdisciplinary program at any institution of higher learning, we have created a separate section to describe its unique qualities. General education assessment is the evaluation of student learning within the curricular areas meeting the College’s general education requirements for a degree: natural sciences, social and behavioral sciences, humanities, language and rationality, and health and physical education. Because the general education requirement is an institutional requirement that crosses disciplines, assessment occurs on a broader scale than course or program assessment. The general education areas are assessed for whether students are achieving the learning outcomes as stated in the College Catalogue for each area. General education assessment can be done through standardized testing (for writing, mathematics, and natural science), surveys or prompts (for social and behavioral science and arts and humanities), evaluated speeches (for speech), and institutionally developed or administered exams (for critical thinking and computer and information literacy). General education assessment may occur in any of the courses that meet the general education requirement, and certain institutional assessments may also take place in courses outside the general educational areas. Click the icon to the left for a PLOs and GELOs Powerpoint Presentation.

The general learning outcomes (GELOs) statements for each area are listed below:

**Humanities:**
- Examine the human response to the world around them through artistic and cultural creation.
- Demonstrate an understanding and appreciation of the ways in which arts, literature, philosophy or foreign languages reflect historical, intellectual, and cultural contexts, as well as aesthetic tastes.

**Natural Sciences**
- Demonstrate a knowledge of natural phenomena and recognize the processes that explain them.
- Assess the relationships between science and other human activities through the examination of the physical universe, its life forms, and its natural phenomena.

**Language & Rationality**
- Apply formal systems of reasoning in solving problems or analyzing arguments.
- Critically evaluate communication in a symbol system appropriate to the academic discipline being studied.

**Behavioral and Social Sciences:**
- Demonstrate an understanding of the perspectives, theories, methods, and core concepts of the social and behavioral sciences.
- Explain the major problems and issues in the disciplines in their contemporary, historical and geographical contexts.

**Health & Physical Education**
- Demonstrate awareness of attributes for healthy physical and psychological life styles.
- Practice proper techniques and skills as related to the designated physical activities.
Educational Programs and Courses

LATTC Certificate and Degree Program by Definition:

Many certificate and degree programs are available within each department and discipline at Los Angeles Trade-Technical College. A description and requirements for each program offered at the college is provided in this section.

Associate Degree Programs:

Associate in Science (AS) and Associate in Arts (AA) degree programs are composed of three parts: general education, a program of study or an area of emphasis, and additional graduation requirements or electives to bring the total units to a minimum of 60 semester units. However, the associate degree represents more than an accumulation of units. Instead, it embodies completion of a well-defined pattern of learning experiences that are designed to develop certain capabilities. All the general requirements for the associate degree at Los Angeles Trade-Technical College are specified in the Associate Degree Requirements section of this catalog. The specific degree requirements—majors or areas of emphasis, electives, and general education graduation plan—is provided for each degree program on the following pages.

Certificate of Achievement Programs:

A Certificate of Achievement is issued in State-approved programs designed for students who are looking for instruction with a high degree of specialization. Certificate of Achievement programs vary in length (typically ranging anywhere from 12 to 48 units), but must have 16 or more semester units, and may be pursued on a full-time or part-time basis. Certificate of Achievement programs are usually less than a two-year educational program comprised of courses needed to prepare students for immediate employment. In addition, a website is provided by Los Angeles Trade-Technical College to equip students with important information on each Certificate of Achievement program offered at the college including, but not limited to: program costs, employment projections and profiles related to the occupation(s) the program trains students for, and program completers. The website is available at: http://college.lattc.edu/certificates/ noted on the student’s transcript.

Noncredit Programs:

Noncredit programs are an organized sequence of two or more courses leading to a defined objective, certificate, a diploma, or license. Noncredit programs at Los Angeles Trade-Technical College generally fall into these two program areas: career development and college preparation or career technical programs with “high employment potential” that provide 288 hours or more of instruction. Courses comprising noncredit programs are not applicable to a credit certificate or degree program.

Apprenticeship Programs:

Apprenticeship programs prepare students for any profession, trade, or craft that are learned through a combination of supervised, on-the-job training with off-the-job formal education. Los Angeles Trade-Technical College’s apprenticeship programs are intended for students who are indentured to learn a trade under agreement with the State of California Division of Apprenticeship Standards. As such these programs are restricted to indentured apprentices only.

Program and Student Learning Outcomes:

LATTC has established learning outcomes for the courses and programs it offers. Throughout this section, program learning outcomes are provided for each approved degree and certificate program.

The Western Association of Schools and Colleges (WASC)

Outcomes are used to describe the anticipated or achieved results of programs or the accomplishment of institutional objectives, as demonstrated by such indicators as student attitudes, knowledge, and/or performance. (WASC Handbook of Accreditation/2001)

The Accrediting Commission for Community and Junior Colleges (ACCJC)

Student Learning Outcomes are the knowledge, skills, abilities, and attitudes that a student has attained at the end (or as a result) of his or her engagement in a particular set of collegiate experiences. (p.49, Accreditation Standards—ACCJC Standards Glossary)

The Academic Senate for California Community Colleges

Student Learning Outcomes refer to overarching specific observable characteristics developed by local faculty that allow them to determine or demonstrate evidence that learning has occurred as a result of a specific course, program, activity, or process.

Outcomes are broader statements of intent or vision that are not necessarily measurable, but observable. Objectives are small steps that lead toward an outcome or goal. Measurability refers to both quantitative and qualitative means of measuring. (p.9, Standards and Practices Committee: Faculty Role in Accreditation.)
## Educational Programs and Courses

### Degree and Certificate Listing

The degree and certificate programs in the table below are grouped in related areas by Top Codes. Detailed degree and certificate information is located alphabetically in the Credit Degree and Certificate Programs section of the catalog.

PROGRAM OVERVIEW

The Accounting program offers occupational training to the student who plans to work in general and corporate accounting. Instruction is provided in financial and managerial accounting theory and in various practical aspects of the accounting field. General accountants record transactions involving receivables, payables, payroll, and property into a general ledger and examine the financial records for compliance with accounting standards and applicable laws. Corporate accountants record financial transactions, analyze and evaluate financial records, apply tax law and finance techniques, and may design and implement accounting/bookkeeping systems and procedures. Many of the courses offer practical accounting training to the owner/operators of a small business. Courses required in the Associate Degree program are basic to the study of more advanced accounting for the student who wishes to continue formal education at a four-year institution. Courses required for the Accounting Clerk Certificate are designed to prepare students for entry-level positions in specialized occupational areas after 2 to 3 semesters of study.

By fulfilling the program requirements, students are proficient in the application of basic financial and managerial accounting principles and techniques. They will be adept at analyzing and recording economic transactions using Generally Accepted Accounting Principles (GAAP) and relevant computer applications. They will understand the application of the accounting principles and techniques to service, merchandising, and manufacturing businesses. Typical positions are bookkeeper, accounting clerk, junior-accountant and tax preparer. The program will prepare students for advancement to senior accountant or chief bookkeeper. This program of study may also lead to many other careers in business and industry.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Analyze and apply accounting theory to service and merchandising, governmental and nonprofit, and corporate organizations in compliance with accounting principles.
• Employ managerial and cost accounting principles.
• Apply business laws to the business environment.
• Utilize specialized ledgers and software to record and process expenditures, receipts, payroll, and other financial transactions for a business or organization.
• Prepare and process payroll records and reports in compliance with state and federal requirements.
• Analyze and prepare financial statements in accordance with accounting principles.
• Use the Internal Revenue Code as it relates to individual, partnership, and corporation income taxes.
• Demonstrate effective business communication skills.

ACCOUNTING

Associate in Arts Degree
Major Units: 47

Requirements for the Associate in Arts degree in Accounting may be met by completing 47 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

NOTE: Students planning for a career in financial accounting may wish to take Accounting 3 offered in the FALL semester.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Apply math knowledge, attention to detail, and familiarity with basic accounting procedures to provide clerical and accounting support for an accounting department.
- Demonstrate effective business communication skills.
- Utilize specialized ledgers and software, such as Quickbooks, to record and process expenditures, receipts, payroll, and other financial transactions for a business or organization.

ACCOUNTING CLERK

Certificate of Achievement

Major Units: 30

A Certificate of Achievement in Accounting Clerk may be earned by completing 30 units of Required Courses with a “C” or better in each course.

PROGRAM OVERVIEW

In keeping with the LATTC and Construction, Design, and manufacturing mission, we offer transfer courses and provide assistance with job placement in various venues, including architectural, urban planning and engineering offices; construction management firms; the construction manufacturing industry; and government agencies. We meet Leadership in Energy and Environmental Design (LEED) standards and use sustainable design strategies and current computer tools (including Global Positioning System—GPS, CFM, Computer-aided design—CAD, Geographic Information System—GIS, Building Information Modeling—BIM, 3-D modeling and others) to record, organize, design and maintain the life cycle of the built environment.

Our courses are integrated and comprehensive, covering four clusters of study: 1) design/space-planning/programming; 2) construction documents/BIM; 3) building systems/materials/historical context; and 4) sustainable tools, such as BIM, GPS, CAD, GIS, 3-D modeling, and simulation. Every class includes training in organizational skills, time management, teamwork, communication and digital file management, and the equipment used in the classroom is the same found in professional offices.

In the architecture design program, students learn additional skills, such as prototyping, visualization, conceptualization, 3-D composition, lighting, proportion, sketching and modeling.

This critical foundational knowledge can be applied to the fields of industrial design, toy design, furniture design, interior design, landscape architecture, set design and virtual reality spaces.

Architecture design is a social mechanism that stimulates the sensory system, affecting the intellect and the desire to create by means of spatial languages and computer technologies. Our program provides innovative templates to create spaces, objects, and solutions for local needs — with cutting-edge innovation in particular demand in the Los Angeles area — as well as the global market. We recognize the untapped talent of visual thinkers in our communities and we provide them with a nurturing environment in which learning can happen in the context of doing.

In addition, these new tools can process multiple layers of information, helping us to understand the complex ways in which a single building interacts with its neighborhood, city and world, and thus enhancing our ability to create the necessary innovative solutions.
Given the importance of the built environment and its place in society, a revolution in architecture and design has taken place. New tools — GIS/CAD and 3-D modeling — facilitate an unprecedented analytical and comprehensive means of looking at human-made ecosystems, with these new lenses, we are able to see patterns and relationships we never saw before, helping us to sustain ourselves on the planet.

While some of these tools have been used successfully in design and construction for many years, they now support a broad range of additional applications, such as first response, national intelligence, operations planning, emergency management, Americans with Disabilities Act (ADA) compliance, safety and security planning, space utilization, LEED neighborhood planning, and land optimization.

Architecture design professionals are used throughout the life cycle of a building — from site selection, design and construction to use, maintenance and adaptation, and, ultimately, through closing, repurposing and reclamation. The new challenge is to facilitate each step of the process in a way that maximizes the benefits of the built environment to society while at the same time minimizing the short- and long-term impact on the natural environment.

Architecture design professionals service our communities with solutions for rooms, buildings, campuses, cities, countries and even the global market. Experience in the field and credits from other institutions can be transferred, by examination on a one-to-one basis, for up to 15 units.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Visualize and translate drawing information to actual physical objects and completed construction components.
• Apply building codes and standards as they pertain to the life, health, and safety of the public.
• Demonstrate skill and proficiency in computer-aided drafting and design by showing technical mastery in the use of industry-relevant computer technology and software.
• Explain the role, duties, and responsibilities of the members of the design team, including the working relationship between technicians and professionals.

ARCHITECTURAL TECHNOLOGY
• Associate in Arts Degree
  Major Units: 47

Requirements for the Associate in Arts degree in Architectural Technology may be met by completing 46 units of Required Courses and 1 unit of Major Electives with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

By fulfilling the program requirements, students will have the skills needed to enter the field as an Architectural Technician who is both a problem solver and an integral part of the design process. Students will master the skills necessary to work in the construction, drafting, estimating, building inspection, civil, electrical, mechanical and structural engineering, construction computer rendering, and computer-aided drawing arenas. General education classes provide a well-rounded education, imparting the knowledge and skills needed to successfully participate in all aspects of society.

At least 60 degree applicable units (46 total major units and Plan B units) are required to earn an Associate degree.

For additional related degrees and certificates, refer to programs under Automotive Technology, Diesel and Related Technologies, and Motorcycle Repair Mechanics.

PROGRAM OVERVIEW

Los Angeles is a leading collision capital center in the automotive design world. Insurance companies are increasingly demanding Auto Collision Technicians trained in damage cost estimations. The demand for fully trained Automotive Repair Technicians is very high where skilled technicians are readily employable and command excellent incomes. These technicians use highly sophisticated devices, such as laser for straightening frames, computer for mixing paint, and dust control contamination vacuum tools for smoothing paint.

The LATTC Automotive Collision Repair program is designed for students who want to enter this growing field. Classes are a combination of classroom instruction coupled with hands-on training. Students learn welding procedures, diagnostic and repair procedures, body part alignment processes, metal finishing/shrinking/filling techniques, auto body electrical wiring systems, body section replacement and structural sectioning practices, body damage estimating techniques, auto body construction methods, paint color application skills, and body shop practices.

By fulfilling the program requirements, students are proficient in a variety of automotive collision techniques and will have the knowledge and skills necessary to maintain, repair, and diagnose body and fender repairs. They will be proficient at all aspects of preparation and painting, including computerized mixing and matching, damage estimation, creating computerized reports and digital imaging. Students who complete this degree will be able to perform jobs as estimators, service managers equipped to repair problems occurring in automotive collision systems.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Identify different types of vehicle frame types, components, and structure chemistries and outline the procedures of repair on the various materials.
- Demonstrate efficiency in the use of various paints, primers, sealers and the tools required to complete collision repairs on a vehicle using the latest trade proficiencies.
- Use the various computer software available to create collision repair estimates in accordance to the latest industry standards.

MAJOR ELECTIVES

Select at least 10 units from the courses below

| AUTOCOR 148 | Paint Preparation and Application | 3 |
| AUTOCOR 149 | Estimating Body Damage             | 3 |
| AUTOCOR 185 | Directed Study                     | 1 |
| AUTOCOR 226 | Auto Collision Repair I            | 3 |
| AUTOCOR 227 | Auto Body & Fender II              | 3 |

NOTE: Students are required to provide basic hand tools, Transportation Technology uniform and personal safety equipment.
AUTOMOTIVE COLLISION REPAIR
Certificate of Achievement
Major Units: 36

A Certificate of Achievement in Automotive Collision Repair may be earned by completing 36 units of Required Courses listed under for the Associates degree in Automotive Collision Repair with a "C" or better in each course.

A Certificate of Achievement is awarded for the completion of 36 units in the first through fourth semester Required Courses listed above. This program includes DuPont Paint Systems Certificate of Achievement for Rule 1151 of the South Coast Air Quality Management District (SCAQMD).

AUTOMOTIVE AND RELATED TECHNOLOGY

Department: Transportation
Department Chair: Mr. Jess Guerra, Room OH-114A
(213) 763-3919, GuerraJ@lattc.edu

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Diagnose and repair various types of vehicles using specialty shop tools and diagnostic equipment.
• Perform vehicle repairs using manufacturer technical programs while demonstrating proficiency in adhering to all applicable shop safety regulations.
• Ability to write mechanical repair estimates in accordance to the latest industry standards.

AUTOMOTIVE AND RELATED TECHNOLOGY
Associate in Science Degree
Major Units: 48

Requirements for the Associate in Science degree in Automotive and Related Technology may be met by completing 48 units of Required Courses with a "C" or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

Students who complete this degree will be able to perform jobs as a diagnostics, repair, and diagnostic equipment. To troubleshoot and repair problems occurring in automotive anti-lock braking systems (ABS), electrical/electronic systems, engine performance, drivability, suspension and steering, automatic and manual transmissions, transaxles, engine repair, heating and air conditioning.

Students should take the 10 basic courses during Semester I and Semester II:

</tbody>
</table>

At least 60 degree applicable units (48 total major units and Plan B units) are required to earn an Associate degree.

For additional related degrees and certificates, refer to programs under Automotive Collision Repair, Diesel and Related Technologies, and Motorcycle Repair Mechanics.

PROGRAM OVERVIEW

Los Angeles’ long-time infatuation with the motorcar has made it a leading center in automotive design. Employment opportunities continue to thrive, and the demand for trained automotive technicians in the field continues to increase. The Automotive and Related Technology program trains students to work as professionals in this field, offering instruction in maintenance, diagnosis and overhaul procedures of electrical and fuel injection systems.

By fulfilling the program requirements, students will have gained the skills necessary to maintain, repair, and diagnose electrical, fuel injection systems, and overhaul procedures, as well as basic shop practices needed to meet industry standards.

NOTE: Students are required to provide basic hand tools, Transportation Technology uniform and personal safety equipment.
AUTOMOTIVE AND RELATED TECHNOLOGY

Certificate of Achievement
Major Units: 48

A Certificate of Achievement in Automotive and Related Technology may be earned by completing 48 units of Required Courses listed above for the Associates degree in Automotive and Related Technology with a “C” or better in each course.

AUTOMOTIVE AND RELATED TECHNOLOGY-ADJUNCT: TUNE-UP

Certificate of Achievement
Major Units: 18

A Certificate of Achievement in Automotive and Related Technology-Adjunct: Tune-Up may be earned by completing 18 units of Required Courses with a “C” or better in each course.

BAKING

Department: Culinary Arts/Professional Baking
Department Chair: Mr. Steve Kasmar, ROOM SA-118
(213) 763-7332, KasmarSL@lattc.edu

PROGRAM OVERVIEW

The Professional Baking program is accredited by the American Culinary Federation Educational Foundation (ACFEF). This two year program prepares students for successful careers within the hospitality community. Baking program students, under the direct supervision of their chef instructor, will discuss, prepare, and analyze various baked goods including quick breads, yeast breads, laminated dough, specialty and wedding cakes, cookies, batters, and restaurant-style plated desserts. Baking formulas, cost controls, ingredient identification and usage is practiced throughout the program.

Students prepare baked goods on a daily basis for a retail bakery located on the LATTC campus, the college cafeteria and faculty dining room as well as catering for special events and holiday functions.

The greater Los Angeles area hosts many bakeries, markets, hotels, restaurants, and theme parks where baking graduates readily find employment as bakers, retail bakers, cake decorators, pastry cooks, managers, and production assistants.

The Professional Baking program will prepare students for employment in areas of baking and pastry arts. Students will demonstrate the ability to prepare and formulate baking/pastry recipes and formulas, assess food costs and sales price, and organize daily tasks for successful completion of baked goods. The National Restaurant Association Serve Safe Exam is administered at the completion of the first semester.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Practise safety and sanitation in a working environment.
• Define basic culinary and baking and patisserie terminology and procedures.
• Employ correct baking and patisserie methods of preparation.
• Correctly use, identify kitchen tools and equipment, baking and patisserie tools and equipment.
• Identify the use, purpose and application of major categories of ingredients as they relate to culinary and baking procedures.

BAKING PROFESSIONAL

Associate in Arts Degree
Major Units: 48

Requirements for the Associate in Arts degree in Professional Baking may be met by completing 48 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

BAKING PROFESSIONAL
Certificate of Achievement
Major Units: 48

A Certificate of Achievement in Professional Baking may be earned by completing 48 units of Required Courses listed above for Associates degree in Baking Professional with a “C” or better in each course.

The Professional Baking Certificate prepares the student for a career as a baker, retail baker, pastry cook, production assistant or as a cake decorator.

CARPENTRY/BUILDING AND CONSTRUCTION TECHNOLOGIES

Department: Construction, Design, and Manufacturing
Department Chair: Mr. William (Bill) Elarton, ROOM SQ-122 (213) 763-3700, cdm@lattc.edu

Program Learning Outcomes (PLOs)
Upon completion of the Degree/Certificate program, students are able to:
• Use hand and power tools to perform work within the building construction industry.
• Demonstrate sustainable industry principles and practices.
• Perform calculations and measurements required for work in the building construction industry.
• Work independently and interdependently to safely accomplish shared professional outcomes.

Carpentry
Associate in Science Degree
Major Units: 48

Requirements for the Associate in Science degree in Carpentry may be met by completing 45 units of Required Courses and 3 units of Major Electives with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

PROGRAM OVERVIEW

To meet the training needs of persons interested in becoming a Carpenter, LATTC offers a Carpentry Associate in Science degree and a Carpentry Construction Technologies Associates in Arts degree as well as Certificates of Achievement.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evening-only course of study designed for individuals currently in the field who want to improve their skills or learn new ones. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the students’ place of employment.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career as a Carpenter in the Construction or Maintenance arena. The construction, installation, and repair of structures and fixtures made from wood and other materials. Working from blueprints, layout, measuring, marking, and arranging materials in accordance with local building codes, cutting and shaping wood, plastic, fiberglass, or drywall using hand and power tools, joining materials with nails, screws, staples, or adhesives are just some of the skills that will be mastered during this program.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Use hand and power tools to perform work within the building construction industry.
• Demonstrate sustainable industry principles and practices.
• Perform calculations and measurements required for work in the building construction industry.
• Work independently and interdependently to safely accomplish shared professional outcomes.

Carpentry

Chemical Technology

Degree: Sciences
Department Chair: Mr. Ricky Wong, Room CH-405

Award Title | Award Type | Grad. Plan | Required Course Units | Major Elective Units | Total Major Units
--- | --- | --- | --- | --- | ---
Chemical Technology | A.S. | Plan B | 47 | - | 47
Chemical Technology | C | | | | 47

At least 60 degree applicable units (47 total major units and Plan B units) are required to earn an Associate degree.

Program Overview

The Chemical Technician (CT) occupations are becoming the fastest growing occupational category in the United States. The chemical technician generally
performs laboratory analysis or testing in a wide variety of biological and physical science settings such as; environmental, water, drinking and wastewater and pharmaceutical, cosmetics and petroleum refineries; grading studies of materials, and quality control of industrial chemicals. Training is provided in applied chemistry, physics and mathematics as well as instrumentation, industrial processes, computerized analysis and quality control. The CT program is also designed to help students prepare for a smooth transition into other science related BA/BS degree programs.

At the conclusion of this program, students will have the skills necessary for:
- Working in the chemical process industry, including treatment plants
- Monitoring safety/health and environmental regulations
- Sampling and handling chemical materials
- Measuring physical properties
- Performing chemical analysis
- Performing instrumental analysis
- Planning, designing and conducting experiments, and
- Synthesizing compounds

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree/Certificate program, students are able to:
- Evaluate and apply knowledge of laboratory and chemical processes.
- Demonstrate good verbal and written communication.
- Practice basic knowledge of Good Laboratory Practice (GLP).
- Evaluate and apply knowledge of regulatory policies for laboratory business practices.
- Demonstrate and apply knowledge of Environmental Health and Safety Regulations.

### CHEMICAL TECHNOLOGY

**Associate in Science Degree**

Major Units: 47

Requirements for the Associate in Science degree in Chemical Technology may be met by completing 47 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

At least 60 degree applicable units (38 total major units and Plan B units) are required to earn an Associate degree.

### PROGRAM OVERVIEW

The Associate of Science Degree in Chemistry provides students interested in the physical, chemical, biological, and environmental sciences with a strong academic background in chemistry and coursework required to transfer to several four-year institutions and professional school. This degree certifies the students’ ability to analyze and solve problems in the area of chemistry and areas where knowledge of chemistry is required. Chemistry related fields include the pharmaceutical sciences, food sciences, biotechnology, nanotechnology, environmental sciences and engineering among many others. Our students pursue careers in chemistry, pharmacy, medicine, dentistry, physician assistant, and in other health or physical...

EDUCATIONAL PROGRAMS AND COURSES

Los Angeles Trade-Technical College 2012-2013 GENERAL CATALOG

For students completing 38 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Demonstrate conceptual understanding of inorganic, organic, analytical, biological, and physical chemistry.
• Utilize fundamentals and application of current chemical and scientific theories.
• Articulate and demonstrate proper chemical procedures and regulations for safe handling and use of chemicals.
• Characterize chemical compounds, perform accurate and precise quantitative measurements using proper techniques and modern instruments, and properly execute common laboratory practices (such as laboratory safety, waste management, record keeping, and preparations solutions and dilutions).
• Demonstrate problem-solving, analytical, and critical thinking skills.
• Communicate scientific results orally and in writing, including operating and interpreting data from instrumentation.

PROGRAM OVERVIEW

The LATTC Child Development Program is designed to meet the needs of those students who wish to prepare themselves for employment or who are currently employed in the Early Childhood Education (ECE) or Elementary Education field. This curriculum prepares student to teach in programs for children including: private facilities, parent cooperative, Head Start programs, Children's Centers and infant/toddler or school age programs. In addition, this program also prepares students to transfer to four-year universities in either Child Development or Teacher Education majors.

The Child Development Program offers various educational options. Completion of each program leads to a certificate, transfer option and/or an Associate in Arts degree. With additional general education units and required experience, the student will be eligible for the Child Development Permit as defined under Title 5. Meeting this requirement will enable the student to teach in both Federal and State preschool programs.

Upon completion of the Degree program, students are able to:

• Successfully manage an Early Childhood Education (ECE) classroom; and

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Successfully manage an Early Childhood Education (ECE) classroom; and
provide children with responsive care, developmentally appropriate and
anti-bias curriculum, and a healthy and safe environment.

- Operate a high-quality ECE program that complies with licensing and title
  V regulations.
- Demonstrate professionalism while working with children, parents, staff,
  and community.

PLANNING AHEAD:

MANTOUX TEST: Some Child Development courses may require you to obtain
a Mantoux test for Tuberculosis. The college Health Center provides this service.
Please call ahead for days and times the Health Center provides this service.

CRIMINAL CLEARANCE: In order to fulfill State licensing requirements
for employment in private and public programs you must receive a Criminal
Clearance to work with young children. Consult with faculty for additional
information.

CPR CLASS: Your employer may require you to take a 15-hour Cardiopulmonary
Resuscitation class. This class covers training on basic first aid for infants and
children, CPR techniques as well as information on basic health and sanitation
procedures.

CHILD DEVELOPMENT: PLAN A

EARLY CHILDHOOD EDUCATION

PROGRAM OVERVIEW

Associate in Science in Early Childhood Education for Transfer degree is intended for students who plan to complete a baccalaureate degree in a similar program or major at a CSU campus. Students who complete this degree will gain priority admission to a CSU and to a similar program or major. Students who are pursuing the Associate in Science in Early Childhood Education who complete this degree program will be proficient in the methodology of working with young children through the extensive overview of theories and application of child development, the development of curriculum and lesson planning techniques, ways to observe and record child behavior, and classroom management techniques.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:
- Enter the field of preschool teaching upon graduation.
- Teach in child development programs (pre-kindergarten).

CSU-GE PATTERN OR IGETC REQUIREMENTS

- 37-39 units of General Education coursework are required as detailed by the UC/CSU – IGETC General Education requirements in this catalog. Up to 9 units of the CSU GE pattern coursework may be double-counted toward the 25 unit major course requirements (Child Development 1, 10 and 11). The major requires 60 total units—double counting does not lower the required unit count for the degree.

CSU TRANSFERABLE ELECTIVES

- The balance of units would be made up with CSU transferable elective coursework from 0-7 units for a total of 60 units.

NOTE: Most Child Development courses have prerequisites and/or co-requisites except for Child Development 1, 10 and 11. Refer to the Course Descriptions section of the catalog for additional details.

TRANSFER—Students interested in transferring to a four-year college or university should visit the University Transfer Center or meet with a counselor to select appropriate transferable courses.

PROGRAM OVERVIEW

The LATTC Infant/Toddler Teacher certificate program provides the student with a career preparation for working with young children age 0 to 2. In addition to basic course requirements, this certificate enables students to acquire a specialty in the area of infants/toddlers. With additional general education units and the required experience, students are eligible for the Child Development Teacher Permit as defined under Title 5. Meeting this requirement will enable the students to work with young children ages 2 – 5 in both Federal and state programs.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:
- Recognize and identify critical milestones during the 0 – 2 developmental years.

NOTE: Most Child Development courses have prerequisites and/or co-requisites except for Child Development 1, 10 and 11. Refer to the Course Descriptions section of the catalog for additional details.

PROGRAM OVERVIEW

Students completing the certificate are qualified to teach preschool age children (ages 2 – 5) in a private Child Development program as licensed under Title 22 of the Department of Social Services. With required work experience (50 days of 3+ hours per day within 2 years), students are eligible for the Child Development Associate Teacher Permit as defined under Title 5. Meeting this requirement will enable the students to teach in both federal and state preschool programs.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Successfully manage an Early Childhood Education (ECE) classroom and provide children with responsive care, developmentally appropriate and anti-bias curriculum, and healthy and safe environment.
- Operate a high-quality ECE program that complies with licensing and Title V regulations.
- Demonstrate professionalism while working with children, parents, staff, and community.

PRESCHOOL TEACHER

Certificate of Achievement

Major Units: 35

A Certificate of Achievement in Preschool Teacher may be earned by completing 35 units of Required Courses with a “C” or better in each course.

With additional general education units and the requisite experience, students are eligible for the Child Development Matrix Permit as defined under Title 5. Meeting this requirement will enable the student to teach in federal and state preschool programs.

NOTE: Most Child Development courses have prerequisites and/or co-requisites except for Child Development 1, 10 and 11. Refer to the Course Descriptions section of the catalog for additional details.
PROGRAM OVERVIEW

This Certificate of Achievement qualifies students for a teacher position within school-age programs. School-age program teachers work with children from kindergarten through middle school, and before and/or after school programs. Some responsibilities might be to design and implement developmentally age-appropriate activities that are fun, exciting and challenging to a variety of age groups.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:
• Articulate and implement licensing code for Title 22.
• Design and implement developmentally age-appropriate activities for a variety of age groups.
• Articulate and implement the California Child Development Education Code.
• Articulate and implement the California Family Child Care Education Code.
• Articulate and implement the California State Child Development Administrative Rules.

TEACHER WITH SPECIAL NEEDS

PROGRAM OVERVIEW

The LATTC Teacher with Special Needs certificate of achievement program provides the student with a career preparation for working with children with special needs in the infant/toddler and preschool settings. In addition to basic course requirements, this certificate enables students to acquire a specialty in the area of special needs. With additional general education units and the required experience, students are eligible for the Child Development Teacher Permit as defined under Title 5. Meeting this requirement will enable the student to work with special needs children in both Federal and state programs.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Set a goal for a special needs child and 3 supportive objectives reflective of those used in an Individual Education Plan (IEP).

COMMUNITY PLANNING & ECONOMIC DEVELOPMENT

Department: Business Administration/Computer Applications & Office Technologies

Department Chair: Ms. Paulette Bailey, Room CH-225
(213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Community Planning program at LATTC is the only program offered at an accredited community college in the United States. Our unique program provides students the knowledge and training needed for successful employment in the field of community and economic development. The community and economic development industry focuses on revitalizing low and moderate income communities. Rebuilding the economic, physical and social infrastructure of urban communities represents a new, growing and exciting career opportunity.

Students can learn basic planning terminology, development strategies, and other technical skills needed to enter the industry, earning a Certificate of Achievement in two semesters.

The Community Planning curriculum and courses are regularly reviewed and refined to ensure that courses are relevant, industry appropriate and cutting-edge. Industry experts and professionals develop, design and teach our courses. Our industry partnerships provide critical resources for our students, providing them with invaluable employment, volunteer, internship and networking opportunities. Our courses are structured to be laboratories that combine lecture, project driven learning and hands-on application of knowledge to contemporary issues affecting communities. Community planning courses are taught during the evening/weekends on campus, online and in the community to provide students with the greatest range of educational opportunities.

The Community Planning program is designed as the entry point for students wanting to begin a rewarding career in the community and economic development industry by working to build livable communities. Community development specialists are needed to help local residents, government and businesses solve complex neighborhood problems. Community developers work in community-based organizations; banks, city, state and federal governments; foundations; real estate development companies; social service agencies; job training and placement organizations; investment firms; and think tanks.

The community and economic development industry has three main goals. First, to change the economy of a community for the better increasing the income and wealth of residents and stimulating investments in the community. While placing assets and economic opportunities in the hands of resident leaders. A second goal is to improve the physical nature of the neighborhood, from its housing to its shopping areas, transportation, public spaces, and environment. The third is to strengthen the social bonds among residents and strengthen the infrastructure in communities – organizing the community, building leadership, civic engagement and quality social services.
The community and economic development industry allows individuals to improve the quality of life in communities while getting paid competitive salaries. Many community developers begin with community organizing and transition to housing and workforce development as a natural growth of the industry. The skills and knowledge learned in the Community Planning program allow students to be marketable in the non-profit and for-profit corporations. Companies and organizations are interested in hiring individuals that have solid skills and a good understanding of the problems and conditions facing low and moderate income cities across the country.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Examine and understand the issues in the community and economic development field, and apply strategies to engage various issues.
- Develop and implement a work plan consisting of goals, objectives and timelines to evaluate the effectiveness of programs aimed at addressing a community need.

COMMUNITY PLANNING & ECONOMIC DEVELOPMENT

Certificate of Achievement
Major Units: 21

A Certificate of Achievement in Community Planning and Economic Development may be earned by completing 21 units of Required Courses with a "C" or better in each course.

A total of 6 units must be completed in each development component area (economic, community organizing/social, physical/built environment/real estate) and 3 units in professional development area.

At least 60 degree applicable units (total major units and Plan B units) are required to earn an Associate degree.

For additional related certificates, refer to Medical Office Assistant.

PROGRAM OVERVIEW

The Computer Applications and Office Technologies (CAOT) degree and certificate programs are designed to provide students with administrative and clerical skills required for employment in a variety of areas, such as business and industry, government agencies, schools, and hospitals. Office workers use a variety of computer software applications, produce correspondence, maintain databases, organize meetings, manage records and projects, and schedule appointments. The degree and certificate options include courses that are integral to many different administrative fields, and most include specific technical skills, relevant computer applications, and the necessary training in communicating, problem solving, and decision-making required for a variety of administrative and clerical entry-level positions as well as promotion and career advancement opportunities. The course content is designed to meet the varying needs of a wide spectrum of students, including those seeking:
• Associate in Arts degree(s)
• Certificate(s) that are specific to a discipline or area
• Entry into the job market
• Advanced training and/or retraining
• Lifelong learning

By fulfilling the program requirements, students are prepared for entry-level positions, promotion, and career advancement in a variety of office occupations. They will be adept at analyzing business situations and using critical thinking skills to apply technological solutions in an office environment. The student will be proficient in the use of current software application programs such as Microsoft Word, Excel, PowerPoint, Access, and Internet-related skills and techniques. Typical positions: Administrative Assistant, Office Assistant, Medical Office Assistant, Information Processing, and a variety of data entry/office/clerical occupations.

Instruction in this program focuses on four specialty areas: (1) Administrative Assistant (2) Information Processing (3) Medical Office Assistant (4) Office Assistant – Clerical.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Successfully use the computer to process, organize and present data and information in basic business format with no errors.
• Communicate effectively via spoken word, print and media, and work collaboratively with others in an office setting.

COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: ADMINISTRATIVE ASSISTANT

Associate in Arts Degree

Major Units: 43

Requirements for the Associate in Arts degree in CAOT Administrative Assistant may be met by completing 31 units of Required Courses and 12 units of Major Electives with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The Administrative Assistant program prepares students for employment in business, government, and educational offices using automated systems and procedures. Emphasis is placed on the development of basic business office procedure and language skills, and training in the use of relevant computer application programs and office equipment.

By fulfilling the program requirements, students are prepared to assume intermediate office duties and decision-making office responsibilities. The program prepares students for career advancement and retraining in the use of current computer application programs. The program provides the foundation for entry into office management positions. Typical positions: Administrative Assistant, Secretary, Senior Office Clerk.

MAJOR ELECTIVES

Select at least 9 units from the CAOT Major Electives list located after Computer Applications & Office Technologies: Office Assistant-Clerical.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Use the computer to process, organize and present data and information in basic business format with no errors.
• The ability to communicate effectively via spoken word, print and media, and work collaboratively with others in an office setting.

**COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: INFORMATION PROCESSING SPECIALIST**

- **Associate in Arts Degree**
  - Major Units: 44

Requirements for the Associate in Arts degree in CAOT Information Processing Specialist may be met by completing 41 units of Required Courses and 3 units of Major Electives with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The Information Processing program prepares students for employment in business, government, and educational offices using computerized systems and procedures. Emphasis is placed on training and competency in the use of relevant computer applications software programs including word processing, spreadsheets, databases, presentation graphics, desktop publishing, utilization of the Internet, and popular operating systems. The development of basic business office procedure and language skills, and training in the use of office equipment are also emphasized.

By fulfilling the program requirements, students are prepared to assume intermediate automated office duties and decision making office responsibilities.

The program prepares students for career advancement and retraining in the use of current computer application programs. Selected courses provide the background and skills to help students prepare to take Microsoft Office Specialist (MOS) certification exams. The program provides the foundation for entry into office data management positions and the skills that promote success in the workplace. Typical positions include data entry clerk and office clerk.

Select at least 13 units from the CAOT Major Electives list located after Computer Applications & Office Technologies: Office Assistant-Clerical.

**COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: INFORMATION PROCESSING SPECIALIST**

- **Certificate of Achievement**
  - Major Units: 33

A Certificate of Achievement in CAOT Information Processing Specialist may be earned by completing 33 units of Required Courses with a “C” or better in each course.

The Information Processing Certificate prepares students for employment in business, government, and educational offices using computerized systems and procedures.

By fulfilling the program requirements, students are prepared to assume entry-level computerized automated office duties and responsibilities. The program prepares students for retraining in the use of current computer application programs. The program provides the foundation for entry into data-entry clerical positions. Typical positions: Data-Entry Clerk, Office Clerk, Junior Clerk.

**PROGRAM LEARNING OUTCOMES (PLOs)**

Upon completion of the Degree/Certificate program, students are able to:

• The ability to successfully use the computer to process, organize, and present data and information in basic business format with no errors.

• The ability to communicate effectively via spoken word, print and media, and work collaboratively with others in an office setting.

**COMPUTER APPLICATIONS & OFFICE TECHNOLOGIES: OFFICE ASSISTANT-CLERICAL**

- **Associate in Arts Degree**
  - Major Units: 42

Requirements for the Associate in Arts degree in CAOT Office Assistant-Clerical may be met by completing 32 units of Required Courses and 10 units of Major...
Electives with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The Office Assistant - Clerical Associate in Arts degree prepares students for employment in business, government, and educational offices using automated systems and procedures. Emphasis is placed on the development of basic business office procedure and language skills, acquiring basic accounting knowledge, and training in the use of relevant computer application programs and office equipment.

General office clerks mostly are employed in relatively small businesses. Although they work in every sector of the economy, about 46% worked in local government; healthcare and social assistance; administrative and support services; finance and insurance; or professional, scientific, and technical industries. (Source: U.S. Bureau of Labor Statistics)

By fulfilling the program requirements, students are prepared to assume intermediate office duties and decision-making office responsibilities. The program prepares students for career advancement and retraining in the use of current computer application programs. The program provides the foundation for entry into office management positions and the skills that promote success in the workplace. Typical positions include assistant office manager, secretary, and senior office clerk.

EDUCATIONAL PROGRAMS AND COURSES

PROGRAM OVERVIEW

The Computer Information Systems program is designed to prepare students for careers in exciting Information Technology fields such as programming, software engineering, database administration, computer networking, multimedia, and web technologies. Microcomputer usage continues to grow at an even increasing pace as does the demand for workers with solid technical skills and knowledge of programming, networking, and website development and management. The primary goal of the program is to prepare students for entry-level employment as well as providing marketable career advancement knowledge and skills. Students with interest in transferring to an Information Systems program at four-year institutions should consult with the Counseling department for needed course work.

Demand for computer software engineers will increase as computer networking continues to grow. For example, expanding Internet technologies have spurred demand for computer software engineers who can develop Internet, intranet, and World Wide Web applications. Programmers are employed in almost every industry, but the largest concentration is in computer systems design and related services. Large numbers of programmers also work for telecommunications companies, software publishers, financial institutions, insurance carriers, educational institutions, and government agencies. Prospects should be best for college graduates with knowledge of, and experience working with, a variety of programming languages and tools – including C++ and other object-oriented languages such as Java, as well as newer, domain-specific languages that apply to computer networking, database management, and Internet application development.

By fulfilling the program requirements, students are proficient in the use of current software application programs. They will be adept at integrating computer-based technology by applying both data and word processing aspects of information systems. They will understand how computers and software applications are utilized in today’s information systems that support business decisions. Computer Information Systems personnel are involved in a variety of administrative, clerical, and accounting functions required to efficiently operate and maintain computerized business systems. This program leads to entry-level positions that maintain databases, manage projects, create presentations, and design, develop, and maintain websites. Typical positions are website creator, data entry/records clerk, computerized business systems supervisor, and self-employment.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Create and debug code for specifications and write comprehensive program documentation.
• Demonstrate comprehensive understanding of language tools by synthesizing and integrating multiple languages constructs in a single project.
• Demonstrate basic understanding of computer hardware and software.

At least 60 degree applicable units (36 total major units and Plan A units) are required to earn an Associate degree.

PROGRAM OVERVIEW

LATTC’s Correctional Science program will prepare you to enter the rapidly growing field of corrections. The correctional field has an enormous range of career options, and with the proper training a future filled with job opportunity and flexibility will be opened. Substantial and growing employment opportunities exist in corrections, public and private detention facilities, law enforcement, private security, immigration and customs, secret service, Federal Bureau of Investigation (FBI), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), homeland security are just some of the areas open to you. Students will also have the opportunity to gain experience in the field participating in ride-a-longs and internships with local agencies.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Demonstrate an understanding of the workings of the correctional system by applying definitions, concepts, and principles to courts and correctional settings.
- Apply critical thinking to research, evaluate, and analyze and synthesize the appropriate procedures for the collection of evidence and data in criminal case preparation pertaining to correctional institutions.
- Develop, organize and write an objective report that meets the legal and detailed requirements of correctional institutions.

At least 60 degree applicable units (48 total major units and Plan B units) are required to earn an Associate degree.

For additional related certificates, refer to programs under Skin Therapy.
PROGRAM OVERVIEW

Cosmetology is the study and practice of professional care of the hair, skin and nails. The LATTC Cosmetology program offers training in hair styling, and cutting; chemical treatments, waving, straightening and coloring; skin care and make-up techniques; nail art, manicures, and pedicures. The Cosmetology occupation is governed by stringent state laws which stipulate that all who enter the field must complete 1600 hours of instruction. The LATTC Cosmetology program is carefully designed to prepare students to pass the California State Board examination and integrates a mock state board exam to help familiarize the students with the examination procedures.

The beauty industry is a 3 billion-dollar business in the United States and the demand for professional and creative cosmetologists is always high. Professionals in the beauty industry can be found in runway dressing rooms, movie sets, and in salons and day spas. Emphasis on skin and hair care for men and women is at the forefront of services in this high visibility industry. In addition the beauty industry holds a wide array of entrepreneurial opportunities. The Cosmetology department prides itself in working with each individual graduate to assist them with job placement upon completion of the program and successfully passing the California State Board examination.

By fulfilling the program requirements, students will have the knowledge and skills needed to successfully compete in the beauty industry. The Cosmetology program will prepare students to enter the beauty industry as stylists, salon managers, educators, make-up artists (both conventional and theatrical), product sales, manicurists and business owners.

Important Notes: All hours and operations on time cards are kept for five years per state requirements.

Please note regarding transfer hours: Transfer students with more than 300 hours from another Cosmetology program who have not received college level units from an accredited institution may not transfer into Los Angeles Trade Technical College. However, students who cannot transfer hours can start the LATTC Cosmetology program at the freshman level.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Perform, practice, and demonstrate all areas of cosmetology skills observing the safety and sanitation rules set forth by the California Board of Barbering and Cosmetology.
- Be prepare to take the written and practical California Board of Cosmetology Licensure Examination.
- Demonstrate skills necessary to build and maintain an ongoing clientele in the cosmetology salon environment and industry.
- Demonstrate knowledge of cosmetology industry requirements regarding good work ethic, resumes and employment guidelines, track and maintain business transactions.

CULINARY ARTS

Department: Culinary Arts/Professional Baking
Department Chair: Mr. Steve Kasmar, ROOM SA-118
(213) 763-7332, KasmarSL@lattc.edu

Upon successful completion, students will be able to:
• Recognize industry standards for entry, supervisory, and management level employment.
• Demonstrate professional culinary techniques according to industry standards.
• Evaluate proper practices in various industry segments.

PROGRAM LEARNING OUTCOMES (PLOs)

The Culinary Arts program has successfully prepared students for the hospitality industry for many years. By fulfilling the program requirements, students will possess a working foundation of skills necessary to work in a professional industry kitchen. Within the program, students will illustrate a working foundation of a professional industry kitchen. Students are proficient in cooking techniques and terminology including meat fabrication and cookery, hot and cold sauce preparation, vegetable identification and production, task organizing and time management. Successful students will graduate with a working knowledge of culinary nutrition and fundamental management skills, as well as National Restaurant Association Serve Safe Certification.

**Diesel and Related Technology**

**Department:** Transportation  
**Department Chair:** Mr. Jess Guerra, Room OH-114A  
(213) 763-3919, GuerraJ@lattc.edu

**Required Courses**

**Program Overview**

If you live in the United States, almost every single thing you eat, wear or use was delivered by a diesel-powered vehicle. Our trucks, trains, buses are almost all diesel fueled; freighters, ocean liners, and electrical generators are also diesel powered. LATTC trains the professionals who keep this vast pool of machines productive. Graduates of the Diesel Technology program are well paid and have the diverse choice of areas in which to specialize. In recent years, the demand from local employers has exceeded our supply of qualified graduates as the program continues to grow.

By fulfilling the program requirements, students are proficient in all aspects of diesel engine fundamentals, electrical components, fuel systems, overhaul procedures, air brake system and the construction and operation of diesel engines.

**Program Learning Outcomes (PLOs)**

Upon completion of the Degree/Certificate program, students are able to:

- Identify and explain the operation of diesel vehicle systems (such as engine, transmissions, brakes, electrical and suspension) along with their related subsystems.
- Utilize the various manufacturer diagnostic software to accurately diagnose and repair diesel powered vehicles.
- Demonstrate proficiency in utilizing specialized tools and shop equipment in the repair of diesel vehicles while adhering to all applicable industry safety standards.

**Required Courses**

**Diesel and Related Technology**

**Certificate of Achievement**

Major Units: 45

A Certificate of Achievement in Diesel and Related Technology may be earned by completing 45 units of Required Courses listed under for the Associate degree in Diesel and Related Technology with a “C” or better in each course.

By fulfilling the program requirements, students are able to enter the job market as diesel technicians.
Los Angeles Trade-Technical College 2012-2013 GENERAL CATALOG

ELECTRICAL CONSTRUCTION & MAINTENANCE

Program Learning Outcomes (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Use hand and power tools to perform electrical construction and maintenance work.
• Demonstrate sustainable electrical construction and maintenance practices.
• Perform trade calculations related to electrical construction and maintenance work.
• Work independently and interdependently to safely accomplish shared professional outcomes.
• Demonstrate knowledge of reading electronic symbols and schematic diagrams.

Electrical Construction and Maintenance

Educational Programs and Courses

PROGRAM OVERVIEW

To meet the training needs of persons interested in becoming an Electrician, LATTTC offers an Electrical Construction and Maintenance Associate in Science degree, and Electrical Construction and Maintenance Construction Technologies Associates in Arts degree, as well as Certificates of Achievement.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment necessary to allow for hands-on training in the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve or expand their skills. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the student’s place of employment. Depending on availability, the Associate in Arts degree may require slightly longer to complete. Check with the Department Chair for more details prior to enrolling.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in Residential, Commercial, and Industrial Construction and Maintenance of Electrical Systems. Electrical theory, electrical controls, conduit installation, blueprints, low voltage systems, maintenance practices, equipment installation, etc. are just some of the skill that will be mastered during this program.

</table>

At least 60 degree applicable units (44 total major units and Plan B units) are required to earn an Associate degree.

PROGRAM OVERVIEW

This program covers, circuit analysis of several complete FM systems. Included are a wideband microwave multiplex system and several mobile communication systems.

Students acquire information required by the Electronics Technician to aid in passing the Federal Communications Commission (FCC) general radiotelephone license examination. The FCC rules, regulations, and theory areas are explained and sample FCC-type tests are taken. Marine and aeronautical rules and regulations are also studied and are necessary for passing the general radiotelephone examination. Students may come day and/or evening. Additional hours taking general studies courses will lead to the Associate in Science degree.

By fulfilling the program requirements, students are proficient in the operation of AM/FM Transmitters and trouble shoot AM/FM Receivers. Students are able to install C Band, K/U Band, and digital satellites systems (DSS). Students will have an understating of cordless phones, microwave receivers/transmitters, and cell phone systems.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Demonstrate knowledge of reading electronic symbols and schematic diagrams.
• Perform mathematical calculations and measurements related to electronics circuit analysis.
• Demonstrate basic understanding of semiconductors devices, digital circuits, and electronics communications theory.

ELECTRONICS COMMUNICATIONS

Associate in Science Degree
Major Units: 44

Requirements for the Associate in Science degree in Electronics Communications may be met by completing 44 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The electronics industry today is faced with a changing and dynamic marketplace. In response, the Electronics and Computer Information Systems program at LATTC continuously updates its courses and labs, responding to the latest industry demands. Students receive training in the most current electronics and computer technology techniques and degree and certificate programs allow students the flexibility of not having to commit to a full-time schedule. The Electronics Department is proud of its twenty year partnership with the Federal Aviation Administration (FAA), where our students are frequently offered employment prior to their graduation.

The Electronics Communications program covers, circuit analysis of several complete FM systems including wideband microwave multiplex system and several mobile communication systems. Students are able to apply basic radio fundamentals necessary to understand transmitters and receivers used in modern AM and FM communication systems. The program also prepares students to passing the F.C.C. general radiotelephone license examination. F.C.C. theory and regulations, and marine and aeronautical rules are covered and students are offered a sample test.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:
• Write coherent college-level in-class essays with clear syntax and varied sentence structure, and exhibiting knowledge of Standard American English rules of punctuation and grammar.
• Conduct and present research, conforming to Modern Language Association (MLA) Standards.
• Analyze and evaluate a diverse body of literature in a variety of presentation formats.

ENGLISH

Certificate of Achievement in Electronics Communications

Major Units: 44

A Certificate of Achievement in Electronics Communications may be earned by completing 44 units of Required Courses listed under for the Associate degree in Electronics Communications with a "C" or better in each course.

ENGLISH

Associate in Arts Degree

Major Units: 18

Requirements for the Associate in Arts degree in English may be met by completing 15 units of Required Courses and 3 units of Major Electives with a "C" or better along with general education courses meeting Plan A graduation requirements. Information on the Plan A requirements may be found in the catalog under Graduation/Transfer Requirements.

The English major may not be declared as a double major with Liberal Arts.

At least 60 degree applicable units (18 total major units and Plan A units) are required to earn an Associate degree.

PROGRAM OVERVIEW

The English Associate in Arts degree is designed for students interested in general studies or who plan to transfer to a four-year institution for a Bachelor of Arts (B.A.) degree. This program provides students with an opportunity to read widely in American, British and world literature. Students are trained in writing, and analytical and critical thinking skills that will prepare them for various academic and business-related pursuits.

FASHION

Department: Design and Media Arts
Department Chair: Ms. Carole Anderson, ROOM CY-222
(213) 763-3640, AndersCL@lattc.edu

PROGRAM OVERVIEW

The Fashion Design program is formulated to provide specialized training in the latest methods of garment construction, illustration, draping, and pattern making, including the most widely used apparel software programs. Students are encouraged to continually experiment with creative design problems during the two-year program. The fashion department is staffed by professional instructors who have spent many years in the fashion industry as designers, pattern makers, production managers and manufacturers in all categories of apparel. The Fashion Design classrooms are equipped like design rooms complete with industrial sewing machines, pressing equipment, grading machines and dress forms. In addition, the college has state-of-the-art computer lab classrooms where instruction is offered in Gerber Technology, Lectra Inc. and Tutaketch, which allows students to master technology along with traditional skills. The newest computer lab was developed to answer industry demand for training in fashion and technical illustration using Adobe Photoshop and Illustrator.

The fashion community contributes to the program through student scholarships donated by professional groups, companies and individuals. Fashion professionals are invited to work with and critique student designs and prominent speakers visit the campus on a regular basis to lecture on current fashion industry trends. Foreign and domestic fashion publications are available for student reference as well as an extensive collection of historical fashion magazines. The Sharon Tate Costume Collection houses a vast collection of apparel from noted designers and historical costumes, used to inspire students and offer creative solutions to design problems.

Los Angeles is the leading center for apparel manufacturing in the United States. These firms require personnel trained in the design and technical aspects of clothing production. Many local apparel manufacturing firms employ LATTC graduates as designers, assistant designers, grader/marker makers, pattern makers, technical designers, specification writers, and production managers.

The Fashion Design program prepares students for careers in all areas of apparel manufacturing from assistant designers to production management.

Required courses:
- Perform mathematical calculations for apparel.
- Use industrial sewing machines for apparel construction.
- Communicate design ideas visually using flat sketches or illustrations.
- Use and manipulate a basic pattern block.
- Use fabric manipulation to create three-dimensional forms.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
- Complete 42 units of Required Courses and 4 units of Major Electives with a "C" or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The daytime fashion design classes are part of a structured program, which each student is strongly advised to take in sequential order. Each semester is divided into two segments, and classes meet five days per week.

FASHION TECHNOLOGY

Certificate of Achievement
Major Units: 28

A Certificate of Achievement in Fashion Technology may be earned by completing 28 units of Required Courses with a “C” or better in each course.

A full range of condensed lab courses in clothing construction, sketching, grading, draping and pattern making are offered during the evening and on Saturdays. These courses may be taken in any order, and lead to a Certificate in Fashion Technology.

By fulfilling the program requirements, students are proficient in construction and assembly methods, illustration, both technical and fashion, pattern making, grading, and draping techniques. These courses will prepare students for apparel computer courses where they will apply skills using the latest computer technology.

Evening students may receive a Certificate of Achievement after taking 28 units that include:

Los Angeles is the leading center for apparel manufacturing in the United States. These firms require personnel trained in the design and technical aspects of clothing production. This evening/Saturday program allows industry professionals the opportunity to upgrade their skills and advance in the latest technology.
Upon completion of the program, students will understand the cultural aspects of fashion in history, entrepreneurial opportunities in the fashion industry, and how to communicate the latest fashion trends and styling. Students will also be proficient in international business processes preparing them for the global apparel market.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Evaluate business ideas and develop strategies.
- Research and analyze industry data.
- Perform calculations related to industry.
- Use various forms of communication to complete projects.
- Use technology to assimilate data and make presentations.
- Contribute and work in a group to complete a project.
- Merchandise apparel assortments.

FASHION MERCHANDISING

Associate in Sciences Degree
Major Units: 45

Requirements for the Associate in Sciences degree in Fashion Merchandising may be met by completing 45 units of Required Courses with a "C" or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

PROGRAM OVERVIEW

Fashion Merchandising is the planning, organization, and development of fashion products to be sold at a profit. The program at LATTC is unique in that it offers instruction covering both manufacturing processes and retail expertise. Computer technology plays an important role in the program offering instruction on AIMS 2000.

Retail is a major industry in Southern California and fashion constitutes one of its largest segments. Retail positions range from major department stores to specialty outlets, and from personal stylists to employment in wholesale manufacturing. Los Angeles has taken the lead as the largest apparel manufacturing center in the United States, and the Fashion Merchandising curriculum is designed to provide specialized training in fashion trends, and consumer demand, as well as wholesale concepts.
HYBRID & ELECTRIC PLUG-IN VEHICLE TECHNOLOGY

Department: Transportation
Department Chair: Mr. Jess Guerra, Room OH-114A
(213) 763-3919, GuerraJ@lattc.edu

PROGRAM OVERVIEW

The courses listed in this certificate compile a comprehensive list of job related skills needed to acquire hybrid and electric plug-in vehicle maintenance and repair technical skills. They cover basic, intermediate and advanced level training of these vehicles including the different configurations used in the automotive, transit and trucking industries. These skills will prepare an individual for entry-level employment or career advancement in the maintenance and repair of hybrid vehicles in all sectors of the transportation industry.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Identify alternative fuel and hybrid vehicles and explain their operation and related safety repair procedures.
- Safely remove and replace various hybrid and plug-in electric vehicle components using specialty tools and equipment according to manufacturer and industry safety guidelines.
- Perform complex hybrid and plug-in electric vehicle troubleshooting using manufacturer diagnostic software, schematics, and specialty tools designed for hybrid and electric vehicle repair.

HYBRID & ELECTRIC PLUG-IN VEHICLE TECHNOLOGY

Certificate of Achievement
Major Units: 12

A Certificate of Achievement in Hybrid and Plug-in Electric Vehicle Technology may be earned by completing 12 units of Required Courses with a “C” or better in each course.

LABOR STUDIES

Department: Labor Studies
Department Chair: John McDowell, Room LA-117
(213) 763-7129, McDowellJR@lattc.edu

The Labor Center

The Labor Center, located in LA-117, offers Labor Studies classes leading to an Associate in Arts Degree or Certificate of Achievement in Labor Studies. Classes and programs are held both on campus and off site at union halls and community organizations. Students can register by mail, online, on site in class or at the Labor Center Office.

The Labor Center maintains strong relationships with leaders of organized labor and the community, including a broad based Advisory Board. These leaders help promote participation in the Labor Studies program, and assure evaluation and feedback from the labor movement to help shape future programs. The Labor Center staff also advise Labor Studies students and prospective students, and the Center maintains a collection of labor DVDs available for free loan.

PROGRAM OVERVIEW

Labor Studies is designed to train students, union leaders, human relations professionals, and workers in the practical, applied skills and up-to-date knowledge of labor relations and for positions in union leadership. Employees in labor and human relations can develop career skills and prepare for positions or advancement in labor unions, labor relations, human relations and government. The instructors are all experts who are active in the field.

The Labor Studies Program offers the following alternative patterns of learning: 1) courses may be completed as desired to develop specific skills to meet the needs of the individual student; 2) courses may be completed to meet the requirements of the Associate Degree; 3) courses may be completed to meet the 24 units required to earn the Certificate of Achievement in Labor Studies.

By fulfilling the program requirements, students will have a greater understanding of the contributions of labor and the necessary skills for union leadership. This is particularly applicable to Los Angeles, with over 300 local unions with a combined membership approaching 800,000 union members.

Students who complete the requirements for the Associate Degree in Labor Studies will have a working knowledge of labor organizations, their structure, philosophy and day to day operation.
PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Use effective communication, mobilizing and leadership skills to organize, build and strengthen unions.

LABOR STUDIES

LABOR STUDIES
Certificate of Achievement
Major Units: 24

A Certificate of Achievement in Labor Studies may be earned by completing at least 15 units of Required Courses and 9 units of Major Electives listed under the Associate degree in Labor Studies with a “C” or better in each course.

Students who complete the requirements for the Certificate of Achievement in Labor Studies will have developed practical skills in representation, negotiations, advocacy, and problem solving at the workplace.

Students who earn a Certificate will be qualified for entry level positions in labor, industry, and government.

A maximum of 3 units of COOP ED may be applied to meet the 24 units Certificate requirement in Labor Studies.

NOTE: A maximum of 3 units of COOP ED may be applied to meet the 24 units Certificate requirement in Labor Studies.

Additional Labor Studies courses may be used to fulfill total major units. For additional information, contact the Labor Center.

LIBERAL ARTS AND SCIENCES

Liberal Arts and Sciences: Natural Sciences (Transfer) | A.A. | Plan A | - | 18 | 18 |

At least 60 degree applicable units (total major units and graduation plan units) are required to earn an Associate degree.
PROGRAM OVERVIEW

Students planning to transfer to a four-year college or university may choose the Associate in Arts degree with a major in Liberal Arts and Sciences by choosing one of the options listed below.

The Liberal Arts degree is designed for students who desire a broad base of knowledge in the liberal arts and sciences. The Liberal Arts degree is one option for students who plan to transfer to a four-year university, including the California State University (CSU) or the University of California (UC).

Select one of the options for the General Education Requirement

OPTION 1: LATTC Graduation Plan A or Plan B depending upon the degree selection
OPTION 2: Certified completion of the California State University General Education-Breadth pattern (CSU GE Breadth)
OPTION 3: Intersegmental General Education Transfer Curriculum (IGETC) pattern IGETC

NOTE: Students need to complete additional units to meet the required 60 units for the Associate of Arts degree.

Students should be aware that not all courses on this list are offered every semester.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Utilize their broad and well balanced educational experience in the area of arts, humanities, and social sciences to transfer to a four-year college or university.
- Think and communicate clearly and effectively both orally and in writing.
- Use mathematics.
- Understand the modes of inquiry of the major disciplines.
- Be aware of other cultures and times.
- Achieve insights gained through experience in thinking about ethical problems.
- Develop the capacity for self-understanding.
- Possess sufficient depth in some field of knowledge to contribute to lifetime interest.

LIBERAL ARTS AND SCIENCES: MULTIPLE SUBJECT

TEACHER PREPARATION

Associate in Arts Degree

Major Units: 49

Requirements for the Associate in Arts degree in Liberal Arts and Sciences: Multiple Subject Teacher Preparation may be met by completing 37 units of Required Courses and 12 units of Major Electives with a "C" or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The Multiple Subject Teacher Preparation option is designed for future elementary school teachers.

Students planning for transfer are cautioned that this curriculum may not provide for the completion of lower division requirements for transfer. Students should consult with a counselor for specific information regarding an intended major if transfer to a four-year university is a goal.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

- Utilize their broad and well balanced educational experience in the area of arts, humanities, and social sciences to transfer to a four-year college or university.
- Think and to communicate clearly and effectively both orally and in writing.
- Use mathematics.
- Understand the modes of inquiry of the major disciplines.
- Be aware of other cultures and times.
- Achieve insights gained through experience in thinking about ethical problems.
- Develop the capacity for self-understanding.
- Possess sufficient depth in some field of knowledge to contribute to lifetime interest.

**LIBERAL ARTS AND SCIENCES: NATURAL SCIENCES**

**Associate in Arts Degree**
Major Units: 18

Requirements for the Associate in Arts degree in Liberal Arts and Sciences; Natural Sciences may be met by completing 18 units of Required Courses with a "C" or better along with general education courses meeting Plan A graduation requirements. Information on the Plan A requirements may be found in the catalog under Graduation/Transfer Requirements.

This area of emphasis examines the physical universe, its life forms, and its natural phenomena. Emphasis is placed on students using the methodologies of science as an investigative tool. The Natural Sciences area of emphasis allows the students to take courses that MAY satisfy lower-division requirements with the fields of science including Biology, Chemistry, Allied Health fields, Nursing preparation, Health Science and related fields, Kinesiology, Pre-Med, Dental Hygiene and more.

Students planning for transfer are cautioned that this curriculum may not provide for the completion of lower division requirements for transfer. Students should consult with a counselor for specific information regarding an intended major if transferring to a four-year university is a goal.

Degree Requirements in Natural Sciences:
- Complete 18 units of coursework from courses listed below.
- At least one science course have a lab.

</tbody>
</table>

At least 60 degree applicable units (48 total major units and Plan B units) are required to earn an Associate degree.

**PROGRAM OVERVIEW**

LATTC offers an Associate in Science degree in Machine Shop CNC as well as a Certificate of Achievement.

The Associate in Science degree and Certificate of Achievement, is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 21 hours per week. This time commitment is necessary to allow for hands-on training in the lab applications used during the course of instruction.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in the Machining Industry. Students will properly use related terminology, safely set-up and operate numerous conventional and computer numerically controlled (CNC) machine tools, use computers to program various CNC machines directly or with Computer Assisted Machinery (CAM), and interpret most related parts and assembly drawings. The general education
component classes will give the student a well rounded education and provide knowledge and skills to assist in successful participation in all aspects of society.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use hand and power tools to perform work within the machining technology industry.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements required for work in the machining technology industry.
- Work independently and interdependently to safely accomplish shared professional outcomes.

At least 60 degree applicable units (44 total major units and Plan B units) are required to earn an Associate degree.

PROGRAM OVERVIEW

This program is designed for students who wish to enter the fields of marketing or public relations. It is designed to meet the needs of those who wish to become store managers, department store buyers, or retail/wholesale salespersons. Publicity, sales, and business writing are stressed.

By fulfilling the program requirements, students will have a background in the principles and practices involved in the promotion and distribution of products and services from producers through middleman to the ultimate consumer. This program leads to entry-level positions in public relations and marketing careers in business, industry, agency, government, and nonprofit sectors of society. Typical positions are retail, wholesale, industrial sales, buyer, merchandising supervisor, and self-employment.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

• Develop a marketing plan for a business using fundamental marketing theories and principles.
• Design, implement and evaluate a marketing/public relations campaign.
• Apply marketing research principles to a company’s product or service.
• Write for internal and external publications with an understanding of the needs of the target audiences.
• Apply basic graphic design principles to newsletters, brochures, reports, and related PR projects.
• Serve as an effective spokesperson for an organization or business.
• Apply ethical principles to decision making and crisis management.
• Explain the role of the public relations practitioner within the context of mass communication.
• Describe the effects of print and broadcast media on the practice of public relations.
• Apply advertising principles to promote a firm’s image and product/service offering.

MARKETING AND PUBLIC RELATIONS

Certificates of Achievement

A Certificate of Achievement in Marketing and Public Relations may be earned by completing 33 units of Required Courses with a “C” or better in each course.

</tbody>
</table>

At least 60 degree applicable units (22 total major units and Plan B units) are required to earn an Associate degree.

PROGRAM OVERVIEW

The Associate of Science for Transfer Degree in Mathematics will provide students interested in Mathematics, or any of the related fields such as Engineering, Physics or Statistics, with a strong academic background in mathematics. The courses taken by students in the pursuit of this degree will help develop students’ ability to approach and solve problems in pure or applied mathematics where this is required.

By successfully completing the Associate in Science in Mathematics for Transfer degree requirements at Los Angeles Trade Technical College, students are prepared to transfer to a four-year Mathematics program. Completion of coursework in single and multivariable Calculus, Linear Algebra, Differential Equations and Statistics will meet the lower division mathematics requirements of the California State University. CSU is required to “guarantee admission with junior status to any community college student who meets all of the requirements”. This degree is intended for students who are interested in transferring to a four-year university and majoring in Mathematics, Engineering, Physics and Statistics.

The Associate in Science in Mathematics for Transfer degree requirements are as follows.

1. Minimum of 60 CSU-transferable semester units.
2. Minimum grade point average (GPA) of at least 2.0 in all CSU-transferable coursework.
3. Completion of a minimum of 22 semester units from the list of required and Major Electives in the mathematics major with a grade
Educational Programs and Courses

Los Angeles Trade-Technical College 2012-2013 GENERAL CATALOG

of C or better or a “P” if the course is taken on a “pass-no pass” basis (title 5 § 55063).

4. Certified completion of the California State University General Education-Breadth pattern (CSU GE Breadth) or the Intersegmental General Education Transfer Curriculum (IGETC) pattern.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Apply the techniques of both differential calculus and integral calculus to problems involving functions of both one and several variables.
• Approach and solve problems in pure and applied mathematics where this is required.
• Use calculus to solve applications related to mathematics, engineering, physics, and statistics.
• Solve higher order constant-coefficient linear differential equations and systems of differential equations and use these methods to solve applied problems.

MATHEMATICS

Associate in Science for Transfer Degree
Major Units: 21-22

Requirements for the Associate in Arts degree in Mathematics may be met by completing 15 units of Required Courses and 6-7 units of Major Electives with a “C” or better along with general education courses meeting Plan A graduation requirements. Information on the Plan A requirements may be found in the catalog under Graduation/Transfer Requirements.

MEDICAL OFFICE ASSISTANT

Department: Business Administration/Computer Applications & Office Technologies
Department Chair: Ms. Paulette Bailey, Room CH-225
(213) 763-7269, BaileyP@lattc.edu

Award Title | Award Type | Grad. Plan | Required Course Units | Major Elective Units | Total Major Units |
------------|------------|------------|-----------------------|----------------------|------------------|
Medical Office Assistant | C | 29 | 3 | 32 |

For additional related degrees and certificates, refer to programs under Computer Applications & Office Technologies (CAOT).

PROGRAM OVERVIEW

The Medical Office Assistant Certificate of Achievement prepares students for entry-level employment in a medical/dental front office, such as a doctor/dentist’s office, hospital, clinic, and/or medical insurance company.

Upon completion of the certificate program, students are prepared to assume entry-level medical/dental office duties and responsibilities. The program may also prepare students for career advancement and retraining in the use of current computer application programs. The program also provides the basic skills that promote success in the workplace. Typical positions include medical clerk, medical transcriber, medical office assistant, and assistant medical office manager.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Successfully use the computer to process, organize and present data and information in basic business format.
• Communicate effectively via spoken word, print and media, and work collaboratively with others in an office setting.

MEDICAL OFFICE

Certificate of Achievement

Educational Programs and Courses

MICROCOMPUTER TECHNICIAN

Department: Electronics & Computer Information Systems
Department Chair: Mr. Eric Chavez, Room CH-325 (213) 763-3782, ChavezEL@lattc.edu

By fulfilling the program requirements, students are able to format a computer, install the operating system, and install all the necessary drivers. The students are able to successfully configure and create a network system consisting of a number of computers all for employment in a field related to microcomputer technician.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Install, configure, and add auxiliary equipment for a microcomputer.
• Load software and suggest programs to answer the needs of individuals and companies.
• Format a computer, install the operating system, and install all the necessary drivers.
• Configure and create a network system consisting of a number of computers.

MICROCOMPUTER TECHNICIAN
Associate in Science Degree
Major Units: 42

Requirements for the Associate in Science degree in Microcomputer Technician may be met by completing 42 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The Microcomputer Technician program is designed to prepare a technician to install, configure, and add auxiliary equipment for a microcomputer. The technician is also able to load software and suggest programs to answer the needs of individual companies. Microcomputer Technicians must be above average in knowledge of mechanical systems. They must also have interest and ability in mathematics to successfully apply the training presented in this program.

The computer industry is expanding due to the continuing drop in the price of computers and the introduction of new models with greater power. The fastest growing segment of this field is the microcomputer segment. The power and speed of these units continue to increase and, at the same time, the price continues to decrease. This has placed the computer within financial reach of many small businesses and individuals. With more systems being manufactured and installed, more technicians are needed.

MICROCOMPUTER TECHNICIAN Certificate of Achievement Major Units: 42

A Certificate of Achievement in Microcomputer Technician may be earned by completing 42 units of Required Courses listed under for the Associate degree in Microcomputer Technician with a “C” or better in each course.

This Certificate is designed for students who wish to train for employment as a microcomputer technician but do not wish to transfer to a four year university.

MOTORCYCLE REPAIR MECHANICS

Department: Transportation
Department Chair: Mr. Jess Guerra, Room OH-114A (213) 763-3919, GuerraJ@lattc.edu

A Certificate of Achievement in Motorcycle Repair Mechanics: Adjunct may be earned by completing 16 units of Required Courses and 7 units of Major Electives with a “C” or better in each course.

NURSING, REGISTERED

Department: Allied Health
Department Chair: Dr. Rita Weingourt, Room MH-165A (213) 763-7182, WeingouRL@lattc.edu

PROGRAM OVERVIEW

The Los Angeles basin is the leader in off road motorcycle racing. The Certificate of Achievement in Motorcycle Repair is designed for both new students as well as industry professionals who want to upgrade their skills and show validation of technology training.

Courses leading to the Certificate are offered during evenings and on weekends. Upon completion of the program, students will have the skills necessary to maintain, repair, and diagnose electrical and fuel induction systems, and will be proficient in tune-up overhaul procedures and basic shop practices.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Diagnose and repair issues related to various models of motorcycles.
- Maintain, repair, and diagnose electrical and fuel induction systems
- Demonstrate proficiency in tune-up overhaul procedures.
- Exemplify basic shop practices.

At least 60 degree applicable units (total major units and Plan B units) are required to earn an Associate degree.
PROGRAM OVERVIEW

The Registered Nursing (RN) Program at LATTC combines nursing and general education courses with selected laboratory experiences during which students provide nursing care to clients in hospitals and other health care facilities. Nursing courses include medical-surgical nursing, geriatric nursing, maternal child health nursing, pediatric nursing, psychiatric nursing, pharmacology, and nursing management and leadership/preceptorship. The program is designed to be completed within four semesters after admission for non-licensed candidates and within three semesters for candidates who have a valid California Licensed Vocational Nurses (LVN) license.

Applicants must meet health as well as other requirements mandated by the program and affiliating hospitals/clinic prior to entry. Candidates are admitted to the program in the Fall and Spring semesters. Candidates must enter the program with a minimum overall 2.5 grade point average in prerequisites and a 2.5 grade point average in the science prerequisites. A candidate may file an application only after all prerequisites have been completed. At that time the student will be eligible to take the nursing entrance examination called TEAS (Test of Essential Academic Skills). If the student achieves a passing score on the TEAS, he or she will be placed on the waiting list. If a student does not achieve a passing score on the TEAS, he or she will be provided with remediation opportunities and permitted to retake the exam. Students may retake the entrance exam once. Program flyers with prerequisites and admission information may be obtained from the Counseling Office or the Department of Allied Health.

Nursing is a field that is in high demand and is one that is personally rewarding and constantly stimulating. Well paying jobs for nurses are available in almost every city in America. More importantly, nurses have the opportunity to improve and even save lives; teach people how to achieve better health; and advocate for patients/clients and their families. Please visit the Department of Allied Health to learn more about this exciting field.

The Registered Nursing Program is approved by the California Board of Registered Nursing (BRN). Upon completion of the program, graduates are eligible to apply for the State Board of Registered Nursing Licensing Examination (NCLEX). Student graduates will be able to:

1. Use nursing process to assess, diagnose, plan, implement, and evaluate care for clients of all ages who are experiencing acute or chronic health problems.
2. Collaborate with other health care personnel to provide coordinated care for clients of all ages who are experiencing acute or chronic health problems.
3. Function within the scope of the California Nurse Practice Act.
4. Demonstrate commitment to the profession of nursing.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Utilize nursing process and Maslow’s Hierarchy of Needs to provide nursing care to clients along the health-illness curriculum across the life span.
• Demonstrate ability to apply theoretical knowledge and clinical skills to practice as an entry level registered nurse.

NURSING, REGISTERED

<table>

Requirements for the Associate in Science degree in Registered Nursing may be met by completing 41 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

PREREQUISITE COURSES

A GPA of 2.5 or better must be earned in all prerequisite courses. A GPA of 2.5 or better must be earned in Biology and Microbiology. High school diploma, GED, U.S. university degree or A.S./A.A. degree is required. Foreign education may be considered after transcript evaluation.

Requirements for the Associate in Science degree in Registered Nursing may be met by completing the Required Courses below and 18 units of general education courses to meet the Plan B graduation requirement.

</tr>
</tbody>
</table>

For additional related degrees and certificates, refer to programs under Refrigeration and Air Conditioning Mechanics.

PROGRAM OVERVIEW

Most craft workers specialize in one kind of work, such as plumbing or carpentry. General maintenance and repair workers, however, have skills in many different crafts. They repair and maintain machines, mechanical equipment, and buildings and work on plumbing, electrical, and air-conditioning and heating systems. They build partitions, make plaster or drywall repairs, and fix or paint roofs, windows, doors, floors, woodwork, and other parts of building structures. They also maintain and repair specialized equipment and machinery found in cafeterias, laundries, hospitals, stores, offices, and factories.

A general maintenance worker’s typical duties include troubleshooting and fixing faulty electrical switches, repairing air-conditioning motors, and unclogging drains. In addition, newer buildings sometimes have computer-controlled systems that allow maintenance workers to make adjustments in building settings and monitor problems from a central location; for example, they can remotely control light...
sensors that turn off lights automatically after a set amount of time or identify a broken ventilation fan that needs to be replaced.

General maintenance and repair workers inspect and diagnose problems and determine the best way to correct them, frequently checking blueprints, repair manuals, and parts catalogs. They obtain supplies and repair parts from distributors or storerooms. Using common hand and power tools such as screwdrivers, saws, drills, wrenches, and hammers, as well as specialized equipment and electronic testing devices, these workers replace or fix worn or broken parts, where necessary, or make adjustments to correct malfunctioning equipment and machines.

General maintenance and repair workers also perform routine preventive maintenance tasks to ensure that machines continue to run smoothly, building systems operate efficiently, and the physical condition of buildings does not deteriorate. Following a checklist, they may inspect drives, motors, and belts, check fluid levels, replace filters, and perform other maintenance actions. Maintenance and repair workers keep records of their work.

The “Certified Steam Boiler License” is a specialized certification required for many maintenance workers. LATTC offers a Certificate of Achievement-Steam Plant to address this need. The core of the program is designed to prepare students to take the Boiler/Steam Plant certification exam, while the remainder is structured to create students who possess an array of skills which would be transferrable to a variety of job settings, creating a highly capable general maintenance worker.

By fulfilling the program requirements, students will have the necessary skills for entry and mid level jobs in the general maintenance industry. This program prepares the student for basic electrical, heating and refrigeration, plumbing, and carpentry work, and to pass the “Certified Boiler/Steam Plant” License exam.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Use and interpret technical manuals to properly identify all major components of a high and low pressure boiler system and state and describe their function.
• Demonstrate sustainable industry principles and practices.
• Apply the proper procedures for calculation and measurement necessary in the operations and maintenance field.
• Safely use appropriate materials, test equipment and tools in order to connect and or troubleshoot a high and low pressure boiler system in addition use charging, evacuation, and recovery equipment properly and safely to a heating, ventilation, air conditioning and refrigeration (HVACR) system.

OPERATION & MAINTENANCE ENGINEERING: STEAM PLANT

Certificate of Achievement

PARALEGAL STUDIES

Department: Business Administration/Computer Applications & Office Technologies
Department Chair: Ms. Paulette Bailey, Room CH-225
(213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Paralegal Studies program at LATTC will prepare students for employment as paralegals or legal assistants in both the private and public sectors. Students who complete the program will be able to work with lawyers in law offices, corporations, governmental agencies or other entities. Upon completion of the program students will have the following skill-sets: Prepare cases for courts, collect data and investigate case facts, and build arguments based on
data; Review previous judiciary decisions and make information available and accessible to attorneys; Prepare legal reports for attorneys; Identify the law pertaining to individual cases and all required information; and Prepare legal documents, draft motions, and obtain affidavits.

The program will also provide hands-on experience in legal assistance practices through research studies on legal cases, internships within law firms, and other employment sectors complementing the Paralegal Job Market.

The Paralegal Studies program will enhance the professional specialized skills of a law office clerk. The graduate possessing the Certificate of Achievement or the AA Degree will be able to work closely with attorneys and be responsible for researching, analyzing, and managing tasks associated with legal cases and the delivery of legal services. The eminence of the Paralegal Studies program at LATTC stems from its partnership with practicing lawyers, paralegals from the public and private sectors, and other law school’s faculty members.

The mission of the program is to provide an environment of excellence in knowledge and the latest practices of the legal field. LATTC’s Paralegal Studies program aims at preparing students for the Certified Legal Assistant/Certified Paralegal (CLA/CP) exam.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Prepare cases for courts, collect data and investigate case facts, and build arguments based on data.
- Review previous judiciary decisions and make information available and accessible to attorneys.
- Identify the law pertaining to individual cases and all required information.
- Prepare legal documents, draft motions, and obtain affidavits, including legal reports for attorneys.

Plumbing: Construction Technology —(evening only) | C | 37 | 8 | 45

At least 60 degree applicable units (48 total major units and Plan B units) are required to earn an Associate degree.

For additional related degrees and certificates, refer to Water Systems Technology.

PROGRAM OVERVIEW

Most people are familiar with plumbers, those individuals who come to their home to unclog a drain or install an appliance. Plumbers install, maintain, and repair many different types of pipe systems. Some systems move water to a municipal water treatment plant and then to residential, commercial, and public buildings. Other systems dispose of waste, provide gas to stoves and furnaces, or provide for heating and cooling needs. Pipe systems in power plants carry the steam that powers huge turbines, while pipes also are used in manufacturing plants to move material through the production process. Specialized piping systems are critical in both pharmaceutical and computer-chip manufacturing. The existence of such various pipe systems generate the need for trained plumbers.

Plumbers must be able to follow building plans or blueprints and instructions, lay out the job, and work efficiently with the materials and tools of their trade. Computers and specialized software are used to create blueprints and plan layouts. To meet the training needs of persons interested in becoming a service and repair plumber or a commercial construction plumber, LATTC offers a Plumbing Associate in Science degree and a Plumbing Construction Technologies Associate in Arts degree, as well as Certificates of Achievement.

The Associate in Science degree is designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 24 hours per week. This time commitment is necessary to allow for hands-on training with the laboratory applications used during the course of instruction.

The Associate in Arts degree is an evenings-only course of study designed for individuals currently in the field who want to improve or expand their skills. Due to limitations on available evening hours, the utilization of hands-on laboratory application is assumed to be provided at the student’s place of employment. Depending on availability, the Associate in Arts degree may require slightly longer time to complete due to limited hours available. Check with the Department Chair for more details prior to enrolling.

Plumbers work in commercial and residential settings where water and septic systems need to be installed and maintained. They also work outdoors, sometime in remote areas, as they build the pipelines that connect sources of oil, gas, and chemicals with the users of these materials. Because plumbers frequently must lift heavy pipes, stand for long periods, and sometimes work in uncomfortable or cramped positions, they need physical strength as well as stamina.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential, commercial, and industrial service and repair or construction plumbing. Reading of blueprints, layout, estimating, installation of

PROGRAM OVERVIEW

The Chemical Process Industries (CPI) are a major part of U.S. business and represent a diverse industries ranging from pharmaceuticals to large-scale processing of gasoline and waste water treatment and food and beverage. Working in the CPI represents a particular challenge with regard to handling materials, which range from small quantities of specialized products to large quantities of potentially hazardous materials.

Process Technicians (PTs) team with engineers and other technicians with specialties such as instrumentation, electronics, or maintenance to adjust and optimize conditions for the production of large quantities of products. The quality of the production is dependent on the skill and knowledge of the Process Technician in carrying out the operations of the plant. PTs must be concerned with issues such as personal and co-worker safety, impact of materials on the environment, and process skills that deal with all aspects of controlling processes and maintaining equipment.

CPI is the fourth largest manufacturing industry in the United States. It encompasses plants manufacturing an almost endless range of products, such as chemicals, (both organic and inorganic), food and beverages, cleaning preparations, plastics, agricultural chemicals, paints, pharmaceuticals, cosmetics, power generation, pulp and paper, petroleum refining and wastewater treatment, to name just a few.

The LATT Process Technology program is a member of the California Chemical and Process Technology Alliance (CCPTA) and the Pacific Technology Career Alliance, an education/industry consortia of major chemical industries both public and privates. The CCPTA was founded for the purpose of ensuring that Process Technology instructors and students are on the receiving end of current industry analytical methods, techniques, equipment and standards. The Alliance is also committed to providing a well skilled employee pool for chemical industry employment opportunities.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
- Evaluate and apply basic knowledge of operations and industrial processes.
- Demonstrate good verbal and written communication.
- Practice basic knowledge of current Good Manufacturing Practices (cGMPs).
- Evaluate and apply knowledge of regulatory policies for process practices.
- Demonstrate knowledge of Environmental Health and Safety.

PROCESS TECHNOLOGY

Associate in Science Degree
Major Units: 45

Requirements for the Associate in Science degree in Process Plant Technology (PTEC) may be met by completing 45 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

The Process Technology program prepares students to become process operators in chemical industries such as:
- Petroleum refining
- Oil and gas exploration and production
- Power generation
- Alternative energy
- Pharmaceuticals
- Food and beverage
- Cosmetics
- Water and wastewater
- Chemical manufacturing
- Biotechnology

Processing plants for most of the above mentioned industries can be found locally in Los Angeles County and adjoining counties and nationwide. The Associate of Science degree in Process Technology will lead to a highly skilled, high benefits and high-wage, life-long profession. The student will be trained in the proper use of safety, processing, and equipment.

At the end of the Associate degree in Process Technology, a student will be able to perform such task as:
- Operating a process plant
- Perform all task in a safe manner, protecting plant personnel and our environment
- Operate the plant economically
- Recognize abnormal situations
- Identify plant equipment
- Explain the important functions of the plant
- Explain interrelationships between components of a system
- Analyze the overall processing system
• Diagram control systems
• Analyze information

High school students preparing for the PTEC program are encouraged to take courses in Chemistry/Chemical Technology, Physics, English, and at least one year of Algebra.

Certificate of Achievement

Major Units: 45

A Certificate of Achievement in Process Technology may be earned by completing 45 units of Required Courses listed under for the Associates degree in Process Technology with a “C” or better in each course.

REAL ESTATE

Department: Business Administration/Computer Applications & Office Technologies

Department Chair: Ms. Paulette Bailey, Room CH-225
(213) 763-7269, BaileyP@lattc.edu

PROGRAM OVERVIEW

The Real Estate program prepares students seeking careers as real estate professionals and equips the general public who are prospective property owners, present property owners, or real estate investors with important real estate knowledge. The program explores many aspects of the real estate profession allowing students to acquire entry-level marketable skills while gaining much of the necessary course work to obtain a California state license as a real estate sales agent and/or broker. The program also offers advanced courses for real estate agents or for individuals in real estate related fields and industries.

In October of 2007 the 18-month conditional license will be eliminated and potential licensees must take REAL ES 1, REAL ES 3 and one other 3 unit course to qualify to sit for the Real Estate Salesperson’s examination. Many other industries are directly or indirectly related to real estate and often require a basic knowledge of the subject area for employment consideration. Typical positions: Real Estate agent, broker, appraiser, property manager, escrow officer, real estate office manager, land developer, urban planner, construction, and investor/owner of income producing properties.

By fulfilling the program requirements, students are prepared for a variety of entry-level and advanced career opportunities in the real estate profession. Completion of the degree program satisfies most of the formal education requirements to obtain a California Real Estate Broker's License.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Demonstrate knowledge of real estate principles and practices in fulfillment of Department of Real Estate Licensure requirement.

PROGRAM OVERVIEW

Cooling and heating devices help regulate the temperature, humidity, and air quality in residential homes, commercial locations, and industrial facilities. Critical items like food and medicine require refrigeration to keep them from spoiling. Technicians repair, maintain, and install heating, air-conditioning, and refrigeration systems. Our program trains these technicians. Los Angeles Trade Technical College offers an Associate in Science degree in Refrigeration and Air Conditioning Mechanics, as well as Certificate of Achievement.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential, commercial, and Industrial service and repair of air conditioning, heating and refrigeration systems. Environmental Protection Agency (EPA) refrigerant certification will be received. Electrical controls, piping installation, compressor installation and repair are just some of the skills that would be mastered during this program.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
- Use and interpret technical manuals to properly identify all major components of a refrigeration system and state and describe their function.
- Demonstrate sustainable industry principles and practices.
- Apply the proper procedures for calculation and measurement necessary in the air conditioning and refrigeration field.
- Safely use appropriate materials, test equipment and tools in order to connect or troubleshoot a refrigeration and air conditioning system.
- Use charging, evacuation, and recovery equipment properly and safely.

REFRIGERATION & AIR CONDITIONING MECHANICS

Associate in Science Degree
Major Units: 48

Requirements for the Associate in Science degree in Refrigeration and Air Conditioning Mechanics may be met by completing 48 total major units with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

Courses from the day or evening programs should not be mixed in an attempt to meet the degree requirements.

REFRIGERATION & AIR CONDITIONING MECHANICS
Certificate of Achievement
Major Units: 48

A Certificate of Achievement in Refrigeration and Air Conditioning Mechanics may be earned by completing 48 total major units with a “C” or better.

Courses from the day or evening programs should not be mixed in an attempt to meet the degree requirements.

RENEWABLE ENERGY GENERATION, TRANSMISSION, AND DISTRIBUTION: POWERLINE MECHANIC
Associate in Science Degree
Major Units: 43

Requirements for the Associate in Science degree in Renewable Energy Generation, Transmission, and Distribution: Powerline Mechanic may be met by completing 34-36 units of Required Courses and 6-7 units of Major Electives with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

Recommended sequence of courses for Renewable Energy Generation, Transmission, and Distribution AS Degree with Powerline Mechanic Emphasis

RENEWABLE ENERGY GENERATION, TRANSMISSION, AND DISTRIBUTION: POWERLINE MECHANIC
Certificate of Achievement
Major Units: 18-20

A Certificate of Achievement in Powerline Mechanic may be earned by completing 18-20 units of Required Courses with a “C” or better in each course.

PROGRAM OVERVIEW
LATTTC offers a series of courses in the Renewable Energy Generation, Transmission, and Distribution Associate in Science degree, with a Powerline Mechanic emphasis, program for individuals interested in working in occupations in the utility industry sector—particularly transmission and distribution occupations. The courses comprising this program enable individuals to be prepared to obtain entry-level positions in the utility sector.

PROGRAM LEARNING OUTCOMES (PLOs)
Upon completion of the Degree program, students are able to:
• Use hand and power tools to perform basic utility powerline work.
• Perform calculations and measurements commiserate to entry level powerline work.
• Pole Climbing Competencies.

At least 60 degree applicable units (42 total major units and Plan B units) are required to earn an Associate degree.

## Program Overview

LATTC offers a series of courses for individuals interested in working in the new, emerging renewable energy and energy efficiency industry. This degree program includes courses that enable individuals to: (1) have the requisite knowledge and skills to obtain employment in the energy/utility sector and (2) obtain skills and expertise to pursue other renewable energy and/or energy efficiency occupations.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career in residential and commercial renewable energy-related occupations.

## Program Learning Outcomes (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Use hand and power tools to perform new and retrofit weatherization and related energy efficiency operations.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements related to weatherization and other energy efficiency operations.
- Work independently and interdependently to safely accomplish shared professional outcomes.

## Renewable Energy Technician W/ Energy Efficiency Emphasis

**Associate in Science Degree**  
**Major Units:** 42

Requirements for the Associate in Science degree in Renewable Energy Technician W/ Energy Efficiency Emphasis may be met by completing 38 units of Required Courses and 4 units of Major Electives with a "C" or better along with general education courses meeting Plan B graduation Requirement. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

## Weatherization and Energy Efficiency Certificate of Achievement  
**Major Units:** 12

A Certificate of Achievement in Weatherization and Energy Efficiency may be earned by completing 12 units of Required Courses listed, with a "C" or better in each course.

LATTC offers a series of courses for individuals interested in employment as weatherization and energy efficiency specialists. The courses are developed both for new building professionals and for professional builders/contractors already in the workforce in need of these skills. Homeowners may also find the introduction class helpful. Individuals will be prepared to be weatherization, energy efficiency, and retrofit technicians, home improvement retrofit trainees, residential air sealing technicians, insulation installers, energy conservation representatives or residential energy field auditors.

ENERGY SYSTEMS TECHNOLOGY FUNDAMENTALS

Certificate of Achievement
Major Units: 16

A Certificate of Achievement in Energy Systems Technology Fundamentals may be earned by completing 16 units of Required Courses listed, with a “C” or better in each course.

The goal of the Energy Systems Technology Fundamentals Certificate of Achievement Program is to provide short-term industry-recognized training for entry-level professionals in the utility/energy sector, a significant industry sector in the Los Angeles region.

Skills gained from this program prepare a student for employment at the entry level in jobs such as; Los Angeles Department of Water and Power “Electrical Utility Helper” classification, Southern California Edison’s “Utility Helper” position, City of Los Angeles “Electrical Craft Helper”.

At least 60 degree applicable units (42 total major units and Plan B units) are required to earn an Associate degree.

For additional related certificates, refer to programs under Energy Systems Technology Fundamentals.

PROGRAM OVERVIEW

LATTC offers a series of courses for individuals interested in working in the new, emerging field of solar energy. The courses enable individuals to be prepared to become certified by North American Board of Certified Energy Practitioners (NABCEP). The solar courses have also obtained NABCEP approval. In addition, one of the courses—Fundamentals of Solar Electricity (ECONMT 105 —54 hours)—prepares individuals to be able to take the NABCEP Photovoltaic (PV) Entry Level Certificate of Knowledge test. This Certificate program also prepares individuals and is required to successfully complete other renewable energy or energy efficiency Certificate of Achievement and degree programs at the college. As such, it serves as one of the “stackable” certificates in the renewable energy/energy efficiency certificate and degree pathway.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Use hand and power tools to perform solar (PV) installation and maintenance work.
• Demonstrate sustainable industry principles and practices.
• Perform calculations and measurements required for solar (PV) installation and maintenance work.
• Work independently and interdependently to safely accomplish shared professional outcomes.

RESTAURANT MANAGEMENT

Department: Culinary Arts/Professional Baking
Department Chair: Mr. Steve Kasmar, ROOM SA-118
(213) 763-7732, KasmarSL@lattc.edu

Award Title Award Type Grad. Plan Required Course Units Major Elective Units Total Major Units

Restaurant Management A.A. Plan B 42 - 42

At least 60 degree applicable units (42 total major units and Plan B units) are required to earn an Associate degree.

For additional related degrees and certificates, refer to programs under Baking Professional and Culinary Arts.

PROGRAM OVERVIEW

The Greater Los Angeles area needs qualified individuals who can lead the numerous hotel, restaurant, and catering kitchens in our region. The Restaurant Management program at LATTC offers a foundation in management theory, cooking fundamentals, sanitation, safety and restaurant supervision. Students practice and demonstrate culinary and management skills in a working foodservice facility located on the college campus.

The Restaurant Management program provides a foundation in kitchen fundamentals including preparation of hot and cold sauces, vegetable and meat cookery, identifying accounting procedures and reports, operating kitchen equipment, expression and employing management theory and supervision techniques.

By fulfilling the program requirements, students are prepared to find positions as restaurant managers, manager’s assistant, kitchen manager, dining room manager, or kitchen supervisors.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree program, students are able to:

• Practice and demonstrate culinary and management skills in a working foodservice facility on a college campus.
• Demonstrate foundational kitchen fundamentals, including operating kitchen equipment.
• Employ management and supervision techniques.
• Utilize accounting procedures and reports.

RESTAURANT MANAGEMENT
Associate in Arts Degree
Major Units: 42

PROGRAM OVERVIEW

Sign makers design and produce signs to advertise and identify businesses, industries, public services, entertainment, as well as other areas. Students learn how to design and execute a wide variety of signs including temporary signs such as posters and paper banners plus permanent signs on wood, metal, canvas, vehicles, walls and glass. Students learn the fundamentals of lettering, design, composition, and color, while practicing hand and eye coordination. Students also learn to both draw and brush a diverse set of alphabets and a variety of interior and exterior signs. In addition, students study how to design and execute signs on sign specific software including patterns, vinyl lettering, and vinyl application plus how to use plotters, scanners, and clip art images.

Many sign makers are self-employed, work freelance or are employed in a commercial sign shop. Employment opportunities are competitive and only those with good hand skills and knowledge have the best chance for employment. Specialty skill instruction like dimensional letters, sandblasted signs, gold leaf and high-end layout and design are offered to advanced students. Advanced students participate in a business module for pricing and eventual self-employment.

By fulfilling the program requirements, students are proficient in basic hand lettering, sign design and layout, the production of temporary signs, exterior permanent signs, window signs and specialty signs, computer operation including printing, cutting and applying vinyl lettering and general production skills needed to complete a successful sign. Students will also understand basic pricing and sales techniques, record keeping or small business operation, and obtaining licenses.

SILKSCREEN: Silkscreening is a printing method for multiple or large number jobs. The student will learn how to make a screen, cut a variety of stencils, prepare the screen and print an image. Proper ink usage and clean-up will be taught. Students will print on a variety of substrates including multicolor prints on T-shirts.

MURAL CLASS: Techniques for producing large format murals are taught using a variety of methods including the grid method. Students will learn layout and design, pattern making and transferring artwork to the wall. Surface preparation, paints, tools and brushes will also be covered.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Draw and hand letter basic alphabets
- Design and layout signs
- Produce computer generated design and letters.
- Construct sign blanks and prep for lettering.
- Design, execute digital prints.
- Construct a basic silk screen.
- Silk-screen prints on various substrates.
- Design, layout a mural.
- Prepare wall layout a mural.
- Paint finished mural.

For additional related degrees and certificates, refer to programs under Cosmetology.

PROGRAM OVERVIEW

By fulfilling the program requirements, students are able to apply knowledge and skills preparing them for the California State Board of Barbering and Cosmetology license and the Esthetic industry.
By fulfilling the program requirements, students are proficient in the process and procedures needed to transform an initial entrepreneurial idea into a viable business operation. They will be adept at in-depth analysis of ways new business ventures are created, designed, developed, and operated. They will understand and perform the basic planning and management skills required to form and operate a entrepreneurial business.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

• Convey an understanding of the legal and social environment of business, in particular civil and criminal law, consumer protection, contracts, employment and personal property rights.
• Demonstrate competence in financial accounting processes and systems.
• Express competence in budgeting, financial statements, performance evaluations, differential analysis, product pricing, and capital investment analysis.
• Demonstrate competence in corporate and management accounting.
• Understand microeconomic theory, financial analysis, and policy applications.
• Communicate effectively in a business setting both orally and in writing.

SMALL BUSINESS ENTREPRENEURSHIP

Certificate of Achievement

Major Units: 32

A Certificate of Achievement in Small Business Entrepreneurship may be earned by completing 32 units of Required Courses listed, with a “C” or better in each course.

SOLID WASTE MANAGEMENT TECHNOLOGY

Certificate of Achievement

Major Units: 24

A Certificate of Achievement in Solid Waste Management Technology may be earned by completing 24 units of Required Courses and 12 units of Major Electives listed with a “C” or better in each course.

Students completing the Certificate program will be proficient in performing the duties involved in landfill management including collection, transportation, storage and disposal.
PROGRAM OVERVIEW

The Street Maintenance Technology program is designed primarily for those involved in public works maintenance operations. Asphaltic and concrete pavement, construction, plan reading, calculation of materials, state and municipal codes, report writing, and heavy equipment operation and maintenance are some of the skills required in this field. To meet the training needs of persons interested in becoming a street maintenance worker, LATTC offers a Street Maintenance Associate degree and a Certificate of Achievement.

The street maintenance field has evolved into a broader category of workers. Workers in this arena are primarily employed by governmental agency that perform maintenance operations on public highways and streets. Professionals in this field are involved at the ground level through upper level management.

By fulfilling the program requirements, students will have the necessary knowledge and skills for a career as a Street Services Worker. Knowledge and skills will be mastered in the area of installation and maintenance of various types of street construction and material including asphalt and concrete. Students will also gain the supervisory skills needed to be promoted into management.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Use hand and power tools to perform street services work.
• Demonstrate sustainable industry principles and practices.
• Perform calculations and measurements required for street services work.
• Work independently and interdependently to safety accomplish shared professional outcomes.

STREET MAINTENANCE TECHNOLOGY

Certificate of Achievement

Major Units: 30

A Certificate of Achievement in Street Maintenance Technology may be earned by completing 30 units of Required Courses listed under for the Associates degree in Street Maintenance Technology with a “C” or better in each course.

REQUIRED COURSES

ST MAIN 103 Applied Calculations in Public Works 3
ST MAIN 203 Survey of Street Services 3
ST MAIN 204 Street Maintenance I: (Intro to Street Maintenance) 3
ST MAIN 205 Street Maintenance II 3
ST MAIN 206 Street Maintenance III 3
ST MAIN 207 Street Maintenance IV 3
ST MAIN 208 Street Maintenance V 3
ST MAIN 209 Street Maintenance VI 3
ST MAIN 210 Street Maintenance VII 3
ST MAIN 211 Street Maintenance VIII (Supervision) 3

MAJOR ELECTIVES

ST MAIN 209 Class “B” Drivers License Prep. 3
ST MAIN 210 Motor Sweeper Operator 3

STREET MAINTENANCE TECHNOLOGY

Associate in Arts Degree

Major Units: 30

Requirements for the Associate in Arts degree in Street Maintenance Technology may be met by completing 30 units of Required Courses with a “C” or better, along with the general education courses meeting Plan A graduation requirements. Information on the Plan A requirements may be found in the catalog under Graduation/Transfer Requirements.

REQUIRED COURSES

ST MAIN 103 Applied Calculations in Public Works 3
ST MAIN 203 Survey of Street Services 3
ST MAIN 204 Street Maintenance I: (Intro to Street Maintenance) 3
ST MAIN 205 Street Maintenance II 3

</table>

For additional related degrees and certificates, refer to programs under Fashion Design and Fashion Merchandising.

For additional related degrees and certificates, refer to programs under Fashion and Fashion Merchandising.

#### PROGRAM OVERVIEW

The LATTC Tailoring Certificate program is uniquely designed for the working adult. Courses are offered during evening and weekend hours and cover all aspects of the pattern making and construction techniques necessary to complete tailored garments. Courses include construction techniques for bespoke men’s and women’s garments including trousers, jackets and coats. Tailors are distinctly different from dressmakers in that they are specialized in constructed garments such as jackets, coats and trousers or slacks.

The skills for custom tailoring are always in demand. Stylists work with tailors to outfit sports figures, celebrities, and specialty customers. Costume designers work with tailors to create multiple versions of garments needed in film production, and customers seeking individual design and fit seek out the assistance of professional tailors.

#### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:
- Perform basic tailoring techniques
- Construct a tailored jacket
- Construct tailored men’s pants
- Execute hand-made buttonholes
- Construct a man’s style shirt
- Draft basic men’s patterns
- Draft men’s jackets

#### TAILORING

**Certificate of Achievement**  
**Major Units:** 20

A Certificate of Achievement in Tailoring may be earned by completing 12 units of Required Courses and 8 units of Major Electives listed, with a “C” or better in each course.

The Tailoring Certificate of Achievement prepares students to construct trousers, jackets, vests and coats for personal fit and for custom tailoring. Upon completion of the program students are able to draft patterns as well as construct tailored garments.

At least 60 degree applicable units (48 total major units and Plan B units) are required to earn an Associate degree.

For additional related degrees and certificates, refer to programs under Sign Graphics.

#### PROGRAM OVERVIEW

The Visual Communications program at LATTC is the starting point for exciting careers in animation, art direction, digital imaging, graphic design,
illustration, multi-media, web design and other related fields. The fast-paced two-year program begins with fundamentals: color, design, drawing, prepress and typography. Advanced levels create finished portfolios on a Macintosh computer, utilizing industry standard digital software. Student portfolios demonstrate creativity and discipline, displaying dynamic art sensibilities and creating visual solutions for problems of marketing and publishing. The Visual Communications program focuses on four core areas:

- **GRAPHIC DESIGN**: Beginning levels will study the areas of layout and design, typography, and advertising concepts. Advanced levels will develop logos and corporate identity programs, design brochures with extended text, and create original magazine advertising, which is directed to specific audience demographics. Problem solving, brainstorming and computer training will receive equal emphasis. Graduating student portfolios incorporate a wide variety of projects showcasing the student’s ability to conceptualize, design and use typography as a communication tool.

- **DRAWING**: Beginning levels will study freehand observational drawing, perspective and the principles of light and shade. Black and white mediums will be explored in pencil, markers and ink. Advanced levels create comprehensive layouts in color marker and pencil as preliminary development. Finished designs and illustrations for advertising and on-line usage are then created traditionally or digitally and serve as portfolio samples.

- **DIGITAL PREPRESS**: Thorough study of the preparation of art, graphics, photography, and typography for reproduction in print. Beginning levels concentrate on understanding the mechanics of color separations and print specifications. This knowledge is then applied as students create digital files that utilize specific print requirements. Advanced levels prepare complex graphic computer files for output at commercial printers.

- **COMPUTER GRAPHICS**: The creation of art and design on the computer requires mechanical know-how and considerable familiarization with the workings of several graphic software applications. The Visual Communications program offers instruction in Adobe Creative Suites: Acrobat, Dreamweaver, Flash, Fireworks, Illustrator, InDesign and Photoshop and HTML. Graduating student portfolios demonstrate familiarization with each of these software applications and an ability to manipulate each for specific uses and creative affects.

Today’s commercial marketplace for artists has never been more available. Flash motion graphics and web design have initiated new and creative directions. Traditional artists and conventional designers continue as before but have incorporated digital software within their accomplished collection of talents. This blending of tradition and technology is the primary emphasis within the Visual Communications program.

By fulfilling the program requirements, students can pursue many different creative careers. While it is advisable for students to continue higher education, many graduates have entered the workplace upon completion of the Visual Communications program alone realizing creative and financial success. Graduating students will have acquired visual sensitivities with respect to type, images and graphics; they will be trained in the visual software used by industry, and will understand marketing as it applies to commercial art and understand how to tailor their work appropriately to specific audiences. Graduates must present their portfolio to a panel of industry professionals as a condition of course completion. With this review, students are measured in the scope and quality of their work, problem solving ability, presentation skills and ability to interact as they explain their ideas and work.

### PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Understand computer applications and formats for graphic design
- Use of advertising principles to guide graphic and visual problem solving.
- Formalize business practice skills in preparation for employment.
- Develop competencies for on-line design and publication.
- Demonstrate understanding of history, theories, and terminology of reproduction as applied to design.

### VISUAL COMMUNICATIONS

#### Associate in Arts Degree

**Major Units: 48**

Requirements for the Associate in Arts degree in Visual Communication may be met by completing with a “C” or better 46 units of Required Courses and 2 units of Major Electives along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

At least 60 degree applicable units (total major units and Plan A units) are required to earn an Associate degree.

For additional related degrees and certificates, refer to Plumbing.

PROGRAM OVERVIEW

Projected retirements of existing operators will fuel this demand as well. The net result of these shifts will be increased openings for personnel in all areas: plant operations, distribution/collection field maintenance, administration, customer service, line supervision, meter readers, engineers, and plant maintenance.

The Water Systems Technology programs at LATTC offers students a choice of two concentrations within water systems industry:

- **WASTEWATER OPTION** offers courses focusing on preliminary, primary, secondary, and tertiary treatment systems as well as disinfection methods, solids treatment, and solids and effluent disposal practices.
- **SUPPLY WATER OPTION** offers courses focused on the operation and design of water systems, wells, pumps and meters; water treatment for potable water; and technical phases of automatic controls, including power and code considerations.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Have the basic knowledge of the sources of wastewater, its collection and available treatment technology.
- Knowledge of and understanding of factors affecting treatment of wastewater.
- Basic knowledge of the Regulations governing wastewater treatment and organizations involved.
- Basic knowledge of the wastewater treatment processes and process control strategies.
- Knowledge wastewater math as it applies to process control.

WASTEWATER SYSTEMS TECHNOLOGY
Associate in Science Degree
Major Units: 21

Requirements for the Associate in Science degree in Wastewater Systems Technology may be met by completing 21 units of Required Courses with a “C” or better, along with general education courses meeting Plan A graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

In the State of California, there are five operator grade levels of profession in operating and maintaining publicly owned wastewater treatment facilities. Each grade level requires passing an examination administered by the State of California, after meeting qualifying experience and educational requirements. An Associates degree and 6 years of performance of an Operator Duty while holding a certificate, qualifies a person to be promoted to grade five level.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Degree/Certificate program, students are able to:

- Have the basic knowledge of the surface water and groundwater sources and be able to identify characteristics of different sources of water.
- Knowledge of and understanding of factors affecting what it takes to bring water from source to the tap (environmental issues, engineering studies, construction, etc.)
- Basic knowledge of the Safe Drinking Water Act Regulations.
- Basic knowledge of the water treatment processes.
- Knowledge of the hydraulics of the water distribution system and functions of the elements of the distribution system (reservoirs, pumps, pipes, valves, hydrants, meters, etc.)
- Knowledge of the operation of the water treatment and the distribution systems and the skills and knowledge to take the State Operator Certification Exams and become a water distribution or treatment operator.
WATER SYSTEM TECHNOLOGY: SUPPLY WATER TECHNOLOGY

Associate in Science Degree
Major Units: 22

Requirements for the Associate in Science degree in Water Systems Technology: Supply Water Technology may be met by completing 22 units of Required Courses along with general education courses meeting Plan A graduation requirements. Information on the Plan A requirements may be found in the catalog under Graduation/Transfer Requirements.

By fulfilling the program requirements, students are prepared for certification by the American Water Works Association (AWWA) as well as the State Department of Health. Students will also have the background to advance in the Supply Water Industry.

SUPPLY WATER TECHNOLOGY

Certificate of Achievement
Major Units: 22

A Certificate of Achievement in Supply Water Technology may be earned by completing 20 units of Required Courses and 2 units of Major Electives listed under for the Associate degree in Water System Technology with a “C” or better in each course.

WELDING, GAS AND ELECTRIC

Welding, Gas and Electric

Department: Construction, Design, and Manufacturing
Department Chair: Mr. William (Bill) Elarton, ROOM SQ-122
(213) 763-3700, cdm@lattc.edu

Program Overview

The Associate in Science degree and Certificate of Achievement in Welding Gas and Electric is a full-time program designed for individuals seeking entry level positions in the field. Students enrolling in this program should be able to commit to full-time student status, which is approximately 21 hours per week. This time commitment is necessary to allow for hands-on training with the lab applications used during the course of instruction. LATTC’s welding program is a Certified Welding Test Center. Individuals seeking certification as a welder can take the required certification exams on site.

By fulfilling the program requirements, students will have the necessary skills for all positions that are related to welding on plate. This program prepares the student for fabrication work, construction work, job shops and other entry-to-mid level related jobs.

Program Learning Outcomes (PLOs)

Upon completion of the Degree/Certificate program, students are able to:
• Use hand and power tools to perform welding construction and maintenance work.
• Demonstrate sustainable welding construction and maintenance practices.
• Perform trade calculations related to welding construction and maintenance work.
• Work independently and interdependently to safely accomplish shared professional outcomes.

Welding, Gas and Electric

Associate in Science Degree
Major Units: 48

Requirements for the Associate in Science degree in Welding, Gas and Electric may be met by completing 48 units of Required Courses with a “C” or better along with general education courses meeting Plan B graduation requirements. Information on the Plan B requirements may be found in the catalog under Graduation/Transfer Requirements.

## WELDING, GAS AND ELECTRIC

**Certificate of Achievement**

**Major Units: 48**

A Certificate of Achievement in Welding, Gas and Electric may be earned by completing 48 units of Required Courses listed under for the Associates degree in Welding, Gas and Electric with a "C" or better in each course.

## WELDING, GAS AND ELECTRIC: CONSTRUCTION TECHNOLOGY

**Certificate of Achievement**

**Major Units: 28**

A Certificate of Achievement in Welding, Gas and Electric may be earned by completing 24 units of Required Courses and 4 units of Major Electives with a "C" or better in each course.

APPRENTICESHIP EDUCATION

Department Chair: Mr. William (Bill) Elarton, ROOM SQ-122
(213) 763-3700, cdn@lattc.edu

NOTE: Available to Registered Apprentices only.

EDUCATIONAL PROGRAMS AND COURSES

- Electrical Lineman
- Engineer: Operating/Maintenance

LATTC’s Apprenticeship Education program offers classes to students who are registered to learn a trade under agreement with the State of California Division of Apprenticeship Standards, and are required to attend college classes during their registered apprenticeship program. The LATTC Apprenticeship Education program is part of a state approved industrial plan for training skilled workers. It is enabled nationally by the Federal Apprenticeship Law (known as the Fitzgerald Act of 1937) and on the state level by the Shelley-Maloney Labor Standards Act of 1939. The program is authorized and supported by the California Apprenticeship Council under the supervision of the joint Apprenticeship Committee (equal employer and employee representation) for each trade under standards approved by the State of California.

Apprentices training under the cooperative direction of the college and Apprenticeship committees for their trade may petition to receive credit toward the Associate in Arts degree or the Associate in Science degree for all courses successfully completed. A Certificate of Achievement will be awarded when the proper application is made and the student has successfully completed all the apprenticeship assigned in their discipline. Additional courses may be substituted with the approval of the apprenticeship coordinator. Substitutions will be limited to 50%.

There are two primary parts to the training of an apprentice: (1) on-the-job training and instruction in the manipulative processes, and (2) in-school training which involves instruction in technical subjects related to the on-the-job training. On-the-job training is comprised of 40 hours per week of supervised work experience and instruction wherein an apprentice rotates through a series of sequential work experiences which are designed to develop the all-around skills of the trade.

State apprenticeship law requires that state and local boards responsible for vocational education administer related and supplemental instruction for apprentices. College offerings provide the apprentice with a study of technical subjects, subject to regular class attendance for the duration of the apprenticeship training period. An example of topics studied, which are generally applicable to a majority of trades, includes applied math and science, blueprint reading and drawing, materials, equipment, processes, and health and safety.

Los Angeles Trade Technical College plays no part in the apprenticeship selection process. For further information about apprenticeship programs operating in California and the possibility of becoming an registered apprentice in any trade, contact the California State Division of Apprenticeship Standards at 8th floor, Room 8000.320 West Fourth Street, Los Angeles, California 90012. Their phone number is (213) 576-7750.

For more information, contact the LATTC apprentice information center located in room SQ-122. Phone: (213) 763-7151.

PROGRAM LEARNING OUTCOMES (PLOs)

Upon completion of the Certificate program, students are able to:

- Use hand and power tools to perform electrical line work operations.
- Demonstrate sustainable industry principles and practices.
- Perform calculations and measurements related to electrical line work.
- Work independently and interdependently to safety accomplish shared professional outcomes.

ELECTRICAL LINEMAN APPRENTICESHIP

Certificate of Achievement

Prerequisites: Students enrolling in these classes must have been accepted into a California Registered Apprenticeship Program. Student apprentices will be monitored and evaluated during this program by the joint apprenticeship committee for their trade and will gain the skills necessary to perform as a journeyman in their trade. A Certificate of Achievement may be awarded when a student completes 16 units in this program.

701A ELECTRICAL LINEMAN APPRENTICESHIP I A (3) RPT1
Lecture: 3 hours; Lab: 1 hour
This is the first module of instruction in the generation of electricity; hydro, steam, and wind. Students receive training in safe practices, installation of cross arms, transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

701B ELECTRICAL LINEMAN APPRENTICESHIP I B (3) RPT1
Lecture: 2 hours; Lab: 2 hours
This course continues instruction in the generation of electricity; hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub-transmission lines and cables, distribution lines and cables. Students receive training in pole climbing; safe practices, installation of cross arms, transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

702A ELECTRICAL LINEMAN APPRENTICESHIP II A (3) RPT1
Lecture: 3 hours; Lab: 1 hour
First module of instruction in the review of electricity including: electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Students receive training in pole climbing; safe practices, installation of cross arms, transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

702B ELECTRICAL LINEMAN APPRENTICESHIP II B (3) RPT1
Lecture: 2 hours; Lab: 2 hours
Continuation of instruction in the review of electricity including; electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers, connections, transformer fusion, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized.

703A ELECTRICAL LINEMAN APPRENTICESHIP IIA (3) RPT1
Lecture: 3 hours; Lab: 1 hour
First module of instruction in the stringent use of state law G.0.095, safety orders, O.S.H.A. requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guying, rigging, transformer fusion, circulation current, trouble shooting, street lighting and public relations, live-line maintenance using live-line tools, safety and first aid.

703B ELECTRICAL LINEMAN APPRENTICESHIP IIB (3) RPT1
Lecture: 2 hours; Lab: 2 hours
Continuation of instruction in the stringent use of state law G.0.095, safety orders, O.S.H.A. requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead-ending, guying, rigging, transformer fusion, circulation current, trouble shooting, street lighting and public relations, live-line maintenance using live-line tools, safety and first aid.

702A CABLE SPICER APPRENTICESHIP IA (3) RPT1
Lecture: 2 hours; Lab: 2 Hour
This is the first module of study in the application of rigging principles to underground problems. Installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections, State law requirements, safety and street lighting electrical systems are included.

702B CABLE SPICER APPRENTICESHIP IIB (3) RPT1
Lecture: 2 hours; Lab: 2 Hours
This module continues study in the application of rigging principles to underground problems. Installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections. State law requirements, safety and street lighting electrical systems are included.

709 ELECTRICAL CRAFT HELPER APPRENTICESHIP (4) RPT1
Lecture: 4 hours
This course is designed as entry level preparation for a student interested in careers in the electrical power industry. This introductory course covers the basic fundamentals of planning, installation and maintenance of high and low voltage electrical systems. Basic functions of generation, both hydro and steam are covered. The transmission and distribution of electrical power will be reviewed. Fundamentals of electricity, identification, function, and operation of components will be surveyed. Ohms law, safety, ropes, knots, rigging, and tools required in the trade will be reviewed. Civil service exam assistance will also be covered.

Student apprentices will be monitored and evaluated during this program by the joint apprenticeship committee for their trade and will gain the skills necessary to perform as a journeyman in their trade.

100 O.S.H.A. BASED SAFETY STANDARDS: CONSTRUCTION & INDUSTRY (2) RPT3
Lecture: 2 hours
This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their O.S.H.A. (30 hr) safety-training certificate.

703 ENERGY MANAGEMENT (4)
Lecture: 4 hours
The computer’s use in the HVACR industry and the application of energy management technology in the improvement of energy efficiencies. The goal is to prepare the maintenance engineer to use of modern technology, including computers in the continuing quest for improved energy management.

704 MOTOR CONTROL I (2)
Lecture: 1 hour; Lab: 3 hours
This course provides instruction in basic motor control fundamentals, including the basic function of controlling devices, review of basic motors, selection of motors and definitions. The class will discuss definitions for controller components and symbols, familiarization of N.E.M.A. standards and review of one-line, wiring and schematic diagrams. The class will also introduce the use of digital controllers for use in industry.

720 HVAC - I (2)
Lecture: 1 hour; Lab: 3 hours
An introduction to the Principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration systems. Equipment selection, maintenance, and safety will be covered.

724 FUNDAMENTALS OF ELECTRICITY (2)
Lecture: 1 hour; Lab: 3 hours
This course covers the basic principles and practices of A/C and D/C electricity. Analyzing series, parallel and complex circuits, using Ohm’s law, the power equation, Kirchhoff’s laws, and other applicable laws applicable laws and equations.

727 INDUSTRIAL MECHANICS (2)
Lecture: 1 hour; Lab: 3 hours
Principles and practices for application of electro mechanics in environmental and manufacturing process control. The course will cover the use of devices and equipment in the control of industrial production and the maintenance of a healthy and comfortable environment in buildings.

739 LOCKSMITHING AND SECURITY SYSTEMS FOR APPRENTICES (4)
Lecture: 3 hours
This course is designed to provide an opportunity to those students who are working with security systems to become familiar with the use of the systems used by locksmiths to make buildings secure. The various types of locks and the tools necessary for adapting various lock systems will be discussed.

740 TENANT RELATIONS AND REPORTS FOR APPRENTICES (4)
Lecture: 4 hours
The techniques used in maintaining wholesome and mutually beneficial relations with tenants and others is the primary purpose of this course. The need to understand the needs of all persons associated with a building is stressed. Instruction in the use of systems to maintain records and deliver timely and accurate reports is provided.
744 HVACR - CONDITIONING CONTROLS (2)
Lecture: 1 hour; Lab: 3 hours
An introduction to the Principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration control systems. System control equipment selection, maintenance, and safety will be covered.

745 PLUMBING CODE I (4)
Lecture: 4 hour
Instruction in plumbing principles and common practices. Theory and hands on application will be applied on various common maintenance plumbing installations and repairs operations.

746 PLUMBING CODE PRINCIPLES AND PRACTICES (2)
Lecture: 1 hour; Lab: 3 hours
This course will provide instruction in plumbing principles and common practices. Theory and hands on application will be applied on various common maintenance plumbing installations and repairs operations.

747 ELECTRICAL TROUBLESHOOTING (2) RPT3
Lecture: 2 hours Lab: 2 hours
This course covers the basic principles and practices of electrical equipment and system troubleshooting. Proper use of tools and safety equipment will be covered.

748 ELECTRICAL CODES & ORDINANCES (NEC)
Lecture: 4 hours
This course covers the basic principles and practices of electrical equipment and system troubleshooting. Proper use of tools and safety equipment will be covered.

749 HVACR II (2) RPT3
Lecture: 1 hour, Lab: 3 hours
Advanced principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration systems. Equipment selection, maintenance, and safety will be covered.

750 INDOOR AIR QUALITY (4) RPT3
Lecture: 4 hours
This course emphasizes on operation of systems to provide quality air to indoor environments. AQMD requirements and pending regulations are reviewed. Organizing and implementing maintenance programs that include indoor air quality assessment and air balancing HVAC systems are covered.

751 PRINT READING (3) RPT3
Lecture: 3 hours
This class covers the instruction in basic blueprint reading including symbols identification. Various drawing types, the information contained, and the primary uses for each type drawing will be covered.

753 BOILERS FOR APPRENTICES (4) RPT3
Lecture: 4 hours
Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the combustion of fuels.
PRE-PROFESSIONAL EDUCATIONAL PATHWAYS

COOPERATIVE WORK EXPERIENCE EDUCATION

PROGRAM OVERVIEW

Cooperative Work Experience Education (CWEE) combines on-the-job experience with regular classroom instruction. It is designed to expand students' skills and knowledge, and to improve self-understanding by integrating classroom study with supervised work experience.

CWEE is based on the principle that well educated individuals develop most effectively through the incorporation of related education and work experience. By monitoring structured work experiences in business, industry, government and human services settings, LATTC provides enrichment to college studies which enhance the student's total development.

In the Cooperative Work Experience Education program, individual students' educational objectives are carefully planned and coordinated between the College and employer to ensure a positive and realistic employment experience.

Cooperative Work Experience Education has the following objectives:

- To provide opportunity for the student to secure employment on a part-time or full-time basis.
- To gain realistic work experience that is meaningfully related to the student's college study program.
- To provide the student the opportunity to acquire knowledge, skills, and attitudes essential for successful employment.

A student enrolled in Cooperative Work Experience Education:

- Has the opportunity to learn or improve employment skills under actual working conditions.
- Gains perspective on career goals through application of classroom theory to "real life experience."
- Builds self-identity and confidence as a worker through individual attention given by instructor/coordinators and employers.
- Has opportunities to test personal abilities in work environments.
- Has a more realistic approach to the Job market.
- May refer to work experience education in future job applications.
- Benefits financially while learning, and can begin a career earlier.

Students employed in a job related to their major should enroll in:

COOP ED MAJOR Course: 941
Section: See schedule
Units: 4
Room: CH-236

STUDENT QUALIFICATIONS

OCCUPATIONAL WORK EXPERIENCE (PARALLEL PLAN)

Hours by arrangement: 1-4 units
Prerequisite: Approval of Work Experience Coordinator.
This is a program of on-the-job learning experience for students employed in a job related to an occupationally oriented major. The program may be repeated three times for a maximum of 16 units.
To receive credit a student must complete a minimum of seven units during the semester, including work experience.

OCCUPATIONAL WORK EXPERIENCE (ALTERNATE PLAN)

Hours by arrangement: 1-8 units
Prerequisite: Approval of Work Experience Coordinator
This is a program of on-the-job learning experiences full-time one semester and work full-time the following semester. Work must relate directly to the student's educational goal. Students must have satisfactorily completed at least seven units of credit and not be enrolled concurrently in more than one other course. The program may be repeated three times for a maximum of 16 units.

CALIFORNIA STATE UNIVERSITY: APPROVED COOPERATIVE EDUCATION SUBJECT AREAS

Los Angeles Community College District policy provides that a maximum of eight (8) semester units in cooperative education courses completed in the subject areas listed below may be applied toward the California State University 56 unit admission requirement.

Cooperative Education COURSE DESCRIPTIONS

The following courses provide Cooperative Work Experience Education credit:

911 WORK EXPERIENCE IN MAJOR I (1) RPT3 (CSU)
921 WORK EXPERIENCE IN MAJOR I (2) RPT3 (CSU)
931 WORK EXPERIENCE IN MAJOR I (3) RPT3 (CSU)
941 WORK EXPERIENCE IN MAJOR I (4) RPT3 (CSU)
Prerequisite: Employment in a field related to the students' program of study as verified by the signature of the cooperative education advisor. Supervised training...
is conducted in the form of on-the-line job training in an employment area that will enhance the students’ educational goals on campus. Additional courses within the disciplines listed below provide Cooperative Work Experience Education credit:

- Automotive Technology
- Business
- Carpentry
- Child Development
- Computer Application and Office Technology
- Cooperative Education
- Culinary Arts
- Diesel Technology
- Electrical Construction and Maintenance
- Fashion Design
- Fashion Merchandising
- Labor Studies
- Machine Tool Technology
- Nursing
- Operating/Maintenance Engineer
- Plumbing Technology
- Refrigeration and Air Conditioning Mechanic
- Solid Waste Management Technology
- Supply Water Systems Technology
- Waste Water Management
- Welding/Gas and Electric
NONCREDIT CONTINUING EDUCATION

Department: Learning Skills / Noncredit-Continuing Education
Department Chair: Christina Anketell, Room RH-102
213-763-3738, AnketeCP@lattc.edu

PROGRAM OVERVIEW

Los Angeles Trade Technical College offers a variety of tuition-free noncredit courses on campus and at community-based organizations throughout Los Angeles. As a key aspect of lifelong learning, noncredit instruction at LATTC serves as a gateway to college and career preparation; provides programs for immigrants to actively engage in the economy and civic life; and provides access to basic skills and English as a Second Language. Students can register for classes through the Bridges to Success Center located in the Student Services building (ST), Room 316, online, or off-site at the first class meeting. For additional information and registration assistance, contact the Bridges to Success Center at (213) 763-5560 or via email at bridge@lattc.edu.

PROGRAM LEARNING OUTCOMES (PLOs)

• Use basic English and critical thinking skills to successfully transition to college classes and start working towards their certificate, degree, or transfer goals.
• Demonstrate basic math skills to successfully transition to college classes and start working towards their certificate, degree, or transfer goals.
• Utilize basic computer literacy skills to successfully transition to college classes and start working towards their certificate, degree, or transfer goals.
• Employ basic study skills to successfully transition to college classes and begin working towards their certificate, degree, or transfer goals.

COLLEGE READINESS

Certificate

This certificate prepares students for success in college. Students will obtain the basic skills needed to successfully transition to college classes and start working towards their certificate, degree, or transfer goals.

NON CREDIT COURSE DESCRIPTIONS

BASIC SKILLS

2CE BASIC ENGLISH SKILLS (0)
Basic listening, reading, speaking, and writing skills for students with minimum English language skills. (54 hours)

23CE COLLEGE AND SCHOLASTIC ASSESSMENT PREP (0)
This course provides students with study, computational, writing, and critical thinking skills to prepare for the college assessment test. (72 hours)

35CE BASIC MATH SKILLS (0)
This course is designed to strengthen basic math skills. Topics include properties, rounding, estimating, comparing, converting, and computing whole numbers, fractions, and decimals. Upon completion, students should be able to perform basic computations and solve relevant mathematical problems. (54 hours)

42CE SOFTSKILLS BASIC 1B - THE SUCCESSFUL JOB SEARCH (0)
This course covers the basic knowledge and skills necessary for gaining employment. Topics include telephone contact of prospective employers, resume writing, employer expectations, and interviewing skills. (9 hours)

43CE SOFTSKILLS BASIC 1C - PRE-EMPLOYMENT READINESS (0)
This course provides an introduction for starting successful employment or a new job. Topics include: making good first impressions, basic workplace expectations, developing good work habits, time management, communication skills, dealing with job-related stress, and techniques for good interpersonal relationships. (9 hours)

45CE MICROSOFT OFFICE APPLICATION BASICS (0)
An introduction to basic functions of Microsoft Office® applications namely Word®, Excel®, Outlook®, and PowerPoint®. (36 hours)

47CE MICROSOFT WORD BASICS (0)
An introduction to basic functions of Microsoft Word®. Topics include: document management, editing techniques, and formatting text and documents. (9 hours)

50CE MICROSOFT POWERPOINT BASICS (0)
An introduction to basic functions and features of Microsoft Powerpoint®. Topics include: PowerPoint® definitions and terminology; using fonts, colors, graphics, and much more! (9 hours)

51CE INTERNET BASICS (0)
An introduction to basic functions and features of the internet. Topics include internet providers, web browsers, search engines, navigating the internet, methods for handling worms and viruses, and more. (9 hours)

54CE SOFTSKILLS BASIC 3A – CUSTOMER SERVICE AND RELATIONS (0)
This course introduces basic customer service and relations skills. Topics include principles of customer service and relations, employee responsibilities in customer relations, communication skills, handling customer complaints, telephone skills, and using new technologies related to customer service. (9 hours)

55CE SOFTSKILLS BASIC 3B—IMAGE, ETIQUETTE, AND INTERPERSONAL COMMUNICATIONS (0)
This course covers the interpersonal and professional image skills necessary for succeeding in the workplace. Topics include basic business manners and etiquette, interacting with people or “people skills”, how to develop a professional image, problem solving, and handling workplace conflict. (9 hours)

60CE BASIC COMPUTER LITERACY (0)
This course introduces basic computer components and functions including computer hardware, software, using the internet, operating systems, and software applications. (e.g. word processing, spreadsheets, email and communications). (54 hours)

65CE FINANCIAL LITERACY – CREDIT BASICS (0)
Students will learn the basic skills involved in establishing and maintaining good credit, improving their credit scores, managing their debt responsibly, and preventing becoming victims of predatory lending. (9 hours)

66CE FINANCIAL LITERACY – PERSONAL MONEY MANAGEMENT (0)
Students will learn the basic skills involved in managing their personal finances and using basic savings and checking products and services offered by regulated financial institutions. (9 hours)

73CE INDUSTRY OVERVIEW AND CAREER OPPORTUNITIES (0)
This course provides students with the basic information about the targeted industry and sectors that they are focused on for their career; including essential facts, key institutions, history, career pathways and trends. This course provides students with the basic research and networking skills to become well-informed job seekers so they can effectively prepare for their career and become employed. (18 hours)

74CE EMPLOYMENT TEST PREPARATION (0)
This course provides an orientation to test-taking, math, reading, mechanical and other contextualized basic skills to adequately prepare students for employer-based tests. (72 hours)

75CE INTRODUCTION TO POST-SECONDARY EDUCATION (0)
This course introduces students to the opportunities and benefits of post-secondary education by dispelling many of the myths and reducing information overload that may discourage students and their caregivers from applying to and attending post-secondary education institutions. Students will learn tips and strategies that will help them select and successfully apply to and enroll in post-secondary institutions that best fit their education and career goals and needs. (9 hours)

77CE FUNDAMENTALS FOR WORKPLACE SUCCESS – TEAMWORK (0)
This course will prepare students to successfully collaborate and work effectively with their colleagues and co-workers in diverse settings by strengthening their employability, interpersonal and leadership skills. Students will gain insights about themselves and learn new tools and strategies that optimize their strengths and help them increase their effectiveness and efficiency at work. (36 hours)

78CE FUNDAMENTALS FOR WORKPLACE SUCCESS II – EFFECTIVE COMMUNICATION AND LEADERSHIP SKILLS (0)
This course gives students the opportunity to develop their listening, communication and leadership skills appropriate for the workplace in a supportive and interactive environment. Students are introduced to skills that can help them become active, purposeful listeners and more effective communicators and leaders for career success. (36 hours)
ENGLISH AS A SECOND LANGUAGE

1CE  ENGLISH AS A SECOND LANGUAGE - BEGINNING I (0)
This course provides a basic introduction to the English language to the limited English speaker. Topics include listening, speaking, and reading English for the immediate need. (54 hours)

5CE  ENGLISH AS A SECOND LANGUAGE (0)
This course provides listening, reading, speaking, and writing skills for ESL learners with basic English language skills. (36 hours)

6CE  ENGLISH AS A SECOND LANGUAGE 0 (0)
This course basic listening, reading, speaking, and writing skills for ESL learners with zero to minimum English language skills. Students will learn basic pronunciation, survival vocabulary, cultural differences, self-sufficiency for tasks and activities, and basic English structure. (54 hours)

7CE  ENGLISH AS A SECOND LANGUAGE - 1 (0)
This course basic listening, reading, speaking, and writing skills for ESL learners with zero to minimum English language skills. Students will learn basic pronunciation, survival vocabulary, cultural differences, self-sufficiency for tasks and activities, and basic English structure. (54 hours)
**ACCTG 001  INTRODUCTORY ACCOUNTING I (5) UC:CSU**

**Lecture:** 5 hour(s)  
**Advisory:** Business 38 and English 21

Introduces the fundamental principles and concepts of accounting as a basis for financial communication in business. This includes the procedures for maintaining records in business transactions and the preparation of financial statements for the sole proprietorship in a service and merchandising firm. Procedures and techniques for internal control, deferrals and accruals, inventory, plant assets, accounts receivable, accounts payable, and payroll are included.

**Student Learning Outcomes:**
1. Students will use Cost Volume Profit (CVP) analysis to analyze decisions.

**ACCTG 002  INTRODUCTORY ACCOUNTING II (5) UC:CSU**

**Lecture:** 5 hour(s)  
**Prerequisite:** Accounting 1

**Student Learning Outcomes:**
1. Prepare statements of cash flow using the indirect method.

**ACCTG 003  INTERMEDIATE ACCOUNTING I (3) CSU**

**Lecture:** 3 hour(s)  
**Advisory:** Accounting 2 and Business 38

This course provides complete analytical application and an advanced review of topics discussed in Accounting I and II. Topics include assets (current, fixed, and intangible), investments, financial statements, income taxes, liabilities, stockholders equity, revenue recognition, asset acquisition and leases. This course places a high emphasis on financial reporting standards.

**Student Learning Outcomes:**
1. Students will demonstrate skills and knowledge of income statement preparation and presentation.

**ACCTG 011  COST ACCOUNTING (3) CSU**

**Lecture:** 3 hour(s)  
**Advisory:** Accounting 1; Accounting 2; Business 38

This course covers both managerial and cost accounting, with emphasis on cost and non cost systems; types of cost; elements of cost; cost behavior; variances for labor, materials and overhead; indirect expenses; allocation of cost to by products; standard cost and budgets.

**Student Learning Outcomes:**
1. Students will be able to use cost volume profit (CVP) analysis to analyze decisions.

**ACCTG 015  TAX ACCOUNTING I (3) CSU**

**Lecture:** 3 hour(s)  

This course is a study of Federal Income Taxes as they apply to individuals and sole proprietorships and a analysis of appropriated tax laws.

Consideration of applicable accounting procedures and preparation of reports and returns are emphasized.

**Student Learning Outcomes:**
1. Students will learn how to complete an individual income tax return. 2. Students will learn how to calculate gross income with exclusions.

**ACCTG 018  COMPUTERIZED PAYROLL ACCOUNTING (3)**

**Lecture:** 2 hour(s)  
**Lab:** 2 hour(s)  
**Advisory:** Accounting 1

This course will cover procedures and practices involved in a manual or automated payroll system. Students will become familiar with current Federal and California laws affecting payroll, computation of payroll taxes and preparation of required payroll tax returns/forms.

**Student Learning Outcomes:**
1. Students will demonstrate competency in computing federal and state liabilities for employer’s payroll taxes.

**ACCTG 021  BOOKKEEPING AND ACCOUNTING I (3) UC:CSU**

**Lecture:** 3 hour(s)  
**Advisory:** Business 38

This course includes fundamentals of double entry bookkeeping; preparation of the trial balance; worksheets and financial statements; use of controlling accounts; the control of cash and bank reconciliation statements. Students may complete a mercantile firm practice set.

**Student Learning Outcomes:**
1. Students will analyze and record financial transactions and post to ledger.

**ACCTG 022  BOOKKEEPING AND ACCOUNTING II (3) UC:CSU**

**Lecture:** 3 hour(s)  
**Advisory:** Accounting 21

This course includes fundamentals of double entry bookkeeping; preparation of worksheets and financial statements. The voucher system; payroll accounting; accounting for notes, bad debts, inventories, cost of good sold, fixed assets, depreciation, adjustments and interim statements are presented. Together with Accounting 21, these courses equal Accounting 1.

**Student Learning Outcomes:**
1. Students will prepare a basic financial statement.

**ACCTG 025  AUTOMATED ACCOUNTING METHODS AND PROCEDURES (3)**

**Lecture:** 3 hour(s)  

This course emphasizes the hands-on use of popular computer software applications to accounting and business, with special reference to the general ledger, billing, accounts receivable, accounts payable, payroll, and inventory control.

**Student Learning Outcomes:**
1. Students will demonstrate the application of the accounting software to record various types business transactions and prepare standard financial reports for a service business.

**ACCTG 055  ACCOUNTING COMPUTER LABORATORY (1)**

**Lab:** 2 hour(s)  

This is an accounting computer lab which provides the student with an opportunity to apply the accounting concepts being studied in a concurrent
Course Descriptions

ADM JUS 001  INTRODUCTION TO ADMINISTRATION OF JUSTICE
(3) UC:CSU
Lecture:  3 hour(s)
This course deals with the structure of law, definitions, and the most frequently used sections of the California Penal Code. Topics include origins of federal and state laws, interpretation and application of law, identifying elements of property crimes and criminal liability.

Student Learning Outcomes:
1. Gather information on the various components of the criminal justice system.
2. Critically analyze and then organize information on the criminal justice system.
3. Properly apply the English language to write an explanatory paper about the criminal justice system.

ADM JUS 002  CONCEPTS OF CRIMINAL LAW (3) UC:CSU
Lecture:  3 hour(s)
This course covers the origins, development and philosophy of criminal law. This course looks at the many different types of evidence brought into the justice system. Also covered are the rules governing the admissibility of evidence in court.

Student Learning Outcomes:
1. Explain the origins, development and philosophy of criminal law.
2. Explain the types of criminal evidence utilized by our courts.
3. Explain rules regarding the use of evidence in our court system.

ADM JUS 003  LEGAL ASPECTS OF EVIDENCE (3)
Lecture:  3 hour(s)
This course provides instruction in the origins, development and philosophy of criminal evidence. This course examines the different methods and procedures of evidence brought into the justice system. Also covered are the rules governing the admissibility of evidence in court.

Student Learning Outcomes:
1. Explain the origin, development and philosophy of criminal evidence.
2. Explain the types of criminal evidence utilized by our courts.
3. Explain rules regarding the use of evidence in our court system.

ADM JUS 004  PRINCIPLES AND PROCEDURES OF THE JUSTICE SYSTEM (3) CSU
Lecture:  3 hour(s)
This course provides instruction in the role and responsibilities of the American criminal justice system and its purpose; an examination of the philosophy, history, structure, operation, and concepts and services related to the justice; a study of case law methodology and case research and their impact on society; an examination of the legal process from arrest through trial, sentencing options and correctional procedures.

Student Learning Outcomes:
1. List historical and conceptual significance of the court system, administration and management. 2. Discuss the criminal trial process and the specific roles and responsibility of each member. 3. Evaluate the judicial process and its effect on society.

ADM JUS 005  CRIMINAL INVESTIGATION (3) CSU
Lecture:  3 hour(s)
This course provides instruction in the practice of various types of technical writing commonly used in police agencies, the appropriateness of different styles in different contexts and the conceptualization of the material, and the utilization of machine tabulation in reports and methods of reporting criminal statistics.

Student Learning Outcomes:
1. Write clear and concise law enforcement reports. 2. Improve basic grammar and apply the grammar rules to writing police reports.

ADM JUS 008  JUVENILE PROCEDURES (3) CSU
Lecture:  3 hour(s)
This course covers the juvenile justice system and related juvenile justice issues. Topics include an overview of the juvenile justice system, treatment and prevention programs, history, theories, methodology, and special areas and laws unique to juveniles.

Student Learning Outcomes:
1. Discuss the histories and philosophies of the juvenile justice system.
2. Identify and compare the legislative policies related to juvenile offenders and the procedures for implementation.
3. Describe the impact of legislative change on the development of national standards for juvenile justice.

ADM JUS 014  REPORT WRITING FOR PEACE OFFICERS (3) CSU
Lecture:  3 hour(s)
The study of techniques of protection against persons armed with dangerous and deadly weapons. Students examine the moral aspects, legal provisions, safety precautions and restrictions covering the use of firearms and other weapons.

Student Learning Outcomes:
1. List safety hazards that pose threats to officers.
2. Describe the operation and application of safety equipment used to protect officers.
3. List the many factors that should be considered when approaching a dangerous situation.

ADM JUS 041  OFFICER SAFETY (3)
Lecture:  3 hour(s)
This is a practical course which covers the technical terminology of fingerprinting, pattern interpretation, and classification of fingerprints, the taking of fingerprints, searching and filing procedures and laboratory work in the classroom.

Student Learning Outcomes:
1. Define technical terminology used in fingerprint processing work.
2. Explain and interpret fingerprint patterns and classifications.
3. Explain fingerprint searching and filing procedures.
ADM JUS 067 COMMUNITY RELATIONS I (3) UC:CSU
Lecture: 3 hour(s)
Examination of the complex relationship between the community and the justice system with emphasis on the challenges of dealing with the role of race, ethnicity, gender relations, sexual orientation, social class, language, and culture in shaping these relations. 
Student Learning Outcomes:
1. Analysis of assigned textual readings; in class debate on the increasing social and economic bifurcation of society. 2. Differentiate value systems and ideologies as they apply to community relations and diversity. 3. Evaluate immigration and its effect on society; examining in class videos on race relations for content synthesis.

ADM JUS 073 LAW AND MINORITY GROUPS (3)
Lecture: 3 hour(s)
This course examines the growing crises of race, ethnicity, gender and discrimination within the American Justice System. Myths and realities about crime and minorities are analyzed. Racism, and inequities within the legal structures including court trials, corrections and the death penalty are discussed. Changes in criminal justice administration advocated by minority groups are reviewed. 
Student Learning Outcomes:
As a result of this learning experience, a student can: 1. Analyze and evaluate how myths about race, ethnicity and crime have influenced our Criminal Justice System. 2. Compare and contrast the crime rates within and without minority communities. 3. Analyze, evaluate and describe the factors that have influenced race based differences in the crime rate. Propose steps to be implemented for the reduction or eradication of race based criminal justice disparities.

ADM JUS 075 INTRODUCTION TO CORRECTIONS (3) CSU
Lecture: 3 hour(s)
This course surveys the total correctional cycle and the relationships of its components, including historical, theoretical and philosophical explanations of criminal behavior; statistics and research findings; employment opportunities; and employment requirements. This course will also examine the basic nature of correctional work; aims and objectives of correctional administration; probation and parole; skills; knowledge and attitudes required for employment in this field. 
Student Learning Outcomes:
1. Identify the components of the U.S. Corrections system and its history of development. 2. Understand the procedures used in jails and prisons and their effect on inmates. 3. Compare and contrast the various alternatives to incarceration and for which populations each are best suited.

ADM JUS 501 AN A TO Z GUIDE TO CRIMINAL JUSTICE CAREERS (3) CSU
Lecture: 3 hour(s)
This course reviews the hot jobs in the criminal justice arena and outlines a method for the student to decide on their career path. Hiring process and interview skills will be explored. Fitness for duty and other physical and physiological characteristics will be discussed. An A to Z guide to Local, State, and Federal Criminal Justice Careers will be presented. 
Student Learning Outcomes:
1. List career opportunities. 2. Develop a self career map/plan.

ADM JUS 502 INTRODUCTION TO FORENSIC PSYCHOLOGY (3) CSU
Lecture: 3 hour(s)
This is a basic course dealing with the nature of Psychology within the criminal justice system. The aims and objectives of Forensic Psychology as applied to corrections, probation practices, institutions, services, and inmate supervision will be discussed. 
Student Learning Outcomes:
1. Define various psychological traits and conditions and discuss the impact they have on corrections and probation institutions service.

ADM JUS 750 ETHICS AND THE CRIMINAL JUSTICE SYSTEM (3) CSU
Lecture: 3 hour(s)
This course identifies and explores ethics, values definitions and applications in the criminal justice system: police, courts, probation, parole, corrections and private security organizations. Remedial strategies relating to unethical behavior by individuals and groups will also be addressed. 
Student Learning Outcomes:
1. Discuss strategies addressing unethical behavior by staff. 2. Explain the ethical right and wrong when applied to various aspects of the criminal justice system.

AMERICAN SIGN LANGUAGE

A S L 001 AMERICAN SIGN LANGUAGE I (4) UC:CSU
Lecture: 4 hour(s)
This is an introductory course designed to develop basic conversational skills using the manual alphabet and American Sign Language. It is planned to assist in communicating with deaf individuals and have a better understanding of deaf culture. This course develops basic vocabulary and grammar of American Sign Language. Its emphasis is placed on comprehension skills and vital aspects of the Deaf culture and community. 
Student Learning Outcomes:
1. Distinguish between Deaf and Hearing Culture. 2. Student will prepare and present a Formal ASL Presentation incorporating expressive and receptive ASL language skills.

A S L 002 AMERICAN SIGN LANGUAGE II (4) UC:CSU
Lecture: 4 hour(s)
Prerequisite: American Sign Language 1; This is an intermediate course in American Sign Language with special emphasis on vocabulary, grammar, and on the improvement of expressive and receptive skills. This course includes exposure to deaf culture and the history of sign languages. 
Student Learning Outcomes:
1. The student will demonstrate comprehension of ASL vocabulary and grammar. 2. The student will demonstrate ASL conversational fluency on an intermediate level. 3. The student will demonstrate use of descriptive classifiers, personal and possessive pronouns.

ANTHROPOLOGY

ANTHRO 101 HUMAN BIOLOGICAL EVOLUTION (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course is an introduction to the field of biological anthropology. Topics covered include genetic inheritance, the mechanisms of evolution, the biology and behavior of living primates, the history of human evolution as seen in the fossil record, and modern human biological variation. 
Student Learning Outcomes:
1. Students will understand human beings as the result of a natural evolutionary process. a. Comprehend the basics of modern evolutionary theory and Mendelian genetics. b. Compare and contrast humans beings with our closest living relatives, the non human primates. c. Examine the fossil record of human evolution. 2. Critically analyze human variation and its relationship to the concept of “race” and its practical applications.
ANTHRO 101H HUMAN BIOLOGICAL EVOLUTION HONORS (3)
Lecture: 3 hour(s)
Advisory: English 28
This course is an introduction to the field of biological anthropology. Topics covered include genetic inheritance, the mechanisms of evolution, the biology and behavior of living primates, the history of human evolution as seen in the fossil record, and modern human biological variation.
Student Learning Outcomes:
1. Students will understand human beings as the result of a natural evolutionary process. a. Comprehend the basics of modern evolutionary theory and Mendelian genetics b. Compare and contrast humans beings with our closest living relatives, the non human primates c. Examine the fossil record of human evolution d. Critically analyze human variation and its relationship to the concept of “race” and its practical applications.

ANTHRO 102 HUMAN WAYS OF LIFE: CULTURAL ANTHROPOLOGY (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course provides a comparative survey of human culture, including the study of human society, language, religion, political and economic organization, with examples drawn from contemporary preliterate, peasant, and urban societies.
Student Learning Outcomes:
1. Students will develop comprehension and appreciation of human cultural variation and diversity.

ANTHRO 102H HUMAN WAYS OF LIFE: CULTURAL ANTHROPOLOGY HONORS (3)
Lecture: 3 hour(s)
Advisory: English 28
This course provides a comparative survey of human culture, including the study of human society, language, religion, political and economic organization, with examples drawn from contemporary preliterate, peasant, and urban societies.
Student Learning Outcomes:
1. Students will develop comprehension and appreciation of human cultural variation and diversity.

ARCHITECTURE

ARC 130 HISTORY OF ARCHITECTURE I (2) UC:CSU
Lecture: 2 hour(s)
This course covers the study of architecture history from the prehistoric times to the Renaissance, the development of place and function as it is influenced by the geographical, climatic, religious, social, economic and historical forces. This course analyzes the difference between world architecture history and western architecture history, including the characteristics of Latin America, Islamic and Asia. The history of architecture is seeing through a perspective of how the built environment has responded to nature forces and resources; air, water, air and land. In addition each period identifies technological innovation that characterized the historical roots in numerous civilizations.
Student Learning Outcomes:
1. Sketch a building example, describe typology, style and life cycle characteristics. 2. Describe the form, shape geometry and design principles used. 3. Identify the social, technological, environmental and economic forces that shaped the building form. 4. Do an e Portfolio. 5. Discuss with class their research and findings. 6. Describe to the class findings and discoveries for each period.

ARC 131 HISTORY OF ARCHITECTURE II (2) UC:CSU
Lecture: 2 hour(s)
This course covers the study of architecture history from the Renaissance to our current times, the development of place and function as it is influenced by the geographical, climatic, religious, social, economic and historical forces. This course analyzes the difference between world architecture history and western architecture history, including the characteristics of Latin America, Islamic and Asia. The history of architecture is seeing through a perspective of how the built environment has responded to nature forces and resources; air, water, air and land. In addition each period identifies technological innovation that characterized the historical roots in numerous civilizations.
Student Learning Outcomes:
1. Sketch a building example, describe typology, style and life cycle characteristics. 2. Describe the form, shape geometry and design principles used. 3. Identify the social, technological, environmental and economic forces that shaped the building form. 4. Do an e Portfolio. 5. Discuss with class their research and findings. 6. Describe to the class findings and discoveries for each period.

INT 200 RESIDENTIAL PLANNING (3) RPT3
Lecture: 1 hour(s)
Lab: 4 hour(s)
Using sustainable Design strategies, standards and geospatial tools (CAD/BIM/GIS), the student will learn how to participate in the interior design profession as a viewer and a doer for the entire life cycle of a building and focusing on interior residential planning. Basic concepts will be covered in class to understand the fundamentals variables that determine interior spaces: lights, air, circulation, texture, pattern, geometry, experience, styles, natural resources, energy efficiency, form, materials, thermal/moisture protection and others. A study is made using a small house project layout, livability, functionality, size, orientation, cost, furnishing, equipment, and ornamentation and future inhabitants. The small house project is put in context through a brief history of American shelters their construction types and styles. At this point the student is ready for developing, retrofitting, adding and remodeling the small house project including basic interior construction details and finishes. Residential construction problems are explored with an emphasis placed in functional design.
Student Learning Outcomes:
1. Create an e Portfolio. 2. Research and order appropriate sustainable materials. 3. Address organizational sustainability issues, such as waste stream management, green building practices, and green procurement plans. 4. Analyze air quality, ventilation, and indoor air circulation. 5. Analyze solar path, views, orientation. 6. Utilize a variety of texture of materials, styles and other consideration of interior design. 7. Address appropriate lighting qualities and energy management lighting and solar passive/active response. 8. Use appropriate Space-planning solutions and furniture arrangement. 9. Use LEED standards. 10. Address code, site and environmental requirements.

ARCHITECTURAL INTERIORS
ARC 152  EQUIPMENT OF BUILDINGS (3) CSU
Lecture: 1 hour(s)  Lab: 4 hour(s)
Using geospatial tools and sustainable strategies. This course applies the basic principles of design, selection and operation of equipment in buildings. Building equipment are systems that integrate architectural design with water distribution, water recycling and harnessing, air circulation, natural air flow, air heating and cooling, natural light, and acoustics. Passive and solar strategies are integrated into equipment as well as new technologies.

Student Learning Outcomes:
1. Design an Energy Saving Plan for a Building System for Water, Electricity, Air Circulation, Sound, and Vertical Transportation. 2. Design electrical generators using rule of thumbs and existing tables; wind turbine, photovoltaic, biomass, etc. 3. Draw a Mechanical & Electrical Plan using standard templates and symbols. 4. Develop a reflected ceiling plan that integrates ceiling, lighting, mechanical, and structural systems and incorporates life safety considerations. 5. Sketch and delineate all variables for a building section that integrates structural, mechanical, and lighting systems and incorporates life safety considerations.

ARC 160  COMPUTERS FOR DESIGNERS (3) CSU
Lecture: 1 hour(s)  Lab: 4 hour(s)
The student will learn how to become a designer and a technologist in three dimensional digital environments. The student will use the power of the tools to be inspired and collaborators. This course is geared towards the built environment, ecological, entertainment and industrial designers. Students will learn how the space of a place affects the way we think, act and create. Emphasis is placed on how designers can optimize and understand the role of digital mediums in today's competitive edge and sustainable demands. Basic computer operations like operating systems, interfaces, print, view, export, file management, image manipulation are covered within the design exercises.

Student Learning Outcomes:
1. Students will complete a set of 10 drawings and design Students will submit an e Portfolio.

ARC 172  ARCHITECTURAL DRAWING I (3) CSU
Lecture: 1 hour(s)  Lab: 4 hour(s)
This is an architecture drawing class that will focus on construction documents for wood construction. The course will cover how these architectural drawings are documents that instruct all the stakeholders how to use, build and maintain a high performance building. The course will explain how construction documents made out of concrete and masonry are connected to the life cycle of a building. It covers an integrated building approach as it identifies the deliverables for: programing (identify the need), design drawings (identify the solutions), construction documents (drawings used to build the building), operation/maintain (as built drawings) and assessment (analysis for upgrade and improvement). In addition This course will cover CAD, BIM, and GIS tools, LEED Credits, Sustainable Standards and their relationship to a set of construction documents for concrete and masonry construction. The student will develop a simple set of construction documents for concrete and masonry. 5. Submit an e Portfolio. 6. Integrate LEED Standards. 7. Integrate AIA Standards.

ARC 173  ARCHITECTURAL DRAWING II (3) CSU
Lecture: 1 hour(s)  Lab: 4 hour(s)
This is an architecture drawing class that will focus on construction documents for concrete and masonry construction. The course will cover how these architectural drawings are documents that instruct all the stakeholders how to use, build and maintain a high performance building. The course will explain how construction documents made out of concrete and masonry are connected to the life cycle of a building. It covers an integrated building approach as it identifies the deliverables for: programing (identify the need), design drawings (identify the solutions), construction documents (drawings used to build the building), operation/maintain (as built drawings) and assessment (analysis for upgrade and improvement). In addition This course will cover CAD, BIM, and GIS tools, LEED Credits, Sustainable Standards and their relationship to a set of construction documents for concrete and masonry construction. The student will develop a simple set of construction documents for concrete and masonry. 5. Submit an e Portfolio. 6. Integrate LEED Standards. 7. Integrate AIA Standards.

ARC 182  DIRECTED STUDY ARCHITECTURE (1) RPT2
Lecture: 1 hour(s)  Lab: 4 hour(s)
This course allows students to pursue a directed study in the Architecture Technology field on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Architecture Technology.

ARC 201  ARCHITECTURAL DESIGN I (3) UC:CSU
Lecture: 1 hour(s)  Lab: 4 hour(s)
This course will use sustainable strategies and geospatial tools to explore architecture design solutions. In this course students will work in a design laboratory studio exploring space and form. The solutions focus on analysis, proportion, solar passive, water conservation, biomimicry, planning, layout, aesthetic, interpretation, and the nature of materials. Methods of presentations are studied, as well as design methodologies.

Student Learning Outcomes:
1. Document design objectives including site characteristics, spatial and functional relationships, and building systems considerations * Implement Digital Solar and Energy Studies. 2. Establish preliminary project scope, phasing, budget, and schedule. 3. Partner with a University like USC School of Cinematography Arts/Multimedia Learning to explore one of the geometries to be used by a given concept. 4. Develop an e portfolio. 5. Implement Design Innovation LEED Standards. 6. Implement Sustainable Design Strategies. 7. Partner with LATTC Carpenter for the Green Sandbox Construction Yard Incorporate a case study and existing road maps that best match their design proposal. 8. Describe in words their project what it is, why it is important and how it will be build. 9. Display a Space and Form design based on nature patterns.

ARC 202  ARCHITECTURAL DESIGN II (3) UC:CSU
Lecture: 1 hour(s)  Lab: 4 hour(s)
This course looks at space and form as a canvas for an architect, moving beyond abstraction language paradoxes, and formal gymnastics. Design and form integrates embodied energy of all resources, cognitive experiences, new materials, stronger social concerns and the need to react to location and space. It will see the creation of place and space, as a first act of human intention and use nature templates to solve holistic solutions. This course analyzes how the geometry of space influences how we communicate, behave, think, create, and produce; as well as its influences in cognition and mental model. This course will focus on building a better
future through participatory design and the use of digital age tools including fabrication and geospatial.

Student Learning Outcomes:
1. Design a project that has the following characteristics: a) communicates with new media navigates and work in information environments b) use 3d modeling c) involves community participation d) adapts, transforms and beautifies living standards.

ARC 261 COMPUTER AIDED DESIGN FOR ARCHITECTURE I (3) CSU
Lecture: 1 hour(s)
Lab: 4 hour(s)
This is a digital modeling course for space and form design. This course covers space modeling, energy simulation, solar paths, light analysis, texture, rendering and materials, as well as its relationship to BIM, CAD and geospatial tools.

Student Learning Outcomes:
1. Students will submit the following according to standards: a) Renderings b) Lighting Studies c) Solar simulation d) Walk through of any built environment (if applicable) e) Texture studies f) e Portfolio.

ARC 271 ARCHITECTURAL DRAWING III (3) CSU
Lecture: 1 hour(s)
Lab: 4 hour(s)
This is an architecture drawing class that will focus on construction documents for steel construction. The course will cover how these architectural drawings are documents that instruct all the stake holders how to use, build and maintain a high performance building. The course will explain how construction documents made out of concrete and masonry are connected to the life cycle of a building. It covers an integrated building approach as it identifies the deliverables for: programing (identify the need), design drawings (identify the solutions), construction documents (drawings used to build the building), operation/maintain (as built drawings) and assessment (analysis for upgrade and improvement). The student will prepare a complete set of construction documents for a simple steel building structure. Appropriate reference material that focus on concrete and masonry will be covered in class like fastening, flashing, crack control and others.

Student Learning Outcomes:
1. Students complete set of construction documents for masonry and concrete. 2. A set of construction drawings with accurate implementation of building codes and space requirements. 3. Use BIM Building Information Model to analyze a case study. 4. Document smart manufacture techniques for buildings for a green environment. 5. Submit an e Portfolio. 6. Integrate LEED Standards. 7. Integrate AIA Standards.

ARC 285 DIRECTED STUDY ARCHITECTURE (2)
Lecture: 2 hour(s)
This course allows students to pursue a directed study in the Architecture Technology field on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Architecture Technology.

ARC 341 GIS METROPOLITAN ACCESS PLANNING SYSTEMS I (3) CSU
Lecture: 1 hour(s)
Lab: 4 hour(s)
This course will cover the interconnection of BIM, CAD, GIS, spatial systems and online mapping in one construct. GIS technology and related geospatial technologies will explore intelligent building drawings as they connect to multiple environments; ecological, buildings and socio economic forces. GIS are spatial drawings with multiple types of information associated with them; business, land use, roads, rivers, parcel maps, census, others. This course introduces fundamental concepts and functionality of spatial thinking and visual computation. The course uses the GIS analytical process to quantify and qualify multiple layers of spatial information applied to sustainable projects.

Student Learning Outcomes:
1. Enter data into Geographic Information Systems (GIS) databases using techniques such as coordinate geometry, keyboard entry of tabular data, manual digitizing of maps, scanning or automatic conversion to vectors, and conversion of other sources of digital data. 2. Perform geospatial data building, modeling, or analysis using advanced spatial analysis, data manipulation, or cartography software. 3. Analyze Geographic Information Systems (GIS) data to identify spatial relationships or display results of analyzes using maps, graphs, or tabular data.

ARC 385 DIRECTED STUDY ARCHITECTURE (3)
Lecture: 3 hour(s)
This course allows students to pursue a directed study in the Architecture Technology field on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Architecture Technology.

ART

ART 101 SURVEY OF ART HISTORY I (3) UC-CSU
Lecture: 3 hour(s)
This course encompasses the historic study of architecture, painting and sculpture, with incidental references to the related minor arts. A survey is made of the chronological development of Western and non-European art from the Prehistoric to the Renaissance, with special emphasis upon the cultural factors that contributed to its evolution.

Student Learning Outcomes:
1. Students will identify, compare, and analyze Western art and architecture from the Prehistoric to the Renaissance and demonstrate knowledge of art terminology and artistic styles through objective and essay exams, oral presentations and museum projects.

ART 102 SURVEY OF ART HISTORY II (3) UC-CSU
Lecture: 3 hour(s)
A survey of the major visual arts of the Western world from the Early Renaissance to the present, linking art and architecture with social, economic, political and religious aspects of western and global cultures.

Student Learning Outcomes:
1. Students will identify, compare, and analyze art and architectural styles, theories, and individual artistic expressions from the Early Renaissance to the present in the Western World while demonstrating knowledge of art terminology and artistic styles through objective and essay exams, oral presentations and museum projects.

ART 103 ART APPRECIATION I (3) UC-CSU
Lecture: 3 hour(s)
This course is designed specifically for those students who desire to expand their visual awareness through training in visual perceptual skills. The course includes exploration of the basic elements of art; visual skills are enhanced by practice in drawing techniques based on perception. Students will acquire a broad understanding of the nature of art through study of selected works from art history.

Student Learning Outcomes:
1. Students will identify and compare the various media and techniques...
of arts as well as analyze the nature of art, the use of the elements and principles and identify selected works from art history.

**ART 104 ART APPRECIATION II (3) UC:CSU**

Lecture: 3 hour(s)

Students participate in art experiences through the study of specific periods of world art, artists, and works of art, basic drawing exercises stressing visual perception, and individual research projects on the art and artists of various cultures.

Student Learning Outcomes:
1. Students will analyze the themes and ideas that motivate people to make art as well as identify works of art from different periods and geographical areas and evaluate the functions and purposes of art in various cultures to examine the role it plays in our existence.

**ART 201 DRAWING I (3) UC:CSU**

Lecture: 2 hour(s)
Lab: 2 hour(s)

Instruction is given in basic pencil drawing, charcoal, pastel, and other sketching media. Painting in wash, ink, and watercolor, from still life and outdoor assignments is included. This is a course for beginners and non art majors, as well as, a brush up course for artists.

Student Learning Outcomes:
1. Students will create drawings in a variety of materials using line, shape, form and light logic.

**ART 300 INTRODUCTION TO PAINTING (3) UC:CSU**

Lecture: 2 hour(s)
Lab: 2 hour(s)

An introduction to various painting materials, media, and techniques. Emphasis is placed on color mixing, value, intensity and compositional organization.

Student Learning Outcomes:
1. Students will create paintings in a variety of media using color theory, color mixing, value, and intensity. Students will demonstrate compositional organization and techniques in their paintings.

**ART 501 BEGINNING TWO DIMENSIONAL DESIGN (3) UC:CSU**

Lecture: 2 hour(s)
Lab: 2 hour(s)

This course introduces the elements and principles of two dimensional (flat) design in the visual arts. Color, color theory, psychology of perception, and historical and cultural foundations are explored.

Student Learning Outcomes:
1. Students will create designs using the elements and principles of two dimensional design in the visual arts including line, shape, value, color and texture.

**ASTRONOMY**

**ASTRON 001 ELEMENTARY ASTRONOMY (3) UC:CSU**

Lecture: 3 hour(s)

This course is a general introduction and overview of Astronomy and covers many topics including constellations, seasons, history of Astronomy, the electromagnetic spectrum, telescopes, the Earth and other planets of our solar system, the Sun, binary stars, the Milky Way Galaxy, properties of galaxies and the Big Bang Theory. Students are kept abreast of current developments in the field.

**ASTRON 005 FUNDAMENTALS OF ASTRONOMY LABORATORY (1)**

UC:CSU

Lab: 3 hour(s)

This course provides the laboratory work to accompany or follow Astronomy 1. This course uses astronomical instruments and laboratory equipment. Includes work with celestial sphere, sky charts, optical bench, telescopes, spectroscopes, and photometer. The course requires field trips for evening observations.

Student Learning Outcomes:
1. Be able to set up and use an astronomical telescope to observe and identify features of selected astronomical bodies. 2. Be able to examine and analyze data from astronomical charts and images. 3. Be able to use and examine a plan sphere and charts to identify constellations, stars and planets in the night sky, as demonstrated during evening viewing sessions. 4. Be able to identify constellations, stars, planets, and other objects in the night sky by direct observation.

**AUTORTK 100 HEATING AND AIR CONDITIONING SYSTEMS THEORY, INSPECTION &RPR (3)**

Lecture: 1 hour(s)
Lab: 6 hour(s)

Instruction is offered in the area of (HVAC) heating, ventilation & air conditioning systems, with emphasis on function & testing of heater controls, heater cores, air conditioning compressors, clutch & controls.

Student Learning Outcomes:
1. The students will be able to inspect and diagnose air conditioning components for damage, ware and performance using proper procedures and equipment. 2. The student will be able to install an air conditioning manifold gage set and analyze pressure readings to determine system performance. 3. The students will be able to operate various automotive scanners to communicate with air conditioning controllers (ECM, PCM, BCM etc.) retrieving repair codes to diagnose various components and sensors. 4. The students will be able to rebuild, repair, or replace as necessary various air conditioning components using proper equipment and procedures.
Course Descriptions

AUTORTK 114A    STEERING,SUSPENSION,BRAKES,PRINCIPLES AND PRACTICES (3)
Lecture:  1 hour(s)
Lab:  6 hour(s)
This course offers instruction in the construction, function and testing of the automatic transmission and transaxle. Emphasis is placed on safety power train, torque converter, hydraulic fundamentals and controls, fluid and seal, planetary systems, and electronic shift controls as well as diagnosis.

Student Learning Outcomes:
1. Test, diagnose, and inspect automotive automatic transmissions using industry standard tools and equipment. 2. The student will disassemble/reassemble various automatic transmissions sub assemblies and explain their operation.

AUTORTK 113B    DRIVE TRAIN COMPONENTS PRINCIPLES AND PRACTICES (3)
Lecture:  1 hour(s)
Lab:  6 hour(s)
This course offers instruction in the principles of manual transmission and axles, including gears, gear reduction, ratios, gear combinations, bearings and types of clutches. Laboratory instruction is offered in the repair and servicing of clutches, standard transmission and differentials

Student Learning Outcomes:
1. Test, diagnose, and inspect various automotive manual transmissions utilizing industry standard tools, equipment and specifications. 2. The student will be able to disassemble/reassemble to specifications various manual transmissions FWD/RWD subassemblies and explain their operations. 3. Test, diagnose, and inspect automotive differentials, drive shafts, clutches, and FWD/RWD manual transmissions to industry standards.

AUTORTK 121    BASIC ENGINE THEORY INSPECTION AND REPAIR (3) CSU
Lecture:  1 hour(s)
Lab:  6 hour(s)
This course offers instruction in the types of operating principles and performance characteristics of automotive engines. Applied mathematics and related physics are emphasized throughout the course. Students will disassemble and assemble a complete engine and apply related theory to factory procedures.

Student Learning Outcomes:
1. Define and explain the engine related components theory / operation and systematical method of troubleshooting system failures within the engine performance environment. 2. Identify and describe component location / function and operation within their perspective systems. 3. Identify the difference between component failure and lack of maintenance problems associated with engine related service, troubleshooting, test and repair.
4. Charge a Battery and perform a load test to determine the condition of the Battery. 4. Perform basic engine condition diagnosis and define basic principles of troubleshooting engine problems. 5. Perform cranking vacuum, running vacuum, snap acceleration, exhaust restriction tests, power balance test, dry / wet compression test, and cylinder leakage test. 6. Perform cooling system pressure test and dye leakage test. 7. Perform oil pressure test. 8. Perform Fuel System Pressure and Volume Test on a Fuel Delivery System, determine the state of system and compare test results to manufacturer’s specifications and make the correct recommendations. 9. Identify fuel injection system components describe basic theory and operation, and methods of testing and repair of components. 10. Perform a fuel injection system tests, diagnose and service components and interpret the results. 11. Identify basic fuel injection components and explain basic theory and operation of input and output devices. 12. Identify common automotive tools and equipment used in fuel injection troubleshooting and repair. 13. Demonstrate safe and proper use of equipment. 14. Know and follow state, federal, EPA and OSHA guidelines and regulations. 15. Complete a written quiz, which is similar in format to tests given by the Automotive Service Excellence (ASE) with a score of 70% or higher. 16. Identify parts and components. 17. Demonstrate proper tool usage and repair techniques. 18. Practice safe methods of using hand and power tools. 19. Remove and replace parts. 20. Identify and use the different types and sizes of fasteners used on electrical and electronic components. 21. Read trade and equipment manuals. 22. Practice quality assurance standards. 23. Use common sense. 24. The student will be able to perform an engine vacuum test, compression test, cylinder power balance test, cylinder leak down test, oil leak & pressure test and exhaust restriction test.

AUTORTK 122    ELECTRICAL/ELECTRONIC SYSTEMS THEORY, INSPECTION & REPAIR (3) CSU
Lecture:  1 hour(s)
Lab:  6 hour(s)
Instruction on theory, inspection & repair of automotive electronic/electrical systems and components. Emphasis is placed on charging, battery/starting & ignition systems component inspection, diagnosis & repair. This course also offers instruction on electrical wiring diagram analysis.

Student Learning Outcomes:
1. Troubleshoot, diagnose and repair of electrical and electronic systems using the appropriate test equipment such as scanners, DVMs (Digital Volt Ohm Meters), ETMs (Electrical Troubleshooting Manuals) and wiring schematic circuit diagrams. 2. Diagnose automotive electrical problems, to include electrical principles, use of basic electrical test equipment, and how to interpret wiring diagrams, and to gather and analyze information. 3. Diagnose and repair automotive batteries, starting, and charging, lighting systems, advanced automotive electrical systems, to include body electrical accessories, and basic computer control.

AUTORTK 123    FUEL & EMISSIONS SYSTEMS THEORY, INSPECTION & REPAIR (3) CSU
Lecture:  1 hour(s)
Lab:  6 hour(s)
Instruction is offered on engine performance, diagnosis and repair. Emphasis is placed on ignition, fuel, and emission systems. Instruction is offered on related technologies of automotive fuel delivery systems, induction and scavenging systems. The proper use of test equipment and
AUTORTK 130    AUTOMOTIVE THEORY AND REPAIR I (3)  CSU

Student Learning Outcomes:
1. The students will complete appropriate NATEF task sheets provided in student work book accompanying text as related to fuel and ignition systems and tune up.

AUTORTK 131    AUTOMOTIVE THEORY AND REPAIR II (3)

Student Learning Outcomes:
1. The students will be able to inspect and diagnose emission components for damage, wear and performance using proper procedures and equipment. 2. The students will be able to operate various automotive scanners to communicate with emission system controllers (ECM and PCM) retrieving repair codes to diagnose various components and sensors. 4. The students will be able to repair, rebuild or replace as necessary various emission control components using proper equipment and procedures.

AUTORTK 132    AUTOMOTIVE THEORY AND REPAIR III (3)  CSU

Student Learning Outcomes:
1. The students will be able to perform an engine vacuum test, compression test, cylinder pressure balance test, cylinder leak down test, oil leak & pressure test and exhaust paper test. 2. The students will be able to use engine condition and performance data to determine necessary engine repair procedures. 3. The students will be able to use industry standard tools and equipment to perform necessary engine repair procedures.

AUTORTK 133    COMPUTER CONTROL AND FUEL INJECTION (3)  CSU

Student Learning Outcomes:
1. Define and explain the fuel injection components theory / operation and systematical method of troubleshooting system failures within the engine performance environment. 2. Identify and describe component location / function and operation within their perspective systems. 3. Identify the difference between openings, shorts and grounds within circuits, troubleshooting, test and repair. 4. Charge a battery and perform a load test to determine the condition of the Battery. 5. Perform a Fuel System Pressure and Volume Test on a Fuel Delivery System, determine the state of system and compare test results to manufacturer's specifications and make the correct recommendations. 6. Identify fuel injection system components describe basic theory and operation, and methods of testing and repair of components. 7. Perform a fuel injection system tests, diagnose and service components and interpret the results. 8. Identify basic fuel injection components and explain basic theory and operation of input and output devices. 9. Identify common automotive tools and equipment used in fuel injection troubleshooting and repair. 10. Demonstrate safe and proper use of equipment. 11. Know and follow state, federal, EPA and OSHA guidelines and regulations. 12. Complete a written quiz, which is similar in format to tests given by the Automotive Service Excellence (ASE) with a score of 70% or higher. 13. Identify parts and components. 14. Demonstrate proper tool usage and repair techniques. 15. Practice safe methods of using hand and power tools. 16. Remove and replace parts. 17. Identify and use the different types and sizes of fasteners used on electrical and electronic components. 18. Read trade and equipment manuals. 19. Practice quality assurance standards. 20. Use common sense. 21. Demonstrate ability to assemble and disassemble fasteners, components, etc. 22. Diagnose and repair electrical and electronic components and noises associated with repair. 23. Demonstrate proper safety practices and use of equipment.

AUTORTK 134    AUTOMOTIVE EMISSION CONTROL SYSTEMS (3)  CSU

Student Learning Outcomes:
1. Troubleshoot, diagnose and inspect automotive engine performance and electrical systems using industry standard tools and equipment.

AUTORTK 135    AUTOMOTIVE THEORY AND REPAIR IV (3)  CSU

Student Learning Outcomes:
1. The students will be able to inspect and diagnose braking, suspension/steering, brake components using proper procedures and equipment. 2. The students will be able to operate various automotive scanners to communicate with brake, suspension/steering, and automotive accessories. 3. The students will be able to use industry standard tools and equipment to perform necessary automotive repairs: engine, transmissions, drivability, brakes, suspension, steering, and automotive accessories.

AUTORTK 136    COMPUTER CONTROL AND FUEL INJECTION (3)  CSU

Student Learning Outcomes:
1. The students will be able to inspect and diagnose braking, suspension/steering, brake components using proper procedures and equipment. 2. The students will be able to operate various automotive scanners to communicate with brake, suspension/steering, and automotive accessories. 3. The students will be able to rebuild, repair, or replace as necessary various automotive engine evaluation procedures are stressed in this course.

Student Learning Outcomes:
1. The students will complete appropriate NATEF task sheets provided in student work book accompanying text as related to fuel and ignition systems and tune up.
AUTORTK 142 AUTOMOTIVE THEORY AND REPAIR VI (3) CSU

Lecture: 1 hour(s)
Lab: 6 hour(s)

Instruction is offered on fuel injection, automatic transmissions & heating, ventilation & air conditioning systems, with emphasis on diagnosis and repair procedures. Shop practice is offered on most areas of automotive repairs: engine, transmissions, drivability, brakes, suspension, steering, automotive accessories, and various other repairs.

Student Learning Outcomes:
1. The students will be able to inspect and diagnose fuel injection, automatic transmissions and air conditioning system components for damage, ware and performance using proper procedures and equipment. 2. The students will be able to operate DSO'S/DMM'S to analyze electrical charging, ignition and computer control circuits for correct electrical signals and performance using proper procedures. 3. The students will be able to operate various automotive scanners to communicate with charging, ignition, and engine controllers (ECM, PCM, BCM Etc.) retrieving repair codes to diagnose various components and sensors. 4. The students will be able to repair, rebuild or replace as necessary various charging, ignition, and computer control components using proper equipment and procedures.

AUTORTK 141 AUTOMOTIVE THEORY AND REPAIR V (3) CSU

Lecture: 1 hour(s)
Lab: 6 hour(s)

Instruction is offered on the use of electrical diagnostic equipment, interpretation of wiring diagrams, engine computer controls and charging systems. Shop practice is offered on most areas of automotive repairs: engine, transmissions, drivability, brakes, suspension, steering, and automotive accessories.

Student Learning Outcomes:
1. The students will be able to inspect and diagnose charging, ignition and computer control components for damage, ware and performance using proper procedures and equipment. 2. The students will be able to operate DSO'S/DMM'S to analyze electrical charging, ignition and computer control circuits for correct electrical signals and performance using proper procedures. 3. The students will be able to operate various automotive scanners to communicate with charging, ignition, and engine controllers (ECM, PCM, BCM Etc.) retrieving repair codes to diagnose various components and sensors. 4. The students will be able to repair, rebuild or replace as necessary various charging, ignition, and computer control components using proper equipment and procedures.

AUTORTK 285 DIRECTED STUDY AUTOMOTIVE AND RELATED TECHNOLOGY (2)

Lecture: 2 hour(s)

This course allows students to pursue a directed study in Automotive and Related Technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in automotive and related technology.

AUTORTK 385 DIRECTED STUDY AUTOMOTIVE AND RELATED TECHNOLOGY (3)

Lecture: 3 hour(s)

This course allows students to pursue a directed study in Automotive and Related Technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in automotive and related technology.

AUTOCOR 114 BASIC WELDING THEORY AND PRACTICES (3)

Lecture: 1 hour(s)
Lab: 6 hour(s)

Instruction is given in the theory and safety of MIG and plastic welding/plastic adhesives. The main components of this class include the following: introduction to the collision repair industry and potential careers, shop safety and efficiency, and welding equipment technology.

Student Learning Outcomes:
1. The student will be able to demonstrate proper tool usage and repair techniques, practice proper welding techniques, practice job safety. 2. They will read trade and equipment manuals, adhere to CAL OSHA and EPA safety regulations, check for broken welds, tears, stress, and repair/replace as needed. 3. The student will properly use welding equipment, safely use hand and power tools, assure vehicle's structural integrity, perform final inspection, and practice quality assurance standards.
AUTOCOR 115 AUTO BODY CONSTRUCTION (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
Instruction is given in the study of auto body construction and body part nomenclature. The study offers an understanding of diagnostic and repair procedures for movable and/or stationary glass and hardware.
Student Learning Outcomes:
1. The student will be able to identify vehicle frame, major body sections, and body classifications. 2. The student will be able to use industry standard tools and equipment to perform necessary engine repair procedures.

AUTOCOR 116 BASIC COLLISION REPAIR (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
Instruction is given in occupational information that includes body shop safety, work habits, job orientation and local laws and ordinances. The type of auto body tools and their uses are discussed and demonstrated. Laboratory experiences are provided for using basic hand and power tools in repairing minor sheet metal damage.
Student Learning Outcomes:
1. The student will be able to demonstrate proper tool usage and repair techniques, practice proper welding techniques, practice job safety. 2. They will read trade and equipment manuals, adhere to CAL OSHA and EPA safety regulations, check for broken welds, tears, stress, and repair/replacement as needed. 3. The student will properly use welding equipment, safely use hand and power tools, assure vehicle's structural integrity, perform final inspection, and practice quality assurance standards.

AUTOCOR 124 INTERMEDIATE COLLISION REPAIR PARTS & REPLACEMENT ALIGNMENT (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
This course offers instruction in auto body repair procedures and alignment. Instruction is given on techniques used on outer body panel repairs, replacements, and adjustments. Instruction covers removing, repairing, and replacing steel, aluminum, and plastic composition on body panels, doors, deck lids, and hoods to manufacturers' specifications. Emphasis is placed on types and usage of auto body pull equipment, pulling points, and anchor points on damaged vehicles.
Student Learning Outcomes:
1. The student will be able to demonstrate proper tool usage and repair techniques, practice proper outer panel replacement.

AUTOCOR 125 INTERMEDIATE COLLISION REPAIR METAL REPAIR AND REFINISHING (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
This course offers instruction in the study of auto body construction and body part nomenclature. Instruction is given in metal finishing, shrinking, and filled application. Instruction covers grinding, sanding, and restoring contours with heat and plastic body fillers/fiberglass fillers/SMC (Sheet molded compound) fillers/adhesives to industry standards.
Student Learning Outcomes:
1. The student will be able to repair sheet metal to its original shape according to ASE and I Car standards. 2. Students will be able to describe different types of metals used in vehicle construction. 3. Students will be able to summarize paintless dent removal according to ASE and I Car standards.

AUTOCOR 126 INTERMEDIATE COLLISION REPAIR FRAME STRAIGHTENING (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
This course offers instruction in auto body electrical wiring systems. Instruction covers the types of usage of auto body pull equipment and pulling and anchor points on damaged vehicles. Laboratory projects include proper pulling of damaged parts in conjunction with alignment and body repair.
Student Learning Outcomes:
1. The student will be able to identify electrical components in vehicles and use alignment equipment to pull the damaged metal back out to its original shape according to ASE and I Car standards. 2. Students will be able to identify signs of stress/deformation and make necessary repair according to ASE and I Car standards.

AUTOCOR 134 BODY PANEL REPLACEMENT (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
Instruction is given in both on procedures and welding procedures of panel replacements and the use of pulling equipment for proper sheet metal alignment. Students will understand the techniques of outer body panel repairs, replacements, and adjustments. Students will repair, remove and replace steel / aluminum / SMC / plastic body panels, doors, deck lids, bumpers, and hoods. Students will adjust and align panels to manufacturer's specifications.
Student Learning Outcomes:
1. Students will utilize proper safety equipment when working in the lab. Students will properly remove and replace body panels to OEM specifications. 2. Students will properly set up the Squeeze type resistance spot welding machine. 3. Students will properly create spot welds to factory specifications. 4. Students will properly repair steel body panels. 5. Students will properly repair aluminum body panels. 6. Students will replace bolt on aluminum body panels, riveted bonded aluminum body panels, and adhesively bonded aluminum body panels. 7. Students will properly prepare plastics for repair and welding.

AUTOCOR 135 BODY SECTION REPLACEMENT (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
Instruction is given in body section replacement and structural sectioning, including removing and replacing mechanical parts, using manufacturers' body repair manual and I CAR recommendations. Measuring for cutting and proper alignment of sections is stressed. Students will understand the proper techniques of body/structural sectioning and anti corrosion protection.
Student Learning Outcomes:
1. Students will utilize proper safety equipment when working in the lab. 2. Students will be able to differentiate between High Strength Steel (HSS), Advanced High Strength Steel (AHSS), and Ultra High Strength Steel. 3. Students will be able to repair and replace complete and partial unibody frame panels made of HSS, AHSS, and UHSS. 4. Students will be able to repair and replace complete and partial full frame sections made of HSS, AHSS, and UHSS. 5. Students will be able to take corrosion precautions and apply corrosion preventing materials where needed.

AUTOCOR 136 UNITIZED BODY AND FRAME ALIGNMENT (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)
Students learn proper frame alignment and the methods of straightening damaged frames and unitized body construction. Students learn to utilize computerized laser beam frame measuring equipment. Body shop practices are also covered.
Student Learning Outcomes:
1. Students will utilize proper safety precautions when measuring and straightening frames with equipment. 2. Students will identify proper measurements by examining Body Dimension Specifications from vehicle manufacturers. 3. Students will be able to evaluate the effects of impact forces through full frame and unibody construction by measuring with specific gauge type measuring equipment and comparing the measurements to OEM specification measurements found in Body Dimension Charts. 4. Students will be able to evaluate the effects of impact forces through full frame and unibody construction by measuring with specific computerized measuring systems and comparing the measurements to OEM specification measurements found in Software.
COURSE DESCRIPTIONS

AUTOCOR 140 ADVANCED COLLISION REPAIR ESTIMATING (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

Students are taught collision analysis for body, frame and refinishing of damaged vehicles. Students create damage reports for customers and insurance companies. Students are given access to Mitchell University online instruction and certification website. Instruction is given in proper repair procedures, nomenclature, and terminology so students can clearly justify damage reports to customers, insurance adjusters, and technicians. This course provides training on the basics of UltraMate Premier Suite E Claim Manager, a tool that allows users to place all claim related data (estimates, images, etc.) into a single electronic claim folder.

Student Learning Outcomes:
1. Students will acquire supervisor skills relating to city, state, and national rules and regulations in regards to hazardous materials and employee safety. 2. Students will acquire certification for mastering Mitchell UltraMate Premier Suite e Claim Manager 3. Students will acquire certification for mastering Mitchell UltraMate Premier Suite e Claim Manager 3.7 Basic Training. 3. Students will acquire certification for mastering Mitchell UltraMate Premier Suite e Claim Manager 3.7 Advanced Training. 4. Students will be able to demonstrate proper analysis of structural and non structural vehicle damage. 5. Students will be able to recognize and illustrate accident reconstruction. 6. Students will be able to create damage reports using Mitchell UltraMate Software. 7. Students will be able to organize estimates along with pertinent information to communicate with industry partners.
8. Students will be able to build and configure communication avenues to direct repair partners.

AUTOCOR 141 DIMENSION CHARTS (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

This course offers a review of auto collision repair techniques and includes lectures, demonstrations and guest speakers. Advanced instruction is offered in inspection, paint repair and repaint to I-CAR and industry standards. The first part of DuPont Certification for Compliant Coatings Rule 1151 is taught in this course.

Student Learning Outcomes:
1. Students will utilize proper safety equipment when working in the lab. 2. Students will properly apply DuPont compliant pre treatments and specialty coatings. 3. Students will properly apply primer surfaces. 4. Students will properly apply primer sealers. 5. Students will properly apply basecoats. 6. Students will properly apply clearcoats. 7. Students will properly mix factory colors using the DuPont ColorNet software.

AUTOCOR 142 PAINT PREPARATION AND APPLICATION (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

This course introduces students to MIG welding, aluminum welding, and resistance welding. Students will learn to repair and replace body panels on unibody and full frame vehicles. Repairing and replacing structural panels made of High Strength Steel (HSS), Advanced High Strength Steel (AHSS), and Ultra High Strength Steel (UHSS) are incorporated into this course. Students will learn aluminum welding techniques and panel bonding for both aluminum and steels. Students will understand the proper techniques of body/structural sectioning and anti corrosion protection. Students will repair vehicles to industry standards.

Student Learning Outcomes:
1. Students will utilize proper safety equipment when working in the lab. 2. Students will properly remove and replace body panels to OEM specifications. 3. Students will properly set up the Squeeze type resistance spot welding machine. 4. Students will properly create spot welds to factory specifications. 5. Students will properly repair steel body panels. 6. Students will properly repair aluminum body panels. 7. Students will be able to repair and replace complete and partial full frame sections made of HSS, AHSS, and UHSS. 8. Students will be able to take corrosion precautions and apply corrosion preventing materials where needed.

9. Students will be able to evaluate the effects of impact forces through full frame and unibody construction by measuring with specific gauge type measuring equipment and comparing the measurements to OEM specification measurements found in Body Dimension Charts. 10. Students will be able to utilize various types of unibody and full frame straightening equipment to include in floor straightening equipment, portable body and frame pullers, rack straightening systems and bench straightening systems.

AUTOCOR 143 ADVANCED COLLISION REPAIR PRIMERS AND PAINTS (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

This course offers a review of auto collision repair techniques and includes lectures, demonstrations and guest speakers. Advanced instruction is offered in inspection, paint repair and repaint to I-CAR and industry standards. The first part of DuPont Certification for Compliant Coatings Rule 1151 is taught in this course.

Student Learning Outcomes:
1. Students will utilize proper safety equipment when spraying compliant coatings. 2. Students will properly apply DuPont compliant pre treatments and specialty coatings. 3. Students will properly apply primer surfaces. 4. Students will properly apply primer sealers. 5. Students will properly apply basecoats. 6. Students will properly apply clearcoats. 7. Students will properly mix factory colors using the DuPont ColorNet software.

AUTOCOR 144 ADVANCED COLLISION REPAIR SPECIAL PROBLEMS & SOLUTIONS (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

This course offers a review of auto collision repair techniques, including paint application problems and solutions. Spot and panel paint options including color matching are taught. The second half of DuPont Certification for Compliant Coatings Rule 1151 is taught in this course. Certification testing for the DuPont Certificate is given and certificates are awarded to qualifying students.

Student Learning Outcomes:
1. Students will acquire and utilize safety skills relating to Hazardous Materials Training for Auto Dealers. 2. Students will acquire the skills needed to refinish plastic and flexible parts. 3. Students will acquire the skills needed to refinish spot and panel repairs. 4. This includes color matching. 5. Students will acquire the skills needed to refinish complete paint jobs. 6. Students will acquire certification for compliant coatings for Rule 1151.

AUTOCOR 145 ADVANCED COLLISION REPAIR SPECIAL PROBLEMS & SOLUTIONS (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

This course offers a review of auto collision repair techniques, including paint application problems and solutions. Spot and panel paint options including color matching are taught. The second half of DuPont Certification for Compliant Coatings Rule 1151 is taught in this course. Certification testing for the DuPont Certificate is given and certificates are awarded to qualifying students.

Student Learning Outcomes:
1. Students will acquire and utilize safety skills relating to Hazardous Materials Training for Auto Dealers. 2. Students will acquire the skills needed to refinish plastic and flexible parts. 3. Students will acquire the skills needed to refinish spot and panel repairs. 4. This includes color matching. 5. Students will acquire the skills needed to refinish complete paint jobs. 6. Students will acquire certification for compliant coatings for Rule 1151.

AUTOCOR 146 PAINT PREPARATION AND APPLICATION (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

Students receive instruction in the types and properties of paint, solvent and spot painting. Cause and effect relationships of paint and surface blemishes, paint application problems, repairs and final detailing as required to I-CAR and industry standards are introduced.

Student Learning Outcomes:
1. Students will utilize proper safety equipment when spraying compliant coatings. 2. Students will ascertain and utilize the various types of safety equipment when spray painting. 3. Students will mix and formulate compliant coatings to industry standards. 4. Students will practice spraying spot and panel repairs. 5. Students will detail vehicles for delivery to customers.

AUTOCOR 147 ESTIMATING BODY DAMAGE (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

Students are taught body repair and computerized estimating collision service management systems. Damage reporting, structural and nonstructural damage analysis, sequencing of inspections and use of collision estimating guides and damage reports are also addressed.

Student Learning Outcomes:
1. Students will properly identify vehicles. 2. Students will be able to demonstrate proper analysis of structural and nonstructural vehicle damage. 3. Students will be able to recognize and illustrate accident reconstruction.

AUTOCOR 148 CREDITED STUDY AUTOMOTIVE COLLISION REPAIR (1) RPT2
Lecture: 1 hour(s)

This course allows students to pursue a directed study in Automotive Collision Repair on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor. 2. The student will formulate a research paper based on a topic in automotive collision and related technology.

AUTOCOR 149 ADVANCED COLLISION REPAIR SPECIAL PROBLEMS & SOLUTIONS (3)
Lecture: 1 hour(s)
Lab: 6 hour(s)

This course offers a review of auto collision repair techniques, including paint application problems and solutions. Spot and panel paint options including color matching are taught. The second half of DuPont Certification for Compliant Coatings Rule 1151 is taught in this course. Certification testing for the DuPont Certificate is given and certificates are awarded to qualifying students.

Student Learning Outcomes:
1. Students will acquire and utilize safety skills relating to Hazardous Materials Training for Auto Dealers. 2. Students will acquire the skills needed to refinish plastic and flexible parts. 3. Students will acquire the skills needed to refinish spot and panel repairs. 4. This includes color matching. 5. Students will acquire the skills needed to refinish complete paint jobs. 6. Students will acquire certification for compliant coatings for Rule 1151.
AUTOCOR 227  AUTO BODY AND FENDER II (3)
Lecture:  1 hour(s)
Lab:  6 hour(s)
This course offers advanced training in refinishing, color mixing and matching of OEM (Original Equipment manufacturer) color codes. Proper paint gun operation and use of air pressure and spray patterns are emphasized, as well as VOC (Volatile Organic Compounds) log calculation systems. Students will learn to repair/repair as required to I CAR and industry standards. This course will emphasize on the STAR Training Program whose goal is to train technicians to reduce material consumption costs and pollution through increased spray efficiency.

Student Learning Outcomes:
1. Students will utilize proper safety equipment when spraying compliant coatings.
2. Students will learn how to use the sandpaper grading system.
3. Students will understand proper techniques of preparing panels.
4. Students will learn the proper operating and maintenance procedures for HVLP spray equipment.
5. Students will learn proper mixing techniques.
6. Students will properly apply DuPont compliant sealers, waterborne basecoats and clears.
7. Students will learn the proper operating and maintenance procedures for Laser Touch spray system.

AUTOCOR 285  DIRECTED STUDY AUTOMOTIVE COLLISION REPAIR (2)
Lecture:  2 hour(s)
This course allows students to pursue a directed study in Automotive Collision Repair on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a research paper based on a topic in automotive collision and related technology.

AUTOCOR 385  DIRECTED STUDY AUTOMOTIVE COLLISION REPAIR (3)
Lecture:  3 hour(s)
This course allows students to pursue a directed study in Automotive Collision Repair on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
1. The outcome will vary depending on the contract with the instructor.
2. The student will formulate a research paper based on a topic in automotive collision and related technology.

AUTOCOR 941  COOPERATIVE EDUCATION AUTOMOTIVE COLLISION REPAIR (4) RPT3
Lecture:  4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.

-----------------------------------------------

Baking, Professional

PROFBKG 101  ASSEMBLING AND DECORATING CAKES (2)
Lecture:  1 hour(s)
Lab:  2 hour(s)
Prerequisite: Culinary Arts 112

The course provides an introduction to cake decorating and design. Students will recognize and prepare various piping methods as they pertain to a professional bakery.

Student Learning Outcomes:
1. Recognize basic cake piping and frosting techniques
2. Demonstrate various piping techniques

PROFBKG 112  BAKING PROCESSES AND THEORY OF INGREDIENTS (4)
Lecture:  2 hour(s)
Lab:  6 hour(s)
Corequisite: Culinary Arts 112

Course Covers the production of quick breads, introduction to puff pastry, laminated dough, and cookies with a emphasis placed on mixing methods. The role of leavening agents, starches, chemical reactions of ingredients and the effect on heat and cold on products. Recipe and menu development, including ingredient selection will be discussed.

Student Learning Outcomes:
1. Identify Beginning Baking terminology and bakers math.
3. Evaluate and critique finished product.

PROFBKG 121  BEGINNING YEAST BREADS AND QUICKBREADS (6)
Lecture:  3.75 hour(s)
Lab:  6.75 hour(s)
Prerequisite: Professional Baking 112 and Culinary Arts 112

Class introduces student to volume lean & rich yeast bread and quick bread production with an emphasis on flour usage, chemical and natural leavening agents, as well as fat and sugar ingredient identification. Speed, accuracy, and increased productivity are stressed along with preparation of a variety of bread products up to industry standards.

Student Learning Outcomes:
1. Identify a wide variety of baking procedures.
2. Demonstrate and apply methods of preparation for yeast, laminated and quick breads.
3. Compare and Contrast the various preparations and evaluate finished product.

PROFBKG 122  ARTESIAN BREADS, SPECIALTY BREADS (6)
Lecture:  3.75 hour(s)
Lab:  6.75 hour(s)

Recognize formulas and demonstrate the ability to alter formulas in yeast, rolled in, and quick bread formulas central to this class. View bread baking from an artisan s prospective. Explore the fundamentals of baking science: How a formula works including changes of yields and altering percentages of ingredients in formulas to produce desired results are stressed. Work on increasing productivity, speed and accuracy is continued in this class.

Student Learning Outcomes:
1. Students will demonstrate and apply the Artisanal Yeast Dough Production techniques that meet baking industry and/or employment standards.
2. Students will correctly demonstrate and apply the 12 Steps of Artesian Yeast Dough Production.
PROFBKG 131  PLATED RESTAURANT STYLE DESSERTS (6)
Lecture:  3.75 hour(s)
Lab:  6.75 hour(s)
Prerequisite:  Professional Baking 112; Professional Baking 121; Professional Baking 122; Culinary Arts 112

The course covers a wide range of baking techniques and topics with concentration on the composition of restaurant style plated desserts made up of a number of components.

Student Learning Outcomes:
1. Differentiate various baking preparation of doughs, cakes, fillings, sauces and garnishes. 2. Demonstrate said preparations within a professional bakery setting. 3. Assess finished products according to industry standards.

PROFBKG 132  MULTI COMPONENT DESSERTS AND PASTRIES (6)
Lecture:  3.75 hour(s)
Lab:  6.75 hour(s)
Prerequisite:  Professional Baking 112; Professional Baking 121; Professional Baking 122; Professional Baking 131 and Culinary Arts 112

Students will discuss and demonstrate contemporary style multi component plated restaurant style desserts. Topics include traditional composed desserts, modern menu fusion, international/ethnic and classical dessert combinations.

Student Learning Outcomes:
1. Identify multi component plated desserts used in the modern restaurant. 2. Demonstrate preparation of multi component plated desserts. 3. Evaluate multi component plated desserts.

PROFBKG 141  ADVANCED BAKING CENTERPIECE AND DECORATING TECHNIQUES (6)
Lecture:  3.75 hour(s)
Lab:  6.75 hour(s)
Prerequisite:  Professional Baking 112; Professional Baking 121; Professional Baking 122; Professional Baking 131; Professional Baking 132; Culinary Arts 111; Culinary Arts 112

This class applies procedures and techniques for preparing advanced decorative bakery items for display in a professional food service facility. Students will prepare and demonstrate various advanced techniques including: Molded and tempered chocolate show pieces, marzipan, nougatine, pastillage, pulled and molded sugar, wedding and other occasional cakes, rolled and poured fondant, and gum paste will be prepared and evaluated.

Student Learning Outcomes:
Recognize and Demonstrate preparation of advanced bakery techniques and procedures Evaluate finished products per class and industry standard

PROFBKG 941  COOPERATIVE EDUCATION BAKING, PROFESSIONAL (4) RPT3
Lecture:  4 hour(s)

Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

BARBERING

BAR 113  FRESHMAN BARBERING I (6)
Lecture:  3 hour(s)
Lab:  9 hour(s)
The beginning course includes sanitation, client protection, scalp treatments, shampooing, hair cutting, finger waves, curl constructions, and manicuring.

Student Learning Outcomes:
Student will be able to perform basic hair designs. Students will be able to demonstrate a basic manicure. Students will be able to perform hair sculpting procedures and practice industry safety and sanitation standards.

BAR 114  FRESHMAN BARBERING II (6)
Lecture:  3 hour(s)
Lab:  9 hour(s)
Prerequisite:  Barbering 113

Beginning course with plain facials, permanent waving techniques, hair cutting with a razor and clippers and thermal texture hair styling.

Student Learning Outcomes:
Students will be to perform a plain facial using massage manipulations. Student will be able to demonstrate a plain straight back permanent wave. Student will be able to perform a variety of hair sculpting using the shears and clipper.

BAR 123  BARBERING JR. SALON I (6)
Lecture:  3 hour(s)
Lab:  9 hour(s)
Prerequisite:  Barbering 114

This course will cover advanced permanent waving, soft permanent wave, men hairpieces, thermal straightening and curling, hair cutting, clipper cutting and electricity.

Student Learning Outcomes:
Students will be able to perform advanced cold waving, soft permanent waving. Students will be able to perform chemical straightening. Students will demonstrate competence in hair cutting. Students will be able to demonstrate proper use of electricity.

BAR 124  BARBERING JR. SALON II (6)
Lecture:  3 hour(s)
Lab:  9 hour(s)
Prerequisite:  Barbering 123

The students are instructed in advanced permanent waving, soft permanent wave, men hairpieces, thermal straightening and curling, hair cutting, clipper cutting and electricity.

Student Learning Outcomes:
Students will be able to perform advanced cold waving, soft permanent waving. Students will be able to perform chemical straightening. Students will demonstrate competence in hair cutting. Students will be able to demonstrate proper use of electricity.

BAR 133  BARBERING JR. SALON III (6)
Lecture:  3 hour(s)
Lab:  9 hour(s)
Prerequisite:  Barbering 114

The course will cover basic, intermediate, and advance hair coloring, bleaching, lighteners, facial hair color, and color correction techniques. Course will cover shaving techniques and soft perm waving. The subjects mentioned will be discussed.

Student Learning Outcomes:
The students will be able to apply law of color in identifying and demonstrating the applications of basic and intermediate hair coloring.
bleaching and toning. Students will be able to apply shaving and hair sculpting. Student will be able to apply permanent/soft waving techniques.

BAR 134 BARBERING JR. SALON IV (6)
Lecture: 3 hour(s)
Lab: 9 hour(s)
Prerequisite: Barbering 133
The course will cover basic, intermediate, and advanced hair coloring, bleaching, lighteners, facial hair color, and color correction techniques.

Student Learning Outcomes:
Students will be able to describe the benefits of facial massage. Students will be able to identify the 14 shaving areas of the face. Students will be able to discuss, identify, and name the sections of the head as applied to hair cutting.

BAR 143 BARBERING SR. SALON I (6)
Lecture: 3 hour(s)
Lab: 9 hour(s)
Prerequisite: Barbering 24; Barbering 134

The students will review all areas of cosmetology. Theory is focused on what is required by State Board and practical assignments related to services provided. There will be emphasis on communication, customer service, time management, booking of appointments and proper sales attitude.

Student Learning Outcomes:
Students will be able to perform a chemical straightener. Student will be able to demonstrate a resting facial. Student will be able to list and describe the properties of the hair and scalp.

BAR 144 BARBERING SR. SALON II (6)
Lecture: 3 hour(s)
Lab: 9 hour(s)
Prerequisite: Barbering 143

The students will be introduced to clinic floor practicum and advanced client services. Mock State Board procedures for licensure will be employed. Business practices include: client services, effective communication, job search skills, networking, strategies for building a client, selling techniques, starting and operation a business.

Student Learning Outcomes:
Student will model industry standard business practices including customer rapport, service-planning, professional communication, client retention, referrals, marketing and cooperation with co workers. Student will review individual competency requirements, by skill and theory, and passing a mock examination, student will demonstrate readiness to pass the state certification exam.

BIOLOGY

BIOLOGY 003 INTRODUCTION TO BIOLOGY (4) UC:CSU
Lecture: 3 hour(s)
Lab: 3 hour(s)
This is an introductory course dealing with the fundamental properties of living things. The structure and physiology of plants and animals, with emphasis on humans, are covered. Relationships between biological communities, genetics, and evolution are stressed.

Student Learning Outcomes:
1. Be able to explain the cell theory, and discuss the structure and function of cell organelles and basic cell division processes. 2. Explain mechanisms of evolutionary changes. 3. Discuss the consequences of the evolutionary processes on biological diversity and adaptation patterns. 4. Describe patterns and processes of heredity (with emphasis on humans)

Using both classical and molecular genetics. 5. Relate the structure of organs and organ systems of multicellular organisms to their specific functions. 6. Discuss factors that affect the structure of biological communities and ecosystems. 7. Use basic biological (ecological) principles to analyze major environmental issues.

BIOLOGY 006 GENERAL BIOLOGY I (5) UC:CSU
Lecture: 3 hour(s)
Lab: 6 hour(s)
Prerequisite: Chemistry 51 or Chemistry 101

This is the first of a sequence of two General Biology courses designed for life science and pre med majors. It deals with basic cellular processes within and between cells, metabolism, genetics and recombinant DNA technology.

Student Learning Outcomes:
1. Discuss the cell theory. 2. Discuss how cell structure is related to its function. 3. Discuss metabolism, cell communication and cell division processes. 4. Describe patterns of inheritance and discuss processes of heredity using concepts in Mendelian and molecular genetics. 5. Solve genetic problems involving Mendelian and molecular genetics. 6. Discuss basic principles and applications of DNA technology.

BIOLOGY 007 GENERAL BIOLOGY II (5) UC:CSU
Lecture: 3 hour(s)
Lab: 6 hour(s)
Prerequisite: Biology 6

This is the second of a sequence of two General Biology courses designed for life science and pre med majors. It deals with basic concepts in evolution, systematics, anatomy, physiology and ecology of organisms.

Student Learning Outcomes:
1. Explain mechanisms of evolutionary change. 2. Discuss consequences of evolution on biological diversity and adaptation patterns. 3. Reconstruct phylogeny and explain principles of phylogenetic reconstruction using morphological and molecular data. 4. Identify and classify major taxa using phylogenetic systematics and explain the basis of classification. 5. Describe the most important events in the history of life on earth. 6. Relate the structure of organs of multicellular eukaryotes (with emphasis on plants and animals) to their functions. 7. Discuss how abiotic and biotic factors affect individuals, populations, communities and ecosystems. 8. Use ecological principles to analyze human impact on environment.

BIOLOGY 020 HUMAN ANATOMY AND PHYSIOLOGY (8) UC:CSU
Lecture: 6 hour(s)
Lab: 6 hour(s)
Prerequisite: Biology 3 or Biology 36; and Chemistry 51 or Chemistry 65

This course integrates the fundamentals of human anatomy with the fundamentals of cellular and organ system physiology. Instruction and laboratory procedures (observation, experimentation, and dissection) are designed to provide a solid foundation in the anatomy, histology, and physiology of the organ systems of the human body.

Student Learning Outcomes:

(LECTURE) 1) Given a human case study incorporating arterial blood gas (ABG) data, the student will analyze the situation and determine type of acidosis or alkalosis and any compensatory actions by lungs or kidneys. (LAB) 1) Given a set of disarticulated human bones, at least 70% of the students should be able to identify specific bones and their bony markings on a photograph (at least 70% proficiency). 2) Given a model, picture, dissected cat, or human subject, identify specific muscles, joints, and their origins/insertions on a photograph (70% of students with at least 70% proficiency). 3) Given a photograph or microscope slide, 70% of students will identify major tissue types and recall their location in the body with 70% proficiency or better.

BIOLOGY 036 BIOSCIENCE FOR HEALTH OCCUPATIONS (4)
Lecture: 3 hour(s)
Lab: 3 hour(s)

This is an elementary course including basic chemistry, basic microbiology and anatomy and physiology. Basic chemistry, as related to health care and microbiological principles including asepsis will be treated. Anatomy
and physiology, both microscopic and gross, of the human body are studied using a systems approach.

Student Learning Outcomes:
1. Be able to use the Scientific Method in understanding biological principles
2. Be able to describe basic chemical principles in human biology.
3. Be able to identify the structure and function of cell organelles.
4. Be able to describe different types of bacteria, their staining methods, and how they cause disease.
5. Be able to discuss the anatomy and physiology of human organ systems.

### BUILDING CONSTRUCTION TECHNIQUES

**BLDGCTQ 002 PRE EMPLOYMENT APPLIED TRADES CALCULATIONS AND MEASUREMENTS (3) RPT1**

Lecture: 3 hour(s)

This is an entry level course in applied calculations and measurements with special emphasis on application problems encountered in the utility, manufacturing, and construction industries.

Student Learning Outcomes:
1. Add, subtract, multiply, and divide whole numbers, with and without a calculator.
2. Use a standard ruler, a metric ruler, and a measuring stick.
3. Recognize some of the basic shapes used in the construction industry and apply basic geometry to measure them.

**BLDGCTQ 007 WEATHERIZATION PRACTICAL ENERGY EFFICIENCY TECHNIQUES (3)**

Lecture: 3 hour(s)

This course provides expertise advice on various techniques that can be used to weatherize homes and other structures. The course is suitable for application by a professional home or energy inspector. Homeowners would also benefit from the knowledge and application of the simpler techniques.

Student Learning Outcomes:
1. Recognize some of the basic shapes used in the construction industry and apply basic geometry to measure them.

**BLDGCTQ 008 WEATHERIZATION ENERGY EFFICIENCY PRACTICES (1)**

Lab: 3 hour(s)

This course provides laboratory exercises to build skills necessary for the effective application of energy techniques that can be used to weatherize homes and other structures. Course is suitable for application by a professional weatherization contractor training entry level workers or a homeowner looking to improve their own home. Efficiency practices related to: Energy basics, sealing, insulating, window replacement/Installation, environmental air, water, appliance energy efficiency, and lighting are just some of the areas that will be covered.

Student Learning Outcomes:
Students install the 6 basic weatherization measures: Attic insulation, caulking gaps, window repair and glass cutting, door weatherstripping, water heater blanket, and low flow shower head.

**BLDGCTQ 009 ENERGY AUDITOR RESIDENTIAL (3)**

Lecture: 3 hour(s)

A course focusing on residential energy requirements, loss and efficiency. How energy is used and lost will be discussed, along with the testing techniques and approaches to measure the amount of energy lost. Students will learn the components of an energy audit report and complete necessary forms.

Student Learning Outcomes:
1. Complete a mock contractor’s license examination.
2. Identify and interpret various Contractors’ License regulations.
3. Identify and interpret mechanics lean laws and regulations.

**BLDGCTQ 010 ENERGY AND UTILITY INDUSTRY CAREERS (3)**

Lecture: 3 hour(s)
Lab: 1 hour(s)

Computer Aided Design/Drafting (CADD) applications specific to landscape professionals. Includes introduction to CADD skills, block functions, Internet applications, three dimensional design, presentation drawings, building systems, working drawings, and working drawing coordination.

Student Learning Outcomes:
Students complete a set of Three Dimensional Models with Libraries, Meta tags and Information using CAD MEP as the drawing tool for a sustainable landscape design project.

**BLDGCTQ 011 CADD FOR SUSTAINABLE LANDSCAPE DESIGN (4)**

Lecture: 3 hour(s)
Lab: 3 hour(s)

This course covers the use of computer Aided Design/Drafting (CADD) applications specific to landscape professionals, including the introduction to CADD skills, block functions, Internet applications, three dimensional design, presentation drawings, building systems, working drawings, and working drawing coordination.

Student Learning Outcomes:
Students complete a set of Three Dimensional Models with Libraries, Meta tags and Information using CAD MEP as the drawing tool for a sustainable landscape design project.

**BLDGCTQ 012 ENERGY AUDITOR RESIDENTIAL PRACTICES (1)**

Lab: 3 hour(s)

A course focusing on the practical application of residential energy requirements, loss and efficiency. Testing techniques and measurement of the amount of energy lost. Students will perform actual energy audits of simulated structures and complete necessary forms.

Student Learning Outcomes:
Students will install the 6 basic weatherization measures: Attic insulation, caulking gaps, window repair and glass cutting, door weatherstripping, water heater blanket, and low flow shower head.

**BLDGCTQ 014 CARPENTRY AND CONSTRUCTION FOR SOLAR INSTALLATION (4)**

Lecture: 3 hour(s)
Lab: 3 hour(s)

This course covers the roof structure principles necessary for installation of solar panels. Construction techniques and principles of roof framing and construction will be emphasized. Roof covering and flashing will also be a focus of the course. The installation and mounting of different panel mounting systems will be demonstrated and covered in class.

Student Learning Outcomes:
Students install a set of Three Dimensional Models with Libraries, Meta tags and Information using CAD MEP as the drawing tool for a sustainable landscape design project.

**BLDGCTQ 010 CONTRACT’S LICENSE LAW (3) CSU**

Lecture: 3 hour(s)

Contractor’s License Law is designed to prepare personnel in the construction industry on the California Law requirements for attaining a California State Contractor’s License. Topics covered are License Law, Contractor’s License Law, Employment Regulations, Worker’s Compensation, Safety in Employment and Business Management.

Student Learning Outcomes:
1. Complete a mock contractor’s license examination.
2. Identify and interpret various Contractors’ License regulations.
3. Identify and interpret mechanics lean laws and regulations.
BUSINESS

BUS 005  BUSINESS LAW I (3) UC:CSU
Lecture:  3 hour(s)
Introductory course in civil law emphasizing laws relating to contracts, agency, personal property, business organizations, partnerships, corporations, security transactions, and torts. Students also explore logical reasoning and the application of rules of law to everyday business affairs.

Student Learning Outcomes:
1. Student will recognize particular legal issues inhering to a given case scenario and determine which laws come to bear on the issues towards arriving at a resolution of those issues.

BUS 006  BUSINESS LAW II (3)
Lecture:  3 hour(s)
Introductory course in civil law emphasizing commercial paper, secured transactions, bankruptcy, real and personal property, and trusts and estates.

Student Learning Outcomes:
1. Students will identify the laws, rules, and regulations that bound the exchange of goods and services between producers and consumers in the marketplace.

BUS 012  CUSTOMER SERVICE PRINCIPLES (3)
Lecture:  3 hour(s)
Instruction will focus on those skills the customer service student needs to be well prepared for a work environment characterized by demanding customers, changing economic conditions, constant change and a new level of competitiveness. This interpersonal skills approach places greater emphasis on the application of knowledge through practice, followed by feedback and reinforcement. The skills, strategies, and techniques used in this class are directed toward identifying customer needs and the satisfaction of those needs.

BUS 013  CUSTOMER SERVICE ISSUES (3)
Lecture:  3 hour(s)
This course covers customer service issues such as decision making, problem solving, handling conflict, teamwork, managing change, attitude and self esteem, in the customer service workplace. Student Learning Outcomes: Student will be able to summarize methods to effectively communicate with customers. Student will be able to demonstrate an understanding of techniques and strategies for handling difficult customers.

BUS 014  ORAL COMMUNICATIONS FOR CUSTOMER SERVICE (3)
Lecture:  3 hour(s)
Instruction will focus on the key issues of positive and productive customer service communications, identifying customer needs and problems and finding viable solutions.
Student Learning Outcomes:
1. Students will become effective communicators in today’s changing workplace. Students will learn how to write collaboratively in an office environment.

BUS 032  BUSINESS COMMUNICATIONS (3) CSU
Lecture:  2 hour(s)
Lab:  2 hour(s)
The course emphasizes the concepts of successful written and oral communication skills in business in order to write effective business communications including letters, electronic communications, and short reports. This course also helps students develop the ability to create and present oral presentations.

Student Learning Outcomes:
1. Students will become effective communicators in today’s changing workplace. Students will learn the writing process as it applies to e-mail messages and memorandums.

BUS 033  TECHNICAL REPORT WRITING (3) CSU
Lecture:  3 hour(s)
Advisory:  English 67
This course provides students with technical communication skills that help in finding and using information to share with others in the workplace. It also provides techniques that communicators use to analyze an audience and purpose, to create and find the best information on a subject, to arrange the information skillfully to meet the audience’s needs and preferences, and to deliver the information effectively using the most appropriate software application.

Student Learning Outcomes:
1. Students will plan and draft documents using templates and style in Microsoft application. Student will learn how to write collaboratively in an office environment.

BUS 038  BUSINESS COMPUTATIONS (3) CSU
Lecture:  3 hour(s)
This course provides the principles of mathematics, financial accounting and general business problems that include the following: Bank services including checking account and credit card account activity, payroll calculations, cash and trade discounts merchandise mark up and inventory valuation, simple and compound interest, annuities, stock and bond transactions, business consumer loans, taxes and insurance, depreciation, financial statements, ratios, and business statistics.

Student Learning Outcomes:
1. Students will demonstrate speed and accuracy in analyzing the fundamental processes of mathematics commonly used in making business calculations.
Students will demonstrate an understanding of mathematical skills required in other business subjects such as accounting, management, marketing, and computer operations.

**BUS 040 BUSINESS PROJECT MANAGEMENT (3) CSU**
- **Lecture:** 2 hour(s)
- **Lab:** 2 hour(s)

This course will identify all phases of project management. Students will learn the tools for completing projects on time and within budget. Specific topics include project life cycles, setting objectives, identifying activities and resources, work breakdown structures, work flow, network analysis, contingency planning, scheduling, budgeting, work in progress and reporting. Special emphasis will be placed on MS Project.

**Student Learning Outcomes:**
- Students will be able to develop project proposals in regard to identifying project scope, developing project schedules while utilizing efficient resources, determining cost in respect to project risk and effectively closing the proposed project while building strong relationships with customers and partners.

---

**BUS 941 COOPERATIVE EDUCATION BUSINESS (4) RPT3**
- **Lecture:** 4 hour(s)

Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

**Student Learning Outcomes:**
- The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

---

**CARPENTRY**

**CRPNTRY 105 CALCULATIONS AND MEASUREMENT FOR WOODWORKING STUDENTS I (3) CSU**
- **Lecture:** 3 hour(s)

This course covers the basic math skills needed to perform in the construction field. Emphasis is placed on the basic operations and how they are applied to carpentry. Measurement calculations will be performed in both standard and metric measurements.

**Student Learning Outcomes:**
- Students complete national certification test for Introduction to Construction Math

---

**CRPNTRY 111 CONSTRUCTION I (7) CSU**
- **Lecture:** 3 hour(s)
- **Lab:** 12 hour(s)

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of residential foundation and wall construction, use of rough and finish hardware, glues and adhesives, federal, state, and local building codes and ordinances are studied.

**Student Learning Outcomes:**
- Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

---

**CRPNTRY 111A CONSTRUCTION I (3) CSU**
- **Lecture:** 3 hour(s)

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of residential foundation and wall construction, use of rough and finish hardware, glues and adhesives, federal, state, and local building codes and ordinances are studied.

**Student Learning Outcomes:**
- Students identify parts of a wood framed structure and describe their purpose

---

**CRPNTRY 111B CONSTRUCTION I (2) CSU**
- **Lab:** 6 hour(s)

This is the second laboratory course in the Carpentry 111 sequence. This covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of residential foundation and wall construction will be the focus of this course.

**Student Learning Outcomes:**
- Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

---

**CRPNTRY 111C CONSTRUCTION I (2) CSU**
- **Lab:** 6 hour(s)

This course covers use and operation of hand tools, machine tools, and portable electric tools commonly used in the construction trades. Fundamentals of wall construction, roof construction, and applications of federal, state, and local building codes and ordinances are studied.

**Student Learning Outcomes:**
- Students will use common power and hand tools to perform basic framing operations. 2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw. 3. The student will fasten framing members together using hand nailing techniques. 4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

---

**CRPNTRY 114 HAND AND POWER TOOL APPLICATION (4) CSU**
- **Lecture:** 1 hour(s)
- **Lab:** 9 hour(s)

This course focuses on the safe use of hand and power tools used in the carpentry and construction industry. Operation and safety instruction will be given on both portable and stationary power tools including skill saws, table saws, jointers, planers, band saws, etc. Students will use hand and power tools to complete woodworking and carpentry projects.

**Student Learning Outcomes:**
- Students demonstrate knowledge of safe use of hand and power tools.

---

**CRPNTRY 115 BASIC BLUEPRINT READING (3) CSU**
- **Lecture:** 1 hour(s)
- **Lab:** 6 hour(s)

Students will be familiarized with the basic terms for construction drawings, components, and symbols: emphasis is placed on the different types of drawings and how to interpret and use the dimensions.

**Student Learning Outcomes:**
- Students identify information from blueprints such as dimensions, symbols and location.
CRPNTRY 117  CONSTRUCTION MATERIALS (2)  CSU
Lecture:  1 hour(s)
Lab:  3 hour(s)
Corequisite:  Carpentry 114
This course focuses on building materials such as concrete, steel and a variety of woods used for exterior and interior carpentry finish; insulation, flashing, roof covering, interior and exterior wall covering, wood trim and other finish materials in residential construction; rough and finish hardware such as nails, screws, bolts, timber fasteners, gang nailing, power fastening, powder actuated fasteners, joist hangers, clips, etc.; methods of installation.
Student Learning Outcomes:
Students identify basic construction materials including framing, finishing, millwork and wood materials.

CRPNTRY 123  BASIC HOUSE CONSTRUCTION (4)  CSU
Lecture:  2 hour(s)
Lab:  6 hour(s)
This course covers the basic framing operations involved in residential construction. Students will complete the framing process using large scale models. Basic construction tool operations, and processes will be emphasized and tested.
Student Learning Outcomes:
1. Students will use common power and hand tools to perform basic framing operations.
2. The student will calculate rafter lengths and cut the rafters to size using a Skill saw.
3. The student will fasten framing members together using hand nailing techniques.
4. The student will measure and cut framing members to length using the worm drive circular saw, power miter box and radial arm saws.

CRPNTRY 124  BLUEPRINT READING II (3)  CSU
Lecture:  1 hour(s)
Lab:  6 hour(s)
Advanced blueprint reading for the process of estimation and construction. Material take offs, detail methods, labor calculations, profit, overhead and bid procedures will be covered. Activities will involve finding building data and dimensions from residential and light commercial drawings. Student Learning Outcomes: Students complete national print reading certification test (nccer).

CRPNTRY 126  CONSTRUCTION II (6)  CSU
Lecture:  3 hour(s)
Lab:  9 hour(s)
The course focuses on principles of estimating, quantity take off, materials and labor costs, bidding procedures, for new construction, renovation for both residential and commercial construction.
Student Learning Outcomes:
Students calculate construction materials, labor and business costs for a residential structure from a set of plans.

CRPNTRY 129  BASIC RESIDENTIAL ESTIMATING (2)  CSU
Lab:  6 hour(s)
This course introduces the process of construction estimation. Students will learn the estimation process of individual systems as well as the whole structure. Students complete building data sheets and materials price sheet. They will gain experience through a complete materials estimate of a structure.
Student Learning Outcomes:
Students complete a material take off for a construction project from blueprints.

CRPNTRY 130  CALCULATIONS AND MEASUREMENT FOR WOODWORKING STUDENTS II (3)  CSU
Lecture:  3 hour(s)
Students complete common woodworking and construction calculations with an emphasis on percentage, area and volume calculations, algebra, geometry and trigonometry as they apply to the carpentry and woodworking trades. Students calculate concrete volume, lumber requirements and material quantities, as well as perform length and size calculations.
Student Learning Outcomes:
Students complete a comprehensive estimate for a residential construction project. Students will be major component of the course.

CRPNTRY 132  APPLIED BLUEPRINT READING (3)  CSU
Lecture:  1 hour(s)
Lab:  6 hour(s)
This course focuses on construction documents used in the construction of residential and light commercial projects. Emphasis is placed on the interpretation of drawings, standards, specifications, and symbols used in construction. Gathering information for material requirements and estimates will be major component of the course.
Student Learning Outcomes:
Students will highlight and detail the foundation, floor and framing plans according to the shear panel schedule, then index and tape plans according to instructions.

CRPNTRY 133  ADVANCED RESIDENTIAL ESTIMATING (3)  CSU
Lecture:  3 hour(s)
Students complete a comprehensive residential estimation project including materials, labor, overhead costs and expenses. Students perform materials take off using detailed and unit methods. Students estimate concrete and rebar requirements, lumber needs for floor, wall and roof construction as well as interior and exterior finishing materials. Labor costs are also calculated for common construction jobs. At the end of the course students will complete a comprehensive estimate for a residential construction project.
Student Learning Outcomes:
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 134  ADVANCED RESIDENTIAL CONSTRUCTION (4)  CSU
Lecture:  2.5 hour(s)
Lab:  4.5 hour(s)
This course is a continuation of Basic Construction. Students will complete framing operations involving floor, wall, ceiling and roof construction. In addition, this course goes into greater depth in the areas of rough in for the preparation of electrical, plumbing, heating and ventilation. Student Learning Outcomes: Students will detail wall plates off architectural plans that includes layout for all holdowns, posts, windows, doors, channels, shear panels, studs and anchor bolts.

CRPNTRY 135  CONCRETE CONSTRUCTION (2)  CSU
Lecture:  1 hour(s)
Lab:  3 hour(s)
Students explore and experience concrete concepts and forming. Emphasis will be placed on slab on grade forms and construction and stem forming. Students will use leveling instruments to square, level and layout buildings and forms.
Student Learning Outcomes:

CRPNTRY 144  RESIDENTIAL EXTERIOR FINISH (4)  CSU
Lecture:  1 hour(s)
Lab:  9 hour(s)
In this course, students will learn the tools, techniques, and principles of residential exterior finish. Students will install exterior finish materials such as siding, stucco and shingles. An emphasis will be placed on installation of roofing materials such as asphalt shingles.
CRPNTRY 145 RESIDENTIAL INTERIOR FINISH (5) CSU
Lecture: 2 hour(s)
Lab: 3 hour(s)
The course will focus on the materials, practices, and principles of interior finish work for residential construction. Emphasis will be placed on drywall installation and finishing, installation of interior door, installation of door hardware. Students will also install door and window casing, baseboard, and crown molding. Stair layout and construction will also be reviewed.
Student Learning Outcomes:
Students complete door installation including the installation of lock set, casing, weatherstripping, threshold and door shoe.

CRPNTRY 148 COMPUTER ASSISTED ESTIMATING I (3) CSU
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
Students receive instruction in using specialized software to generate 2D and 3D plans for residential construction. Emphasis will be placed on using the developed plans to generate estimation information including material and cut lists.
Student Learning Outcomes:
Students create a complete set of building documents including material lists.

CRPNTRY 149 COMPUTER ASSISTED ESTIMATING II (3) CSU
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course includes instruction in advanced computer assisted estimating techniques. Students will learn to make design projects with emphasis on material applications, structural design, framing lumber, concrete reinforcement, producing a cost break down and bidding procedures.
Student Learning Outcomes:
Students prepare complete cost estimates using software, including cost of materials and labor from outside sources.

CRPNTRY 170 INTRODUCTION TO CNC WOODWORKING MACHINING AND PROGRAMMING (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course presents an introduction to the use of a CNC router. Topics include safety, feed speeds, spindle speeds, tooling, setups and programming to include related attachments and accessories for the machine.
Student Learning Outcomes:
1. Create a name plate with the CNC Router using MaterCam.

CRPNTRY 185 DIRECTED STUDY CARPENTRY (1) CSU RPT2
Lecture: 1 hour(s)
This course allows students to pursue directed study in Carpentry on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one carpentry course to take this class.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a project based on a topic in Carpentry and related topics.

CRPNTRY 240 BUILDING CONSTRUCTION SPECIALTIES (4) CSU
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
This course is a continuation of Basic Construction. Students will complete framing operations involving floor, wall, ceiling and roof construction. In addition, this course includes greater depth in the areas of rough in for the preparation of electrical, plumbing, heating and ventilation.
Student Learning Outcomes:
Students will detail wall plates off architectural plans that includes layout for all holdowns, posts, windows, doors, channels, shear panels, studs and anchor bolts.

CRPNTRY 241 BLUEPRINT READING AND ESTIMATING (3) CSU
Lecture: 3 hour(s)
Students will learn blueprint reading through the process of estimation. Material take offs, detail methods, labor calculations, profit, overhead and bid procedures will be examined.
Student Learning Outcomes:
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 243 BUILDING ESTIMATING I (3) CSU
Lecture: 3 hour(s)
This course introduces the process of construction estimation. Students will learn the estimation process of individual systems as well as the whole structure. Students complete building data sheets and materials price sheet. They will gain experience through a complete materials estimate of a structure.
Student Learning Outcomes:
Students complete a material take off for a construction project from blueprints.

CRPNTRY 247 BUILDING ESTIMATING II (3) CSU
Lecture: 3 hour(s)
Students complete a comprehensive residential estimation project including materials, labor, overhead and costs and expenses. Students perform materials take off using detailed and unit methods. Students estimate concrete and rebar requirements, lumber needs for floor, wall and roof construction as well as interior and exterior finishing materials. Labor costs are also calculated for common construction jobs. At the end of the course students will complete a comprehensive estimate for a residential construction project.
Student Learning Outcomes:
Prepare a takeoff estimate of materials using a set of architectural plans.

CRPNTRY 251 BUILDING CODES 1: INTERNATIONAL RESIDENTIAL CODE (IRC) (3) CSU RPT1
Lecture: 3 hour(s)
This class will examine the most current version of the International Residential Code. Topics will include administration and planning, and the structure, logic and layout of the code. It will then take up relevant code sections for all phases of residential construction. Namely, foundation, floor, wall, roof/ceiling, electrical, plumbing and mechanical, lighting distribution and fixtures, appliance installation and swimming pools. Study materials will be aligned with the most current ICC publications. Student Learning Outcomes: Student will provide the code section and installation locations for smoke detectors.

CRPNTRY 252 BUILDING CODES 2: INTERNATIONAL BUILDING CODE (3) CSU RPT1
Lecture: 3 hour(s)
This course provides the most updated international building codes. Topics to be covered are Administration, Use and Occupancy Classifications, types of Construction, General Heights and Areas, Fire and Smoke Protection features and Systems, Means of Egress, Accessibility, Detailed Occupancy Requirements, Exterior Wall Coverings, Roofs, and Foundations, Special Inspections, Concrete, Masonry and Wood, Interior Finishes, Interior Environment, Gypsum Board, Elevators, and Glazing.
CHEM T 111 APPLIED CHEMISTRY I (5) CSU

Lecture: 3 hour(s)
Lab: 6 hour(s)
This course is dedicated to the study of principles and concepts of chemistry, including atomic theory, chemical bonding, gases, chemical equilibrium, acids and bases, nuclear chemistry, and introduction to organic chemistry. Laboratory studies include qualitative and quantitative analysis of common anions and cations and introduction to instrumental analysis.

Student Learning Outcomes:
Students will be able to use the concept of modern atomic theory (in particular, quantum theory) to explain chemical behavior.

CHEM T 131 INDUSTRIAL PROCESSES (3)

Lecture: 1 hour(s)
Lab: 6 hour(s)
Instruction is given in the fundamental theories of chemical and physical processes used in various manufacturing industries. Also, instruction is given in operation of equipment used in these physical and chemical processes.

Student Learning Outcomes:
1. Apply GLP and GMP techniques. 2. Perform the synthesis of lab samples. 3. Analyze unknown lab samples. 4. Perform and evaluate all lab procedures in a final team project. 5. Apply computer applications necessary for data acquisitions.

CHEM T 132 QUANTITATIVE AND INSTRUMENTAL ANALYSIS I (5)

Lecture: 3 hour(s)
Lab: 6 hour(s)
This course is dedicated to the study of principles and concepts of Quantitative and Instrumental methods of analysis including techniques using gravimetric and titrimetric analysis. Instrumental analysis such as, Gas Chromatography, Infrared Chromatography, Atomic Absorption and others are offered.

Student Learning Outcomes:
1. Apply GLP and techniques, perform the synthesis of lab samples, analyze unknown lab samples.

CHEM T 133 ORGANIC CHEMISTRY I (4)

Lecture: 2 hour(s)
Lab: 6 hour(s)
This course includes systematic study of hydrocarbons including nomenclature, physical and chemical properties, occurrences, synthesis,
and reactions of alkanes, alkenes, and alkynes. Laboratory studies include distillations, liquid liquid extractions, and chromatographic techniques and OH spectroscopy.

Student Learning Outcomes:
The student will be able to recognize and name aliphatic hydrocarbons applying the IUPAC nomenclature rules.

CHEM T 140 MICROBIOLOGY LABORATORY TECHNIQUES FOR TECHNICIANS (1)
Lab: 3 hour(s)
This course studies techniques and procedures used regularly in microbiology laboratories. It includes laboratory safety and aseptic techniques, media preparation, handling and maintaining cultures and the use and care of lab equipment, especially microscopes. The course is designed specifically for chemical, process and biomanufacturing technicians.

Student Learning Outcomes:
1. Demonstrate knowledge of lab safety techniques and standards and use them appropriately in the laboratory. 2. Isolate and transfer pure cultures of bacteria under aseptic conditions. 3. Demonstrate knowledge of bacteria and fungi commonly found microbiology laboratories. 4. Prepare and observe under brightfield microscope stained bacterial smear. 5. Determine bacterial population density using standard plate count and turbidimetric techniques. 6. Prepare different types of liquid and solid culture media.
7. Prepare and properly store stock bacterial cultures. 8. Evaluate effects of physical and chemical agents on microbial growth. 9. Identify the scientific name of an unknown pure cultures of microbe using standard microbiological techniques.

CHEM T 141 BASIC EMPLOYMENT INFORMATION (1)
Lecture: 1 hour(s)
Instruction covers safety precautions, professional ethics, health habits, responsibilities to the customer and management, personal appearance, employment trends and professional organizations. The course also includes writing resources and cover letters, and job search techniques.

Student Learning Outcomes:
1. Student will compose a resume using current employment formats. 2. Student will construct a cover letter and thank you note. 3. Student will demonstrate the ability successfully interview for an employment opportunity. 4. Student will create and present power point presentations covering employment criteria.

CHEM T 142 QUANTITATIVE AND INSTRUMENTAL ANALYSIS II (5)
Lecture: 3 hour(s)
Lab: 6 hour(s)
This course is a continuation of Quantitative and Instrumental Analysis I. It is an advanced course covering the theory and application of modern instrumentation and techniques for the analysis of chemical systems such as fuels, waste water, food and beverages, pharmaceuticals, metal etc. It also includes interpretative spectroscopy and computer assigned experimentation.

Student Learning Outcomes:
1. Apply GLP and techniques. 2. Perform the synthesis of lab samples. 3. Analyze unknown lab samples. 4. Evaluate basic flowcharts in instrumentation. 5. Evaluate and quantify the sample composition and concentration.

CHEM T 143 ORGANIC CHEMISTRY II (4) CSU
Lecture: 2 hour(s)
Lab: 6 hour(s)
This course addresses IUPAC nomenclature, physical and chemical properties, occurrences, synthesis, reactions and industrial applications of aldehydes and ketones, alcohols, ethers including cyclic and crown ethers, aromatic compounds, esters, amino acids, peptides, proteins, carbohydrates, synthetic and natural polymers, polarimetry, OH, UV/VIS, NMR spectroscopy, and mass spectrometry.

Student Learning Outcomes:
The student will be able to elucidate the structure of complex organic molecules by analyzing and interpreting the nmr spectrum of such compounds.

CHEM T 161 SPECIAL PROJECTS I (1)
Lab: 3 hour(s)
This course addresses the principles and instrumentation of gas chromatography (GC) with particular reference to Shimadzu GC 8A gas chromatograph.

Student Learning Outcomes:
The student will be able to perform distillation analysis of ethyl acetate and n-butyl acetate mixture using the GC 8A gas chromatograph.

CHEM T 162 SPECIAL PROJECTS II (2)
Lab: 6 hour(s)
This is a course in which the student specializes in a particular laboratory instrument, device, or procedure.

Student Learning Outcomes:
Students will be able to calibrate the FT OH spectrometer and perform liquid and/or solid analysis by OH spectroscopy. Students will be able to standardize the lambda 35 UV/VIS spectrometer and perform liquid analysis by UV spectroscopy.

CHEM T 168 CHEMICAL QUALITY CONTROL I (2)
Lab: 6 hour(s)
This course provides Introduction to quantitative and qualitative analysis of common anions and cations in aqueous solution.

Student Learning Outcomes:
The student will be able to assign oxidation states to individual atoms in molecules and ions and balance redox equations under acidic and basic conditions.

CHEMISTRY

CHEM 051 FUNDAMENTALS OF CHEMISTRY I (5) UC/CSU
Lecture: 4 hour(s)
Lab: 3 hour(s)
Prerequisite: Mathematics 114 or Mathematics 115
This course with laboratory emphasizes the principles of inorganic chemistry and introduces elementary organic chemistry. It is planned primarily for health science majors, as a preparatory course for higher level chemistry courses, and for non science majors requiring a one semester course with laboratory. High school students may obtain both: high school and college credit for this course. UC/CSU systems limit Chem 51/Chem 65 credit to one course.

Student Learning Outcomes:
1. Students will apply basic chemistry concepts to solve problems using the scientific method: a) Categorize matter according to its physical state and according to its chemical composition b) Describe the atom in terms of subatomic particles and their properties c) Name inorganic compounds d) Classify, balance and perform calculations with chemical reactions e) Explain properties of matter in terms of electron configurations f) Calculate concentration of solutions g) Solve acid base, redox, and radioactivity problems h) Recognize simple organic compounds. 2. Students will perform quantitative experiments and relate experimental data to concepts learned in class.
CHEM 065  INTRODUCTORY GENERAL CHEMISTRY (4)  UC:CSU

Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Mathematics 114 or Mathematics 115

This course emphasizes basic inorganic chemistry concepts including composition of matter, families of compounds and chemical and physical changes leading the students to a better understanding of their environment. Students develop problem solving skills applying the scientific method and perform experiments to reinforce the material learned in class. It is planned primarily as a preparatory course for higher level chemistry courses, and for non-science majors requiring a one semester course with laboratory. High school students may obtain both: high school and college credit for this course. UC/CSU systems limit Chem 51/ Chem 65 credit to one course.

Student Learning Outcomes:
1. Students will apply basic chemistry concepts to solve problems using the scientific method: a) Categorize matter according to its physical state and according to its chemical composition b) Describe the atom in terms of subatomic particles and their properties c) Name inorganic compounds d) Classify, balance and perform calculations with chemical reactions e) Explain properties of matter in terms of electron configurations f) Calculate concentration of solutions g) Solve acid base, redox, and radioactivity problems h) Recognize simple organic compounds. 2. Students will perform quantitative experiments and relate experimental data to concepts learned in class.

CHEM 070  INTRODUCTORY ORGANIC AND BIOCHEMISTRY (4)  UC:CSU

Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Chemistry 51 or Chemistry 65 or Chemistry 101

This course studies the structure, physical properties and nomenclature of organic compounds and biomolecules. Simple chemical reactions are introduced. Students use physical and chemical properties of compounds to characterize them in the laboratory. It is strongly recommended to take this course before taking chemistry 211. This course provides credit towards the Associate of Sciences degree in Chemistry.

Student Learning Outcomes:
1. Students will name small organic compounds; hydrocarbons, alcohols, ethers, thiols, aldehydes, ketones, carboxylic acids, esters, amines and amides. 2. Students will describe the structure of small organic compounds. 3. Students will classify constitutional and stereoisomers. 4. Students will describe structure and identify physical and chemical properties of carbohydrates, lipids, proteins and nucleic acids. 5. Students will use the physical and chemical properties of compounds to characterize them in the laboratory.

CHEM 101  GENERAL CHEMISTRY I (5)  UC:CSU

Lecture: 3 hour(s)
Lab: 6 hour(s)
Prerequisite: Mathematics 125

This course presents the principles of chemistry, including modern atomic structure, chemical bonding, stoichiometry, gases, solids, liquids, descriptive inorganic chemistry, and introduces equilibrium and electrochemistry. The laboratory emphasizes the quantitative aspects of chemistry as an instrumentation. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Student Learning Outcomes:
1. Students will apply fundamental principles of chemistry to identify problems, propose solutions and demonstrate concepts: a) Students will use the Scientific method to solve problems using the proper units, precision and significant figures. b) Interpret the law of conservation of mass c) Calculate molar mass of compounds and molality of solutions d) Analyze atomic theory: subatomic particles and isotopes e) Translate a word equation into a chemical equation, balance it and use it for stoichiometric calculations. f) Analyze precipitation, acid base, oxidation reduction, equations g) Illustrate kinetic theory of ideal gases h) Analyze the units of energy and express a thermochemical equation i) Illustrate the concept of enthalpy and enthalpy change j) Use quantum numbers to define electrons. k) Illustrate the building up principle with the periodic table relating periodic properties to electron configuration. l) Describe ionic and covalent bonds m) Use Lewis formulas to illustrate the concepts of resonance, the octet rule and formal charge n) Relate bond lengths and bond orders to bond energies. o) Describe phase diagrams and properties of the solid, liquid and gaseous states of matter and relate their properties to intermolecular forces. p) Express concentration of solutions and analyze colligative properties of solutions. 2. Students will perform experiments and draw conclusions from experimental data.

CHEM 102  GENERAL CHEMISTRY II (5)  UC:CSU

Lecture: 3 hour(s)
Lab: 6 hour(s)
Prerequisite: Chemistry 101

This course is a continuation of General Chemistry I. It includes detailed study of chemical equilibrium, kinetics, electrochemistry, nuclear and coordination chemistries. Quantitative and qualitative analysis and inorganic preparations are part of the laboratory. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences Degree in Chemistry.

Student Learning Outcomes:
1. Students will describe kinetic, thermodynamic and redox concepts for inorganic reactions and apply radioactive principles: a) Relate rates of reactions to mechanisms b) Evaluate rates of reactions and their dependence on concentration and temperature c) Illustrate and evaluate dynamic equilibrium and effect of catalysts the effect of catalysis c) Interpret the Arrhenius, Bronsted Lowry and Lewis concepts of acids and bases, analyze relative strength of acids and bases and relationship of molecular structure to acid strength d) Define and determine the pH of solutions e) Describe and analyze acid base equilibria f) Assess the properties of salt solution and buffer solutions and perform acid base titrations f) Define the solubility product Ksp and apply it to calculate solubility of compounds g) State the first, second and third laws of thermodynamics and perform calculations for phase transitions and chemical changes h) Relate free energy to equilibrium constants and temperature i) Balance redox reactions and illustrate their applications. j) Define radioactivity, formulate nuclear equations and evaluate nuclear stability k) Identify, describe and interpret the properties of main group elements, transition elements and coordination compounds. 2. Students will perform experiments to illustrate these concepts following safety practices in the laboratory.

CHEM 185  DIRECTED STUDY CHEMISTRY (1)  RPT2

Lecture: 1 hour(s)

This course allows students to pursue directed study in Chemistry on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The student will formulate a research project based on a specific chemistry topic, interpret the current chemical research literature on that topic and write a report about it.

CHEM 211  ORGANIC CHEMISTRY FOR SCIENCE MAJORS I (5)  UC:CSU

Lecture: 3 hour(s)
Lab: 6 hour(s)
Prerequisite: Chemistry 102

Structure, dynamics, equilibrium and nomenclature of organic compounds including conformational analysis, potential energy plots, hybridization, reaction mechanisms and molecular modeling. Students employ modern synthetic and chromatographic techniques. Guest speakers enhance the topics covered in class. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Student Learning Outcomes:
1. Students will describe structure dynamics and equilibrium of organic compounds i.e Hydrocarbons, haloalkanes, alcohols, thiols, ethers, sulfides and epoxides: a) Describe bonding and structure of functional groups in organic compounds. b) Name them according to the IUPAC system. c) Relate their physical properties to structure. d) Inspect conformations of alkanes and cycloalkanes. e) Describe chirality, optical activity and inspect properties of stereoisomers. f) Evaluate acidity of organic compounds and illustrate the thermochromy of acid base reactions. g) Describe preparation and reactions of organic compounds including mechanisms,
COURSE DESCRIPTIONS

CHEM 221H  ORGANIC CHEMISTRY FOR SCIENCE MAJORS I
HONORS (5) UC:CSU
Lecture:  3 hour(s)
Lab:  6 hour(s)
Prerequisite: Chemistry 102
Structure, dynamics, equilibrium and nomenclature of organic compounds including conformational analysis, potential energy plots, hybridization, reaction mechanisms and molecular modeling. Students employ modern synthetic and chromatographic techniques. Guest speakers enhance the topics covered in class. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry. Honors students will be assigned extensive reading and research assignments beyond the regular chemistry 211 course.

Student Learning Outcomes:
1. Students will describe structure dynamics and equilibrium of organic compounds i.e. Hydrocarbons, haloalkanes, alcohols, thiols, ethers, sulfides and epoxides: a) Describe bonding and structure of functional groups in organic compounds. b) Name them according to the IUPAC system. c) Relate their physical properties to structure. d) Inspect conformations of alkanes and cycloalkanes. e) Describe chirality, optical activity and inspect properties of stereoisomers. f) Evaluate acidity of organic compounds and illustrate the thermochemistry of acid base reactions. g) Describe preparation and reactions of organic compounds including mechanisms, reaction intermediates and potential energy diagrams. h) Employ multi step organic synthesis and retrosynthesis to produce the functional groups learned in class. 2. Students will employ modern synthetic and chromatographic techniques to characterize organic synthesis.

CHEM 212  ORGANIC CHEMISTRY FOR SCIENCE MAJORS II (5)
UC:CSU
Lecture:  3 hour(s)
Lab:  6 hour(s)
Prerequisite: Chemistry 211
Continuing studies of organic molecules started in chemistry 211 with emphasis on carbonyl containing compounds, macromolecules and naturally occurring nitrogen and oxygen containing compounds. Non covalent interactions and catalyst. A mechanistic approach to reactions and a focus on multi step synthesis is emphasized throughout the course. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Student Learning Outcomes:
1. Students will describe structure dynamics and equilibrium of organic compounds; organolithium, organonitrile compounds, diorganocopper reagent, carbenes, carbocarbons, aldehydes, ketones, carboxylic acids, derivatives of carboxylic acids, dienes, amines and benzene as well as other aromatic compounds: a) Describe bonding and structure of the functional groups in organic compounds. b) Name according to the IUPAC system. c) Relate physical properties to structure and inspect chirality. d) Apply spectroscopic techniques to characterize organic compounds. e) Describe preparation and reactions of organic compounds including mechanisms, reaction intermediates and potential energy diagrams. f) Examine stability of organic compounds g) Employ multi step organic synthesis and retrosynthesis to produce the functional groups learned in class. 2. Students will employ modern synthetic, chromatographic and spectroscopic techniques to prepare and characterize them. 3. Students will perform multi step synthesis and draw conclusions form experimental data.

CHEM 221  BIOCHEMISTRY FOR SCIENCE MAJORS (5) UC:CSU
Lecture:  3 hour(s)
Lab:  6 hour(s)
Prerequisite: Chemistry 211
This course introduces structure, thermodynamics and metabolism of biologically important molecules. Students use modern techniques for purification, structure and function characterization including chromatography, gel electrophoresis, spectroscopy and molecular modeling. This course is part of the transfer sequence for careers in the physical biological and health sciences and a requirement for the Associate of Sciences degree in Chemistry: Concentration biochemistry.

Student Learning Outcomes:
1. Students will describe structure, thermodynamics and metabolism of biologically important molecules: a) Describe the connections of thermodynamics and life. b) Analyze acid base titration curves and describe buffer systems. c) Interprets characteristics of amino acids in terms of structure. d) Assess how the structure of proteins determine their function and illustrate the thermodynamics of protein folding. e) Describe methods for protein isolation and characterization. f) Illustrate the differences between kinetic and thermodynamically aspects of reactions. g) Describe enzyme kinetics in mathematical terms. h) Assess the models for kinetic behavior of enzymes. i) Relate events at the active site to reaction mechanisms. j) Describe lipids and related molecules to illustrate models of membrane structure and their function. k) Describe levels of structure in nucleic acids and the flow of genetic information in the cell. m) Describe techniques for nucleic acid research. n) Formulate ways to study DNA protein interaction and use bioinformatics to study genomics and proteomics. o) Assess the thermodynamics of metabolism.

CHEM 221H  BIOCHEMISTRY FOR SCIENCE MAJORS (5) UC:CSU
Lecture:  3 hour(s)
Lab:  6 hour(s)
Prerequisite: Chemistry 211
This course introduces structure, thermodynamics and metabolism of biologically important molecules. Students use modern techniques for purification, structure and function characterization including chromatography, gel electrophoresis, spectroscopy and molecular modeling. This course is part of the transfer sequence for careers in the physical biological and health sciences and a requirement for the Associate of Sciences degree in Chemistry: Concentration biochemistry. Honors students will be assigned extensive reading and research assignments beyond the regular chemistry 221 course.

Student Learning Outcomes:
1. Students will describe structure, thermodynamics and metabolism of biologically important molecules: a) Describe the connections of thermodynamics and life. b) Analyze acid base titration curves and describe buffer systems. c) Interprets characteristics of amino acids in terms of structure. d) Assess how the structure of proteins determine their function and illustrate the thermodynamics of protein folding. e) Describe methods for protein isolation and characterization. f) Illustrate the differences between kinetic and thermodynamically aspects of reactions. g) Describe enzyme kinetics in mathematical terms. h) Assess the models for kinetic behavior of enzymes. i) Relate events at the active site to reaction mechanisms. j) Describe lipids and related molecules to illustrate models of membrane structure and their function. k) Describe levels of structure in nucleic acids and the flow of genetic information in the cell. m) Describe techniques for nucleic acid research. n) Formulate ways to study DNA protein interaction and use bioinformatics to study genomics and proteomics. o) Assess the thermodynamics of metabolism.

CHEM 285  DIRECTED STUDY/ CHEMISTRY (2)
Lecture:  2 hour(s)
This course allows students to pursue directed study in Chemistry on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The student will formulate a research project based on a specific chemistry topic, interpret the current chemical research literature on that topic and write a report about it.

CHEM 385 DIRECTED STUDY CHEMISTRY (3) RPT2
Lecture: 3 hour(s)
This course allows students to pursue directed study in Chemistry on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The student will formulate a research project based on a specific chemistry topic, interpret the current chemical research literature on that topic and write a report about it.

CHILD DEVELOPMENT

CH DEV 001 CHILD GROWTH AND DEVELOPMENT (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course examines the major physical, psychosocial, and cognitive/ language developmental milestones for children, both typical and atypical, from conception through adolescence. There will be an emphasis on interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methodologies, students will observe children, evaluate individual differences and analyze characteristics of development at various stages.

Student Learning Outcomes:
1. Analyze major developmental milestones for children from conception through adolescence in the developmental domains and compare and contrast various theoretical frameworks that relate to the study of human development.
2. Examine the effects that social context have on children’s development. These include but are not limited to cultural, economic, political, historical factors. 3. Differentiate between various theories that are related to children’s development.
4. Collect research data using child observations, surveys, and/or interviews and analyze information according to various developmental theories.
5. Compare and contrast typical and atypical developmental characteristics at each stage.
6. Discuss the impacts that interaction between genetic and social/environmental factors has on young children’s development in physical, cognitive, and socio-emotional domains.

CH DEV 002 EARLY CHILDHOOD: PRINCIPLES AND PRACTICES (3) CSU
Lecture: 3 hour(s)
Prerequisite: Child Development 1
An examination of the underlying theoretical principles of developmentally appropriate practices applied to programs, environments, emphasizing the key role of relationships, constructive adult-child interactions, and teaching strategies in supporting physical, social, creative and intellectual development for all children. This course includes a review of the historical roots of early childhood programs and the evolution of the professional practices promoting advocacy, ethics and professional identity.

Student Learning Outcomes:
1. Articulate the best teaching and care practices in ECE field and the history of education, methods of delivery systems, various program types, philosophies, and ethical standards.
2. Develop a personal philosophy of teaching from a professional point of view based upon theoretical perspective.
3. Evaluate ECE settings, curriculum, and teaching strategies using indicators of quality early childhood practice that support all children and their families.
4. Discuss the value of play as a tool for developing skills, knowledge, dispositions, and strengthening relationships among young children.
5. Compare and contrast a variety of guidance and interactions strategies to increase children’s social competence and promote a caring and responsive classroom community.
6. Analyze the correlation between observation, planning, implementation, and assessment in developing effective strategies and positive environment for learning and development.

CH DEV 007 INTRODUCTION TO CURRICULUM IN EARLY CHILDHOOD EDUCATION (3) CSU
Lecture: 3 hour(s)
Prerequisite: Child Development 1; Child Development 2
This course presents an overview of knowledge and skills related to providing appropriate curriculum and environments for young children from birth to age 6. Students will examine a teacher’s role in supporting development and engagement for all young children. This course provides strategies for developmentally appropriate practice based on observation and assessments across the curriculum, including 1) academic content areas, 2) play, art, and creativity, and 3) development of social emotional, communication, and cognitive skills.

Student Learning Outcomes:
Students will be able to:
1. Investigate and apply developmentally appropriate principles and learning strategies to positively influence all young children’s development and acquisition of knowledge and skills.
2. Evaluate the teachers’ role in providing best and promising practices in early childhood programs.
3. Compare and contrast play based curriculum that supports children’s cognitive, language, creative, physical, and socioemotional development.
4. Design and implement curriculum based on observation and assessment to support play and learning using developmental, inclusive and anti-bias principles in collaboration with families to support all children.

CH DEV 008 CURRICULUM IN EARLY CHILDHOOD EDUCATION (3) CSU
Lecture: 3 hour(s)
Prerequisite: Child Development 1; Child Development 2 and Child Development 7
Students design and evaluate developmentally appropriate curriculum and environments for young children from birth to age 8. Based on the value of play, students demonstrate the teacher’s role in applying theory to practice in supporting children’s concept development. Preparing and assessing the implementation of curriculum will include but not be limited to: language and literacy, social studies, art and creativity, music and rhythm, perceptual motor development, mathematics, natural and physical sciences.

Student Learning Outcomes:
1. Demonstrate and design the active implementation of an integrated curriculum.

CH DEV 010 HEALTH, SAFETY AND NUTRITION (3) CSU
Lecture: 3 hour(s)
Advisory: English 21
This course introduces the laws, regulations, standards, policies and procedures and early childhood curriculum related to child health, safety, and nutrition. The key components that ensure physical health, mental health and safety for both children and staff will be identified along with the importance of collaboration with families and health professionals. This course also focuses on integrating the concepts into everyday planning and program development for all children. Students are required to participate in and pass the American Red Cross Infant/Child CPR and First Aid course.

Student Learning Outcomes:
1. Develop strategies to promote the mental and physical health of children and adults in a culturally and developmentally appropriate environment.
2. Demonstrate the understanding of risk factors in children’s program that affects children’s health and safety.
3. Analyze and identify the nutritional needs of children at different developmental stages.
4. Explain the interrelationship of health, safety and nutrition and its connection to development.
5. Evaluate regulations, standards, and policies and procedures related to health, safety, and nutrition in support of young children, teachers and families; as well as identify the health, safety and environmental risks in children’s programs.
6. Identify the required health and safety components in a quality early childhood program and the importance of collaboration with families and the community.
CH DEV 011 CHILD, FAMILY AND COMMUNITY (3) CSU
Lecture: 3 hour(s)
Advisory: English 21

An examination of the developing child in a societal context focusing on the interrelationships of family, school and community and emphasizes historical and sociocultural factors. The processes of socialization and identity development will be highlighted, showing the importance of respectful, reciprocal relationships that support and empower families.

Student Learning Outcomes:
1. Identify the major socializing agents and analyze the impact of home, school, peers, media and community on a child’s development. 2. Examine the American educational and political policies and socioeconomic system as to how these factors affect both the development and interactions of children and their families. 3. Demonstrate understanding of research on social changes, transitions and challenges that confront children, families, schools and communities. 4. Compare and contrast strategies that involve all family members to develop respectful and equal relationships with their children and enhance their children’s development and learning. 5. Inspect community resources and agencies that are available to assist children, families, and community. 6. Examine one’s own self identity, values, beliefs, and goals as related to family history, cultural backgrounds, and life experiences, and evaluate the effects of these factors have on children’s relationships with families.

CH DEV 022 PRACTICUM IN CHILD DEVELOPMENT I (4) CSU
Lecture: 2 hour(s)
Lab: 6 hour(s)
Prerequisite: Child Development 1; and Child Development 2 and Child Development 7 and Child Development 8; Child Development 11

In this course the student will practice and demonstrate developmentally appropriate early childhood program planning and teaching competencies under the supervision of ECE/CD faculty and other qualified early education professionals. Students will utilize practical classroom experiences to make connections between theory and practice, develop professional behaviors, and build a comprehensive understanding of children and families. Child centered, play oriented approaches to teaching, learning, and assessment; and knowledge of curriculum content areas will be emphasized as student teachers design, implement and evaluate experiences that promote positive development and learning for all young children.

Student Learning Outcomes:
1. Integrate understandings of children’s characteristics and needs to develop healthy, safe, respectful, supportive and challenging learning environments for all children. 2. Evaluate the effectiveness of an early childhood environment, curriculum, parent involvement, and teaching strategies to improve teaching practices for all children. 3. Utilize the observation and assessment outcomes to design, implement, and evaluate curriculum activities and daily routines. 4. Demonstrate the abilities to apply a variety of effective approaches, strategies and techniques that support positive relationships with children and adults. 5. Critically reflect one’s own teaching experiences to guide and improve collaborative practice.

CH DEV 023 PRACTICUM IN CHILD DEVELOPMENT II (4) CSU
Lecture: 2 hour(s)
Lab: 6 hour(s)
Prerequisite: Child Development 22

This course provides an advanced practicum experience. Students apply assessment strategies to plan, implement, and evaluate developmentally appropriate activities. Techniques that promote partnerships between teachers and families are developed. Educational philosophy statement, a resume and a professional portfolio are created. State law requires a TB test (Mantoux Test) or chest x ray. In addition to the seminar class, students are required to complete a minimum of 90 hours at an APPROVED field site.

Student Learning Outcomes:
1. Design, implement and evaluate curriculum activities based on observation and assessment of young children. 2. Apply a wide array of effective approaches, strategies and tools in developing relationships with children and colleagues. 3. Evaluate how teachers involve families in their children’s development and learning. 4. Critically assess one’s own teaching experiences to guide and inform practice.

CH DEV 030 INFANT AND TODDLER STUDIES I (3) CSU
Lecture: 3 hour(s)
Prerequisites: Child Development 1

This course provides an in-depth study of cognitive/language, social/ emotional and perceptual/motor developmental domains and milestones of infants from birth to 36 months. As well as, an overview of major theories including attachment, brain development, the value of play, early intervention and relationship based care in the context of family systems: culture, home language, and traditions. Students will be introduced to the laws and regulations of safe healthy environments and the rights of all infants and toddlers including children at risk for disabilities. Class instruction includes objective observations of infants and toddlers in diverse settings.

Student Learning Outcomes:
Recognize major developmental milestones in infants and toddlers and explain the stages and characteristics of infants/toddlers’ physical, cognitive and social and emotional development.

CH DEV 031 INFANT AND TODDLER STUDIES II (3) CSU
Lecture: 3 hour(s)
Prerequisites: Child Development 1 and Child Development 30

This course implements the principles of inclusive, respectful care giving for infants and toddlers within a variety of program designs, routines and schedules. Topics cover typical and atypical development, principles of early intervention, design, implementation and assessment of developmentally appropriate curriculum and environment; health, safety and licensing issues. Coursework includes documentation of learning through observation, guidance towards self regulation, family communications and community resources. Current research within the context of home language, culture and traditions will be addressed.

Student Learning Outcomes:
Students will evaluate principles of respectful care focusing on routines and schedules.

CH DEV 034 OBSERVING AND RECORDING CHILDREN’S BEHAVIOR (3) CSU
Lecture: 3 hour(s)
Prerequisites: Child Development 1

This course focuses on the appropriate use of a variety of assessment and observation strategies to document child development, growth, behaviors, play and learning, and to join with families and professionals in promoting children’s success. Recording strategies, rating systems, portfolios, and multiple assessment tools are explored. Child observations will be conducted and analyzed.

Student Learning Outcomes:
1. Critically compare the purpose, value and use of formal and informal observation and assessment strategies and ethical implications within cultural and social contexts in early childhood settings. 2. Describe and evaluate the characteristics, strengths, and limitations of common observation methods and assessment tools with all children’s developmental, cultural and linguistic characteristics. 3. Demonstrate systematic observation methods to provide data to assess the impact of the environment, interactions and curriculum on all domains of children’s learning and development. 4. Assess the value of partnership with families and other professionals in utilizing interpretation of observational data to inform teaching responses and strategies. 5. Embed activities related to assessment within play-based environments, curriculum and care routines for typically and atypically developing children.

CH DEV 038 ADMINISTRATION & SUPERVISION OF EARLY CHILDHOOD PROGRAMS (3) CSU
Lecture: 3 hour(s)
Prerequisites: Child Development 1; Child Development 2; Child Development 10; Child Development 11

This course examines administrative principles and practices for Early Childhood Programs. Topics covered include: licensing regulations, leadership skills, budget preparation and analysis, personnel management, parent involvement programs and community resources. Professionalism and quality standards are emphasized. Partially fulfills licensing requirement for the director.
CH DEV 039  ADMINISTRATION & SUPERVISION OF EARLY CHILDHOOD PROGRAMS II (3) CSU

Lecture: 3 hour(s)
Prerequisite: Child Development 38

This course provides training for administrators of Early Childhood Programs on a variety of topics pertaining to administration of early childhood programs. Topics include: state and federal regulations, computer applications for administration, grant and proposal development, advocacy, leadership skills and team management techniques, developing a comprehensive parent partnership, working with Desired Results, and legal issues. This course partially fulfills the licensing requirement for the director. Student Learning Outcomes: Student will analyze his/her own administrative style and utilize management strategies that match individual’s leadership style, evaluate his/her own ability and develop a timeline for a personal and professional development plan. Formulate strategies to create a positive climate and motivate the staff.

CH DEV 042  TEACHING IN A DIVERSE SOCIETY (3) CSU

Lecture: 3 hour(s)
Corequisite: Child Development 11

This course will examine the development of social identities in diverse societies including theoretical and practical implications affecting young children, families, programs, teaching, education and schooling. Various classroom strategies will be explored emphasizing culturally relevant and linguistically appropriate anti bias approaches supporting all children in becoming competent members of a diverse society. Course includes examination on issues related to social identity, stereotypes and bias, social and educational access, media and schooling. Course also involves self reflection of one’s own understanding of educational principles in integrating anti goals in order to better inform teaching practices and/or program development.

Student Learning Outcomes:
1. Compare and contrast the identity developmental theories and discuss the various impacts on young children’s social identity.
2. Investigate different aspects of children’s experience as members of families targeted by social bias, considering the significant role of education in reinforcing or contradicting such experiences.
3. Critically assess the components of linguistically and culturally relevant, inclusive, age appropriate, anti bias approaches in promoting optimum learning and development.
4. Analyze the impact of personal experiences and social identity on teaching effectiveness in various social contexts.

CH DEV 044  EARLY INTERVENTION FOR CHILDREN WITH SPECIAL NEEDS (3) CSU

Lecture: 3 hour(s)
Prerequisite: Child Development 1

This course is designed for students interested in specializing in or working with young children with special needs and their families. Instruction focuses on accommodating and adapting the physical environment, instructional strategies and curriculum to meet the needs of differently able children from birth through preschool.

Student Learning Outcomes:
Students will be able to recognize the needs of a family with a young exceptional child and propose an intervention approach that is appropriate for their needs.

CH DEV 045  PROGRAMS FOR CHILDREN WITH SPECIAL NEEDS (3) CSU

Lecture: 3 hour(s)
Prerequisite: Child Development 1

This course is an overview of programs providing special education services for children with special needs focusing on preschool through school age.

It will include a study of various programs, legislation, characteristics of exceptionalities and educational implications. Observation in schools will be required.

Student Learning Outcomes:
Students will assess characteristics of a quality special education class/program and services necessary for children with special needs.

CH DEV 046  SCHOOL AGE PROGRAMS I (3) CSU

Lecture: 3 hour(s)
Prerequisite: Child Development 1

The students will be introduced to the care of school age children. This course is designed for those currently working, or planning to work in before and after school child care. Students will develop age appropriate curriculum, learn how to support the family and make use of community resources.

Student Learning Outcomes:
Students will compare diverse models of school age care to assess how programs meet the needs of school age children. They will apply their understanding of developmental needs by preparing curriculum activities to support children’s growth and development.

CH DEV 047  SCHOOL AGE PROGRAMS II (3) CSU

Lecture: 3 hour(s)
Prerequisite: Child Development 46

Introduction to before and after school age programs. Topics covered include guidance of child behavior, the child in context of the family, community and administration of programs. Hiring and supervision of staff, working with parents and marketing and advertising the school age program will be covered.

Student Learning Outcomes:
1. Upon successful completion of this course students will learn how to evaluate a quality school age program.

CH DEV 057  CHILDREN ETHNIC IDENTITY DEVELOPMENT AND AWARENESS (3) CSU

Lecture: 3 hour(s)
Prerequisite: Child Development 1
Advisory: English 28

This course explores children’s ethnic identity developmental process and their awareness of identity issues. Students will examine ethnic identity developmental stages, the impact of culture, ethnic traditions, values and beliefs on children, and the challenges of identity formation process that children encounter within multiple social and cultural contexts. Culturally sensitive assessment methods and intervention programs to support families from diverse backgrounds will also be discussed. Student Learning Outcomes: Students will be able to compare and contrast various theoretical frameworks that relate to the study of identity formation. Students will be able to apply various culturally sensitive strategies to teaching experiences.

CH DEV 065  ADULT SUPERVISION/EARLY CHILDHOOD MENTORING (2)

Lecture: 2 hour(s)
Corequisite: Child Development 23 or Child Development 39

The class focuses on the principles and practices of supervision and evaluation of staff in Early Childhood Programs. Emphasis is placed on the role of experienced teachers who mentor or supervise new teachers and student teachers. This meets supervision requirement for the Child Development Permit. Student Learning Outcomes: Students will be able to demonstrate ability to evaluate a preschool classroom based on developmentally appropriate guidelines and to facilitate positive interaction between adults in the center/classroom environment.
COMMUNITY PLANNING/ ECONOMIC DEVELOPMENT

COMPLAN 001  INTRODUCTION TO COMMUNITY ECONOMIC DEVELOPMENT (3) CSU
Lecture:  3 hour(s)
This course is an introduction to the theory, history, and practice of community development. The course covers: neighborhood development and community building strategies; land use and real estate development; and business and labor force development strategies used to revitalize urban neighborhoods. Students will produce a neighborhood plan using e-planning tools including: asset maps, a housing plan and a workforce development plan. The course is also offered as three modules that run concurrently with the full course.

Student Learning Outcomes:
1. Students will be able to develop a neighborhood plan and demonstrate research competency with the use of census data and other community based data sources to perform a socio-economic analysis and community building or organizing plan for a specific neighborhood.

COMPLAN 002  INTRODUCTION TO COMMUNITY ORGANIZING (3) CSU
Lecture:  3 hour(s)
This course focuses on community organizing efforts by people working together to improve their neighborhoods and cities. The course prepares students to become professional organizers, community developers, and effective citizen leaders. The course explores the history, theory, and different approaches to grassroots community organizing. Students will analyze the current context for organizing, the impact of social change theories, organizing strategies, tools and new methodologies used in community organizing.

Student Learning Outcomes:
1. Students will discuss the role of community organizing skills and techniques in electoral campaigns.

COMPLAN 003  AFFORDABLE HOUSING DEVELOPMENT (3) CSU
Lecture:  3 hour(s)
This is a required course for the community planning degree and certificate, as well as the urban real estate development certificate. Students formulate real estate development skills needed to develop multi-family affordable housing projects. Through project based learning and case studies, students acquire basic competencies in: stages of the affordable housing development process, project feasibility analyses, including neighborhood, site and financial analyses; sources and uses of financing; project management, marketing and operations.

Student Learning Outcomes:
1. Students will utilize the real estate development process, including project concepts, feasibility analysis, site control, predevelopment activities, and property management.

COMPLAN 004  SCHOOL BASED COMMUNITY DEVELOPMENT APPROACHES (3) CSU
Lecture:  3 hour(s)
A one semester course on critical community development issues in school reform in Los Angeles. Students will examine the relationship between school outcomes and community self-sufficiency. Students will be exposed to new models and cutting edge efforts for linking school reform to broader community development needs. The course will draw on student’s experiences, cutting edge policy research, and best practices in school reform organizing.

Student Learning Outcomes:
1. Students will compare and contrast the current state of public schools in low income communities of color to origins and historical evolution of public schools in the U.S.

COMPLAN 005  SECTOR DEVELOPMENT AND EMPLOYMENT STRATEGIES (3) CSU
Lecture:  3 hour(s)
This course will focus on how a strong understanding of industry sectors can be linked to viable job creation and employment strategies. Particular attention will be devoted to sector initiatives and training programs in the greater Los Angeles region.

Student Learning Outcomes:
To understand general economic principles and how marketplace dynamics determine employment and labor market patterns.

COMPLAN 006  MANAGING NON-PROFIT AND PUBLIC ORGANIZATIONS (3) CSU
Lecture:  3 hour(s)
This course deals with the organizational opportunities and challenges faced by directors and managers of non-profit and public service organizations. Students will gain an understanding of the roles and accountabilities of non-profit directors and managers and learn to work effectively within such organizations by recognizing and applying knowledge about different governance structures and the functional domains common to most public benefit organizations including strategic and operational planning, fund development and community engagement.

Student Learning Outcomes:
1. Students will be able to create an effective mission and vision statement for anew, burgeoning or existing non-profit organization through reflective individual and group processes, including: selecting the vision and mission statement writing team; identifying stakeholders; clarifying core values; generating alternatives options through four different approaches, including critical issues; news stories’ metaphors and pictures; and the desires for stakeholders; drafting the vision and mission statements; presenting the vision and mission statement to a larger body for review, modification and adoption.

COMPLAN 007  CONTEMPORARY ISSUES AND STRATEGIES IN POPULAR EDUCATION AND ORGANIZING (3) CSU
Lecture:  3 hour(s)
This course will explore current issues of land use, housing, workers’ rights, environmental justice and the fight for jobs in Los Angeles by utilizing field research and direct interaction with local non-profit organizations working to make change in these sectors.

Student Learning Outcomes:
1. Analyze and examine contemporary social justice issues. 2. Assess the current state of campaigns to impact the most urgent social justice issues and needs of communities of color in Los Angeles. 3. Formulate arguments to support the need for reform to support positive social change in communities of color in Los Angeles.
COMPLAN 009 COMMERCIAL REAL ESTATE DEVELOPMENT (3) CSU
Lecture: 3 hour(s)
Demonstrate how to develop commercial real estate projects with a specific focus on retail and inner city development. The introductory course builds skills and competencies in land development, development financing, marketing and leasing of small and mid-size commercial projects. Through case studies, simulations and project based learning, students recognize development strategies and tools used by public, private and non-profit organizations.
Student Learning Outcomes:
1. Students will identify and analyze various community development methods and strategies that address and prevent community violence.

COMPLAN 010 COMPREHENSIVE COMMUNITY VIOLENCE PREVENTION (3) CSU
Lecture: 3 hour(s)
The course prepares students for work in the field of community violence prevention. Students will learn to analyze root causes of youth and community violence and will become familiar with a variety of community development strategies to reverse those conditions. The course will also cover strategies for building community collaborations to engage youth, parents, community organizations, public sector agencies, schools, law enforcement agencies, and businesses in a comprehensive effort to prevent youth and community violence.
Student Learning Outcomes:
1. Students will employ current theoretical frameworks to examine complex and multiple root causes of violence.

COMPLAN 011 PROFESSIONAL DEVELOPMENT SKILLS/ISSUES IN COMMUNITY DEV (3) CSU
Lecture: 3 hour(s)
Students will learn to identify and understand a variety of personal, professional development strategies, writing and communication skills and industry networks/language used by professionals in community development corporations, community organizing networks and community based non-profit organizations.
Student Learning Outcomes:
Students will be able to develop their individual professional skills in the field of Community and Economic Development (i.e., power point presentations and oral communication, technical writing, time management, public speaking, work plan development and implementation and networking).

COMPLAN 018 CAREER AND EDUCATION EXPLORATION (3)
Lecture: 3 hour(s)
This course examines emerging careers by applying alternative, hands-on and field methods to facilitate student learning. Through the discourse, project based learning, field trips, and guest speakers. Students will be exposed to career and educational pathways available to them.
Student Learning Outcomes:
1. Students will differentiate between public service and social justice. 2. Compare and contrast between the work done within these two concepts and potential careers.

COMPLAN 022 STRATEGIC MEDIA AND COMMUNICATIONS FOR ORGANIZING (1) CSU
Lecture: 1 hour(s)
This course provides students with a basic understanding of community building principles, strategies and tools for community and economic development.
Student Learning Outcomes:
1. Students will examine the principles and application of Community Building procedures.

COMPLAN 030 MARKET RESEARCH TOOLS FOR THE ECONOMIC DEVELOPMENT PROFESSIONAL (3) RPT3
Lecture: 3 hour(s)
This course is specifically designed for professionals in community economic development organizations that provide technical assistance to small businesses. This hands-on course will provide professionals with the tools needed to assess client needs and develop and implement effective market research and marketing plans for small businesses. This is a hybrid course, utilizing a combination of in class and on line/web based instruction.
The content of this course is geared towards individuals with 2-3 years of professional experience and whose organizations provide assistance to small businesses.
Student Learning Outcomes:
1. Students will develop a tool for documenting the consulting meetings, decisions, and progress on the scope of work.

COMPLAN 032 COMMUNITY BUILDING PRINCIPLES AND STRATEGIES (1) RPT3
Lecture: 1 hour(s)
This course provides students with a basic understanding of community building principles, strategies and tools for community and economic development.
Student Learning Outcomes:
1. Students will identify and quantify community needs, assets and opportunities utilizing data research, social assessment surveys and small focus groups.

COMPLAN 033 COMMUNITY ENGAGEMENT PRINCIPLES AND STRATEGIES (1) RPT3
Lecture: 1 hour(s)
This course provides students with a basic understanding of community engagement principles, strategies and tools for community and economic development.
Student Learning Outcomes:
1. Students will examine the value and role of engaging community stakeholders in the process of Community Development.

COMPLAN 035 HEALTH LEADERSHIP AND COMMUNITY DEVELOPMENT (3) RPT3
Lecture: 3 hour(s)
This course provides students with a basic understanding of the health disparities and conditions affecting low income, inner city communities and the leadership skills required to improve them. Student Learning Outcomes:
1. Students will examine and articulate the health crisis in South Los Angeles. 2. Interpret and analyze health data and graphs.

COMPLAN 036 INTRODUCTION TO APPLIED COMMUNITY DEVELOPMENT RESEARCH (3) RPT1
Lecture: 3 hour(s)
This course provides students with a basic understanding of community based research principles, tools and strategies. The course is taught in a training/workshop format where students will work in small groups to apply classroom lessons to investigate local community issues, such as transportation, environment and economic health. Topics covered include participatory action research theory and methodology, history of Los Angeles, mobility issues in urban settings, sources and impacts of pollution and income and wealth inequality.
Student Learning Outcomes:
1. Students will identify major historical people and events that have had a lasting impact on the region.
COMPLAN 040  NON-PROFIT PROGRAM DESIGN AND DEVELOPMENT (2)  
Lecture:  2 hour(s)  
This course guides students to design a program and services that are highly integrated with an organization’s mission, vision and values. Topics included program goals, outcomes, strategies, and objectives. Students will also learn about service delivery, work plan creation, timeline and the similarities of program development with a business plan.  
Student Learning Outcomes:  
1. Students will be able to create a Logic Model as a tool to show how the program components and rationale of a non-profit program fit together.  

COMPLAN 042  SUSTAINING SOCIAL JUSTICE CAMPAIGN VICTORIES AND ORGANIZATION (1)  
Lecture:  1 hour(s)  
This course will introduce students to current models for sustaining a social justice organization including evaluating the non-profit, social entrepreneurship and self-help models to support community revitalization and empowerment.  
Student Learning Outcomes:  
1. Identify and compare three different types of social movement organizational models. 2. Compare and contrast the opportunities, challenges and successes of these models. 3. Identify funding and sustainability opportunities for various organizations fitting the various models.  

COMPLAN 050  PRACTICAL MULTI-FAMILY/APARTMENT MANAGER (3)  CSU  
Lecture:  3 hour(s)  
This course will provide students with an understanding of the necessary legal and practical aspects of apartment management, primarily focusing on building with 8+ units.  
Student Learning Outcomes:  
1. The student will be able to develop policies and procedures within fair housing guidelines to mitigate financial, legal and environmental risks to ownership.  

COMPLAN 100  HISTORY OF COMMUNITY DEVELOPMENT IN LOS ANGELES (2)  CSU  RPT2  
Lecture:  2 hour(s)  
The course explores the historic development of Los Angeles from the early settlements to the rise of industrialization, neighborhood development, demographic transitions and the intersection between race, class, politics and power. This course provides students with a critical analysis of how low income communities of color were developed as a result of economic disinvestment, de-industrialization, segregation, housing discrimination and local, state and federal policy.  
Student Learning Outcomes:  
Students will understand the movement of ethnic and racial populations in Los Angeles region. Students will understand equity issues and the impacts of economic development trends in Los Angeles on various communities. Students will demonstrate understanding of differences between communities in Los Angeles in relation to power, economics, and social infrastructure. Students will articulate the roles of different partners played in the redevelopment and strategies for improving the economic, political, social and environmental conditions in Los Angeles.  

COMPLAN 101  HISTORY OF SOCIAL JUSTICE MOVEMENT THEORY, IDEOLOGY AND PRACTICE IN AMERICA (2)  CSU  RPT2  
Lecture:  2 hour(s)  
The Course History of Social Justice Movement Theory, Ideology and Practice in America seeks to provide students with a comprehensive experience that reinforces key lessons from social movements based in the United States. From the beginnings of European colonization of the continent to contemporary issues of movement building, students will be challenged to closely analyze the guiding principles and work of key organizations that have fought for justice along racial, gender and multi issue lines. Furthermore, students will be challenged to transform their analysis into theories that they will apply to projects based upon current day problems. Combining theory with a project based curriculum, this course will provide students the opportunity to lift history from the pages of books and actively engage with it in creative and expanding ways.  
Student Learning Outcomes:  
1. Students will learn the correlations between capitalism in the U.S. and cultural domination. 2. Students will relate global political history and colonization to national and local impacts. 3. Students will learn the historical dynamics about developments of U.S. social movements. 4. Students will assess critique equity building concepts and practices.  

COMPLAN 102  CULTIVATING CONSCIOUSNESS: REFLECTION OF THE SELF IN COMMUNITY AS AN ORGANIZER (1)  RPT2  
Lecture:  1 hour(s)  
Cultivating Consciousness is a course intended to provide a space for community organizers to explore issues of race, class and privilege and its impact on the self and communities. Students will learn skills and knowledge related to group dynamics, sustainability, self analysis and macro and micro issues related to the role of community organizers.  
Student Learning Outcomes:  
1. Students will learn the correlations between capitalism in the United States and cultural domination. 2. Students will relate global political history and colonization to national and local impacts. 3. Students will learn the historical dynamics about developments of U.S. social movements. 4. Students will assess and critique equity building concepts and practices.  

COMPLAN 105  INTERNATIONAL MODELS OF COMMUNITY ORGANIZING (1)  
Lecture:  1 hour(s)  
Students will learn about international models of community organizing and the connection between local and international issues.  
Student Learning Outcomes:  
1. Understand the impact of globalization and neoliberalism on local and national systems and economies. 2. Illustrate the contribution of organizing efforts and the United Nations in rebuilding communities all over the world. 3. Distinguish between strategies, tools and systems in international organizing efforts.  

COMPLAN 106  ELECTIONS, COMMUNITY, POWER AND SYSTEMS REFORM IN COMMUNITY DEVELOPMENT (1)  
Lecture:  1 hour(s)  
Students will learn about local and national efforts for elections and systems reform for social change including evaluating successful electoral campaigns  
Student Learning Outcomes:  
1. Compare strengths and challenges in utilizing electoral and system reform campaigns especially in the state of California. 2. Analyze history of electoral campaigns and their impact on positive social change. 3. Identify key components of developing a successful movement building electoral campaign.  

Los Angeles Trade-Technical College  
2012-2013 GENERAL CATALOG
COMPUTER APPLICATIONS
OFFICE TECHNOLOGIES

CAOT 001  COMPUTER KEYBOARDING AND DOCUMENT
APPLICATIONS I (3)  CSU
Lecture: 2 hour(s)
Lab: 3 hour(s)
This is a beginning course designed to develop touch control of the keyboard and proper keyboarding techniques, using the microcomputer and printer, build basic speed and accuracy, and provide practice in applying these basic skills to the formatting of letters, tables, reports, and business forms using MS Word. The achievement of a speed of at least 30 words a minute for 5 minutes with no more than 5 errors is expected.
Student Learning Outcomes:
1. Students will demonstrate effective listening skills by transcribing professional business documents.
2. Students will compose a referral letter applying effective written communication techniques such as: proper grammar, word usage, correct spelling, and correct letter format, give well balanced and attractive appearance.

CAOT 002  COMPUTER KEYBOARDING AND DOCUMENT
APPLICATIONS II (3)  CSU
Lecture: 2 hour(s)
Lab: 3 hour(s)
This is an intermediate course designed to develop speed and accuracy and a review of computer keyboarding techniques. It also includes training in the production of letters, manuscripts, business forms, and legal documents using MS Word. An achievement of a speed of at least 40 words a minute for 5 minutes with no more than 5 errors is expected.
Student Learning Outcomes:
1. Students will create a Formal Report Project using advanced word processing commands and features.

CAOT 003  COMPUTER KEYBOARDING II (3)  CSU
Lecture: 2 hour(s)
Lab: 3 hour(s)
Prerequisite: CAOT 2
Develops production skills in using advanced features of Microsoft Word to create properly formatted business documents. Includes composition at keyboard, decision making, and timed production of letters, tables, and reports. Develops minimum speed at end of course of 50 wpm.
Student Learning Outcomes:
1. Students will produce business letters, tables, forms, reports, and news releases, legal and medical documents in business format using Microsoft Word.

CAOT 007  MACHINE TRANSCRIPTION (3)
Lecture: 2 hour(s)
Lab: 2 hour(s)
This course provides an opportunity for students to develop skill in voice transcriptions, related English skills, and general office routines.
Student Learning Outcomes:
1. Students will demonstrate effective listening skills by transcribing professional business documents.
2. Students will be able to create simple business report, block-style letters and proper keyboard techniques, using the microcomputer and a This is a beginning course designed to develop touch control of the keyboard and proper keyboarding techniques, using the microcomputer and printer, build basic speed and accuracy, and provide practice in applying these basic skills to the formatting of letters, tables, reports, and business forms using MS Word. The achievement of a speed of at least 30 words a minute for 5 minutes with no more than 5 errors is expected.
Student Learning Outcomes:
1. Students will demonstrate effective listening skills by transcribing professional business documents.
2. Students will compose a referral letter applying effective written communication techniques such as: proper grammar, word usage, correct spelling, and correct letter format, give well balanced and attractive appearance.

CAOT 020  MEDICAL OFFICE PROCEDURES (5)
Lecture: 5 hour(s)
Lab: 2 hour(s)
This course offers thorough training in the mechanics of English: spelling, grammar, punctuation, sentence structure, and word usage. It develops business vocabulary as well as the English skills necessary for business situations.
Student Learning Outcomes:
1. Students will use a dictionary to answer questions about spelling, vocabulary development and expansion.

CAOT 030  OFFICE PROCEDURES (3)  CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
The student is instructed in the development of attitudes and personality traits essential to successful office work. Training is received in office organization, duties of office workers, office problems and their solutions, receptionist and telephone techniques, processing written communication, administrative responsibility, and professional growth.
Student Learning Outcomes:
1. Students will apply knowledge in office procedures and techniques for entry level positions in business offices.

CAOT 031  BUSINESS ENGLISH (3)  CSU
Lecture: 3 hour(s)
This course offers thorough training in the mechanics of English: spelling, grammar, punctuation, sentence structure, and word usage. It develops business vocabulary as well as the English skills necessary for business situations.
Student Learning Outcomes:
1. Students will create a Formal Report Project using advanced word processing commands and features.

CAOT 033  RECORDS MANAGEMENT AND FILING (2)
Lecture: 1 hour(s)
Lab: 2 hour(s)
This course will provide an overview of the field of records management; alphabetic, subject, numeric, and geographic storage and retrieval systems; records management technology; and records control. Class includes records management theory using Microsoft Access.
Student Learning Outcomes:
1. The purpose of this quiz is to determine your ability to properly index and code and cross reference names of individuals, businesses, and governmental agencies using ARMA Rules 1-10.

CAOT 034  BUSINESS TERMINOLOGY (2)
Lecture: 2 hour(s)
Advisory: English 68
The course is designed to develop spelling ability and vocabulary enrichment with application for business use. It develops an understanding of common business and technology terms, as well as emphasizing vocabulary development and expansion.
Student Learning Outcomes:
1. Students will differentiate between similar words that sound alike but are spelled differently and have different meanings. Students will compose and edit text that correctly incorporate common business and technology terms as well as new general vocabulary. Students will understand common prefixes, suffixes, and roots, which will assist students in deciphering challenging words that are included in business courses.
CAOT 035  CONCEPTS IN INFORMATION SYSTEMS (3)
Lecture: 3 hour(s)
This course provides an introduction to the basic concepts of microcomputers and information systems with the notion of understanding computer components. Understanding computer components includes application software, system software, input/output devices, communications, files and databases.
Student Learning Outcomes:
Students will understand how to communicate by using web resources.
Students will understand how to operate system and application software.

CAOT 044  MEDICAL TERMINOLOGY (3)
CAOT 046  MEDICAL TRANSCRIPTION (3)
Lab:
Lecture:
This course develops skill in correct transcription procedures and in transcribing medical materials. Production typing of recorded material stressing terminology from medical reports, diagnoses, case histories, is included. Correct spelling of medical terms is stressed.
Student Learning Outcomes:
1. Students will be able to spell, pronounce, and define basic medical terms with 90 percent accuracy.

CAOT 064  COMPUTER APPLICATIONS AND OFFICE TECHNOLOGIES LABORATORY (1)  RPT3
Lab:
This course helps students develop competency in the subject areas taught in the Computer Application and Office Technologies disciplines. It is designed as an aid for students who need additional time and practice to increase their knowledge and skills in any computer applications and office technologies course.
Student Learning Outcomes:
Student will have the ability to complete all CAOT projects and assignments.

CAOT 082  MICROCOMPUTER SOFTWARE SURVEY IN THE OFFICE (3)  CSU
Lecture: 1 hour(s)
Lab: 4 hour(s)
This course is an introduction to office information systems and computer literacy by incorporating group discussions, research, and hands-on experience in a variety of Windows applications. The software used in this course includes word processing, spreadsheets, databases, communications, graphics and operating systems, scheduling, and the Internet.
Student Learning Outcomes:
Students will be able to create a resume with associated cover letter, envelope, and a web page with frames and themes. Students will be able to design and modify the structure of, create and add records to an Access database, and then to use it to generate reports.

CAOT 084  MICROCOMPUTER OFFICE APPLICATIONS: WORD PROCESSING (3)  CSU  RPT2
Lecture: 2 hour(s)
Lab: 3 hour(s)
Advisory: CAOT 1
This course provides instructions on Microsoft Word applications using basic and advanced commands to create, format, edit, save, and print documents including letters, tables, reports, and merge documents. The application also utilizes publishing features that includes creating newsletters, brochures, fliers, and resumes on the web and through cloud computing.
Student Learning Outcomes:
Students will demonstrate knowledge of word processing terminology and the comprehensive capabilities of Microsoft Word. Students will integrate word and excel by linking an excel worksheet to a word document using charts and edit link objects.

CAOT 085  MICROCOMPUTER OFFICE APPLICATIONS: SPREADSHEET (3)  CSU
Lecture: 1 hour(s)
Lab: 4 hour(s)
This course prepares students to apply practical business analysis concepts and techniques using the Microsoft Excel spreadsheet. Students learn to create professional and powerful worksheets with emphasis on What if analysis and business functions; complex problem solving; auditing, scenario manager; data validation; importing external data; Web queries; creating templates; consolidating workbooks and/or worksheets; goal seeking; and integration features. The business applications include those used by office employees, accountants, management, and marketing personnel.
Student Learning Outcomes:
Students will be able to calculate formulas on large worksheets.

CAOT 086  MICROCOMPUTER OFFICE APPLICATIONS: DATABASE (3)  CSU  RPT2
Lecture: 2 hour(s)
Lab: 3 hour(s)
This course provides instructions on office database applications using a relational database program, such as Microsoft Access. Covers records design, file creation and maintenance, and data manipulation and presentation. Emphasizes office applications such as records for personnel, inventory, and sales. Integrates a word processing program to produce automated mailings.
Student Learning Outcomes:
Students will create working databases using Access 2007 professional use. Students will produce queries by setting criteria in professional databases. Students acquire the ability to maintain databases for professional use.

CAOT 088  MICROCOMPUTER OFFICE APPLICATIONS: DESKTOP PUBLISHING (3)  CSU  RPT2
Lecture: 1 hour(s)
Lab: 4 hour(s)
This course provides hands-on training using a personal computer, a printer and desktop publishing software. Includes producing camera ready, near typeset quality publications, newsletters, tri fold brochures, business information sets, merging publication data, creating an interactive websites and linking and embedding objects.
Student Learning Outcomes:
Students will produce a variety of professional looking business publications, such as, newsletters, flyers, brochures, business cards, letterhead, event programs, and a wide range of other business documents.

CAOT 083  LEGAL DOCUMENT PRODUCTION (2)  CSU
Lecture: 2 hour(s)
Advisory: CAOT 84
This course prepares students to produce legal documents within the law firm setting, including briefs, memos, pleadings and all other legal documents. Recommended for paralegal students and required for legal administrative assistants.

Student Learning Outcomes:
Students will have the ability to work with a variety of legal templates to key documents, such as, comprehensive legal documents for the courts, wills and trusts and to key many different contracts.

CAOT 098 MICROCOMPUTER OFFICE APPLICATIONS: INTRO TO WINDOWS (3)
Lecture: 2 hour(s)
Lab: 3 hour(s)
This course is designed to prepare students to operate a computer in the Windows environment. This course covers elements of Windows including: Windows operation, disk and file management, modification and customization of the Windows environment, and application of Windows accessories. This class requires both on campus and online work.

Student Learning Outcomes:
1. Students will gain an understanding of computer concepts, ethics and terminology as it relates to Windows 7 based applications.

CAOT 101 HANDS-ON INTERNET (1) CSU
Lecture: 2 hour(s)
Lab: 1.5 hour(s)
This course provides hands-on introduction to the World Wide Web and its components with emphasis on using traditional Internet services, downloading programs, sharing files, using e-mail, extending browser capabilities and increasing Web security.

Student Learning Outcomes:
Students will understand how the Internet is used in a technological environment. Student will understand the linear nature of the Back and Forward list.

CAOT 941 COOPERATIVE EDUCATION CAOT (4) RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

CO INFO 011 NETWORK SECURITY FUNDAMENTALS (3) CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
This course provides instruction and hands-on training in the following computer information systems concepts: Basic security principles, methods of establishing security baselines, and the most recent attack and defense techniques and technologies. It will also help prepare for CompTIA’s examination and professional security certification.

Student Learning Outcomes:
Students will be able to identify and evaluate basic threats to the network.

CO INFO 012 WEB SECURITY (3) CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
This course is designed to educate users in the technologies, terms, and processes related to Internet Security. Methods for testing security and implementing proper defense measures are covered for both Linux and Windows Operating Systems.

Student Learning Outcomes:
1. Students will create a Network Security Policy for a fractious company

CO INFO 035 MULTIMEDIA PRESENTATIONS FOR THE INTERNET I (3) CSU
Lecture: 1.5 hour(s)
Lab: 3 hour(s)
This course examines the power of using the Internet as a presentation tool and includes Internet History, simple document conversion for the World Wide Web, use of FrontPage, PowerPoint and Producer. Student will prepare presentations for the Internet by assembling ready made digital audio, video, and images.

Student Learning Outcomes:
1. Students in this course will demonstrate the ability to use multimedia elements to organize, design, and develop a multimedia project for the Internet. 2. Organizing, designing, and producing multimedia projects.

CO INFO 040 BEGINNING LEVEL PROGRAMMING/COMPUTER GAMES (3) RPT2
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory: Computer Information Systems 701
This course will provide students with a basic understanding of how a game ‘idea’ is transformed to a marketable product, while educating them on the roles and duties of a game development team and the practices exercised within the game development industry. This course is an in-depth study of level plans for computer video games.

Student Learning Outcomes:
Students will examine and critically discuss the various levels of computer game programming. Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions. In the laboratory students will create computer game programs and debug any related compiler errors.

CO INFO 042 VIDEO GAME PROGRAMMING I (3) RPT2
Lecture: 2 hour(s)
Lab: 2 hour(s)
This hands-on course teaches the technical skills behind 3D game programming, using the latest version of Torque from GarageGames, and provides the very best tools available to the game maker. Students will gain practical experience needed to create their own games. As students create a first person shooter, the class will cover the techniques behind the programming, textures, and models that go into successful game creation. Students will cover the Torque Engine and will learn how to integrate sound and music into their games.

Student Learning Outcomes:
1. Student will program a video game using Beginner’s all purpose Symbolic Instruction Code (BASIC)
Co Info 700  Computer Concepts (3)  CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory:  Mathematics 105 and English 21
This course provides an overview of computer concepts. It emphasizes the physical components of a computer system, an introduction to operating systems with emphasis on Windows and DOS, and an introduction to programming concepts. It is intended for students who want to understand the basic concepts of both computer hardware and software.

Student Learning Outcomes:
The student will be able to explain the basic structure and components of computer hardware, operating systems, applications and programming systems, and the use of the Internet for email messages.

Co Info 701  Introduction to Computers and their Uses (3)  UC:CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory:  English 21; Mathematics 105
The students will be introduced to computer applications using Microsoft Office Word, Excel, Access are covered. Also, the students will learn to integrate different applications, and understand the fundamentals of the Windows operating system.

Student Learning Outcomes:
The student will be able to explain and use the most common business systems text processing, spreadsheets, database systems, and web email.

Co Info 709  Visual Basic Programming (3)  UC:CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory:  Computer Information Systems 701
The primary topic of this class is the structure and methods of the Visual Basic programming system. This system is widely used to create computer applications that include interaction with a user, and is called object oriented programming.

Student Learning Outcomes:
The students will be able to explain and use the syntax and grammar of the Visual Basic programming system to create programs that are representative of commonly used business and engineering procedures.

Co Info 733  Microcomputer Database Programming (3)  CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory:  Computer Information Systems 701 or Computer Information Systems 701
A complete presentation of database management using Access including database design, queries, macros, toolbars, VBA and SQL. Also includes advanced work in Excel, use of the Internet in these products.

Student Learning Outcomes:
1. The student will demonstrate the ability to create database Queries, Reports, and Forms containing a Subform.

Co Info 734  Operating Systems (3)  CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
This course provides students a solid foundation in the basics of the open source Linux operating system that currently powers a majority of network servers the world over due to its robust features from security to efficiency, reliability, and its modest cost of ownership. Unix/Linux powers a greater segment of the Internet than Microsoft. Topics included are An Overview of the Linux Architecture, The Kernel and Shell, File System, Users and Groups Management, Permission and Ownership Management, Services and Processes Management. Students gain system level experience through problem solving hands-on lab exercises at the command line and in the graphical user interface.

Co Info 739  Programming in C++ (3)  UC:CSU
Prerequisite:  Computer Information Systems 739
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory:  Computer Information Systems 701
This class provides an introduction to the C++ programming system. It emphasizes the syntax and grammar of the C++ language. The methods of instruction is the use of the system to implement computer application projects using the traditional programming structures of sequence, selection, and loops, use of functions, arrays and strings and how different data types work.

Student Learning Outcomes:
The students will be able to explain and use the C++ programming system to create programs that are representative of commonly used business and engineering procedures.

Co Info 741  Programming in C# (3)  UC:CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
Advisory:  Computer Information Systems 701
This class provides an overview of computer programming in C#. It emphasizes the structure and methods of object oriented programming. This consists of form design, the properties lists, and the syntax and grammar of the C# language. The class also stresses problem solving methods, development of algorithms, the programming structures of sequence, selection, and loops, use of functions, arrays and strings and how different data types work.

Student Learning Outcomes:
The students will be able to explain and use the C# programming system to create object oriented programs.

Co Info 742  Web Development Using PHP MySQL (3)
Lecture: 3 hour(s)
Advisory:  Computer Information Systems 701
This class provides an intermediate level course in E commerce using the PHP scripting language and the MySQL database platform to develop robust and secure dynamic websites with special emphasis on object oriented programming and the application of real world website features such as Secure Socket Layer (SSL), shopping carts, and payment systems.

Student Learning Outcomes:
The student will learn the fundamentals of website development and E commerce using PHP MySQL.

Co Info 743  Object Oriented Programming in C++ (3)  UC:CSU
Lecture: 2 hour(s)
Lab: 2 hour(s)
Prerequisite:  Computer Information Systems 739
This class provides an overview of computer programming in C++. It emphasizes the syntax and grammar of the language, problem solving methods, development of algorithms, the programming structures of sequence, selection, and loops, use of functions, arrays and strings and how different data types work.

Student Learning Outcomes:
1. The student will be able to explain the procedure to print reports from a data file in the C# programming system.
**CO INFO 750  DREAMWEAVER CONCEPTS AND TECHNIQUES (3) CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)
**Advisory:** Computer Information Systems 701 or Computer Information Systems 757

The course covers concepts and techniques of the Dreamweaver system. It consists of projects that provide experience in the methods used to produce and modify documents for the World Wide Web.

**Student Learning Outcomes:**

- The students will be able to explain and use websites and webpages to create and enhance various methods of the dreamweaver application.

**CO INFO 757  XHTML PROGRAMMING AND APPLICATIONS (3) CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)

The course covers the fundamental operations of the eXtensible HyperText Markup Language (XHTML) system. It consists of projects that provide experience in the methods used to produce and modify documents for the World Wide Web.

**Student Learning Outcomes:**

1. Student will create and modify a webpage by adding a form to communicate a message.

**CO INFO 762  WEB SCRIPTING (3) CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)
**Advisory:** Computer Information Systems 701 or Computer Information Systems 757

This class provides an introduction to the use of the JavaScript programming system. It emphasizes the syntax and grammar of its coding language and the method of instruction is projects which include the design and implementation of calculations and related actions into a Web page.

**Student Learning Outcomes:**

- The students will be able to explain and use the syntax and grammar of the C++ programming system to create programs that are representative of commonly used business and engineering procedures.

**CO INFO 770  LOCAL AREA NETWORK ADMINISTRATION (3) CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)

This course will prepare students for a challenging career in Information Technology with a focus in Local Area Network Administration. Students will develop skills to administer and support data communication hardware such as, file servers, printers and other related peripheral input/output devices, and provide technical direction to lower level network technicians. Server based network, setup file and print resources, network infrastructure, monitor and troubleshoot services running over the network.

**Student Learning Outcomes:**

1. Develop a network proposal that will accommodate the needs of a small business.
2. Create a fully functional network using network simulation software.

**CO INFO 771  LOCAL AREA NETWORK TECHNICAL SUPPORT (3) CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)
**Advisory:** Computer Information Systems 701

This course will provide students with a comprehensive understanding of Local Area Network (LAN) topologies; and with the skills necessary to install, configure, customize, and troubleshoot Ethernet and Wireless computer networks. This course will prepare students for the newest CompTIA Network+ N10 004 examination.

**Student Learning Outcomes:**

- Students will demonstrate technical skills that meet industry and/or employment standards. Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems and solutions.

**CO INFO 787  NETWORK ESSENTIALS (3) CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)
**Prerequisite:** Computer Information Systems 701

This course is to provide a baseline level of knowledge for success in industry and preparation for networking certifications. Students are exposed to new industry topics and get hands-on experience networking the lab and configuring the network. Local area and Wide area networks are covered.

**Student Learning Outcomes:**

- Students will be able to explain and use LAN and WAN networking concept and terminology. Students will be able to explain internetwork for networks, servers and workstations. Students will also be able to describe OSI model in details and able to understand interoperability of level of OSI model. Students will be able to explain techniques to protect workstations, servers and networks.

**CO INFO 790  PROGRAMMING IN JAVA (3) UC:CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)
**Advisory:** Computer Information Systems 701 or Computer Information Systems 739

This course covers the fundamental operations of the Java programming system. It consists of projects that provide experience in the methods used to create Java applications and applet that will run in Internet web pages. Also to create GUI user interface screens.

**Student Learning Outcomes:**

1. Students are expected to be able create Java Application programs.

**COOPERATIVE EDUCATION**

**COOP ED 395  WORK EXPERIENCE GENERAL I (3) RPT3**

**Lecture:** 3 hour(s)

General Cooperative Education is a work experience program involving the employer, the student employee, and the college to insure that the student receives on the job training and unit credit for work experience. Work experience requires that the student be employed in a paid or unpaid position and need not be related to the students educational goals.

**Student Learning Outcomes:**

1. Develop learning objectives related to educational/occupational goals to be accomplished on the job.

**COSMETOLOGY**

**CSMTLGY 035  SKIN THERAPY I (6) NDA**

**Lecture:** 3 hour(s)
**Lab:** 9 hour(s)

Students will be introduced to disinfection and sanitation procedures, basic facial manipulations, proper cleansing, toning and moisturizing applications, masks and pack techniques and operational procedures for using facial machines.
Course Descriptions

CSMTLGY 036  SKIN THERAPY II (6) NDA
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 35

Students will be introduced to waxing services, makeup applications, desincrustation, iomtophoresis, light therapy and high frequency treatments. Skin analysis equipment, facial and body machines, airbrushing machines and hair removal techniques will be employed.

Student Learning Outcomes:
The student will be able to demonstrate sanitation and disinfection, client draping, skin analysis, cleansing, massage and plain facial techniques.

CSMTLGY 037  SKIN THERAPY III (6) NDA
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 36

Students will be introduced to hand and foot treatments, body scrubs, wraps, reflexology and massage treatments. Aromatherapy treatments will be employed.

Student Learning Outcomes:
Students will perform hand and foot treatments utilizing reflexology. Students will demonstrate body scrubs, wraps, and massage and aromatherapy treatments.

CSMTLGY 038  SKIN THERAPY IV (6) NDA
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 37

Students will be introduced to clinic floor practicum, advanced facial and makeup applications, arching and waxing services and body treatments. Mock state board procedures for licensure will be employed.

Student Learning Outcomes:
Students will be able to perform all skin therapy services such as facials, advanced makeup application, arching, waxing and body treatments.

CSMTLGY 101  INTRODUCTION TO COSMETOLOGY (3) NDA
Lecture:  3 hour(s)

This course will introduce the students to the opportunities in the field of cosmetology. Students will learn how vocabulary, math skills, and study skills are applicable to the field, and will be better prepared to enter a full-time cosmetology program.

Student Learning Outcomes:
The student will be able to identify key concepts, define technical terminology and explore the opportunities offered in the cosmetology industry.

CSMTLGY 111  FRESHMAN COSMETOLOGY (6)
Lecture:  3 hour(s)
Lab:    9 hour(s)

The course covers basic manipulative skills and proper application of shampooing, scalp treatments, finger waving, curl construction, hair design, haircutting, and manicuring. Basic lecture and theory include topics on bacteriology, trichology, decontamination.

Student Learning Outcomes:
Student will be able to perform basic hair design concepts. Students will be able to demonstrate a plain manicure. Students will be able to perform hair sculpting procedures and identify and practice industry safety and sanitation standards.

CSMTLGY 112  JUNIOR SALON I (6)
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 111

The course covers basic applications of skin care and facial massage manipulations, permanent waving, haircutting techniques, and all phases of thermal texture hair designing. Theories related to all areas mentioned above are also discussed.

Student Learning Outcomes:
Students will be able to demonstrate the proper procedures for cleansing, toning and moisturizing the skin, massage manipulations, eyebrow arching and basic makeup application. Students will be able to demonstrate procedures for sectioning and wrapping a permanent wave.

CSMTLGY 121  JUNIOR SALON II (6)
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 112

The students are exposed to intermediate instruction in permanent waving, chemical straightening, thermal straightening and curling, skin and hair care, with instruction on the use of facials, hair cutting and nail care. Theories that are related to all areas mentioned above will be discussed.

Student Learning Outcomes:
Student will be able to perform the proper procedures for waxing facial areas, applying masks, packs, scrubs and dermal lights for different skin types. Students will be able to perform thermal texture procedures utilizing the pressing comb, oven, Marcel and electrical irons.

CSMTLGY 122  JUNIOR SALON III (6)
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 121

The students are instructed in advanced permanent waving, soft permanent wave, chemical straightening, thermal straightening and curling, hair cutting, and electricity. Theories related to the above mentioned subjects will be discussed.

Student Learning Outcomes:
Students will be able to perform permanent waving, soft permanent waving and chemical straightening techniques advanced cold waving. Students will be able to demonstrate facial techniques using chemical compounds and electrical modalities.

CSMTLGY 131  TINTING I (6)
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 112

The course covers basic, intermediate and advanced hair coloring, bleaching, toning, highlighting, frosting and color correction techniques. A variety of artificial nail procedures will be demonstrated. Theories to the above mentioned subjects will be discussed.

Student Learning Outcomes:
The students will be able to apply the law of color in identifying and demonstrating the applications of basic and intermediate haircoloring, bleaching, and toning techniques.

CSMTLGY 132  TINTING II (6)
Lecture:  3 hour(s)
Lab:    9 hour(s)
Prerequisite:  Cosmetology 131

The course covers all aspects of hair coloring, bleaching, toning, ‘special effect’ highlighting, foiling, cap frosting and color correction. Additional subjects are: haircutting, thermal and wet hair styling, and the study and applications of artificial nail products. Theories related to the above mentioned subjects will be discussed.

Student Learning Outcomes:
Students will be able to analyze, discuss, and demonstrate the procedures
for a variety of hair coloring/bleaching applications. Students will be able to demonstrate a variety of artificial nail applications.

CSMTLGY 141  SENIOR SALON I (6)
Lecture:  3 hour(s)
Lab:  2 hour(s)
Prerequisite:  Cosmetology 122 or Cosmetology 132
The course reviews all areas of cosmetology, rules, regulations and State Board requirements for licensing. Students will perform client services, conduct consultations, record services, track client appointments and tickets. Theories that are related to all areas mentioned above will be discussed.

Student Learning Outcomes:
Students will complete all final preparations and procedures for customer service and licensure of the Cosmetology State Board Examination in haircutting, hair designing, chemical services, haircoloring and skin care.

CSMTLGY 142  SENIOR SALON II (6)
Lecture:  3 hour(s)
Lab:  2 hour(s)
Prerequisite:  Cosmetology 141
The student will be introduced to clinic floor practicum and advanced client services. Mock State Board procedures for licensure will be employed. Business practices include: client services, effective communication, job search skills, networking, strategies for building a client, selling techniques, starting and operating a business.

Student Learning Outcomes:
Student will model industry standard business practices including customer rapport, service-planning, professional communication, client retention, referrals, marketing and cooperation with co-workers. Student will review individual competency requirements, both skill and theory, and by passing a mock examination, student will demonstrate readiness to pass the state certification exam.

CSMTLGY 210  INTRODUCTION TO HAIR COLORING (3)
Lecture:  1.5 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Cosmetology 112
Students are offered an introduction to basic hair coloring categories, applications and bleaching techniques. In addition, the course will concentrate on hair cutting, hair styling, and permanent waving procedures.

Student Learning Outcomes:
Students will be able to apply temporary and semi permanent hair coloring and perform highlighting techniques using foils.

CSMTLGY 211  INTERMEDIATE HAIR COLORING AND STYLING (3)
Lecture:  1.5 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Cosmetology 112
Students are offered an introduction to intermediate hair coloring, bleaching and toning applications and techniques. In addition, the course will concentrate on hair cutting, hair styling, and skin care procedures.

Student Learning Outcomes:
Students will be able to identify and demonstrate the skills required for mixing and applying demi permanent, permanent hair coloring and bleaching compounds.

CSMTLGY 214  ADVANCED HAIR COLORING AND STYLING (3)
Lecture:  1.5 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Cosmetology 112
Students are offered instruction in permanent hair coloring applications, color correction techniques, zonal and block highlighting effects. In addition, the course will concentrate on hair cutting, thermal hair styling, long hair designing and nail technology.

Student Learning Outcomes:
Students will be able to identify and demonstrate the skills required for special effects applications of hair color and bleach, while employing color correction techniques needed for industry.

CSMTLGY 215  CONTEMPORARY STYLING TECHNIQUES (3)
Lecture:  1.5 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Cosmetology 112
Students receive instruction in advanced hair designing, hair coloring, hair sculpting, and chemical texture services.

Student Learning Outcomes:
Students will be able to analyze and create contemporary hair designs utilizing wet and thermal styling techniques meeting industry standards.

CSMTLGY 217  MULTI TEXTURE DESIGN (LEVEL 1 2) (3)
Lecture:  2 hour(s)
Lab:  3 hour(s)
This class teaches the basic techniques of the five most popular methods for applying hair additions: strand by strand, braiding, bonding, track and sew and netting.

Student Learning Outcomes:
Students will be able to identify the proper procedures and application for various hair augmentation techniques and demonstrate several different braiding patterns and tension control.

CSMTLGY 221  ADVANCED MAKEUP TECHNIQUES (3) NDA
Lecture:  2 hour(s)
Lab:  3 hour(s)
This course is designed to teach students makeup applications in contouring techniques, correct shaping of eyes, lips and eyebrows; makeup applications for women of all ages and ethnicities, and tool knowledge and camouflage procedures.

Student Learning Outcomes:
Students will be able to mix and apply makeup compounds creating a variety of special effects applications.

CSMTLGY 222  INTRODUCTION TO SPECIAL EFFECTS MAKEUP TECHNIQUES (3) NDA
Lecture:  2 hour(s)
Lab:  3 hour(s)
The purpose of this course is to offer introductory FX Special Effects Makeup Techniques for basic applications utilized in the movie and television industry.

Student Learning Outcomes:
Students will be able to mix and apply makeup compounds creating a variety of special effects applications.

CSMTLGY 223  HAIR SCULPTING TECHNIQUES FOR WOMEN (3)
RPT2
Lecture:  2 hour(s)
Lab:  3 hour(s)
Basic to advanced hair cutting techniques that include shape, texture, and structure. Students will learn how to sculpt hair, understand design concepts, analyze form and use a variety of tools and cutting techniques.

Student Learning Outcomes:
Student will perform hair sculpting techniques using razor and shears.
CSMTLGY 224  SEMI PERMANENT EYELASH EXTENSIONS (1)
NDA RPT1
Lecture:  0.5 hour(s)
Lab:    2 hour(s)

Students will be introduced to the application of semi permanent eyelash extensions. Topics covered include: Safety and sanitation procedures, analysis of the eyelashes, materials, tools, equipment, methods and techniques for eyelash extension application.

Student Learning Outcomes:
1. Perform a complete and thorough consultation.
2. Prepare for them self and the client for the semi permanent eyelash extension application.
3. Select the proper materials, tools and equipment for the application of semi permanent eyelash extensions.
4. Perform a basic and advanced demonstration for client care of lashes.

CSMTLGY 225  HAIR SCULPTURING TECHNIQUES FOR MEN (3)
RPT2
Lecture:  2 hour(s)
Lab:    3 hour(s)

Basic to advanced hair cutting and clipper cutting techniques that include shape, texture, lines, fades, designs and structure. Student will learn how to sculpt hair, understand design concepts, analyze form and use a variety of tools and techniques.

Student Learning Outcomes:
1. Students will perform hair sculpting techniques using razor, trimmers, clippers, and shears.

CULINARY ARTS

CLN ART 100  INTRODUCTION TO CULINARY ARTS (2) CSU
Lecture:  1 hour(s)
Lab:    2 hour(s)
Advisory: Culinary Arts 112

This class is designed as an introduction to the culinary field. Topics include basic food service sanitation, introduction to knife skills. Preparation of soups, sauces, stock and cold salad dressings are also covered.

Student Learning Outcomes:
1. Identify basic culinary terminology and practices.
2. Demonstrate basic cooking methods and procedures.

CLN ART 111  CULINARY ARTS ORIENTATION I (4) CSU
Lecture:  2 hour(s)
Lab:    6 hour(s)
Prerequisite: Culinary Arts 112; Corequisite: Culinary Arts 112

With a combination of lecture and lab practice, the students are introduced to the world of commercial food production. Students are introduced to culinary theories and develop skills in knife handling, ingredient identification, small and large equipment use, weights and measures, recipe development and cooking fundamentals.

Student Learning Outcomes:
Students will define basic culinary terminology, identify cooking processes and techniques, and evaluate completed products Define Cooking processes and techniques. Prepare food items according to demonstration standards Evaluate food items and revise finished products as needed

CLN ART 112  SANITATION AND SAFETY (2) CSU
Lecture:  2 hour(s)

This class discusses sanitation and safety as it applies to the restaurant industry; HACCP protocol, preventing food borne outbreaks, introduction to microbiology and establishing ‘flow of food systems’ will be covered, federal, state and local legislation and employee training. National Restaurant Association Serve Safe Test will be given at conclusion of this class.

Student Learning Outcomes:
Recognize proper hygiene and sanitation standards Apply HACCP (Hazard Analysis Critical Control Points) protocol in a professional foodservice facility Score a 75 % or higher on a National Restaurant Association food handlers test

CLN ART 120  FRONT OF HOUSE/DINING SERVICES (4)
Lecture:  2 hour(s)
Lab:    6 hour(s)

Front of house topics pertinent to restaurant & hospitality management, dining room management, service, staffing, use of POS system, money management, stewarding. Serve Safe “Alcohol” test will be administered at the conclusion of the course.

Student Learning Outcomes:
1. Practice proper front of the house operations as it pertains to the food service industry.
2. Describe customer relations and service as performed in a culturally diverse arena.
3. Appraise effective service as it relates to the Hospitality industry.
4. Recognize, identify and assess guidelines of the safe, sale and service of Alcohol.

CLN ART 121  GARDE MANGER I BAKING (6) CSU
Lecture:  3.75 hour(s)
Lab:    6.75 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 112

Introduction to Garde Manger and Baking. Introduction to basic garde manger, salads, cold sauces and salad dressings dressing, baking principles including yeast and sweet doughs, laminated doughs, mixing methods, and decorating.

Student Learning Outcomes:
1. Be able to indentify cold kitchen & bakery operations & procedures.
2. Demonstrate recipes and preparation.
3. Evaluate completed assignments and adjust as needed.

CLN ART 122  GARDE MANGER II CHARCUTIERE (6) CSU
Lecture:  3.75 hour(s)
Lab:    6.75 hour(s)
Prerequisite: Culinary Arts 111 and Culinary Arts 112

Students will become proficient in the historical features of the garde manger stations including planning and preparation of cold soups, hors d’oeuvres, appetizers, canape, mousse, timbale, cold sauces, relishes, force meat, galantine, terrine, pate en creoute components. Preparation and usages of specialty meats, sweetbreads, and sausage will be defined; gelee, aspic, chaud froid, glazing, marinating, curing will be practiced; and buffet presentation, the display of carved fruit and vegetable garnishes and centerpieces will be studied. Projects will include international cuisine, salt dough sculpting and ice carving. Student Learning Outcomes: Students will define and identify classic Garde Manger items, design menu items, and evaluate and access finished products.

CLN ART 131  CULINARY ARTS BREAKFAST I (6) CSU
Lecture:  3.75 hour(s)
Lab:    6.75 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 112

Students are introduced to a la minute breakfast cookery, hot sandwiches, culinary management and supervision. Upon completion the students will be able to identify and safely use the tools and equipment used in breakfast cookery as well as egg cookery, breakfast meats, cereals, beverages, hot sandwiches, a la minute preparation, brunch items, pancakes, and waffles. Other areas covered include portion control, inventory pars, weights and measures, labor and cost control. Management, supervision, leadership, customer relations, communication, and teamwork and time management methods are introduced, discussed and practiced. Effective evaluation, discipline and delegation methods are outlined. Computerized food and labor cost and inventory controls are presented and practiced.
Student Learning Outcomes:
1. Describe la minute cookery, management applications, and cycle menu procedures. 2. Practice and employ la minute and cycle menu protocol in a fast paced food service facility. 3. Compare and contrast la minute and various management styles.

CLN ART 132  CULINARY ARTS ENTREMETIER SAUCIER (6) CSU
Lecture: 3.75 hour(s)
Lab: 6.75 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 112
Students will examine and prepare the theory and production techniques involved in the preparation of stocks, soups, sauces, starchy, and vegetables in a classical and contemporary cooking approach. Students will develop a practical understanding of the role and application of sauce pairing with the center of the plate, vegetables, starchy, and dessert items.

CLN ART 141  BUTCHERY/CENTER OF THE PLATE AND QUANTITY
FOOD COOKERY (6) CSU
Lecture: 3.75 hour(s)
Lab: 6.75 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 131; Culinary Arts 132; and Culinary Arts 121 and Culinary Arts 122 and Culinary Arts 112;
This course covers quantity and quality food production of meats, fish, and poultry. Students will practice center of the plate food preparation, meat identification and fabrication with an emphasis on portion control, sauce pairing and accompaniment compatibility. Students will discuss, compare and prepare various international foods.

Student Learning Outcomes:
Students will define and practice advanced culinary skills and techniques.

CLN ART 142  ADVANCED RESTAURANT PRACTICES II MENU PLANNING AND PURCHASING, SUPERVISION AND TRAINING (6) CSU
Lecture: 3.75 hour(s)
Lab: 6.75 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 112
This course covers menu planning and purchasing for the restaurant, cafeteria, banquet and specialty restaurant settings. Fundamentals of storeroom operations, including ordering, receiving, storage controls, pars and inventory controls will be identified and best practices studied. Supervision and Training of the food service worker will be discussed and practiced.

Student Learning Outcomes:
1. Discuss food purchasing, receiving, and facility supervision. 2. Distinguish various supervisory techniques and inventory applications. 3. Evaluate systems and assess for change.

CLN ART 235  MENU PLANNING AND PURCHASING (4) CSU RPT1
Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 112
Advanced course in menu planning and purchasing using the menu as a tool for ordering, selection and procurement of food and beverage items. Menu, labor, and facility computer generated cost analysis and percentages will be addressed.

Student Learning Outcomes:
1. Define Menu development for a professional food service facility. 2. Recognize ordering and costing procedures based on menu offered. 3. Compose a flow of food and sale price (door to table) based on the menu, menu item, and food cost. 4. Evaluate system and make changes based on outcome.

CLN ART 240  RESTAURANT SUPERVISION AND TRAINING (2) CSU
Lecture: 2 hour(s)
Prerequisite: Culinary Arts 111; Culinary Arts 112
Students are introduced to human resource management and supervision techniques. Students will identify the recruiting process, communication skills, leadership styles, legal issues in the workforce, employee motivation and discipline.

Student Learning Outcomes:
1. Identify the supervisors role as a leader in a restaurant management situation. 2. Discuss the various supervisor obligation in a food service establishment. 3. Evaluate supervisors ability to make changes for their employees and themselves.

CLN ART 941  COOPERATIVE EDUCATION CULINARY ARTS (4) RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering in order to participate in program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

DEV COM 021  FUNDAMENTALS OF WRITING (3) NDA
Lecture: 3 hour(s)
This course focuses on the fundamentals of academic writing. It reinforces basic skills such as the correct use of punctuation, spelling, and sentence structure. Students incorporate these skills, along with sentence combining techniques, to write single paragraph responses that have topic sentences, supporting details, and conclusions.

Student Learning Outcomes:
1. Write 250-300 word paragraphs containing effective topic sentences with details and without intrusive sentence level and punctuation errors. 2. Pass grammar test based on language and mechanics (pre test administered on entry to class).
DIESEL TECHNOLOGY AND RELATED TECHNOLOGY

DIESLTK 112  DIESEL ENGINE AND ELECTRICAL FUNDAMENTALS (11)
Lecture: 6 hour(s)  
Lab: 15 hour(s)
This course is designed to cover the theory and operation of diesel engine components, shop safety, tools, fastening devices, use of measuring instruments, and electrical systems. The student should develop, hands-on skills, manual dexterity skills, critical thinking skills and basic employment skills.
Student Learning Outcomes:
Student should be able to explain the basic principles of operation of any diesel engine and sub assemblies. Student should be able to explain and test the basic principles of operation of the electrical system, charging system, starting system, and the use of a VOM.

DIESLTK 112A  DIESEL ENGINE FUNDAMENTALS (6)
Lecture: 3 hour(s)  
Lab: 7.5 hour(s)
This course is designed to cover the theory and operation of diesel engine components and supporting systems, shop safety, tools, fastening devices, and use of measuring instruments.
Student Learning Outcomes:
Student should be able to explain the basic principles of operation of any diesel engine and sub assemblies.

DIESLTK 112B  DIESEL ELECTRICAL SYSTEMS (6)
Lecture: 3 hour(s)  
Lab: 7.5 hour(s)
This course is designed to cover the theory and operation of electrical fundamentals. The student should develop, hands-on skills, manual dexterity skills, critical thinking skills on electrical parts and systems.
Student Learning Outcomes:
Student should be able to explain and test the basic principles of operation of the electrical system, charging system, starting system, and the use of a VOM.

DIESLTK 122  DIESEL FUEL INJECTION SYSTEMS (11)
Lecture: 6 hour(s)  
Lab: 15 hour(s)
This course covers the principles of fuel injection systems. Emphasis is placed on the proper construction, operation, dis assembly, diagnosis, reassembly, testing and calibrating of different type of pumps and fuel injectors. Various models will be examined, including electronic systems.
Student Learning Outcomes:
Students will demonstrate the understanding of how different types of injectors work. Students will demonstrate the ability to diagnose and repair, various diesel fuel pumps.

DIESLTK 122A  DIESEL FUEL SYSTEMS (6)
Lecture: 3 hour(s)  
Lab: 7.5 hour(s)
This course covers the principles of fuel injection systems. Emphasis is placed on the proper construction, operation, dis assembly, diagnosis, reassembly, testing and calibrating of different type of pumps and fuel injectors.

DIESLTK 122B  DIESEL FUEL SYSTEMS (6)
Lecture: 3 hour(s)  
Lab: 7.5 hour(s)
This course will cover electronic fuel systems, including electronically controlled fuel pumps and injectors. Practical application by hands-on exercises consisting of dis assembly and assembly, calibration testing and troubleshooting.
Student Learning Outcomes:
Students will demonstrate the ability to diagnose and repair, various diesel fuel pumps.

DIESLTK 132  HEAVY DUTY DRIVE TRAIN & AIR BRAKE SYSTEMS (11)
Lecture: 6 hour(s)  
Lab: 15 hour(s)
This course will cover the operating principles and repair of heavy duty clutches, transmissions, drive shafts, and differentials. In addition, students will also learn the operation and repair of air systems, foundation brakes, and anti lock brake systems.
Student Learning Outcomes:
Student will be able to perform various tasks of transmission and clutch maintenance. Student will use various OEM software to diagnose anti lock brake systems.

DIESLTK 132A  HEAVY DUTY DRIVE TRAIN (6)
Lecture: 3 hour(s)  
Lab: 7.5 hour(s)
This course will cover the operating principles and repair of heavy duty clutches, transmissions, drive shafts, and differentials.
Student Learning Outcomes:
Student will be able to perform various tasks of transmission and clutch maintenance.

DIESLTK 132B  AIR BRAKE SYSTEMS (6)
Lecture: 3 hour(s)  
Lab: 7.5 hour(s)
This course will cover the operation and repair of air systems, foundation brakes, and anti lock brake systems.
Student Learning Outcomes:
Student will use various OEM software to diagnose anti lock brake systems.

DIESLTK 142  DIESEL ENGINE OVERHAUL & ELECTRONIC ENGINE CONTROLS (11)
Lecture: 6 hour(s)  
Lab: 15 hour(s)  
Prerequisite: Diesel and Related Technology 112; and Diesel and Related Technology 122
This course covers diesel engine overhaul principles including disassembly, inspection, and reassembly as part of overhauling a diesel engine. The operation of electronic engine controls will also be covered with an emphasis on using OEM diagnostic software in the troubleshooting of a diesel engine.
Student Learning Outcomes:
Student will be able to perform various tasks of an engine overhaul. Student will use various OEM software to diagnose electronic engine controls.
### DIESLTK 142A  DIESEL ENGINE OVERHAUL (6)
**Lecture:** 3 hour(s)  
**Lab:** 7.5 hour(s)  
This course covers diesel engine overhaul principles including disassembly, inspection, and reassembly as part of overhauling a diesel engine.  
**Student Learning Outcomes:**  
Student will be able to perform various tasks of an engine overhaul.

### DIESLTK 142B  ELECTRONIC ENGINE CONTROLS (6)
**Lecture:** 3 hour(s)  
**Lab:** 7.5 hour(s)  
The operation of electronic engine controls will be covered with an emphasis on using OEM diagnostic software in the troubleshooting of a diesel engine.  
**Student Learning Outcomes:**  
Student will be able to utilize various OEM software to diagnose electronic engine controls.

### DIESLTK 185  DIRECTED STUDY  DIESEL AND RELATED TECHNOLOGY (1)
**Lecture:** 1 hour(s)  
This course allows students to pursue a directed study in Diesel and Related Technology on a contract basis under the direction of a supervising instructor.  
**Student Learning Outcomes:**  
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in diesel and related technology.

### DIESLTK 285  DIRECTED STUDY  DIESEL AND RELATED TECHNOLOGY (2)
**Lecture:** 2 hour(s)  
This course allows students to pursue a directed study in Diesel and Related Technology on a contract basis under the direction of a supervising instructor.  
**Student Learning Outcomes:**  
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in diesel and related technology.

### DIESLTK 301  INTRODUCTION TO ALTERNATIVE FUELS & HYBRID VEHICLE TECHNOLOGY (1)  CSU
**Lecture:** 1 hour(s)  
This course provides an introduction to various alternative fuel technologies being used in the automotive and heavy-duty diesel fields. Covers description and basic operation of Bio diesel, Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG), Fuel Cell and hybrid vehicle technologies.  
**Student Learning Outcomes:**  
Student will be able to explain the differences between regular diesel and bio diesel fuels. Student will understand the differences between Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG).

### DIESLTK 302  HYBRID AND PLUG IN ELECTRIC VEHICLE (6)  CSU
**Lecture:** 3.5 hour(s)  
**Lab:** 5 hour(s)  
This course covers hybrid vehicle system fundamentals including hybrid vehicle safety, special tools, different hybrid system configurations, high voltage battery construction and maintenance, de power procedures and basic service.  
**Student Learning Outcomes:**  
1. Students will understand the operating principle of a hybrid and plug in electric vehicle and identify all of its components. 2. They will learn the safety requirements for working with hybrid systems.

### DIESLTK 303  ADVANCED HYBRID AND PLUG IN ELECTRIC VEHICLES (5)  CSU
**Lecture:** 2 hour(s)  
**Lab:** 6 hour(s)  
This course covers advanced hybrid vehicle system diagnostics and replacement of hybrid and plug in electric components such as high voltage battery, electric motor, capacitors, etc. Troubleshooting of gasoline/diesel engine will also be covered.  
**Student Learning Outcomes:**  
1. Students will perform advanced hybrid system trouble shooting and hybrid component replacement. 2. They correctly trouble shoot regenerative brake systems used in hybrid vehicles.

### DIESLTK 385  DIRECTED STUDY  DIESEL AND RELATED TECHNOLOGY (3)    RPT3
**Lecture:** 1 hour(s)  
**Lab:** 6 hour(s)  
This course allows students to pursue a directed study in Diesel and Related Technology on a contract basis under the direction of a supervising instructor.  
**Student Learning Outcomes:**  
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in diesel and related technology. The student will assemble a fully functioning laboratory mockup based on the research determined by the contract between the instructor and student.

### DIESLTK 941  COOPERATIVE EDUCATION  DIESEL AND RELATED TECHNOLOGY (4)  RPT3
**Lecture:** 4 hour(s)  
Cooperative Education is a work experience program involving the employer, the student employee and the college to assure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.  
**Student Learning Outcomes:**  
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

### DIGITAL MEDIA

### DIGLMD 100  INTRODUCTION TO DIGITAL VIDEO (3)  CSU
**Lecture:** 2 hour(s)  
**Lab:** 2 hour(s)  
Students are introduced to the process and tools of non linear video editing. Basic skills will be developed in editing techniques, video formats, compression types, industry terminology, and understanding key concepts of shooting for digital systems. Students will produce short video sequences that are appropriately compressed for delivery via web/Internet and various digital media.  
**Student Learning Outcomes:**  
1. Upon completion of the course, students will be able to shoot and edit videos using HD cameras and non linear editing systems.
DIGLMD 103  FUNDAMENTAL OF DIGITAL AUDIO (3)  CSU  RPT1
Lecture:  2 hour(s)
Lab:  2 hour(s)

Students are introduced to the principles and process of digital audio recording and reproduction. Topics include such aspects as sound design, acoustics, Dolby surround sound, microphones, mixers, outboard gear, signal flow, and recording and editing audio. Further exploration will involve analog over digital formats and destructive over non destructive editing.

Student Learning Outcomes:
1. Students will learn to use sound editing software to record, cut, loop, and mix audio tracks.

DIGLMD 115  VIDEO PRODUCTION: NON LINEAR EDITING (3)  CSU
Lecture:  2 hour(s)
Lab:  2 hour(s)

Students will engage in film and video editing techniques on a non linear editing platform. A series of video editing projects will explore technical non linear editing system skills and editing tools in the service of storytelling craft. Topics covered include theme, structure, continuity, rhythm, flow, suspense, and dramatic irony.

Student Learning Outcomes:
1. Students will learn advanced video editing techniques and concepts using a non-linear editor. 2. Students will create a video sequence using footage in need of both audio and video adjustments and balancing.

DIGLMD 199  DIGITAL MEDIA LAB (1)  CSU  RPT2
Lab:  2 hour(s)

This is an open lab to offer students access to professional creative applications such as Adobe Illustrator, Flash, Dreamworks, AfterEffects, Photoshop, Premiere, and Soundbooth, and Apple Final Cut Pro, as well as video production equipment to complete coursework in the Digital Media program.

Student Learning Outcomes:
Students gain a greater understanding of the media editing software used in Digital Media classes while working on projects.

ECONOMICS

ECON 001  PRINCIPLES OF ECONOMICS I (3)  UC:CSU
Lecture:  3 hour(s)

This course provides an introductory microeconomic analysis and their application to business situation. Emphasis is on supply and demand, elasticities, consumer choice/optimization, profits, economic rent, financial environment of business, market structure, economic and social regulations, antitrust policy in a globalized economy.

Student Learning Outcomes:
1. Student will evaluate individual, professional and government choices in terms of scarcity. 2. Student will apply the understanding of the interaction of demand and supply concept to determine the market price and market quantity of commodity that is produced and consumed. 3. Student will apply the rationing functions of prices and assess the effect of price floor related to under production and over production in the economy. 4. Student will apply the concept of economic change to career development and lifelong learning.

ECON 002  PRINCIPLES OF ECONOMICS II (3)  UC:CSU
Lecture:  3 hour(s)

This macroeconomics course concentrates on the behavior of the economy as a whole and includes such economy wide phenomena as changes in unemployment, general price level and national income. Emphasis is placed on public spending and public choice, economic fluctuations and business cycles. Other topics include fiscal and monetary policy, deficit spending and public debt, money creation, banking and central banking, policies and prospects for global economic growth, comparative advantage, international trade and contemporary economic developments.

Student Learning Outcomes:
1. Student will evaluate individual, professional and governmental choices in terms of scarcity. 2. Student will evaluate the limitations of using GDP as a measurement of social welfare. 3. Student will assess the influence of Federal Reserve’s monetary policy actions on the market interest rates. 4. Student will assess why nations can gain from specializing in production and gain from international trade and incorporate the concept for career goals and lifelong learning.
ECONMT 007  HOME THEATER & COMMERCIAL AUDIO, VIDEO
INSTALLATION THEORY AND PRACTICES (3)  CSU

Lecture:  1.5 hour(s)
Lab:  4.5 hour(s)

This course offers instruction in the installation of Home Theater Video and Audio systems as well as commercial and industrial applications for audio and video technology. Upon successful completion of the course the student will have the skills to enter this area of the electrical trade. Student Learning Outcomes: SLO #1: Analyze job requirements and select proper equipment to meet the needs of the job. SLO # 2: Design, layout and install a complete home theater system in a laboratory setting. SLO #3: Demonstrate troubleshooting of an installed system, including a repair plan to correct identified defects.

ECONMT 100  (O.S.H.A.) SAFETY STANDARDS: CONSTRUCTION & INDUSTRY (2)  CSU

Lecture:  2 hour(s)

This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics such as fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety training certificate.

Student Learning Outcomes:
1. Recognize appropriate training requirements and training methods. 2. Define OSHA specific construction terms such as; competent person, construction work, confined space, working space, general duty clause. 3. Select situational appropriate PPE.

ECONMT 101  ELECTRICAL CRAFT HELPER (4)  CSU

Lecture:  4 hour(s)

This course is designed as entry level preparation for a student interested in careers in the electrical power industry. This introductory course covers the basic fundamentals of planning, installation and maintenance of high and low voltage electrical systems. Basic functions of generation, both hydro and steam are covered. The transmission and distribution of electrical power will be reviewed. Fundamentals of electricity, identification, function, and operation of components will be surveyed. Ohms law, safety, ropes, knots, rigging, and tools required in the trade will be reviewed. Civil service exam assistance will also be covered.

Student Learning Outcomes:
1. List the types of knots utilized for common rigging operations. 2. State the required safety regulations and practices of the power line industry. 3. Describe the precautions and safeguards required of employees working in the power line industry.

ECONMT 105  FUNDAMENTALS OF SOLAR ELECTRICITY (3)  CSU

Lecture:  3 hour(s)

This course is designed for students interested in a career in the solar industry. The fundamental principles and functions of photo voltaic industry will be introduced. This course covers planning, installation, maintenance and all the necessary components for a photo voltaic system. The transmission and distribution of electric power will be reviewed. Basic concepts of electricity, identification, functions and operations of components will be surveyed.

Student Learning Outcomes:
1. Describe the history of PV technology and the industry and list available markets and possible applications for PV systems. Identify types of PV systems and their application. Describe the advantage and disadvantage of each. Identify safety practices and protective equipment used to mitigate hazards in the installation and maintenance of PV systems. 2. Define basic electrical/solar terms including: energy, power, voltage and parallel electrical circuits. Define basic solar terms including: irradiation, irradiance, tilt angle, latitude, longitude, azimuth angle etc. Determine series/parallel PV array arrangement based on module and inverter specifications. 3. Describe the testing standards for solar modules and identify measurement conditions for solar cells and modules. Label key points and describe effects of environmental conditions on a typical IV curve. 4. Describe the use of a digital multi meter, pyranometer, compass, and given a declination map,
differentiate true south from magnetic south. Identify parts and demonstrate the ability to use the Sun pathfinder and do shading analysis.

ECONMT 110 RENEWABLE ENERGY SYSTEMS (3) CSU
Lecture: 3 hour(s)
This course will cover energy basics, solar basics, both active and passive, solar thermal and solar electric, wind, hydro power, wave and tidal power, bio fuel and biomass resources, geothermal power, energy storage and hydrogen fuel cells. Both large and small scale, grid interactive and stand alone systems will be discussed. Energy collection, site evaluation, design analysis of various systems, material use, and methods of construction will also be covered, along with overviews of California and US energy policy and global energy use.
Student Learning Outcomes:
1. Discuss the history of renewable energy development. 2. List the regions of the globe where specific renewable options are most or least viable. 3. List the components needed for various renewable energy sources.

ECONMT 115 FUNDAMENTALS OF D.C. ELECTRICITY (3) CSU
Lecture: 3 hour(s)
This course offers study in the Fundamentals of D.C. Electricity. Subjects include: Electrical safety, the basic principles of atomic structure, electrical quantities, static electricity, magnetism, induction, resistors, series circuits, parallel circuits, and combination circuits. The proceeding resistive circuits will be analyzed using Ohm’s Law, The Power Equation and Kirchhoff’s Voltage and Current Laws.
Student Learning Outcomes:
1. Students will demonstrate an understanding of the basic principles of D.C. Electricity and be able to analyze and solve series circuits, utilizing Ohm’s Law, the power equation, and Kirchhoff’s current and voltage laws.
2. Students will demonstrate an understanding of the basic principles of D.C. Electricity and be able to analyze and solve parallel circuits, utilizing Ohm’s Law, the power equation, and Kirchhoff’s current and voltage laws.
3. Students will demonstrate an understanding of the basic principles of D.C. Electricity and be able to analyze and solve Combination circuits, utilizing Ohm’s Law, the power equation, and Kirchhoff’s current and voltage laws.

ECONMT 116 HANDTOOLS AND WIRING PRACTICES (2) CSU
Lab: 6 hour(s)
This course covers the proper use of Hand Tools, Wiring Methods, Conductor Identification, Selection, Splicing and Termination. Trade Practices and an Introduction to the National Electrical Code.
Student Learning Outcomes:
1. Analyze and interoperate various VOMM readings.

ECONMT 117 ELEMENTARY CIRCUIT PRACTICES (4) CSU
Lab: 12 hour(s)
This course offers instruction in the drawing and analysis of wiring plans, wiring diagrams, and ladder diagrams. Including the wiring of both low and high voltage circuits utilizing push button, single pole, standard three way, coast three way, standard four way, coast four way, and master switching systems.
Student Learning Outcomes:
1. Interoperate Wiring Diagrams and Construct a 4 Way Switching System.
2. Interoperate Wiring Diagrams and Construct a 3 Way Switching System.
3. Interoperate Wiring Diagrams and Construct a Master Switching System.

ECONMT 119 ELECTRICAL CONSTRUCTION AND MAINTENANCE (3) CSU
Lecture: 3 hour(s)
This is an entry level course in electrical calculations and measurements with special emphasis on the application problems encountered in the electrical construction industry.

ECONMT 120 INDUSTRIAL CONTROL SYSTEMS (3) CSU
Lecture: 3 hour(s)
Prerequisite: Electrical Construction and Maintenance 119; and Electrical Construction and Maintenance 119
This course is the second module of the 128 A,B,C series and continues to foster the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.
Student Learning Outcomes:
1. Connect control and power circuits using schematic and wiring diagrams.

ECONMT 128A INDUSTRIAL CONTROL SYSTEMS PRACTICES A (1) CSU
Lab: 3 hour(s)
This course fosters the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.
Student Learning Outcomes:
1. Connect control and power circuits using schematic and wiring diagrams.

ECONMT 128B INDUSTRIAL CONTROL SYSTEMS PRACTICES B (1) CSU
Lab: 3 hour(s)
This course is the second module of the 128 A,B,C series and continues to foster the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes manual and electromagnetic control of motors using switches, pushbuttons, relays and starters for sequencing, jogging, reversing and timed control of motors and circuits.
Student Learning Outcomes:
1. Connect control and power circuits using schematic and wiring diagrams.

ECONMT 128C INDUSTRIAL CONTROL SYSTEMS PRACTICES C (1) CSU
Lab: 3 hour(s)
This course is the final module of the 128 A,B,C series and finalizes the development and application of control circuitry through the use of instructional wiring panels and lab project boards. The course includes
ECONMT 129 FUNDAMENTALS OF ALTERNATING CURRENT (3) CSU
Lecture: 3 hour(s)
Lab: 9 hour(s)
Prerequisite: Electrical Construction and Maintenance 115; Electrical Construction and Maintenance 119

This course offers a study in operating principles of electrical power systems, the theory of A.C. generators and motors, load calculations, efficiencies, power factor correction, and calculations related to these theories.

Student Learning Outcomes:
1. Apply appropriate Ohms laws, mathematical rules and trigonometry to solving electrical calculations. Given a supply voltage, the current flowing into a motor and the resistance of the motors windings, the student will apply ohm's laws and calculate the total Apparent Power, True Power, Reactive Power, Impedance, Inductive Reactance, Phase Angle and the Power Factor of the motor circuit.
2. Apply appropriate units of measure using Engineering notation.
3. Calculate AC circuit and transformer; power, voltage, current, resistance and impedance.

ECONMT 130 PRINCIPLES OF INDUSTRIAL ELECTRIC POWER (3) CSU
Lecture: 3 hour(s)

This course offers a study in operating principles and maintenance procedures and code requirements for electrical power systems. Theory of D.C. and A.C. generators and motors, load calculations, efficiencies and power factor correction are also covered.

Student Learning Outcomes:
1. Analyze drawings of control and power circuits used in industry.
2. Analyze various motor acceleration methods.
3. The students will compare and contrast the efficiency of the different methods.
4. Calculate transformer voltage, current, and KVA ratings.

ECONMT 136 INDUSTRIAL POWER APPLICATIONS (3) CSU
Lab: 3 hour(s)

This course offers a practical study on shop experience in testing, servicing and repairing industrial plant electrical equipment, connection and operation of generators, as well as motors and their control systems.

Student Learning Outcomes:
1. Connect electrical motor control equipment to single and three phase motors to National Electrical Code standards in a safe and workman like manner.
2. Demonstrate electrical control troubleshooting skills, and the ability to identify electrical opens, shorts and ground faults.
3. Perform all work in the lab using proper lock out and tag out procedures.
4. Present finished drawings of all connections made during class.

ECONMT 138 APPLICATIONS OF ELECTRICAL AND ELECTRONICS DEVICES (2) CSU
Lab: 6 hour(s)

This course studies identification and operational tests on various types of electrical and electronic equipment, including transformers, electronic motor speed control systems and other industrial control devices.

Student Learning Outcomes:
1. Construct digital logic circuits, and analyze them using Boolean Algebra.
2. Use solid state relays to energize motor starters.
3. Compare and contrast logic gates using truth tables.

ECONMT 140 CONSTRUCTION WIRING PRINCIPLES AND PRACTICES (3) CSU
Lecture: 3 hour(s)
Lab: 9 hour(s)
Prerequisite: Electrical Construction and Maintenance 130; and Electrical Construction and Maintenance 138; Corequisite: Electrical Construction and Maintenance 167

This class teaches the wiring of electrical systems, including: layout, construction methods, code requirements, installation standards, and best practices.

Student Learning Outcomes:
1. Design wiring plans, which conform to various load and control requirements, which result in minimum material use.
2. Students will calculate the full load currents, and the appropriately sized wire and protective devices for an assigned transformer according to the current National Electrical Code.

ECONMT 142 BASIC PROGRAMMABLE LOGIC CONTROLS (PLC) (1) CSU
Lab: 3 hour(s)

Introduction to Basic Programmable Logic Controllers, Programming Devices, Ladder Diagrams and Designing PLC Programs for Industrial Processes.

Student Learning Outcomes:
1. Identify the advantages of a programmable controller.
2. Identify inputs and output devices connected to a programmable controller.
3. Identify five components of a programmable controller.
4. Troubleshoot a programmable controller program.

ECONMT 150 INTRODUCTION TO THE ELECTRICAL CODES (3) CSU
Lecture: 3 hour(s)
Prerequisite: Electrical Construction and Maintenance 130; and Electrical Construction and Maintenance 138; Corequisite: Electrical Construction and Maintenance 140

This is a study and interpretation of the National Electrical Code, local ordinances, and regulations covering wiring installations and principal circuit requirements.

Student Learning Outcomes:
1. Students will calculate loads and currents for assigned industrial, commercial, and residential occupancies.
2. Students will calculate the appropriately sized wire, conduit, and protective devices for the assigned industrial, commercial, and residential occupancies according to the current National Electrical Code.

ECONMT 159 PROGRAMMABLE LOGIC CONTROLS (PLC) (4) CSU RPT2
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
Prerequisite: Electrical Construction and Maintenance 120; and Electrical Construction and Maintenance 136 or Electrical Construction and Maintenance 184

Programmable Logic Controller wiring, programming, and troubleshooting techniques are learned and practiced in a hands-on laboratory environment.

Student Learning Outcomes:
1. Identify, illustrate, and apply PLC Input/Output components.
2. Plan, design, and construct PLC wiring diagrams.
3. Plan, design, and construct working PLC programs.
4. Troubleshoot faulty PLC hardware and software.
ECONMT 164 SUSTAINABLE LIGHTING PRINCIPLES & PRACTICES (3) CSU
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
This course offers study in the design of residential and commercial lighting systems. Included, are both indoor and outdoor lighting applications, emphasizing sustainable lighting design and energy saving strategies.
Student Learning Outcomes:
1. Analyze and interpret ballast wiring diagram and install replacement ballast.

ECONMT 167 ELECTRICAL CONSTRUCTION WIRING TECHNIQUES (3)
Lab: 9 hour(s)
Prerequisite: Electrical Construction and Maintenance 130; and Electrical Construction and Maintenance 150
Students are taught and practice electrical rough in methods, while emphasizing safe working methods and compliance with Electrical Codes and trade standards.
Student Learning Outcomes:
Students will correctly install different cable and different conduit wiring methods as laboratory projects. Students will install various switches and receptacles in the cable and conduit wiring projects. Students will install the appropriately sized wire, conduit, and protective devices for the assigned laboratory projects. Students will correctly splice and terminate electrical building wire as part of each lab project. Students will follow Lockout/Blockout procedures and other recognized electrical workplace safety procedures at all times in lab.

ECONMT 168 INSTALLATION OF ELECTRICAL WIRING (2)
Lab: 6 hour(s)
Students calculate and layout of interior electric wiring systems followed by practical installations including rough in and finishing techniques.
Student Learning Outcomes:
Students will draw, read, and interpret electrical schematic diagrams and wiring plans. Students will analyze and troubleshoot faulty electrical wiring systems.

ECONMT 169 ALTERNATING CURRENT PRACTICES (2)
Lab: 6 hour(s)
This course offers a study in operating principles and electrical power systems. Theory of A.C. generators and motors, load calculations, efficiencies and power factor correction, and calculations related to these theories demonstrated with projects.
Student Learning Outcomes:
1. Apply appropriate Ohms laws, mathematical rules and trigonometry to solving electrical calculations. Given a supply voltage, the current flowing into a motor and the resistance of the motors windings, the student will apply Ohm’s laws and calculate the total Apparent Power, True Power, Reactive Power, Impedance, Inductive Reactance, Phase Angle and the Power Factor of the motor circuit. 2. Apply appropriate units of measure using Engineering notation. 3. Calculate AC circuit and transformer; power, voltage, current, resistance and impedance. 4. Given a project workstation that may be wired as an Edison 3 Wire Supply (two different phases of 120 volts and a neutral) students will calculate the current imbalance with various imbalanced loads. Then students will open the neutral circuit and find the imbalance in voltage as the circuit becomes a combination circuit. Finally, these calculations are checked against measured values on the workstation.

ECONMT 170 ELECTRICAL CODES AND ORDINANCES II (3) RPT3
Lecture: 3 hour(s)
Advanced electrical codes and ordinances are the focus of this course. General codes, wiring methods and fittings, and circuit requirements specified in the various ordinances are reviewed.
Student Learning Outcomes:
1. List electrical codes by topic and article. 2. Identify topic specific electrical code requirements such as; service size, circuit protection, branch circuits, and box sizing. 3. Interpret various electrical codes applied to various electrical installation examples.

ECONMT 171 ELECTRICAL CODES AND ORDINANCES I (3) RPT1
Lecture: 3 hour(s)
Basic electrical codes and ordinances are the focus of this course. General codes, wiring methods and fittings, and circuit requirements specified in the various ordinances are reviewed.
ECONMT 181  BASIC WIRING PRACTICES (3)
Lecture: 3 hour(s)
This course contains the study of basic electrical diagrams; such as, wiring plans, wiring diagrams, and ladder diagrams. Topics of discussion include: Architectural symbols and drawings, reading and interpreting plans and specifications, as well as the drawing of basic circuits.
Student Learning Outcomes:
1. Interpret Wiring Diagrams, Ladder Diagrams and Wiring Plans; then construct various switching systems from the drawings to industry standards.

ECONMT 182  BASIC DIAGRAM AND CIRCUIT PRACTICES (1)
Lab: 3 hour(s)
This course provides practical shop practice in the wiring of signal, communication and control circuits. Connection of device mechanisms such as, lights, buzzers and relays are specifically reviewed.
Student Learning Outcomes:
1. Identify and draw electrical symbols associated with signal, switching and volt voltage relay circuits. 2. Identify, draw, and interpret wiring and schematic diagrams associated with signal, switching and vol voltage relay circuits. 3. Convert wiring diagrams and wiring plans into associated schematic diagrams.

ECONMT 183  RESIDENTIAL ELECTRIC WIRING (3)
Lecture: 3 hour(s)
This course covers the design and layout of residential electrical wiring in accordance with the National Electrical Code and recognized best trade practices.
Student Learning Outcomes:
Students who complete this class with an aggregate score exceeding 70% will be able to calculate feeder and service loads for residential occupancies. Students who complete this class with an aggregate score exceeding 70% will be able to select wiring methods suitable for residential occupancies. Students who complete this class with an aggregate score exceeding 70% will be able to design wire sizes and outlet locations suitable for residential occupancies.

ECONMT 184  MOTOR CONTROL PRINCIPLES AND PRACTICES (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course will examine the testing, adjusting, servicing and connecting motors, generators and associated controllers. Reduced voltage starters and other motor starting techniques will be studied.
Student Learning Outcomes:
1. Demonstrate familiarity with the theory and principles of AC single and three phase motors, DC motors, generators and alternators. 2. Be able to install above machines by connecting power and control circuits, as well as demonstrate motor control troubleshooting skills, and the ability to identify electrical opens, shorts and ground faults. 3. Demonstrate the ability to solve motor control calculations, design and convert elementary diagrams of the advanced motor control systems from both written and oral instructions into workable wiring installations.

ECONMT 185  DIRECTED STUDY ELECTRICAL CONSTRUCTION AND MAINTENANCE (1) RPT2
Lecture: 1 hour(s)
This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Electrical Construction & Maintenance.

ECONMT 186  INDUSTRIAL ELECTRICAL PRINCIPLES AND PRACTICES (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course content includes the use of measuring instruments, connecting and testing transformer banks and connecting and testing industrial electronic control devices. This course discusses single phase and three phase transformers.
Student Learning Outcomes:
1. Identify single phase and three transformers as well as differentiate between the two types. 2. Safely connect three single phase transformers into a variety of connections for a three phase bank operation. 3. Be able to do calculations involving single phase as well as three phase transformers.

ECONMT 187  ADVANCED PROGRAMMABLE CONTROLLERS (4)
RPT2
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
Prerequisite: Electrical Construction and Maintenance 159
Programmable Logic Controller lecture and laboratory class, including Sequencers, Shift Registers, Analog I/O, and Subroutines, taught using RSLogix software.
Student Learning Outcomes:
1. Design, construct, and develop working PLC programmes using advanced PLC instructions.

ECONMT 188  ELECTRICAL CODE CALCULATIONS (3)
Lecture: 3 hour(s)
This is a course to improve one’s skill in the application of mathematical calculations for determining wire/conductor sizes, outlet number and size, pull boxes dimensions, conduit fill, device and conductor amperages, voltage drop, motor circuit components sizing, and service loads. The calculation will be based on the current rules and regulation as noted in the National Electrical Code standards.
Student Learning Outcomes:
1. List electrical codes by topic and article. 2. Identify topic specific electrical code requirements such as; service size, circuit protection, branch circuits, and box sizing. 3. Interpret various electrical codes applied to various electrical installation examples.

ECONMT 189  COMMERCIAL WIRING AND PRACTICES (2)
Lecture: 1 hour(s)
Lab: 3 hour(s)
Instruction is given in installation of wiring systems such as non metallic sheathed cable, armored cable, flexible metal conduit, electrical metallic
tubing, and PVC. Emphasis is given on National Electric Code standards.

Student Learning Outcomes:
The student will be able to wire a commercial electrical circuit following a wiring diagram using approved methods. The student will be able to take accurate voltage measurements using the meter’s low impedance scale and discern between actual voltage and so-called ghost or phantom voltages.

ECONMT 192 RESIDENTIAL WIRING AND PRACTICES (2)
Lecture: 1 hour(s)
Lab: 3 hour(s)
The course content includes the installation of residential wiring materials including non-metallic sheathed cable, armored cable, and flexible metal conduit for outlets, appliances and lighting.

Student Learning Outcomes:
The student will be able to wire a residential electrical circuit following a wiring diagram using approved methods.

ECONMT 193 CONDUIT BENDING AND CALCULATIONS (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This class teaches bending cutting and threading of conduits and the calculations that are included in these operations. EMT, rigid, and IMC conduit will be bent with hand and hydraulic benders.

Student Learning Outcomes:
1. Bend stubs, saddles, offsets, and back to back bends in EMT, IMC, and rigid conduit.
2. Thread IMC and rigid conduit.

ECONMT 193A CONDUIT BENDING LABORATORY (1) RPT1
Lab: 3 hour(s)
Corequisite: Electrical Construction and Maintenance 168

This class teaches bending and cutting of conduits and the calculations that are included in these operations. EMT conduit will be bent with hand benders.

Student Learning Outcomes:
Students will bend stubs, saddles, offsets, and back to back bends in EMT conduit.

ECONMT 195 GROUNDING: FUNDAMENTALS, APPLICATIONS AND PRACTICES (3)
Lecture: 3 hour(s)

This course will cover the fundamentals of electrical system grounding principles of reviewing definitions, theory, and equipment installations. Application to accepted industry practices, compliance to the National Electrical Code, review of lightning protection and electronic equipment grounding will be covered.

Student Learning Outcomes:
1. Differentiate between Grounding and Bonding. Define terms associated with grounding and bonding such as: ground, grounding, grounded, bonding, bonded, ground fault current etc. 2. State Grounding and Bonding requirements and identify NEC code sections for safety and compliance.
3. Be able to identify and apply NEC sections pertaining to Grounding and Bonding.

ECONMT 196 INFRASTRUCTURE WIRING PRACTICES (4)
Lecture: 1 hour(s)
Lab: 6 hour(s)
This course offers instruction in the installation, termination, testing and documentation of commercial infrastructure wiring including the following: Coaxial Cable, Category 3, 5, E, F, 6 Unshielded Twisted Pair, and Fiber Optics.

Student Learning Outcomes:
Students will be able to install, terminate, test and document infrastructure wiring.

ECONMT 197 LOW VOLTAGE ELECTRICAL PRACTICES (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course offers instruction in the installation, termination, testing and documentation of low voltage systems, such as lighting, communication, telephone, data, control systems, and similar low voltage applications.

Student Learning Outcomes:
1. Design and install structured cabling for residential low voltage applications.

ECONMT 199 JOURNEYMAN ELECTRICIAN EXAM PREPARATION (3) RPT3
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course will prepare the student for the State of California Electricians’ Certification Examination. The distance education version of the class uses the Internet, World Wide Web and personal e-mail.

Student Learning Outcomes:
1. Applies electrical calculations and measurements. 2. Identify trade specific electrical codes. 3. Pass a simulated Certification exam.

ECONMT 205 SOLAR ENERGY INSTALLATION & MAINTENANCE PRINCIPLES AND PRACTICES (2)
Lab: 6 hour(s)

This course is designed for individuals who have the basic electrical and mechanical skills of an energy technician or electrician and are looking to expand into the renewable energy field. This is a hands-on class to develop the fundamental principles and practices for installation and maintenance of solar, wind, and similar renewable energy systems. This course covers basic planning, installation, and maintenance of the necessary components for various renewable energy systems.

Student Learning Outcomes:
1. Demonstrate the ability to use safety harnesses while working on roofs.
2. Follow all safety rules and regulations while working on roofs, in attics and around all electrical equipment during the installation of a renewable energy system.
3. Analyze a site survey and develop a written report that accounts for shading, array orientation, mounting methods and equipment.
4. Perform a system installation following manufacturer’s directions.
5. Adapt a systems mechanical design to conform to the individual site assessment needs taking into account ambient temperature, verify component sizes and capacities. Demonstrate and install subsystem components to an industry acceptable standard.

ECONMT 212 SIGNIFICANT CHANGES NEC NATIONAL ELECTRICAL CODE (3) CSU RPT3
Lecture: 3 hour(s)
Prerequisite: Electrical Construction and Maintenance 172

Continuing education for the journeyman electrician. This course covers the changes to the National Electrical Code made during each 3 year code revision cycle. Each change to the code will be highlighted and how the change will impact the industry practices will be covered.

Student Learning Outcomes:
1. List electrical codes by topic and article. 2. Identify topic specific electrical code changes, such as: grounding, OCP, motors, transformers, hazardous locations, healthcare facilities. 3. Interpret and discuss the trade impact of various electrical codes changes.

ECONMT 215 SMALL WIND ENERGY SYSTEMS PRINCIPLES AND PRACTICES (3) CSU
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course is designed for individuals that have the basic electrical and
Course Descriptions

ECONMT 285 DIRECTED STUDY ELECTRICAL CONSTRUCTION AND MAINTENANCE (2)
Lecture: 3 hour(s)
This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Electrical Construction & Maintenance.

ECONMT 285L DIRECTED STUDY, ELECTRICAL CONSTRUCTION AND MAINTENANCE (LAB) (2)
Lab: 6 hour(s)
This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in Electrical Construction & Maintenance.

ECONMT 385 DIRECTED STUDY ELECTRICAL CONSTRUCTION AND MAINTENANCE (3)
Lecture: 3 hour(s)
This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in Electrical Construction & Maintenance.

ECONMT 385L DIRECTED STUDY, ELECTRICAL CONSTRUCTION AND MAINTENANCE (LAB) (3)
Lab: 9 hour(s)
This course allows students to pursue a directed study in Electrical Construction & Maintenance on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in Electrical Construction & Maintenance.

ECONMT 941 COOPERATIVE EDUCATION ELECTRICAL CONSTRUCTION & MAINTENANCE (4)
RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/ternship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/ternship in order to participate in program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

ELECTRICAL LINEMAN APPRENTICE

ELECLNM 701A ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING I (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s) Module 1A
Instruction is given in the generation of electricity; hydro, steam, wind, the elements of electricity, static, magnetism, electric circuit, transmission lines and cables, sub transmission lines and cables, Students receive training in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

Student Learning Outcomes:
1. Discuss the history and development of the electric utility industry. 2. Identify specific industry tools and materials and discuss their usage. 3. Select and demonstrate proper electric utility PPE equipment.

ELECLNM 701B ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING II (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s)
This course provides instruction in pole climbing; safe practices, installation of cross arms, insulator guys, hanging of transformer, stringing of lines, pulling cables, pole top rescue and vault rescue. Safety and first aid are emphasized.

Student Learning Outcomes:
1. Discuss the history and development of the electric utility industry. 2. Identify specific industry tools and materials and discuss their usage. 3. Select and demonstrate proper electric utility PPE equipment.

ELECLNM 702A ELECTRICAL LINEMAN APPRENTICE RELATED TRAINING III (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s)
Instruction is given in electricity including; electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, test, regulators and safety in maintenance are all emphasized in electricity including; electrical math, transformers, street light practices, map reading, and safety in maintenance.

Student Learning Outcomes:
1. Applied calculations of measurement involved with electrical installations such as; transformer calculations, lighting loads in series, and parallel. 2. Demonstrate map reading. 3. Identify safety in general utility maintenance.
ELECLNM 702B ELECTRICAL LINEMAN APPRENTICE RELATED
TRAINING II (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s)

Instruction is given in electricity including: electrical math, series and parallel circuits, motors, induced emf, mutual and self induction, direct current, alternating current, transformers connections, transformer fusing, capacitors, voltage regulators, definitions, core losses, polarity, markings, oil insulation, cooling practices, loading and testing, and oil circuit breakers. Street light practices, circuits, utilitarian systems, lamps, sodium and mercury lights, glassware, refractors, control of streetlights, map reading, forms, text, regulations and safety in maintenance are all emphasized.

Student Learning Outcomes:
1. Applied calculations of measurement involved with electrical installations such as; transformer calculations, lighting loads in series, and parallel. 2. Demonstrate map reading. 3. Identify safety in general utility maintenance.

ELECLNM 703A ELECTRICAL LINEMAN APPRENTICE RELATED
TRAINING III (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s)

Instruction is given in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead ending, guyig, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, live line maintenance using live line tools, safety and first aid.

Student Learning Outcomes:
1. Restate law G.0.095, safety orders, OSHA requirements. 2. Discuss the joint pole agreement of California. 3. State electrical service requirements.

ELECLNM 703B ELECTRICAL LINEMAN APPRENTICE RELATED
TRAINING III (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s)

Instruction is given in the stringent use of state law G.0.095, safety orders, OSHA requirements, overhead construction standards, overhead jobs, joint pole agreement of California, and electrical service requirements. Course reviews conductor sizes, splices, stringing, dead ending, guyig, rigging, transformer fusing, circulation current, trouble shooting, street lighting and public relations, live line maintenance using live line tools, safety and first aid.

Student Learning Outcomes:
1. Restate law G.0.095, safety orders, OSHA requirements. 2. Discuss the joint pole agreement of California. 3. State electrical service requirements.

ELECLNM 704A ELECTRICAL LINEMAN APPRENTICE CABLE
SPICER MODULE I (3)
Lecture: 2 hour(s)
Lab: 3 hour(s)

This course provides instruction in the application of rigging principles and practices on underground installations. In addition, the installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections will also be covered. State law requirements, safety and street lighting electrical systems will be introduced in this course.

Student Learning Outcomes:
1. Discuss the history and development of the underground electric utility industry. 2. Identify specific underground industry tools and materials and discuss their usage. 3. Select and demonstrate proper underground electric utility PPE equipment.

ELECLNM 704B ELECTRICAL LINEMAN APPRENTICE CABLE
SPICER MODULE B (3)
Lecture: 2 hour(s)
Lab: 2 hour(s)

This course provides instruction in the application of rigging principles and practices on underground installations. In addition, the installation of equipment, splicing theory, distribution circuits, oil circuit breakers, transformer characteristics, and connections will also be covered. State law requirements, safety and street lighting electrical systems will be introduced in this course.

Student Learning Outcomes:
1. Discuss the history and development of the underground electric utility industry. 2. Identify specific underground industry tools and materials and discuss their usage. 3. Select and demonstrate proper underground electric utility PPE equipment.

ELECLNM 709 ELECT CRAFT HELPER, ELECT LINEMAN APPR RELATED TRAINING IV (4)
Lecture: 4 hour(s)

This course is designed as entry level preparation for a student interested in careers in the electrical power industry. This introductory course covers the basic fundamentals of planning, installation and maintenance of high and low voltage electrical systems. Basic functions of generation, both hydro and steam are covered. The transmission and distribution of electrical power will be reviewed. Fundamentals of electricity, identification, function, and operation of components will be surveyed. Ohms law, safety, ropes, knots, rigging, and tools required in the trade will be reviewed. Civil service exam assistance will also be covered.

Student Learning Outcomes:
1. Discuss industry history & development of the grid. 2. List utility industry terms and definitions. 3. State electrical utility industry careers opportunities and requirements.

ELECTRN 002 INTRODUCTION TO ELECTRONICS (3) CSU
Lecture: 3 hour(s)

An overview of the field of applied electronics and its employment opportunities. Introduction to components, nomenclature and symbols. A familiarization of equipment, specifications and physical units. This is a broad introductory course for all students who need a survey of electronic applications and principles. Electronics as applied both historically and in today’s society is investigated. Typical topics included are a study of the natural forces that make electronics possible, present applications of electronics to the fields of medicine, transportation, science, communications, industry, and the start of the digital invasion into our homes and work.

Student Learning Outcomes:
Students will learn the basic electronics quantities and their application in analyzing DC and AC circuits.
### Course Descriptions

#### Electronics Technology

**ETNTLY 150 SOLDERING SURFACE MOUNT TECHNOLOGY (3)**  
**CSU RPT2**  
**Lecture:** 2 hour(s)  
**Lab:** 3 hour(s)  
This course provides an introduction of through hole soldering technology as well as principles of surface mount rework, show the range of specific equipment used in that process and provide a framework for learning about various rework methods. Recommended procedures for removal and replacement of surface mount chip components are also covered.  
**Student Learning Outcomes:**  
Students will be able to solder and de solder through hole and surface mount components.

**ETNTLY 151 DC THEORY AND CIRCUIT FUNDAMENTALS (3) CSU**  
**Lecture:** 3 hour(s)  
Instruction is given in basic electrical concepts, electron theory, Ohm's Law, Kirchhoff's Laws, series circuits, Parallel circuits, combination circuits, principles of magnetism; and the care, use, and construction of basic meters for voltage, current, and resistance measurements. Problems illustrating accuracy necessary in measurements are given.  
**Student Learning Outcomes:**  
Students will be able to analyze series, parallel, series parallel, thevenin and Norton circuits.

**ETNTLY 152 DC THEORY AND CIRCUIT FUNDAMENTALS LAB (2)**  
**Lab:** 6 hour(s)  
**Corequisite:** Electronics Technology 151  
Instruction is given in constructing basic electrical circuits. Series, parallel and series/parallel circuits are constructed and troubleshooting techniques are taught. Problems illustrating accuracy necessary in measurements are given.  
**Student Learning Outcomes:**  
Students will be able to use the equipment such as Digital Multimeter (DMM) and DC power supply to measure and troubleshoot various DC circuits.

**ETNTLY 153 APPLIED DC CALCULATIONS (1)**  
**Lecture:** 1 hour(s)  
**Corequisite:** Electronics Technology 151  
This course offers a review on basic arithmetic including addition, subtraction, multiplication, division, fractions, decimals, square roots, signed numbers, powers of ten, an introduction to algebra, and problems solving Ohm's Law and power calculations. Instruction is also provided in algebra, calculators, logarithms, graphs, phasors, and basic trigonometry as used in electronics.  
**Student Learning Outcomes:**  
Students will be able to apply mathematical problem solving models to DC circuits.

**ETNTLY 154 AC THEORY AND CIRCUIT FUNDAMENTALS (3)**  
**Lecture:** 3 hour(s)  
**Prerequisite:** Electronics Technology 151  
This course offers the Theory of AC Electronics as it applies to basic and advanced circuits found in analog electronics. The course prepares the student for more advanced studies in Communications and Digital Electronics. Subjects covered include Capacitors, Magnetic Circuits, Inductors, Sinusoidal Alternating Waveforms, Basic Elements and Phasers, Series and Parallel AC Circuits, Series Parallel AC Networks, Methods of Analysis, Network Theorems (AC), Power (AC), Resonance, Filters and Bode Plots, Pulse waveforms, and an introduction to System Analysis. Basic algebra and trigonometry will be used as the tools for understanding the AC circuit as it applies to electronics systems.  
**Student Learning Outcomes:**  
Students will use alternating current, inductance and capacitance, time constants and filters in analyzing and troubleshooting AC circuits.

**ETNTLY 155 AC THEORY AND CIRCUIT FUNDAMENTALS LAB (2)**  
**Lab:** 6 hour(s)  
**Prerequisite:** Electronics Technology 152  
An overview of the field in AC electronics that measures and analyzes the parameters and characteristics of AC circuits. The students studies their applications in electronic systems and becomes familiar with the various components used to make a viable circuit. In class, the students will also learn to construct and troubleshoot AC circuits.  
**Student Learning Outcomes:**  
Students will develop and improve their abilities to follow instructions, make accurate measurements and calculations for different AC circuits.

**ETNTLY 156 APPLIED AC CALCULATIONS (1)**  
**Lecture:** 1 hour(s)  
**Prerequisite:** Electronics Technology 153  
At the completion of this course, students will be able to perform mathematical functions used in AC circuit analysis. The topics include solving various algebraic equations, fractional equations, simultaneous equations, trigonometric functions, vector algebra, and logarithms. These topics will be covered with emphasis on calculations involving series, parallel, and series parallel AC circuits.  
**Student Learning Outcomes:**  
Students will be able to apply mathematical problem solving models to AC circuits.

**ETNTLY 157 SEMICONDUCTORS DEVICES AND APPLICATIONS (3)**  
**Lecture:** 3 hour(s)  
**Prerequisite:** Electronics Technology 154  
This course imparts knowledge of semiconductors, electron devices including diodes, transistors, and their application in electronic circuits such as Amplifiers, Switches, Power Supplies, Oscillators, and Integrated Circuits.  
**Student Learning Outcomes:**  
Students will be able to analyze and troubleshoot semiconductor circuits.

**ETNTLY 158 SEMICONDUCTORS DEVICES AND ELECTRONICS LABORATORY (3)**  
**Lab:** 9 hour(s)  
**Prerequisite:** Electronics Technology 155  
This is a semiconductor devices laboratory course. It includes lab exercises using semiconductors devices including diodes, transistors, and their application in electronic circuits such as Amplifiers, Switches, Power Supplies, Oscillators, and Integrated Circuits.  
**Student Learning Outcomes:**  
Students will demonstrate the ability to build, test and troubleshoot successfully. 12 Lab circuits constructed of semiconductor devices.

**ETNTLY 159 DIGITAL CIRCUITS AND APPLICATIONS (3)**  
**Lecture:** 3 hour(s)  
**Prerequisite:** Electronics Technology 154  
This is an introductory course in digital electronics and applications. The course covers the number systems, including the decimal, binary, octal, and hexadecimal number systems. The topics covered include the characteristics of TTL and CMOS logic families, combinational logic circuits, minimizing logic circuits, minimizing logic circuits using Boolean Operations and Karnaugh maps, encoders and decoders, sequential logic devices such as flip flops, counters, shift registers, and memory devices.
ETNTLGY 160  DIGITAL CIRCUITS AND APPLICATIONS LAB (2)

Lecture:  3 hour(s)
Lab:  2 hour(s)
Prerequisite:  Electronics Technology 158
This course provides information required by the electronics technician to aid in passing the electronics technician certification exam. The students will learn about transistors, digital logic, and basic digital circuitry. Students will use computer software to design and simulate basic digital circuits.
Student Learning Outcomes:
Students will be able to design and simulate basic digital circuits.

ETNTLGY 161  F.C.C. RADIO OPERATOR LICENSE (3)

Lecture:  3 hour(s)
Lab:  2 hour(s)
Prerequisite:  Electronics Technology 158
This course provides information required by the electronics technician to aid in passing the F.C.C. general radiotelephone license examination. The students will learn about the fundamentals of radio technology and the operation of various radio systems. Students will use computer software to design and simulate basic radio circuits.
Student Learning Outcomes:
Students will be able to design and simulate basic radio circuits.

ETNTLGY 162  INTRODUCTION TO ELECTRONICS

COMMUNICATIONS (3)

Lecture:  3 hour(s)
Lab:  2 hour(s)
Prerequisite:  Electronics Technology 158
This course covers circuit analysis of several complete AM/FM systems. The students will learn about electronic communications systems, such as AM, FM, and digital systems. Students will use computer software to design and simulate basic communication circuits.
Student Learning Outcomes:
Students will be able to design and simulate basic communication circuits.

ETNTLGY 163  INTRODUCTION TO ELECTRONICS

COMMUNICATIONS LAB (3)

Lecture:  3 hour(s)
Lab:  2 hour(s)
Prerequisite:  Electronics Technology 158
This course allows students direct laboratory application of the radio principles and techniques acquired in the lecture sessions. Laboratory experiments will include the construction and analysis of circuits, AM modulation, AM detection, FM modulation, frequency modulation, limiter, discriminator, and the construction, testing and alignment complete AM super heterodyne radio receiver. Students will use computer software to design and simulate basic communication circuits.
Student Learning Outcomes:
Students will be able to design and simulate basic communication circuits.

ETNTLGY 252  NETWORK CABLING SPECIALIST (3)

Lecture:  2 hour(s)
Lab:  3 hour(s)
Prerequisite:  Electronics Technology 158
This course is designed to provide students with the basic skills used in network technology. The successful completion of the course leads to a certificate in network cabling. Students will become familiar with EIA/TIA 568 Standards (Electronics Industry Association). Students will learn various cables used in network cabling industry such as CAT 5, CAT5E, and coaxial cables and correctly terminate them.
Student Learning Outcomes:
Students will be able to construct cables and make terminations used in network cabling.

ETNTLGY 253  FIBER OPTICS (3)

Prerequisite:  Electronics Technology 158
This course is designed to provide students with the knowledge and skills necessary to become entry level technicians in the network cabling industry with a concentration in fiber optics. Successful completion of this course leads to industry certification.
Student Learning Outcomes:
Students will be able to construct and test fiber optic cables.

ETNTLGY 254  COMPUTER APPLICATIONS FOR ELECTRONICS TECHNOLOGY (3)

Prerequisite:  Electronics Technology 158
This course covers circuit analysis of several complete AM/FM systems. The students will learn about electronic communications systems, such as AM, FM, and digital systems. Students will use computer software to design and simulate basic communication circuits.
Student Learning Outcomes:
Students will be able to design and simulate basic communication circuits.

ETNTLGY 255  COMPUTER BASED ELECTRONICS I (1)

Prerequisite:  Electronics Technology 158
This course covers circuit analysis of several complete AM/FM systems. The students will learn about electronic communications systems, such as AM, FM, and digital systems. Students will use computer software to design and simulate basic communication circuits.
Student Learning Outcomes:
Students will be able to design and simulate basic communication circuits.

ETNTLGY 941  COOPERATIVE EDUCATION ELECTRONICS TECHNOLOGY (4)

Prerequisite:  Electronics Technology 158
Cooperative Education is a work experience program involving the employer, the student, and the college to assist the student in demonstrating and updating the skills learned in the classroom. Students will be able to utilize computer software to effectively organize and communicate their work.
Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

ENGINEER OPERATION/MAINTENANCE

OPMAINT 228  STEAM PLANT OPERATION I (6)

Prerequisite:  Electronics Technology 158
Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the
combustion of fuels.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of a boiler system.
- SLO #2 Critically analyze and then organize information on the application of boiler devices and or systems.

**OPMAINT 229 STEAM PLANT OPERATION II (6)**

**Lecture:** 6 hour(s)

Instruction is given in steam engines, valve operating mechanisms and governors, and operating characteristics of steam engines. Course covers steam turbines, pumps, and auxiliary power plant equipment, steam plant efficiencies, boiler water treatment, troubleshooting, and power transmission. Completion of this second course prepares trainee to take Los Angeles City examination for steam engineer's license.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of a boiler system.
- SLO #2 Critically analyze and then organize information on the application of boiler devices and or systems.

---

**ENGINEER OPR/MAINTENANCE APPRENTICE**

**OPMA AP 100 O.S.H.A. BASED SAFETY STANDARDS: CONSTRUCTION & INDUSTRY (2)**

**Lecture:** 2 hour(s)

This course provides instruction on industry safety and health rules as it applies to workers and employers within the construction industry. Topics include fall protection, lock out tag out procedures, PPE, excavations, etc. are covered. Participants that meet the required hourly attendance and successfully pass the final exam will be eligible to receive their OSHA (30 hr) safety training certificate.

**Student Learning Outcomes:**
- SLO 1 Recognize appropriate training requirements and training methods.
- SLO 2 Define OSHA specific construction terms such as: competent person, construction work, confined space, working space, general duty clause.
- SLO 3 Select situational appropriate PPE.

**OPMA AP 703 ENERGY MANAGEMENT (4)**

**Lecture:** 3 hour(s)

The computer's use in the HVACR industry and the application of energy management technology in the improvement of energy efficiencies. The goal is to prepare the maintenance engineer to use of modern technology, including computers in the continuing quest for improved energy management.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of an energy management system.
- SLO #2 Critically analyze and then organize information on the application of a energy management system. SLO #3 Properly apply the English language to write an explanatory paper about rationals for using various energy management systems or practices. System. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications

**OPMA AP 704 ELECTRIC MOTOR CONTROL I FOR APPRENTICES (2)**

**Lecture:** 1 hour(s)
**Lab:** 3 hour(s)

This course provides instruction in basic motor control fundamentals, including the basic function of controlling devices, review of basic motors, selection of motors and definitions. The class will discuss definitions for controller components and symbols, familiarization of N.E.M.A. standards and review of one line, wiring and schematic diagrams. The class will also introduce the use of digital controllers for use in industry.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of a motor control system.
- SLO #2 Critically analyze and then organize information on the application of motor control systems. SLO #3 Properly install various motor control systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications

**OPMA AP 720 HVACR I (2)**

**RPT1**

**Lecture:** 1 hour(s)
**Lab:** 3 hour(s)

An introduction to the Principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration systems. Equipment selection, maintenance, and safety will be covered.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of a HVACR system.
- SLO #2 Critically analyze and then organize information on the application of HVACR equipment. SLO #3 Properly install various HVACR systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications

**OPMA AP 724 FUNDAMENTALS OF ELECTRICITY (2)**

**Lecture:** 1 hour(s)
**Lab:** 3 hour(s)

This course covers the basic principles and practices of A/C & D/C electricity. Analyzing series, parallel and complex circuits using Ohm's law, the power equation, Kirchoff's laws, and other applicable laws and equations.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of a circuit analysis.
- SLO #2 Critically analyze and then organize information on the application of a circuit analysis. SLO #3 Construct various electrical circuits. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications

**OPMA AP 727 INDUSTRIAL MECHANICS FOR APPRENTICES (2)**

**Lecture:** 1 hour(s)
**Lab:** 3 hour(s)

Principles and practices for application of electro mechanics in environmental and manufacturing process control. The course will cover the use of devices and equipment in the control of industrial production and the maintenance of a healthy and comfortable environment in buildings.

**Student Learning Outcomes:**
- SLO #1 Gather information on the various components of a mechanical system installation. SLO #2 Critically analyze and then organize information on the application of a mechanical system installation. SLO #3 Construct or troubleshoot various mechanical systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO's: #1. Locating Information. #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications
OPMA AP 739  LOCKSMITHING AND SECURITY SYSTEMS FOR APPRENTICESHIP (4)

Lecture:  4 hour(s)

This course is for the beginner. It is designed to teach a facilities maintenance worker how to perform in house locksmithing in a realistic and practical way. Topics will include: preventative maintenance, basic locksmithing tools, keys and locking devices, parts of a key, master key systems, installing basic lock sets, ‘Warded & Leer’ tumbler, side bar waler locks, electromagnetic locks, electric strikes and key coding machines.

Student Learning Outcomes:
SLO #1 Gather information on the various components of a lock system.
SLO #2 Critically analyze and then organize information on the application of locking systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications

OPMA AP 740  TENANT RELATIONS AND REPORTS FOR APPRENTICES (4)

Lecture:  4 hour(s)

The techniques used in maintaining wholesome and mutually beneficial relations with tenants and others is the primary purpose of this course. The need to understand the needs of all persons associated with a building is stressed. Instruction in the use of systems to maintain records and deliver timely and accurate reports is provided.

Student Learning Outcomes:
SLO #1 Gather information on the various good tenant relations. SLO #2 Critically analyze and then organize information on tenant relations. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications

OPMA AP 744  HVACR CONTROL SYSTEMS (2)

Lecture:  1 hour(s)
Lab:  3 hour(s)

This course provides an introduction to the principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration control systems. System control equipment selection, maintenance, and safety will be covered. Student Learning Outcomes: SLO #1 Gather information on the various components of a HVACR control system. SLO #2 Critically analyze and then organize information on the application of HVACR controls equipment. SLO #3 Property install various HVACR control systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for Information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking D: Communications

OPMA AP 745  PLUMBING CODE (4)

Lecture:  4 hour(s)

Instruction in plumbing codes and ordinances that affect rough in work in city and county areas; installation of wastes, vents, clean outs, traps, gas fittings, and gas vents: water pipe requirements.

Student Learning Outcomes:
SLO #1 Gather information on the various aspect of the international plumbing code. SLO #2 Critically analyze and then organize information on the application of the international plumbing code. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for Information. Relates To College Core SLOs: A: Critical Thinking D: Communications

OPMA AP 746  MAINTENANCE PLUMBING PRINCIPLES & PRACTICES (2) RPT2

Lecture:  1 hour(s)
Lab:  3 hour(s)

The course will provide instruction in plumbing principles and common practices. Theory and hands-on application will be applied on various common maintenance plumbing installations and repairs operations.

Student Learning Outcomes:
SLO #1 Gather information on the various components of a plumbing system installation. SLO #2 Critically analyze and then organize information on the application of plumbing devices and code for a basic plumbing system installation. SLO #3 Construct or troubleshoot various plumbing system applications. Relates to OPMA AP Program SLO: #1 Locate Information #2 Reading for information #3 Work independently & interdependently to accomplish a shared professional outcome. #4 Work safely with tools. Relates to CDM Department PLO’s: #1. Locating Information. #2. Reading for information. #4 Working safely with tools. Relates To College Core SLOs: A: Critical Thinking

OPMA AP 747  ELECTRICAL TROUBLESHOOTING (2)

Lecture:  1 hour(s)
Lab:  3 hour(s)

This course covers the basic principles and practices of electrical equipment and system troubleshooting. Proper use of tools and safety equipment will be covered.

Student Learning Outcomes:
SLO Construct and troubleshoot various applications of electrical systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. #4 Work safely with tools. Relates to CDM Department PLO’s: #2. Reading for information. #4. Working safely with tools. Relates To College Core SLOs: A: Critical Thinking

OPMA AP 748  ELECTRICAL CODES & ORDINANCES (NEC) (4)

RPT2

Lecture:  4 hour(s)

This course will introduce students to basic rule for the electrical trade. General codes, wiring methods and fittings, and circuits requirements specified in the various codes and ordinances will be covered.

Student Learning Outcomes:
SLO 1. List electrical codes by topic and article. SLO 2. Identify topic specific electrical code requirements such as: service size, circuit protection, branch circuits, and box sizing. SLO 3. Interpret various electrical codes applied to various electrical installation examples.

OPMA AP 749  HVACR II (2) RPT2

Lecture:  1 hour(s)
Lab:  3 hour(s)

This course introduces advanced principles and practices for the installation and maintenance of residential, commercial, and industrial heating, air conditioning, ventilation, and refrigeration systems. Equipment selection, maintenance, and safety will be covered.

Student Learning Outcomes:
SLO #1 Gather information on the various components of a HVACR system installation. SLO #2 Critically analyze and then organize information on the application of a HVACR system installation. SLO #3 Construct or troubleshoot various HVACR systems. Relates to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. #4 Work safely with tools. Relates to CDM Department PLO’s: #4 Working safely with tools. Relates To College Core SLOs: A: Critical Thinking

OPMA AP 750  INDOOR AIR QUALITY (4)

Lecture:  4 hour(s)

This course emphasizes on operation of systems to provide quality air to
In this course, students plan, draft, revise, and edit compositions of increasing sophistication and complexity, progressing from multi-paragraph essays to research papers. Writing is based on readings that cover topics that challenge students' thinking and provide an intellectual background for the assignments. Readings, discussion, and writing assignments may focus on fiction, non-fiction, memoirs, and/or poetry. This course prepares students for English 101.

**Student Learning Outcomes:**
1. Identify and correct intrusive mechanical errors.
2. In class timed essays.
3. Develop and/or improve vocabulary and comprehension.

**ENGLISH 068 READING LABORATORY (1) NDA RPT3**

**Lab:** 1 hour(s)

Students will improve their reading comprehension and develop critical reading skills through one to one conferences, workshops, and computer instruction with oversight from an instructor and assistance from tutors. Students will develop their understanding of purpose, audience, drafting, revision, and editing. Students will also focus on improving sentence and paragraph structure, and grammar and punctuation. This class is open to all students.

**Student Learning Outcomes:**
1. Develop reading strategies.
2. Identify main ideas for summaries and responses.
3. Develop and/or improve vocabulary and comprehension.

**ENGLISH 094 INTENSIVE GRAMMAR REVIEW (3) NDA RPT1**

**Lecture:** 3 hour(s)

This course offers an intensive review of the principles of standard American English: sentence structure, and variety, diction, and grammar, including parts of speech, verb forms and tenses, fragments, run-ons, and other issues in grammar and usage. Students will learn to identify errors and correct errors in selected texts. Instruction will also include research paper format and avoidance of plagiarism.

**Student Learning Outcomes:**
1. Identify and correct intrusive mechanical errors.
2. In class timed essays.
3. MLA format for source information.

**ENGLISH 100 ACCELERATED PREP: COLLEGE WRITING (3) NDA**

**Lecture:** 3 hour(s)

This course prepares students for academic reading, critical thinking, and writing expected in transfer and associate degree classes. Students plan, draft, revise, and edit compositions of increasing sophistication and complexity, progressing from multi-paragraph essays to research papers. Writing is based on readings that cover topics that challenge students' thinking and provide an intellectual background for the assignments. Readings, discussion, and writing assignments may focus on fiction, non-fiction, memoirs, and/or poetry. This course prepares students for English 101.

**Student Learning Outcomes:**
Write a well developed, coherent in class essay. Write a 4 page research paper, demonstrating MLA format and citations.

---

**OPMA AP 751 PRINT READING (4) RPT2**

**Lecture:** 4 hour(s)

This course covers instruction in basic blueprint reading including symbols, identification, and primary uses for each type of drawing will be covered.

**Student Learning Outcomes:**
SLO 1. Gather information from various types of blueprints. SLO 2. Critically analyze and then organize information gathered from various types of blueprints and related documentation. Related to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Related to CDM Department PLO's: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications

---

**OPMA AP 753 BOILERS FOR APPRENTICES (4)**

**Lecture:** 4 hour(s)

Related engineering information concerning high pressure steam plants in office buildings and industrial establishments are studied in this course. Emphasis is given to steam power plant, use of steam tables, types of boilers, construction of boilers, boiler accessories, settings for combustion equipment and heating surfaces; operation of steam boilers and the combustion of fuels.

**Student Learning Outcomes:**
SLO 1. Gather information on the various components of a boiler system. SLO 2. Critically analyze and then organize information gathered from various types of blueprints and related documentation. Related to OPMA AP Program SLO: #3: Work independently & interdependently to accomplish a shared professional outcome. Related to CDM Department PLO's: #1. Locating Information. #2. Reading for information. Relates To College Core SLOs: A: Critical Thinking D: Communications

---

**ENGLISH 021 ENGLISH FUNDAMENTALS (3) NDA**

**Lecture:** 3 hour(s)

This course focuses on the fundamentals of academic reading, writing, and critical thinking. It reinforces basic skills such as the correct use of punctuation, spelling, and sentence structure. Students incorporate these skills, along with sentence combining techniques, to write single paragraph responses progressing to short essays (250-500 words) that have an introduction, body, and conclusion.

**Student Learning Outcomes:**
1. Write a mechanically sound 5 paragraph essay.
2. Write a brief (500-600 word) research paper, demonstrating rudimentary MLA format.

---

**ENGLISH 028 INTERMEDIATE READING AND COMPOSITION (3)**

**Lecture:** 3 hour(s)

Prequisite: **English 21**

In this course, students plan, draft, revise, and edit compositions of increasing sophistication and complexity, progressing from multi-paragraph essays to research papers. Writing is based on readings that cover topics that challenge students' thinking and provide an intellectual background for the assignments. Readings, discussion, and writing assignments may focus on fiction, non-fiction, memoirs, and/or poetry. This course prepares students for English 101.

**Student Learning Outcomes:**
Write a well developed, coherent in class essay. Write a 4 page research paper, demonstrating MLA format and citations.

---

**ENGLISH 046 READING AND STUDY IMPROVEMENT (3) NDA**

**Lecture:** 3 hour(s)

Students review reading skills and strategies necessary for college success, including reading for main ideas, determining organizational patterns of details presented, and drawing logical conclusions in paragraphs and short essays. Readings and vocabulary study skills are 9th grade to college level. Students are introduced to more critical reading skills (determining author's purpose, tone, point of view, and intended audience) and literacy concepts (interpreting figures of speech, characterization, plot, setting, and theme).

**Student Learning Outcomes:**
1. Identification of topics and paraphrasing main ideas.
2. Development of vocabulary.
3. Application of critical reading skills.

---

**ENGLISH 067 WRITING LABORATORY (1) NDA RPT3**

**Lab:** 1 hour(s)

Students will improve their writing skills through one to one conferences, workshops, and computer instruction with oversight from an instructor and assistance from tutors. Students will develop their understanding of purpose, audience, drafting, revision, and editing. Students will also focus on improving sentence and paragraph structure, and grammar and punctuation. This class is open to all students.

**Student Learning Outcomes:**
1. Navigate the course management system.
2. Summarize texts.
3. Timed five paragraph essay.

---

**ENGLISH 094 INTENSIVE GRAMMAR REVIEW (3) NDA RPT1**

**Lecture:** 3 hour(s)

This course offers an intensive review of the principles of standard American English: sentence structure, and variety, diction, and grammar, including parts of speech, verb forms and tenses, fragments, run-ons, and other issues in grammar and usage. Students will learn to identify errors and correct errors in selected texts. Instruction will also include research paper format and avoidance of plagiarism.

**Student Learning Outcomes:**
1. Identify and correct intrusive mechanical errors.
2. In class timed essays.
3. MLA format for source information.

---

**ENGLISH 100 ACCELERATED PREP: COLLEGE WRITING (3) NDA**

**Lecture:** 3 hour(s)

Prequisite: **English 67**

This course prepares students for academic reading, critical thinking, and writing expected in transfer and associate degree classes. Students plan, draft, revise, and edit compositions of increasing sophistication and complexity, progressing from multi-paragraph essays to research papers. Writing is based on readings that cover topics that challenge students' thinking and provide an intellectual background for the assignments. Readings, discussion, and writing assignments may focus on fiction, non-fiction, memoirs, and/or poetry. This course prepares students for English 101.

**Student Learning Outcomes:**
Write a well developed, coherent in class essay. Write a 4 page research paper, demonstrating MLA format and citations.
complexity, progressing from multi paragraph essays to research papers. Writing is based on readings that cover topics that challenge students’ thinking and provide an intellectual background for the assignments. Readings, discussion, and writing assignments may focus on fiction, non fiction, memoirs, drama, and/or poetry. This course prepares students for English 101.

Student Learning Outcomes:
Write a well developed, coherent in class essay. Write a 4 page research paper, demonstrating familiarity with MLA format and citations.

**ENGLISH 101 COLLEGE READING AND COMPOSITION I (3) UC:CSU**

Lecture: 3 hour(s)
Prerequisite: English 28

In English 101, students extend their knowledge of the principles and structure of academic writing beyond the level of English 28 through the practice of writing essays and the analysis of non fiction and select short and full length fiction. The course includes an introduction to persuasive discourse, research skills, critical reading and thinking, and argumentation. Various compositions and extensive research assignments are required. English 101 fulfills the writing requirement for the Associate of Arts degree and fulfills the transfer requirement to a four year college.

Student Learning Outcomes:
1. Comprehend structure and themes of works of fiction and non fiction, from short essays to full length novels. 2. Conduct academic research. 3. Integrate sources using MLA format. 4. Demonstrate critical thinking and analytical skill.

**ENGLISH 101H COLLEGE READING AND COMPOSITION I (3) UC:CSU**

Lecture: 3 hour(s)
Prerequisite: English 28

In English 101, students extend their knowledge of the principles and structure of academic writing beyond the level of English 28 through the practice of writing essays and the analysis of non fiction and select short and full length fiction. The course includes an introduction to persuasive discourse, research skills, critical reading and thinking, and argumentation. Various compositions and extensive research assignments are required. English 101 fulfills the writing requirement for the Associate of Arts degree and fulfills the transfer requirement to a four year college. Honors students will be assigned readings and written analyses that extend well beyond the scope of the regular English 101 course.

Student Learning Outcomes:
1. Comprehend structure and themes of works of fiction and non fiction, from short essays to full length novels. 2. Conduct academic research. 3. Integrate sources using MLA format. 4. Demonstrate critical thinking and analytical skill.

**ENGLISH 102 COLLEGE READING AND COMPOSITION II (3) UC:CSU**

Lecture: 3 hour(s)
Prerequisite: English 101

This course develops critical thinking, reading, and writing skills beyond the level achieved in English 101. It emphasizes logical reasoning, analysis, and strategies of argumentation using literature and theories of literary criticism. Evaluations are made of texts that reveal the multicultural/global aspects of society, which include traditional and contemporary forms in fiction, poetry, essays, and drama.

Student Learning Outcomes:
1. Analyze a literary work that employs themes and theories, using MLA citation, emphasizing student interpretation not synthesis of sources. 2. Write an in class essay.

**ENGLISH 102H COLLEGE READING AND COMPOSITION II (3) CSU**

Lecture: 3 hour(s)
Prerequisite: English 101

This course develops critical thinking, reading, and writing skills beyond the level achieved in English 101. It emphasizes logical reasoning, analysis, and strategies of argumentation using literature and theories of literary criticism. Evaluations are made of texts that reveal the multicultural/global aspects of society, which include traditional and contemporary forms in fiction, poetry, essays, and drama.

Student Learning Outcomes:
1. Analyze a literary work that employs themes and theories, using MLA citation, emphasizing student interpretation not synthesis of sources. 2. Write an in class essay.

**ENGLISH 103 COMPOSITION AND CRITICAL THINKING (3) UC:CSU**

Lecture: 3 hour(s)
Prerequisite: English 101

English 103 helps students to develop their critical thinking and writing skills beyond the level achieved in English 101. The course emphasizes the application of research, logical reasoning, analysis, and strategies of argumentation in critical thinking and writing, using literature (both fiction and non fiction) and literary criticism as subject matter.

Student Learning Outcomes:
Students will be able to write argumentative essays and research papers integrating credible evidence that is clearly cited in MLA Format; students will be able to perform academic research resulting in the identification and integration of facts, opinions of authority and statistics from credible sources into their formal argumentative papers; students will be able to recognize the inappropriate and appropriate use of appeals in their sources; and students will be able to write a well developed argumentative essay.

**ENGLISH 103H COMPOSITION AND CRITICAL THINKING (3) CSU**

Lecture: 3 hour(s)
Prerequisite: English 101

English 103 helps students to develop their critical thinking and writing skills beyond the level achieved in English 101. The course emphasizes the application of research, logical reasoning, analysis, and strategies of argumentation in critical thinking and writing, using literature (both fiction and non fiction) and literary criticism as subject matter. Honors students will be assigned extensive readings and research papers beyond the regular English 103 course.

Student Learning Outcomes:
Students will be able to perform academic research resulting in the identification and integration of facts, opinions of authority and statistics from credible sources into their formal argumentative papers. Students will be able to write a well developed argumentative in class essay that is relatively free of grammatical errors within a time restricted format. Students will be able to recognize the inappropriate and appropriate use of appeals in their sources.

**ENGLISH 127 CREATIVE WRITING (3) CSU RPT3**

Lecture: 3 hour(s)
Prerequisite: English 28

Introductory workshop offers writers accessible, hands-on exercises in crafting poetry, personal narratives, short stories, and screenplays. Content includes analysis of select prose, poetry and basic vocabulary related to structure, form, genre and style, with special focus on in class peer critiques and revision as an integral component of the writing process. Workshop culminates in the delivery of a 40-50 page Writer’s Portfolio containing original writings students have created and revised during the semester.

Student Learning Outcomes:
1. Analyze and deconstruct the varied genres and techniques that exemplify creative writing. 2. Compose a variety original writings that reflect creative modes. 3. Interpret, critique and (help to) improve writings of fellow students.

**ENGLISH 203 WORLD LITERATURE I (3) UC:CSU**

Lecture: 3 hour(s)
Prerequisite: English 101

This course surveys world literature in translation, including representative selections from Asian, Greek, and Latin literature, and European masterpieces of the Middle Ages and Renaissance, and the Bible.
ENGLISH 205  ENGLISH LITERATURE I (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
Advisory: English 102
Prerequisite:
Lecture:
Student Learning Outcomes:
1. Students will be able to analyze assigned readings in relation to their historical period.

ENGLISH 206  ENGLISH LITERATURE II (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
Course will consist of a chronological survey of major authors and texts of British literature from the Romantic period, the Victorian Age, The Twentieth Century, and after. There is extensive reading and discussion of works as well as a strong writing component and emphasis on textual analysis. Examination of the relationship between historical events and literary works. Student Learning Outcomes: To gain an overview of the themes of British Literature from the Romantic Period through the Twentieth Century and After. To present analytical and critical responses to representative texts to develop written argumentative skills. To explore personal and academic interests for academic and life long learning interests.

ENGLISH 206H  ENGLISH LITERATURE II (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
Course will consist of a chronological survey of major authors and texts of British literature from the Romantic period, the Victorian Age, The Twentieth Century, and after. There is extensive reading and discussion of works as well as a strong writing component and emphasis on textual analysis, including examination of the relationship between historical events and literary works. Student Learning Outcomes: To gain an overview of the themes of British Literature from the Romantic Period through the Twentieth Century and After. To present analytical and critical responses to representative texts to develop written argumentative skills. To explore personal and academic interests for academic and life long learning interests.

ENGLISH 207  AMERICAN LITERATURE I (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
This course surveys American literature from 1608 to the Civil War, emphasizing major writers and works, as well as writers who suggest the diversity of subject and opinion in American literature.
Student Learning Outcomes:
SLO 1: Demonstrate an understanding of the context "historical, intellectual, social, and cultural" on a broad range of American literature from the Colonial Period to the Civil War Period. SLO 2: Identify major literary figures and their works in the period. SLO 3: Assess the historical development and cultural impact of ideas that recur in American literature.

ENGLISH 208  AMERICAN LITERATURE II (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
This survey of American literature from the Civil War period to the present emphasizes major writers and works in order to understand, appreciate, and investigate multicultural influences within national identity.
Student Learning Outcomes:
1. Recognize distinctive features of the major writers, literary works, movements, trends and genres in a broad range of American Literature from the mid 1800s to the present. 2. Demonstrate an understanding of these works in context, including, though not limited to, historical, philosophical, social, political, religious, psychological, biographical, artistic backgrounds.

ENGLISH 212  POETRY (3) UC:CSU RPT1
Lecture: 3 hour(s)
Prerequisite: English 101
ENGLISH 212 features the reading, discussion, and analysis of selected American, British, and world poetry. Students will also write poetry. The course is designed to increase the students' understanding and enjoyment of poetry.
Student Learning Outcomes:
1. Demonstrate knowledge of voice, imagery, and poetic conventions of form and sound, using original language. 2. Effectively analyze poetry in light of historical context, critical theories, and/or formal elements.

ENGLISH 212H  POETRY (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
ENGLISH 212 features the reading, discussion, and analysis of selected American, British, and world poetry. Students will also write poetry. The course is designed to increase the students' understanding and enjoyment of poetry. Honors students will be assigned extensive readings and research papers beyond the regular English 212 course.
Student Learning Outcomes:
1. Demonstrate knowledge of voice, imagery, and poetic conventions of form and sound, using original language. 2. Effectively analyze poetry in light of historical context, critical theories, and/or formal elements.

ENGLISH 215  SHAKESPEARE I (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
Advisory: English 102
Course introduces students to Shakespeare’s prose and poetry through several major plays and sonnets with an additional examination of Elizabethan England and the relationship between historical events and literary works. Course features a strong reading and writing component with an emphasis on class discussion, research and textual analysis.
Student Learning Outcomes:
1. Understand dramatic technique and nuances of language in Shakespearean poetry and drama. 2. Recognize and analyze Shakespearean use of genre (Comedy, History, Tragedy, Romance), theme, character, setting, humor and allusion. 3. Compare and interpret Shakespearean drama through theatrical presentation.

ENGLISH 215H  SHAKESPEARE I (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: English 101
Advisory: English 102
Course introduces students to Shakespeare’s prose and poetry through several major plays and sonnets with an additional examination of Elizabethan England and the relationship between historical events and literary works. Course features a strong reading and writing component with an emphasis on class discussion, research and textual analysis. Honors students will be assigned extensive readings and research papers beyond the regular Shakespeare 215 course.
Student Learning Outcomes:
1. Understand dramatic technique and nuances of language in Shakespearean poetry and drama. 2. Recognize and analyze
Shakespeare’s use of genre (Comedy, History Tragedy, Romance), theme, character, setting, humor, and allusion. 3. Compare and interpret Shakespearean drama through theatrical presentation.

ENGLISH AS A SECOND LANGUAGE

E.S.L. 004A COLLEGE ENGLISH AS A SECOND LANGUAGE IV:
WRITING AND GRAMMAR (6)
Lecture: 6 hour(s)
Prerequisite: ESL 3A
In ESL 4A, students continue to study grammar, sentence writing and paragraph writing. They also move forward to producing simple essays. ESL 4A is part of a sequence of ESL writing courses that prepare students for college level composition.
Student Learning Outcomes:
Students will employ appropriate grammar to produce simple, organized, three paragraph descriptive, narrative, and expository essays.

E.S.L. 004B COLLEGE ENGLISH AS A SECOND LANGUAGE IV:
READING AND VOCABULARY (3)
Lecture: 3 hour(s)
Prerequisite: ESL 3B
Students review the skills learned in 3B and practice new skills, including taking notes on readings and summarizing main ideas from notes, beginning outlining, and expanding dictionary skills. Students also learn new vocabulary, including different forms of new words.
Student Learning Outcomes:
Students will take notes on readings and summarize main ideas, begin outlining and expand dictionary skills to develop vocabulary.

E.S.L. 005A COLLEGE ENGLISH AS A SECOND LANGUAGE V:
WRITING AND GRAMMAR (6)
Lecture: 6 hour(s)
Prerequisite: ESL 4A
In ESL 5A, students consolidate grammar and paragraph writing skills. They also practice writing organized, well developed essays. ESL 5A is part of a sequence of courses that prepare students for college level composition.
Student Learning Outcomes:
Students will write organized, well developed five paragraph essays in a variety of rhetorical modes.

E.S.L. 005B COLLEGE ENGLISH AS A SECOND LANGUAGE V:
READING AND VOCABULARY (3)
Lecture: 3 hour(s)
Prerequisite: ESL 4B
ESL 5B students review the skills learned in ESL 4B, plus take reading notes and organize them into an outline and practice strategic reading skills for test taking. Students also acquire new vocabulary and practice figuring out new words using prefixes and suffixes.
Student Learning Outcomes:
Students will review the skills learned in ESL 4B and practice new skills, including understanding inferences and organizing notes into a detailed outline. Students will learn reading strategies for test taking.

E.S.L. 006A COLLEGE ENGLISH AS A SECOND LANGUAGE V:
WRITING AND GRAMMAR (6)
Lecture: 6 hour(s)
Prerequisites: ESL 5A;
In ESL 6A students practice prewriting, editing, and rewriting skills that will lead to organized, well developed essays. A short research paper is also included. ESL 6A is part of a sequence of ESL writing courses that lead to college level composition.
Student Learning Outcomes:
Students will use critical thinking skills to write college level compositions, including research based topics. Students will learn self editing and peer editing skills.

E.S.L. 003A COLLEGE ENGLISH AS A SECOND LANGUAGE III:
WRITING AND GRAMMAR (6)
Lecture: 6 hour(s)
Prerequisite: ESL 2
In ESL 3A, students continue to learn good sentence writing, which includes basic punctuation and grammar. Students are also introduced to beginning level paragraph writing. ESL 3A is part of a sequence of ESL writing courses that prepare students for college level composition.
Student Learning Outcomes:
Students will be able to identify, utilize and demonstrate basic speaking, listening, grammar, reading, and writing skills at a beginning intermediate level.

E.S.L. 003B COLLEGE ENGLISH AS A SECOND LANGUAGE III:
READING AND VOCABULARY (3)
Lecture: 3 hour(s)
Prerequisite: ESL 2
ESL 3B students learn basic English reading skills including previewing, skimming, scanning, main idea identification, and basic dictionary skills. Students learn new vocabulary and practice figuring out word meaning from context.
Student Learning Outcomes:
Students will utilize previewing, skimming, and scanning to comprehend a text, and will be able to understand simple charts and graphs and summarize readings.

E.S.L. 003C COLLEGE ENGLISH AS A SECOND LANGUAGE III:
LISTENING AND SPEAKING (3)
Lecture: 3 hour(s)
Prerequisite: ESL 2
In ESL 3C, students practice listening and speaking to communicate basic information regarding everyday school, work and social topics. They make class presentations based on oral interviews, learn common idioms, and practice pronunciation of pairs of similar sounding words which commonly present difficulty.
Student Learning Outcomes:
Students will be able to understand and follow oral and written directions by responding appropriately to spoken questions, statement, and prompts; discriminate between statements of fact and opinion, questions and commands; and produce short answers and simple sentences expressing fact and personal opinion.

E.S.L. 008 COLLEGE ENGLISH AS A SECOND LANGUAGE 8:
ADVANCED ESL COMPOSITION (6)
Lecture: 6 hour(s)
Prerequisites: English 21; ESL 6S
ESL 8 is a course in written composition and critical reading skills for the English as a Second Language student. The emphasis is on writing based primarily on critical reading and secondarily on life experiences. Advanced grammar skills are emphasized throughout each lesson.
Student Learning Outcomes:
Students will write a series of essays leading up to a research paper.
ENVIRONMENTAL DESIGN

ENV 101 FOUNDATIONS OF DESIGN I (3)
Lecture: 1 hour(s)
Lab: 4 hour(s)
Students develop creative, conceptual and analytical skills by creating simple to complex two and three dimensional projects based on nature systems and structural integrity. Connections between movement, rhythm, cycle, kinematics and mathematical formulation are explored in class as a foundation for smart spaces. Students will learn to properly communicate architectural concepts through drawings, renderings, physical models, and computer 3D modeling. Form and space design principles, theories, order and methodology are explored and incorporated into student projects. Process and procedures are applied to personal innovative projects inspired by Gaudi, Buck Fuller, Frank Lloyd Wright and Peter Eisenman. The profession of architecture and its relationship to others for the life cycle and sustainable synergy in the AEC Industry (Architecture, Engineering and Construction) are defined. This course is critical for students interested in pursuing a higher degree in architectural or a related design field. Students will also create an electronic portfolio of their work.

Student Learning Outcomes:
1. Students will identify patterns found in nature.
2. Students will apply nature's patterns in developing structural design model compositions.
3. Students will develop drawings using balance, rhythm, cycles, movement and mathematical formulation.

ENVIRONMENTAL SCIENCE

ENV SCI 001 THE HUMAN ENVIRONMENT: PHYSICAL PROCESSES (3) UC:CSU
Lecture: 3 hour(s)
Introduction to the environmental mechanisms that constitute our life support systems and the social, political and economic factors that are the ultimate cause of these problems. This includes an examination of the difference between science and technology and the limits to technological solutions to our environmental problems. The basic science required to understand how our environmental systems work is presented followed by analysis of the essential components of our life support systems and how we impact them. Finally, the major environmental issues are analyzed along with potential solutions to these problems where they exist.

Student Learning Outcomes:
Student Learning Outcomes (SLOs) Upon successful completion of the course, the student will be able to: 1. Articulate the basics of environmental science including the earth's systems, human population dynamics, and the status of our natural resources. 2. Discuss the basic science that explains how our environmental system works. 3. Describe the scientific method, the nature of scientific inquiry and apply the scientific process to assess real world problems and situations. 4. Discuss the status of environmental quality and pollution, and suggest possible remediation of problems. 5. Discuss information on global changes and the implications for the future. 6. Understand and discuss the interrelationship between the environment and society including influences of economics, aesthetics, culture, ethics, and law. 7. Observe the various views of others on the state of our environment. 8. Reflect on his or her own experiences about the environment and its present status.

FASHION DESIGN

FASHDNS 101 INTRODUCTION TO FASHION DESIGN (2)
Lecture: 1.5 hour(s)
Lab: 1.5 hour(s)
This course will introduce the student to the opportunities in the field of fashion design. Students will learn how vocabulary, math skills, and study skills are applicable to the field, better preparing them to enter a full time program. Students will explore different creative tools to create fashion designs. Course will include hands-on activities and courses in the field. Students will also create an electronic portfolio of their work.

Student Learning Outcomes:
Students will develop a project that best suits the field of fashion design.

FASHDNS 111 CLOTHING CONSTRUCTION (4) CSU
Lecture: 1.5 hour(s)
Lab: 7.5 hour(s)
The students will be given instruction in single needle machine operation, sewing techniques projects, garment assembly projects, occupational information and method of evaluation and relationship to the Fashion Industry. Basic information needed for entry level employment is provided. Students will develop a portfolio of their work.

Student Learning Outcomes:
Students will develop a portfolio of garment assembly projects, occupational information and method of evaluation and relationship to the Fashion Industry. Basic information needed for entry level employment is provided.

FASHDNS 112 BASIC FASHION ART AND DESIGN (4) CSU
Lecture: 1.5 hour(s)
Lab: 7.5 hour(s)

Instruction includes drawing the women's fashion figure, drawing children and men's figures, flats, various styles and details. Introduction to color, design theory, fabric properties and rendering. Merchandising a garment line.

Student Learning Outcomes:
Students will develop a portfolio of drawings including men's and women's wear.

FASHDNS 118 ADVANCED CLOTHING CONSTRUCTION (2)
Lecture: 1 hour(s)
Lab: 3 hour(s)
Prerequisite: Fashion Design 111
The objective of this course is to advance the sewing skills of students using specialized machinery. Students will construct garments using knit fabric, lycra/spandex, and chiffon.

Student Learning Outcomes:
Students will develop a one piece swimsuit with bra cups, hipline lining and specialized elastics. Students will construct a lined skirt with French seams and invisible zipper.

FASHDNS 119 HISTORY OF COSTUME (3)
Lecture: 3 hour(s)
This course surveys the origins and development of clothing from prehistoric times through the 20th century. Students will explore costume from its earliest origins through adaptation and assimilation into popular "fashion" in each century. Instruction will include in-depth study of fashion trends, creators, and political climate that has influenced the creation of men's and women's fashion. The influence of historical costume on contemporary dress is discussed.

Student Learning Outcomes:
Students will create a presentation board tracing the historical and cultural influences in a specific period and prepare a research paper including multiple media resources, a bibliography and the option of including visual elements.
FASHDSN 120  BASIC PATTERN MAKING & DESIGN (4) CSU
Lecture:  1.5 hour(s)
Lab:  7.5 hour(s)
Prerequisite:  Fashion Design 111; Fashion Design 112
Instruction is given on drafting the basic block, multiple darts and gathers, style lines, sleeves, collars, skirts, and bodice silhouettes.
Student Learning Outcomes:
Student will execute a pattern and garment utilizing basic pattern manipulations. Student will design and create a sketch for an original dress style from pattern through sewn garment that will include specific elements.

FASHDSN 122  GRADING AND MARKER MAKING (4)
Lecture:  1.5 hour(s)
Lab:  7.5 hour(s)
Instruction is given in grading the basic block, multi patterns, the complete pattern for men, women and children, in a variety of styles, make a marker, manipulate the one and two darts block, draft the basic dart positions, demonstrate the slash and pivot methods, draft extensions, button placement and facing.
Student Learning Outcomes:
Student will grade a princess style pattern including facings. Student will grade a princess style pattern including facings. Student will use industry related software procedures to grade basic patterns

FASHDSN 125  TEXTILES, FIBERS AND FABRICS, PROPERTIES
AND MANUFACTURING (3) CSU
Lecture:  3 hour(s)
This course is an introduction and overview of trade terminology, characteristics of fabric and the difference between cellulose, protein and man made fibers. Topics discussed include: types of yarns and properties, twist yarn, yarn numbering systems and factors in yarn influencing quality. Woven, knitted, tufted, non woven fabrics and additional fabrication methods will be discussed.
Student Learning Outcomes:
1. Student will identify and name specific fabrications and compile a fabric notebook.
2. Students will be able to distinguish between basic fiber groups through burn and chemical tests.
3. Students will recognize and understand basic weaves and knits.

FASHDSN 126  MANUFACTURING AND DESIGN ROOM PROCESS
(1) CSU
Lecture:  1 hour(s)
Instruction is provided on manufacturing and design room process including industry overview and terminology. Cost sheets, specification sheets and inspiration boards will be emphasized in the course.
Student Learning Outcomes:
Student will execute a specification sheet. Student will create a cost sheet. Student will design and present an inspiration board.

FASHDSN 130  DRAPING & DESIGN (4) CSU
Lecture:  1.5 hour(s)
Lab:  7.5 hour(s)
Prerequisite:  Fashion Design 120
Instruction is given in fundamental draping procedures. The basic block and dart variations, yoke styles, torso styles, advanced skirts, cowls, stretch knits, and current style adaptation are practiced. Student Learning Outcomes:
Student will design and create a contour blouse style and complete a finished pattern. Student will design and create a casual coordinate group including a knit top, pant and jacket and completion of a finished pattern.

FASHDSN 132  ADVANCED PATTERNS AND DESIGN (4) CSU
Lecture:  1.5 hour(s)
Lab:  7.5 hour(s)
Prerequisite:  Fashion Design 120 and Fashion Design 122
Instruction is given in given in torso, jacket and pant blocks, sleeves in one with the bodice, neckline variations, and style adaptations according to current styling.
Student Learning Outcomes:
Student will design and create a contour blouse style and complete a finished pattern. Student will design and create a casual coordinate group including a knit top, pant and jacket and completion of a finished pattern.

FASHDSN 137  BUSTIER CREATION (2)
Lab:  6 hour(s)
Prerequisites:  FASHDSN 111, 112, 120
Research historical bustier (corset foundation) designs and construction methods and adapt them to create currently fashionable bustier.
Student Learning Outcomes:
1. Students will be able to alter a basic French block to fit a form and construct an evening dress foundation with pads and bones.
2. Students will be able to drape or draft a bustier or strapless foundation and construct and fit from 3 options.
3. Students will be able to drape or draft a bustier or corset using corset boning techniques.

FASHDSN 138  TAILORING TECHNIQUES FOR READY TO WEAR (2)
Lab:  4 hour(s)
Prerequisites:  FASHDSN 111 or 222.
The objective of this course is to advance the tailoring skills of fashion design students. Instruction will be given on preparation and cutting of fabric, basic hand stitching, the use of steam pressing equipment, and basic elements of tailored apparel.
Student Learning Outcomes:
1. Students will construct a lined jacket incorporating required elements.

FASHDSN 139  COORDINATED SPORTSWEAR (2) CSU
Lecture:  1 hour(s)
Lab:  3 hour(s)
Prerequisite:  Fashion Design 122
Advisory:  Fashion Design 116; Fashion Design 138
Instruction is given on the development of coordinated sportswear including story board presentation and critique. This class has been developed to focus on the most important component of the local apparel industry with concentration on jacket and pant construction and coordination of multiple fabrications within a group.
Student Learning Outcomes:
Student will develop and present a story board for a coordinated sportswear group. Student will design produce elements of a coordinated sportswear group.

FASHDSN 140  ADVANCED DRAPEING & DESIGN (2)
Lecture:  1 hour(s)
Lab:  2 hour(s)
Prerequisite:  Fashion Design 130
This course includes the draping of selected garment types & style innovations. Students use either muslin or fashion fabric according to design and fabrication. Original designs are created & executed in fabric.
Student Learning Outcomes:
Student will drape and create a bias gown inspired by Vionette including a complete pattern. Student will drape and create an advanced style contemporary jacket using innovative style lines and will draft a complete pattern.
FASHDSN 141 ADVANCED DESIGN (4) CSU
Lecture: 1.5 hour(s) 
Lab: 7.5 hour(s) 
Prerequisite: Fashion Design 130 and Fashion Design 132 
Instruction is given in knit blocks, specialized fabrics, dartless blocks, knock-offs, and specialized projects relating to current trends. 
Student Learning Outcomes: 
Student will replicate an intricate pant style including a complete pattern and finished garment. Student will design and create a swim suit using industry required fabrications and draft of complete pattern. Student will design and construct a cocktail dress in appropriate assigned fabrications using drafting and draping techniques and complete pattern.

FASHDSN 142 MANUFACTURING PRODUCTION (4) CSU 
Lecture: 1.5 hour(s) 
Lab: 7.5 hour(s) 
Prerequisite: Fashion Design 141 
Instruction is given in design and creation of garments for showing to the apparel industry. Included is the creation of children’s and men’s designs along with evening and avant garde styles and the development of a perfect production patterns for a minimum of two ensembles. Field trips, senior evaluation, and job orientation are also included. 
Student Learning Outcomes: 
Student will be required to complete two original designs for selected categories to be presented in the department fashion show.

FASHDSN 147 FASHION SHOW PRODUCTION (2) 
Lecture: 1.5 hour(s) 
Lab: 1.5 hour(s) 
Instruction is given on developing a theme and overall concept for presenting a fashion show. Topics include history of fashion presentations, model selection, fitting, stage design and execution plus behind the scenes production of a department fashion show. 
Student Learning Outcomes: 
1. Formulate a fashion show production plan including: a preliminary budget, venue description, and show categories.

FASHDSN 148 ACTIVEWEAR DESIGN (2) 
Lecture: 1 hour(s) 
Lab: 2 hour(s) 
Prerequisite: Fashion Design 132 
Instruction is given in the specialized area of activewear. Focusing on fabrication, design, inner construction, and sewing techniques. The student will draft basic pattern blocks, design and construct an activewear garment. 
Student Learning Outcomes: 
1. Students draft and correct a basic dartless knit block to their personal measurements and body alignment.

FASHDSN 151 ADVANCED FASHION ART AND DESIGN (2) 
Lecture: 1 hour(s) 
Lab: 2 hour(s) 
Prerequisite: Fashion Design 112 
Instruction is given on design and creation of garments for showing to the apparel industry. Included is the creation of children’s and men’s designs along with evening and avant garde styles and the development of a perfect production patterns for a minimum of two ensembles. Field trips, senior evaluation, and job orientation are also included. 
Student Learning Outcomes: 
Student will develop a portfolio and prepare a resume.

FASHDSN 185 DIRECTED STUDY FASHION DESIGN (1) RPT2 
Lecture: 1 hour(s) 
This course allows students to pursue directed study in Fashion Design on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one fashion course to take this class. 
Student Learning Outcomes: 
The outcome will vary depending on the contract with the instructor. The student will formulate a project based on a topic in Fashion Design and related topics.

FASHDSN 222 SAMPLE MAKING AND DESIGN I (2) 
Lab: 6 hour(s) 
The fundamentals of garment construction using industrial patterns, marker making and industrial power machines. Students are assigned garment projects which demonstrate basic techniques, combining classic with modern manufacturing techniques, with special emphasis on pattern layouts for plaid and prints. 
Student Learning Outcomes: 
Students will develop a portfolio of sewing techniques and list the sequence of assembly.

FASHDSN 223 SAMPLE MAKING AND DESIGN II (2) 
Lab: 6 hour(s) 
The objective of this course is to advance the sewing skills of fashion design students. Students are assigned to create and construct a coordinated group using industrial patterns. Selected blouses, shirts, pants and jacket are made. 
Student Learning Outcomes: 
Students execute a coordinated group including a shirt, pant, and jackets. This project will be completed in children’s wear.

FASHDSN 224 SAMPLE MAKING AND DESIGN III (2) 
Lab: 6 hour(s) 
Instruction is provided on construction and fitting of selected commercial patterns adapted to industry standards. Students receive instruction in the theory of color, line and proportion. They create or select designs suitable to the individual and occasion. Selected soft dressmaker type coats, suits, vests, blouses, and dresses are made. 
Student Learning Outcomes: 
Students will execute independent items including a lined pant or skirt, a lined pant or skirt, a shirt or blouse and 1 knit style.

FASHDSN 225 PATTERN MAKING AND DESIGN I (2) 
Lab: 6 hour(s) 
Advisory: Fashion Design 222 
Entry level class offering instruction in development of a basic block, test fitting, and additional basic pattern making fundamentals. 
Student Learning Outcomes: 
Students will draft and construct a basic block. Student will create and construct an original design based on required elements and quality of construction.

FASHDSN 226 PATTERN MAKING AND DESIGN II (2) 
Lab: 6 hour(s) 
Prerequisite: Fashion Design 225 
Intermediate level class offering instruction on the torso bodice, dartless block and drafting a basic pant then using the blocks to create dresses, shirt styles and pant variations. Advanced skirts styling is also included. 
Student Learning Outcomes: 
Students will draft and construct a torso block from the basic sloper. Students will draft a shift dress with mandarin collar, princess seams, required sleeve elements, and construct a full muslin. Students will draft and construct a princess dress including required elements.
FASHDSN 227  PATTERN MAKING AND DESIGN III (2)
Lab:  6 hour(s)
Prerequisite:  Fashion Design 226
Advanced level class offering instruction on jackets, advanced sleeve styles, contouring fundamentals, and basic bodysuits and leotards.
Student Learning Outcomes:
1. Students will draft or knock off and construct a basic part including required elements to personal measurements. 2. Students will draft a bolero with a close fitting raglan and a shawl collar and construct a muslin. 3. Students will draft a tailored jacket block, construct a shell with 2 piece sleeve, revere collar, and traditional jacket facing.

FASHDSN 228  PATTERN GRADING AND DESIGN I (2)
Lab:  6 hour(s)
This course offers training in increasing and decreasing the pattern size for basic slopers in the several size ranges of men's, women's and children's wearing apparel. Also includes practice in selected methods and in the use of "grading machines" currently used in industry.
Student Learning Outcomes:
Student will grade a princess style pattern including facings.

FASHDSN 229  PATTERN GRADING AND DESIGN II (2)
Lab:  6 hour(s)
Selected whole garments are graded. Research and study is done on the laws of proportionate growth, size ranges, and difficult pattern shapes. Principles of design are correlated to grading problems.
Student Learning Outcomes:
Student will grade a stylized dress including stylized darts and facings.

FASHDSN 230  CONTEMPORARY GARMENT CONSTRUCTION TECHNIQUES (1) RPT2
Lab:  3 hour(s)
This course provides the opportunity for students to review and practice various hand and machine sewing techniques. Students concentrate on garment assembly projects using industrial methods.
Student Learning Outcomes:
1. The outcome will vary depending on the needs of the student. The student will complete sewing related projects based on topics in core Fashion classes.

FASHDSN 231  CONTEMPORARY PATTERN MAKING TECHNIQUES (1) RPT2
Lab:  3 hour(s)
This course provides fashion students the opportunity to review and practice various pattern making techniques. Students concentrate on pattern drafting projects using industry methods.
Student Learning Outcomes:
The outcome will vary depending on the needs of the student. The student will complete pattern related projects based on topics in core Fashion classes.

FASHDSN 236  FASHION SKETCHING AND DESIGN I (2)
Lab:  6 hour(s)
Instruction includes fashion figure drawing, rendering fabrics and garments on figures, designing selected garments, study of color theory and techniques.
Student Learning Outcomes:
1. Student will draw a group of technical flat.

FASHDSN 237  FASHION SKETCHING AND DESIGN II (2)
Lab:  6 hour(s)
Prerequisite:  Fashion Design 236
Instruction includes women's day dresses, children's fashion figures and garment designs, watercolor or gouache techniques, technical illustrations, contemporary graphic layouts and the portfolio development.
Student Learning Outcomes:
1. Students will execute fabric rendering with water colors and markers including design of women's, men's and children's styles.

FASHDSN 238  FASHION SKETCHING AND DESIGN III (2)
Lab:  6 hour(s)
Prerequisite:  Fashion Design 236; Fashion Design 237
Instruction includes developing male croquis models, designing formal wear for men, women and children, exploring marker techniques, developing illustrations with markers and other mediums combined in categories of interest and concentration, writing a resume, cover letter and calling card and developing a refined professional portfolio in preparation for job interviews.
Student Learning Outcomes:
1. Student will develop a portfolio of drawings including men's and women's wear.

FASHDSN 239  GOWN DRAPING AND DESIGN I (2)
Lab:  6 hour(s)
Instruction is offered on draping, fitting basic blocks, and transferring the drape to a paper pattern. Students will drape basic type bodices, sleeves, skirts, collars, and construction details. Theory includes basic principles of design, line, proportion, and fabric use.
Student Learning Outcomes:
Students will drape and create a detailed blouse and skirt style including a complete pattern. Students will drape and create a styled dress including a complete pattern.

FASHDSN 240  GOWN DRAPING AND DESIGN II (2)
Lab:  6 hour(s)
This course includes the draping of casual knit garments and dress and jacket style innovations. Students use either muslin or fashion fabric according to their capabilities. Fashion trends are studied and original designs are created.
Student Learning Outcomes:
Students will drape and create a woven shift dress with stylized neckline. Students will drape and create innovative coordinated separates in knit fabric using specialized machinery.

FASHDSN 241  GOWN DRAPING AND DESIGN III (2)
Lab:  6 hour(s)
This course correlates the designer's knowledge of designing, sketching, patternmaking, draping, and construction. Students develop confidence as they study the problems of merchandising and manufacturing. Original designs for special occasion garments are executed in various fabrics.
Student Learning Outcomes:
Students will drape an evening gown using selected elements in specific evening fabrications.

FASHDSN 244  COMPUTER FASHION ART (2)
Lab:  6 hour(s)
This course offers computer fashion art instruction using the MAC computer. Emphasis is placed on the preparation and input of fashion images for portfolios and design presentations as required by industry standards.
Student Learning Outcomes:
1. Students will create a computer aided Fashion Croquis Illustration completed with Moodboard and textile design.
FASHDSN 250  BEGINNING COMPUTER APPAREL SYSTEMS(2)  
Lab:  6 hour(s)  
This course concentrates on grading the commercial pattern using a computer. Inputting the pattern, establishing grade rules and correcting the pattern are included. Marker making, with emphasis on difficult garments and fabric problems is covered. Housekeeping and tape routines are explained.  
Student Learning Outcomes:  
1. Students will create system files, digitize and verify pattern pieces using Gerber hardware and software.

FASHDSN 255  COMPUTERIZED PRODUCT DESIGN (2)  
Lab:  6 hour(s)  
This course offers advanced training and development of skills in apparel utilizing the latest versions of apparel pattern making software. Design students will concentrate on working on advanced pattern and design projects ranging from haute couture to ready to wear clothing.  
Student Learning Outcomes:  
1. Students will create system files, digitize and verify pattern pieces using Gerber hardware and software.

FASHDSN 256  CAD APPAREL PRE PRODUCTION TECHNIQUES (2)  
Lab:  6 hour(s)  
This course offers advanced training in apparel pre production process, and marker making as it applies to computerized apparel production. The class will cover specialized computer software applications, such as Lectra Systems, used for marker making. Students will learn to identify menus associated with marker making applications and composing a full scale marker using industry standards.  
Student Learning Outcomes:  
1. Students will create a storyboard in Artworks software compiling their own textile Designs using design and repeat, colorway, reduction and cleaning, easy knit and Easy weave.

FASHDSN 257  APPAREL PATTERN DESIGN SYSTEMS (2)  
Lab:  6 hour(s)  
This course provides an overview of current computer aided design applications used in apparel pattern development. The class will cover manual pattern development and demonstrate how two dimensional patterns translate to the computer. Students will learn to identify menus associated with pattern applications, used for Tukatech software, and will compose a full scale pattern on the computer as it applies to industry.  
Student Learning Outcomes:  
1. Students will design a computer pattern from Tukatech systems basic blocks.

FASHDSN 258  COMPUTER AIDED PATTERN SYSTEMS (2)  RPT1  
Lab:  6 hour(s)  
Prerequisites: FASHDSN 120 or 225.  
This course is designed to introduce computer aided pattern making using Lectra Systems software programs. Class instruction will cover translating manual patterns to the computer as well as pattern creation using technology. Instruction will be given on system menus in their relation to pattern applications.  
Student Learning Outcomes:  
1. Students will create a pattern from design through marker to prepare for the production process.

FASHDSN 264  APPAREL COMPUTER SYSTEMS ANALYSIS (2)  CSU  
Lecture:  1 hour(s)  
Lab:  2 hour(s)  
This lab course demonstrates how the apparel industry uses commercial and Vendor apparel technology in the global market. Topics covered are apparel software and commercial hardware used to design and manufacture products.  
Student Learning Outcomes:  
1. Students will create a pattern design using Microsoft Powerpoint. Student will complete a project including digitizing, a patternmaking sample, grade rule application, marker creation, and specification sheet. Student will compare and contrast the 3 major apparel systems.

FASHDSN 270  ILLUSTRATOR FOR FASHION DESIGN (2)  
Lab:  6 hour(s)  
This course offers Adobe Illustrator instruction using the Macintosh computer. Emphasis is placed on the preparation and input of fashion design ideas in flat drawings for portfolios, pattern information cards, and cost sheets as required to meet industry standards.  
Student Learning Outcomes:  
1. Students will create Fashion Flat sketches according to Fashion industry standard. 2. Students will learn to create acceptable file formats for different output mediums like web and print.

FASHDSN 285  DIRECTED STUDY  FASHION DESIGN (2)  
Lecture:  2 hour(s)  
This course allows students to pursue directed study in Fashion Design on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one fashion course to take this class.  
Student Learning Outcomes:  
1. Students will formulate a project based on a topic in Fashion Design and related topics.

FASHDSN 385  DIRECTED STUDY  FASHION DESIGN (3)  
Lecture:  3 hour(s)  
This course allows students to pursue directed study in Fashion Design on a contract basis under the direction of a supervising instructor. Students must be enrolled in at least one fashion course to take this class.  
Student Learning Outcomes:  
1. Students will formulate a project based on a topic in Fashion Design and related topics.

FASHDSN 941  COOPERATIVE EDUCATION FASHION DESIGN (4)  RPT3  
Lecture:  4 hour(s)  
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.  
Student Learning Outcomes:  
1. Students will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.
FASHION MERCHANDISING

FASHMER 001 ENTREPRENEURIAL FASHION (3) CSU
Lecture: 2.5 hour(s)
Lab: 1.5 hour(s)
Advisory: English 101; Mathematics 105
This course delivers the information needed to develop an effective business plan and provides a background in entrepreneurship for apparel related businesses. Students will examine the development of a fashion retail business from concept evaluation to strategy articulation. Procedures and resources for researching and opening a business are covered, as well as assortment planning, pricing and financing.
Student Learning Outcomes:
Students will be able to evaluate a potential business idea and write a business plan for a retail or wholesale business.

FASHMER 010 RETAIL MERCHANDISING (3) CSU
Lecture: 3 hour(s)
Advisory: English 101; Mathematics 105
This course introduces all phases of fashion retailing from the creative to the financial. It is designed to familiarize students with the crucial functions of merchandising and product management in a modern retail company. The course covers special aspects of retailing including: the evolution of the industry, merchandising roles and careers, marketing knowledge, consumer behavior, planning and control, and retail pricing.
Student Learning Outcomes:
Students will be able to identify a consumer market for a retail store through the research of demographic, psychographic, and behavioral traits of a target market.

FASHMER 020 APPAREL PRODUCT DEVELOPMENT (3) CSU
Lecture: 2.5 hour(s)
Lab: 1.5 hour(s)
Advisory: English 101; Mathematics 105
This course covers the step by step development of apparel products in a retail or wholesale environment. Students will use research, merchandising knowledge and the application of merchandising concepts and theories in a simulated process. The course includes visual presentation of design concepts, raw materials sourcing, overview of production technology, wholesale marketing and retail distribution. Special emphasis is placed on the California apparel industry.
Student Learning Outcomes:
Students will learn the process of product development and understand how to plan, organize, develop, produce and sell an apparel line. They will create and cost samples for a fashion collection.

FASHMER 021 CULTURAL PERSPECTIVES OF DRESS (3) CSU
Lecture: 3 hour(s)
This course covers the factors that influence human behavior in the selection of dress in societies and cultural groups, and the influence of these factors on the design and production of textiles and apparel. Students will study consumer's purchasing decisions. Topics include the cultural contexts of dress, dress as nonverbal communication, dress through life stages, dress in the workplace, ethnic influences on dress, and technological changes of dress.
Student Learning Outcomes:
Students will demonstrate how to present oneself in a professional setting to the best advantage and relate how dress affects specific jobs in business, sports and several other occupations.

FASHMER 025 FASHION AND INDUSTRY INTERCHANGE (3) CSU
Lecture: 3 hour(s)
Advisory: English 101
This course covers current trends and relationships in the Fashion Industry between apparel, accessories, cosmetics, and home goods. Each category of goods is reviewed from the perspectives of historical development, organization and operation, merchandising and marketing in order to gain broad insight to the unique aspects of these industry segments.
Student Learning Outcomes:
Students will be able to identify relationships in the fashion industry between apparel, accessories, cosmetics, jewelry and hard lines. Students will understand the unique characteristics of these categories, and learn to identify and track current trends.

FASHMER 027 ADVANCED RETAIL MERCHANDISING (3) CSU
Lecture: 3 hour(s)
Prerequisites: Fashion Merchandising 10;
Advisory: English 101; Mathematics 105
An advanced retail research and study course covering retail demographics, site selection, stock assortments, planning, retail budgets, and sales applicable to all retail environments. Merchandise coordination and seasonal planning are given detailed coverage.
Student Learning Outcomes:
Students will be able to conduct market, fabric, and sourcing research to create a line of LATTC Logo Apparel, and illustrate their work in a Power Point presentation.

FASHMER 030 WHOLESALE MERCHANDISING (3) CSU
Lecture: 3 hour(s)
Advisory: English 101; Mathematics 105
This course prepares students for a merchandising position with an apparel manufacturing company. All phases, including line development, design, costing, sales, production, contracting and distribution are covered. Current trends and specialized knowledge in merchandising a successful line are emphasized.
Student Learning Outcomes:
Students will understand the steps of wholesale merchandising relating to marketing the line, preproduction processes, quality assurance and distribution.

FASHMER 035 FASHION PROMOTION (3) CSU
Lecture: 3 hour(s)
Advisory: English 101
This course covers the promotional aspects of the retail fashion industry. Emphasis is given to the processes of fashion communication and how they connect company profit and performance with skillful and creative promotional strategies. Sales promotion, advertising formats, public relations, and direct marketing are presented.
Student Learning Outcomes:
Students will be able to write a press release for a new apparel product or event. They will be proficient in the use of an industry standard template to create and write a document for the purpose of publicizing a fashion item or event.

FASHMER 040 MODERN MERCHANDISING MATH (3) CSU
Lecture: 3 hour(s)
Advisory: Mathematics 105
Students will learn to use the computer for costings, pricing, inventory control as well as a vendor analysis. All current concepts in wholesale and retail merchandise planning are presented. The emphasis is on practical knowledge and the use of computers in today's apparel business. The class will cover the principles and procedures involved in the business applications of the apparel industry using Apparel Information Management System (AIMS) software for wholesale and Microsoft Excel for making retail buying decisions.
FRENCH 001  ELEMENTARY FRENCH I (5) UC:CSU
Lecture: 5 hour(s)
This course introduces the cultures and civilization of France and the French speaking world. This introductory course stresses the fundamentals of French pronunciation and grammar; the building of a practical basic vocabulary; and the development of the ability to speak, understand, read, and write simple contemporary French.

Student Learning Outcomes:
1. Produce simple sentences in the present and future tenses. 2. Respond appropriately to basic questions in French. 3. Follow simple directions in French. 4. Produce sentences with helping verbs.

FRENCH 002  ELEMENTARY FRENCH II (5) UC:CSU
Lecture: 5 hour(s)
Prerequisite: French 1
This course completes the study of elementary grammar, increases vocabulary, includes the reading of simplified texts with continued emphasis on aural and written comprehension, oral expression, and the writing of simple French. Further study of French and Francophone cultures are expected to be covered.

Student Learning Outcomes:
1. Listen with understanding. 2. Respond meaningfully in personal and community situations. 3. Speak the target language effectively and articulately in personal, community, and work settings. 4. Read confidently and competently for personal information, professional and academic needs at an advanced elementary level. 5. Write in target language to communicate with purpose, meaning, and grammatical correctness. 6. Develop processes that lead to an insight understanding of the French culture.

FASHMER 041  FASHION MERCHANDISE BUYING (3) CSU
Lecture: 2.5 hour(s)
Lab: 1.5 hour(s)
Advisory: Fashion Merchandising 10; English 101; Mathematics 105
This course provides specific instruction on fashion/merchandise buying tasks such as: identifying target customers, creating six month merchandise plans, departmental assortment plans, shopping the market and placing orders, in season sales planning and forecasting, and calculating open to buy. This course covers the process of retail buying for a small business as well as for larger companies. Student Learning Outcomes: Students will be able to identify a retail product opportunity and articulate a well-developed strategy to accomplish their proposed sales and marketing plan. They will be able to demonstrate their strategy through a computer generated six month plan (excel), window and floor displays (Smart Draw, Photoshopped, etc.), and written text presented in an organized binder/portfolio.

FASHMER 050  INTERNATIONAL FASHION BUSINESS (3)
Lecture: 3 hour(s)
Advisory: English 101
This course provides an active study of the dynamics and challenges of the international apparel industry. Topics covered include: International business today; cultural diversity and dynamics; international legal issues; global opportunities in marketing; importing/exporting strategies; and international fashion business vocabulary terms.

Student Learning Outcomes:
Students will develop a vocabulary and understanding of the global apparel and textile trade. They will read, summarize, and discuss current business news and relate it to issues in apparel and textile manufacturing both domestically and internationally.

FASHMER 941  COOPERATIVE EDUCATION FASHION MERCHANDISING (4) RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee, and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in the program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

GEOLOGY 001  PHYSICAL GEOLOGY (3) UC:CSU
Lecture: 3 hour(s)
This course studies the physical environment of earth. Emphasis is placed on climate, soils, vegetation, landforms, maps, weather systems, oceans, and the atmosphere, and their pattern on Earth.

Student Learning Outcomes:
Students will be able to assess and list how organic agriculture improves the U.S. economy, its environment, and the physical health of its citizens.

GEOG 001  PHYSICAL GEOGRAPHY (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course examines a broad array of the elements and expressions of human culture including population distribution, use and re-use of natural resources, principle modes of transportation and commerce, sources of energy, languages and religions, the globalization of culture, as well as the social, political, and economic causes of war and climate change.

Student Learning Outcomes:
Students will be able to assess and list how organic agriculture improves the U.S. economy, its environment, and the physical health of its citizens.

GEOLOGY 002  CULTURAL ELEMENTS OF GEOGRAPHY (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course examines a broad array of the elements and expressions of human culture including population distribution, use and re-use of natural resources, principle modes of transportation and commerce, sources of energy, languages and religions, the globalization of culture, as well as the social, political, and economic causes of war and climate change.

Student Learning Outcomes:
Students will be able to assess and list how organic agriculture improves the U.S. economy, its environment, and the physical health of its citizens.
Students will also learn basic scientific principles, the process of the scientific method, map reading and geographic literacy.

**Student Learning Outcomes:**
The student will be able to correctly describe all of the three rock types and accurately discuss and give concrete examples of the basic components of the rock cycle, processes such as plate tectonics, and earth's natural resources.

**GEOLOGY 006 PHYSICAL GEOLOGY LABORATORY (2) UC:CSU**

**Lecture:** 1 hour(s)
**Lab:** 2 hour(s)

This course supplements Geology 1 with additional exercises in the identification of rocks and minerals, reading of maps, and study of rock structures. Studies of local geology are made based upon field trips and the collection of specimens.

**Student Learning Outcomes:**
1. Analyze the role of plate tectonics in changing the sizes of the Earth's continents and oceans; Graph seismic data to determine the magnitude of earthquakes and locate the epicenter of earthquakes. 2. Identify common minerals & rock types on the basis of their physical properties; interpret past environment through detailed observation of mineral composition, fossil types and rock structures. 3. Construct topographic cross sections and geologic cross sections to analyze the geologic and deformational history of an area. 4. Determine the relative and absolute ages of rocks based on their physical relationships; using fossils to determine their age relationships, and determine absolute ages from radiometric data. 5. Analyze landforms formed by and hazards related to surface and groundwater, oceans, glaciers and wind. Interpret global climate change patterns on the basis of variations in sea level and glacier sizes.

**HEALTH 006 NUTRITION FOR HEALTHFUL LIVING AND FITNESS ACTIVITIES (3) UC:CSU**

**Lecture:** 2 hour(s)
**Lab:** 2 hour(s)

Basic nutrition theories, information for healthful food purchasing, and relationship of nutrition to disease. Benefits of exercise and techniques for body conditioning are learned. Class time includes participation in fitness activities including aerobic, developmental and flexibility exercises.

**Student Learning Outcomes:**
Students will develop flexibility that is within the optimal health range.

**HEALTH OCCUPATIONS**

**HLTHOCC 037 NURSE ASSISTANT (5)**

**Lecture:** 3 hour(s)
**Lab:** 6 hour(s)

This course is approved by the State of California. It prepares students...
to perform basic nursing tasks and educates them about the roles and responsibilities of the Certified Nurse Assistant. Skills include principles of safety, infection control and basic patient care practices. Students who successfully complete the course are eligible to take the State Certification Examination.

Student Learning Outcomes:
1. Students will be able to defend a position on a debatable historical issue. 2. Describe and analyze the actors, locations, timelines, actions, and reasons surrounding a historical event. 3. Students will be able to examine and assess the key events from 1865 to the Present.

HISTORY 012 POLITICAL AND SOCIAL HISTORY OF THE UNITED STATES II (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28

This course will examine the historical development of the United States of America from the close of the Civil War to the present. Emphasis is placed on the role of the major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography.

Student Learning Outcomes:
1. Students will be able to defend a position on a debatable historical issue. 2. Describe and analyze the actors, locations, timelines, actions, and reasons surrounding a historical event. 3. Students will be able to examine and assess the key events from 1865 to the Present.

HISTORY 012H POLITICAL AND SOCIAL HISTORY OF THE UNITED STATES II (3)
Lecture: 3 hour(s)
Advisory: English 28

This course will examine the historical development of the United States of America from the close of the Civil War to the present. Emphasis is placed on the role of the major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography. Student must admitted into Honors Program. See instructor or Honors Program Transfer Counselor for more information. The LATTC Honors Program is designed to encourage the development of talent and ability in highly motivated students as they begin their academic studies and prepare to transfer to a four year college or university.

Student Learning Outcomes:
1. Students will be able to defend a position on a debatable historical issue. 2. Describe and analyze the actors, locations, timelines, actions, and reasons surrounding a historical event. 3. Students will be able to examine and assess the key events from 1865 to the Present.

HISTORY 041 THE AFRICAN AMERICAN IN THE HISTORY OF THE U.S. I (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28

This course will examine the historical development of the African American from precolonial Africa through the Civil War. This course will examine the political, social, economic and intellectual development of the United States, as well as the State and local government and constitution of the U.S.

Student Learning Outcomes:
1. Students will critically examine how the decade of the 1850’s offered a preview of the coming of the Civil War. 2. Students will assess the key events as primary causes of the Civil War. 3. Students will describe the events they perceive as pivotal events that led African American participation in the Civil War. 4. Students will include the following key people, events, issues: Anti Slavery society, Fugitive Slave Laws, the Dred Scott Decision, Kansas Nebraska Act, John Brown Raid, Frederick Douglass, Abraham Lincoln, Mary Ellen Pleasant, Thomas Sims and Martin R. Delany.

HISTORY 042 THE AFRICAN AMERICAN IN THE HISTORY OF THE U.S. II (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28

This course will examine the historical development of the United States of America from the end of the Civil War to the present with special emphasis on the contributions of the Afro American. Emphasis is placed on the relationship of regions, both internal and external, the role of major ethnic and social groups, the continuity of the American experience, and its derivation from other cultures, politics, economics, social movements, and its geography will be examined.

Student Learning Outcomes:
Students will be able to critically analyze experiences of African Americans from the post Civil War to the present, New Millennium. 1. Students will be
able to research and analyze a topic that affected African Americans post Civil War to present. 2. Students will analyze an event from this period and be able to link the people, issues and factors that influence the event(s).

HISTORY 086  INTRODUCTION TO WORLD CIVILIZATION I (3)  UC:CSU
Lecture: 3 hour(s)  Prerequisite: English 28
Introduction survey of World Civilization to 1500. This course will examine and compare the social, economic, and political formations of various societies and world cultures. Major topics will include religion, philosophy, technology, and migration and settlement patterns.

Student Learning Outcomes:
1. Discuss the development of major world civilizations and understand the basic components that make up a culture. 2. Identify and compare major world civilizations. In addition, the student will be able to gather and evaluate primary and secondary source materials. 3. Critically analyze social patterns, economic trends, political formations and religious and cultural changes of various cultures and civilizations. 4. Achieve a greater appreciation of the variety of cultural contributions to world history.

HISTORY 087  INTRODUCTION TO WORLD CIVILIZATION II (3)  UC:CSU
Lecture: 3 hour(s)
Introduction survey of World Civilization from 1500 to the Present. This course will examine and compare the social, economic, and political formations of various governments, societies, and world cultures. Major topics will include the development of the nation state, economic systems and technology, industrialization, colonization, and global conquest, revolutions, and migration and settlement patterns.

Student Learning Outcomes:
1. Students will be able to critically analyze world cultures and their importance and contribution to humankind from 1500 to the Present. 2. Discuss the development of major world governments and gain a basic understanding of how these governments and cultures interact in modern times. 3. Identify and compare major world civilizations. In addition, the student will be able to gather and evaluate primary and secondary source materials. 4. Critically analyze social patterns, economic trends, political formations and religious and cultural changes of various civilizations.

HUMANITIES

HUMAN 001  CULTURAL PATTERNS OF WESTERN CIVILIZATION (3)  UC:CSU
Lecture: 3 hour(s)  Prerequisite: English 28
This course is an introduction to the general concepts of the humanities. Music, painting, sculpture and architecture are studied and compared in relation to their background, medium, organization and style. Included is a survey of the most productive periods of Western history, from classical Greek through the Medieval period. Stress is placed on awareness of differences in cultural heritage, values and perspective as revealed in the arts.

Student Learning Outcomes:
Students will demonstrate familiarity with a broad spectrum of world civilizations with particular emphasis on how their artistic legacies reflect political and religious traditions. 1. Students will demonstrate familiarity with several early world civilizations. 2. Students will compare and contrast world religions. 3. Students will assess the ways in which visual art and literature reflect social, political and religious traits of the society that produced them.

HUMAN 002  STUDIES IN SELECTED CULTURES (3)  UC:CSU RPT1
Lecture: 3 hour(s)  Prerequisite: English 28
Students study in depth the social, political, economic and cultural features of a particular culture or set of related cultures. Customs, traditions, values, historical events and trends, religious traditions, popular cultural practices, achievements and trends in the arts and the sciences of the cultures studied are also examined. Western, Eastern, Mid Eastern, African and other cultures and societies both past and present may be studied.

Student Learning Outcomes:
Students will be able to analyze ways in which modern social and political history are reflected in the arts, including literature, visual arts and music. 1. Students will explore art and architecture within the context of the society that created it. 2. Students will interpret social, religious, and psychological dimensions of works of poetry, prose and drama. 3. Students will compare and contrast art, literature and music from different cultures or time periods.

LABOR STUDIES

LABR ST 001  U.S. LABOR HISTORY (3)  CSU
Lecture: 3 hour(s)
This course covers the often untold story of workers' struggle to improve their lives through union organizing and collective bargaining, ranging from early craft unions, the bloody battles to form industrial unions, and the rise of labor federations and public sector unions.

Student Learning Outcomes:
Students will be able to describe the lessons learned from labor history and their current relevance.

LABR ST 002  COLLECTIVE BARGAINING (3)  CSU
Lecture: 3 hour(s)
This course examines the dynamics of collective bargaining including preparation of demands and negotiation strategies, offers and counter offers, major bargaining trends, contract campaigns, and 'mock' bargaining.

Student Learning Outcomes:
Students will demonstrate the skills and knowledge to bargain a union contract.

LABR ST 003  LABOR RELATIONS LAW (3)  CSU RPT1
Lecture: 3 hour(s)
This course provides a comprehensive overview of labor relations laws, primarily for the private sector, covering employee, employer and union rights and obligations, unfair labor practices, union representation elections and other Labor Board procedures.

Student Learning Outcomes:
The student will be able to recognize the main provisions of the National Labor Relations Act.

LABR ST 004  LABOR IN AMERICA (3)  UC:CSU
Lecture: 3 hour(s)
Examines how labor organizations and labor laws impact workers, families and American society focusing on workplace related issues such as job security, income, workers' rights, immigration and role of unions.

Student Learning Outcomes:
The student will be able to describe how unions operate and their economic and political impact.
LABR ST 005  GRIEVANCE AND ARBITRATION PROCEDURES (3)
CSU  RPT1
Lecture:  3 hour(s)
Students learn to identify, investigate, write and present grievances and arbitrations with emphasis on participant’s own contract, grievance procedure and experiences. 
Student Learning Outcomes:
The student will be able to identify, investigate, write and present a union grievance through the grievance process, including arbitration.

LABR ST 006  LABOR AND COMMUNITY SERVICES (3)
CSU  RPT2
Lecture:  3 hour(s)
This course is designed to train Union Counselors to aid members in need. Topics include: financial assistance, debt counseling, unemployment/disability, health and mental health services, child care and other important community support.
Student Learning Outcomes:
Students will be able to identify public and private agencies that provide assistance to members in need. Students will be able to develop a program to assist their members in need.

LABR ST 007  LABOR AND POLITICAL ACTION (3)
CSU  RPT1
Lecture:  3 hour(s)
Covers current political issues facing working people, labor movement, methods and techniques for lobbying, political action, member mobilization, monitoring legislation and campaign laws.
Student Learning Outcomes:
The student will be able to use effective electioneering techniques, including methods to mobilize members to political action.

LABR ST 009  ORGANIZING STRATEGIES AND TECHNIQUES (3)
CSU
Lecture:  3 hour(s)
Students will learn basic skills and techniques needed to organize new workers, build and strengthen their unions and learn about relevant laws and winning strategies.
Student Learning Outcomes:
The student will be able to effectively use organizing strategies and techniques. The student will be able to formulate effective non NLRA strategies.

LABR ST 010  GENDER AND RACE ISSUES IN THE WORKPLACE (3)
Lecture:  3 hour(s)
This course covers legal framework and strategies to combat discrimination and promote diversity as an asset for more effective workplaces and stronger unions. Students learn to overcome workplace divisions by developing respect for differences based on: race, sex, ethnicity, disability, age, sexual orientation, etc.
Student Learning Outcomes:
Students will be able to employ legal framework and strategies to combat discrimination and promote diversity in the workplace.

LABR ST 011  LABOR IN THE PUBLIC SECTOR (3)
CSU
Lecture:  3 hour(s)
This course covers public employment practices, policies, laws and labor relations at the federal, state and local levels.
Student Learning Outcomes:
Students will be able to analyze public labor relation practices, policies and laws at the federal, state and local levels. The student will be able to identify the legal framework regulating public sector unions. The student will be able to design and evaluate effective strategies for representation and collective bargaining in the public sector.

LABR ST 012  BUILDING STRONG UNIONS (3)
CSU  RPT3
Lecture:  3 hour(s)
This course examines how to manage and lead a union: including strategic planning and goal setting; effective communications; time management; team building; increasing member participation; leading organizational change.
Student Learning Outcomes:
The student will be able to set goals and plan strategically to motivate and mobilize members. The student will be able to build structures for communicating, team building and staff development.

LABR ST 013  UNION LEADERSHIP (3)
CSU  RPT1
Lecture:  3 hour(s)
This class covers basic leadership skills for building influence and advancing in a union. Includes public speaking, parliamentary procedure, strategic planning, staff development, motivating and mobilizing members.
Student Learning Outcomes:
Students will develop a strategic plan to build power for their union to organize, and mobilize members contract and political campaigns.

LABR ST 020  WORKERS’ RIGHTS (3)
CSU  RPT1
Lecture:  3 hour(s)
Basic legal rights for workers, including: wage and hour laws, overtime, leaves, workplace privacy including e mail and computers, accommodating disabilities, including pregnancy, and combating sexual harassment and employment discrimination.
Student Learning Outcomes:
Students will be able to identify workers’ rights deriving from federal, California and local labor laws.

LABR ST 021  THE WORKING CLASS AND CINEMA (3)
UC:CSU
Lecture:  3 hour(s)
This course will examine feature film portrayals of the working class and labor unions. Students will learn to evaluate how popular culture dramatizes the struggle for workers rights and analyze how the movies have shaped public perception and values.
Student Learning Outcomes:
The student will be able to describe how Hollywood portrayals affect Americans’ views of unions.

LABR ST 101  INTRODUCTION TO UNIONS (1)
CSU  RPT2
Lecture:  1 hour(s)
Overview of union impact on wages, benefits, working conditions and public policies by industry. Surveys basic union structures, operation and governance.
Student Learning Outcomes:
Students will be able to describe the role of unions in society and discuss how unions work in their specific industry. Students will be able to discuss the role of unions and how they work. Students will be able to describe the unions in their particular industry.

LABR ST 102  CONTRACT NEGOTIATIONS SKILLS (1)
CSU  RPT3
Lecture:  1 hour(s)
This course covers the basics of union contract negotiations, including preparation of demands, negotiations strategies and tactics, contract language, and major bargaining trends.
Student Learning Outcomes:
Students will learn and demonstrate the skills and techniques needed to bargain union contracts.
LABR ST 103 LABOR LAW UPDATE (1) CSU RPT3
Lecture: 1 hour(s)
This course covers recent changes in labor law related to labor relations, state and local bargaining, federal, state and local labor boards, employment and discrimination, union organizing, and campaign election laws.
Student Learning Outcomes:
The student will be able to identify recent changes in labor relations and related laws which govern the relationships between labor unions, employees and employers.

LABR ST 104 CURRENT ISSUES FOR LABOR (1) CSU RPT3
Lecture: 1 hour(s)
This course explores challenges facing the American Labor Movement, including strategies and programs to address them.
Student Learning Outcomes:
The student will be able to describe strategies to organize workers. Student will be able to describe strategies to engage their members to influence public policy.

LABR ST 105 GRIEVANCE HANDLING SKILLS (1) CSU RPT3
Lecture: 1 hour(s)
The student will investigate, write and present union grievances.
Student Learning Outcomes:
Students will investigate, evaluate, document, write and present a union grievance.

LABR ST 106 LABOR AND DISASTER RELIEF (1) CSU RPT3
Lecture: 1 hour(s)
Training labor representatives to respond to disasters, emergencies, acts of terrorism or union/employer economic actions through utilizing appropriate community, public and private resources and agencies.
Student Learning Outcomes:
The student will be able to describe how local and national disaster relief programs work and how unions utilize them to help their members. Student will be able to identify federal, state and local public and private resources available for emergency services and disaster response. Student will be able to employ effective techniques to disseminate information to members during crisis or economic actions.

LABR ST 107 ORGANIZING FOR POLITICAL ACTION (1) CSU RPT3
Lecture: 1 hour(s)
A primer for political activists: phone banks, precinct walks, polling, get out the vote, and vote by mail, campaign financing regulations, and communication strategies to mobilize members and the public.
Student Learning Outcomes:
The student will be able to analyze and choose successful strategies unions use to recruit and mobilize activists around political issues. The student will be able to describe the essential elements of a grassroots political campaign, such as phone bank and/or a precinct walk.

LABR ST 108 LABOR IN THE GLOBAL ECONOMY (1) CSU RPT3
Lecture: 1 hour(s)
Explores how the economic forces of globalization affect national and local economies, unions and individual jobs. Overviews labor strategies; policies on trade and labor standards, international union coordination and local tactics for addressing outsourcing.
Student Learning Outcomes:
The student will be able to describe current economic issues regarding globalization and labor strategies to address the issues.

LABR ST 109 UNION BUILDING STRATEGIES (1) CSU RPT3
Lecture: 1 hour(s)
Skills and techniques to build a strong union through strategic planning, leadership development, communication techniques, 1 to 1 techniques, and running effective meetings.
Student Learning Outcomes:
The student will learn skills and techniques to build strong organizations. Student will be able to apply effective communication techniques to mobilize members. Student will be able to develop leadership skills and describe methods to identify and develop new leaders. Student will be able to employ strategic planning and implementation techniques.

LABR ST 113 UNION LEADERSHIP SKILLS (1) RPT1
Lecture: 1 hour(s)
Basic leadership skills for building influence and advancing in your union. Includes public speaking, parliamentary procedure, running effective meetings, communications and dealing with difficult people.
Student Learning Outcomes:
The student will develop leadership skills to be effective union leaders. The student will be able to develop a strategic plan for their union. Students will be able to speak effectively in various public forums. Student will be able to employ effective communication strategies in a variety of situations.

LABR ST 114 WORKER’S LEGAL RIGHTS (1) CSU RPT3
Lecture: 1 hour(s)
Basic workers’ rights such as privacy, leaves, wage and hour laws, accommodating disabilities, including pregnancy and protections against wrongful discharge, etc.
Student Learning Outcomes:
The student will be able to identify and explain the basic legal rights and protections that workers have under California and federal law. The student will distinguish between employee rights vs. employer rights. The student will discuss the interplay of these laws with union contracts.

LABR ST 115 WORKPLACE HEALTH AND SAFETY (1) CSU
Lecture: 1 hour(s)
Strategies to identify and address current issues in workplace health and safety, such as stress, understaffing, workload, chemical hazards and ergonomic problems. Strategies covered: hazard identification, legal rights, Cal/OSHA, contract language, effective Health & Safety Committees, outside resources, and training programs.
Student Learning Outcomes:
The student will be able to identify and create an action plan to address workplace health and safety hazards.

LABR ST 116 NEW STRATEGIES FOR LABOR (1) CSU RPT3
Lecture: 1 hour(s)
The course will explore strategies to support negotiations and organizing including: labor solidarity, media, community and political campaigns, and strategic organizing.
Student Learning Outcomes:
The student will be able to effectively demonstrate his/her knowledge of union rights and laws. The student will learn effective techniques to recruit and mobilize union activists around labor issues. The student will develop a grassroots organizing campaign plan on any labor issue.

LABR ST 118 EMPLOYEE BENEFITS PLANS (1) CSU
Lecture: 1 hour(s)
This course covers employee health and retirement plans: how they work, how they are funded, how workers can maximize their benefits, proposed changes in these plans, and labor’s role in negotiating and preserving employee benefits.
LABR ST 127 WORKER’S COMPENSATION (1) CSU RPT2
Lecture: 1 hour(s)
This course provides a basic understanding of how Workers Compensation works, including: types of injuries and disability benefits, medical care, rehabilitation and financial support; and procedures for filing a claim and appeals.
Student Learning Outcomes:
Students will describe basic California Workers’ Comp benefits, procedures, and how to file claims.

LABR ST 128 SEXUAL HARASSMENT AND DISCRIMINATION (1) CSU RPT1
Lecture: 1 hour(s)
This course surveys sexual harassment and job discrimination including: criteria for claims, the law, court decisions, and protective agencies, policies and procedures for prevention.
Student Learning Outcomes:
The student will be able to understand the legal definitions of various forms of employment discrimination and sexual harassment. The student will be able to explain various ways for employers and unions to prevent and address sexual harassment and job discrimination.

LABR ST 132 STRATEGIC BARGAINING (1) CSU RPT1
Lecture: 1 hour(s)
Strategic analysis of factors affecting bargaining, power analysis, leverage and pressure strategies including building power through member and community involvement.
Student Learning Outcomes:
The student will be able to appraise and choose the best strategic bargaining techniques to match difficult bargaining situations. The student will be able to assess the balance of power between the union and employer. The student will be able to discuss techniques for applying pressure and leverage in contract negotiations. The student will be able to employ strategic planning techniques to develop a strategic contract campaign.

LABR ST 134 CALIFORNIA WORKERS’ RIGHTS (1) CSU RPT2
Lecture: 1 hour(s)
This course examines how the California Labor Code extends basic rights beyond federal law, including: minimum wage, maximum hours, timely pay, overtime and meal periods, right to know, parental and other leave rights, and enforcement procedures.
Student Learning Outcomes:
Students will learn and demonstrate an understanding of California labor laws and protections, leaves and enforcement procedures.

LABR ST 136 WHEN THE PAYCHECK STOPS (1) CSU RPT2
Lecture: 1 hour(s)
Union representatives occasionally must counsel members when the paycheck stops due to strikes, layoff, or plant closure. This course overviews professional services available for referral and teaches strategies for negotiating with landlords, mortgage companies, utility companies and other creditors.
Student Learning Outcomes:
Students will be able to identify public and private agencies that provide assistance to members in need. Students will be able to develop a program to assist your members in need.
Course Descriptions

LAW

LAW 018 MARRIAGE AND FAMILY LAW (3) CSU RPT1
Lecture: 3 hour(s)
An examination of parental prerogatives, marriage, separation, divorce, custody and support, adoption and guardianship.

Student Learning Outcomes:
1. Students will assess and evaluate their rights, responsibilities and obligations to the minors and other adult(s) sharing their home/residence based on legally recognized nature of their interrelationships.

LAW 038 CRIMINAL LAW & PROCEDURE (3)
Lecture: 3 hour(s)
This course will introduce the student to Criminal Law and Criminal Procedure. The student will learn the elements of a crime that must be proven as to the allegations of the commission of that particular crime. The student will learn the regulatory procedures, both federal and state, that must be followed in order to realize criminal culpability. The student will also examine the roles of the parties to a criminal action.

Student Learning Outcomes:
1. Student will be able to define a crime in terms of its elements and properly classify it. 2. Student will be able to determine if the parties to a crime have met their requisite jurisdictional obligations and procedures in defending against the allegation of having engaged in a criminal act.

LEARNING SKILLS

LRNSKL 001A READING (1) NDA RPT3
(fall 2012 only)
Lab: 3 hour(s)
This course will teach students how to apply the basic features of reading to improve their oral and silent reading fluency, draw upon a variety of learning skills and comprehension strategies to understand and respond to intermediate level reading material, and distinguish between the structural features of expository and narrative texts. Students will progress from reading sentences to paragraphs to short selections and excerpts from longer pieces of writing. This course is open entry/open exit and provides individualized and computer assisted instruction. Grades are on a pass/no pass basis. The course is repeatable up to three times to enhance skills and proficiencies.

This course is the first in a sequence of three progressive modules and prepares students for academic and vocational success.

Student Learning Outcomes:
1. Select letter patterns and know how to translate them into spoken language by using phonics, syllabification, and word parts and apply this knowledge to achieve fluent oral and silent reading. 2. Draw upon a variety of comprehension strategies as needed (e.g., generating and responding to essential questions, making predictions, comparing information from several sources) to understand and respond to intermediate level narrative and expository reading material. 3. Distinguish between the structural features of the text and the literary terms or elements (e.g., theme, plot, setting, characters).

LRNSKL 001B READING (1) NDA RPT3
(fall 2012 only)
Lab: 3 hour(s)
This course will teach students how to apply the basic features of reading to improve their oral and silent reading fluency, draw upon a variety of learning skills and comprehension strategies to understand and respond to intermediate level reading material, and distinguish between the structural features of expository and narrative texts. Students will progress from reading sentences to paragraphs to short selections and excerpts from longer pieces of writing. This course is open entry/open exit and provides individualized and computer assisted instruction. Grades are on a pass/no pass basis. The course is repeatable up to three times to enhance skills and proficiencies.

This course is the first in a sequence of three progressive modules and prepares students for academic and vocational success.

Student Learning Outcomes:
1. Select letter patterns and know how to translate them into spoken language by using phonics, syllabification, and word parts and apply this knowledge to achieve fluent oral and silent reading. 2. Draw upon a variety of comprehension strategies as needed (e.g., generating and responding to essential questions, making predictions, comparing information from several sources) to understand and respond to intermediate level narrative and expository reading material. 3. Distinguish between the structural features of the text and the literary terms or elements (e.g., theme, plot, setting, characters).

LRNSKL 002A ENGLISH FUNDAMENTALS (1) NDA RPT3
(fall 2012 only)
Lab: 3 hour(s)
This course covers standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple sentences.

Student Learning Outcomes:
1. Students will demonstrate the ability to write clear and structurally accurate sentences. 2. Identify and use nouns correctly in sentences. 3. Identify the basic parts of speech in the context of sentences. 4. Utilize the verb form in a sentence with the verb agreeing with its subject(s), and have a pronoun reference consistency. 5. Use correct capitalization rules. 6. Recognize and write complete simple sentences with correct word order, subject verb agreement, and correct punctuation and spelling.

LRNSKL 002B ENGLISH FUNDAMENTALS (1) NDA RPT3
(fall 2012 only)
Lab: 3 hour(s)
This course covers standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple, compound, and complex sentences. The past, present, and future present progressive tenses are introduced. Students also learn to recognize and correct sentence fragments, run on sentences, and demonstrate proofreading skills. Students are introduced to paragraph structures and learn to identify topic sentences, supporting details, and concluding sentences.

Student Learning Outcomes:
Students will demonstrate the ability to: Write clear and structurally accurate sentences using subject verb sentence patterns, subject verb object (direct and indirect) sentence patterns. Identify and use the basic parts of speech in the context of the sentences. Identify different types of clauses and phrases and use them in clear and structurally accurate sentences. Use correct punctuation rules. Write clear and structurally accurate simple, compound, complex sentences using conjunctions and subordinate clauses. Utilize proof reading skills. Identify the basic parts of a paragraph and write cohesive paragraphs.

LRNSKL 003A VOCABULARY DEVELOPMENT (1) NDA RPT3
Lecture: 1 hour(s)
This is a beginning level lecture course focused on reading and vocabulary development. The course teaches students the skills that will help them deal with unfamiliar vocabulary. Students will develop skills using timed
Students will develop a personal plan of action for systematically monitoring their academic and vocational success.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y, 5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lab course which focuses on the skills needed to succeed in academic and vocational success. It is a sequence of three progressive modules which prepare students for academic and vocational success.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lecture course. Based on diagnostic assessment, the student will receive group and individualized spelling instruction designed to improve spelling skills to the level at which the student will be able to succeed in college/vocational coursework.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lab course which focuses on the skills needed to succeed in academic and vocational success. It is a sequence of three progressive modules which prepare students for academic and vocational success.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lecture course. Based on diagnostic assessment, the student will receive group and individualized spelling instruction designed to improve spelling skills to the level at which the student will be able to succeed in college/vocational coursework.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lab course which focuses on the skills needed to succeed in academic and vocational success. It is a sequence of three progressive modules which prepare students for academic and vocational success.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lecture course. Based on diagnostic assessment, the student will receive group and individualized spelling instruction designed to improve spelling skills to the level at which the student will be able to succeed in college/vocational coursework.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lab course which focuses on the skills needed to succeed in academic and vocational success. It is a sequence of three progressive modules which prepare students for academic and vocational success.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lecture course. Based on diagnostic assessment, the student will receive group and individualized spelling instruction designed to improve spelling skills to the level at which the student will be able to succeed in college/vocational coursework.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lab course which focuses on the skills needed to succeed in academic and vocational success. It is a sequence of three progressive modules which prepare students for academic and vocational success.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.

This course is a lecture course. Based on diagnostic assessment, the student will receive group and individualized spelling instruction designed to improve spelling skills to the level at which the student will be able to succeed in college/vocational coursework.

Student Learning Outcomes:
1. Develop their knowledge of basic spelling rules, syllabification, and vowel and consonant patterns.
2. Identify sound symbol association, names and sounds of letters of the alphabet.
3. Distinguish vowel and consonant patterns.
4. Use basic spelling rules: recite and use spelling rules pertaining to: ie, ei; final e; adding k; final consonant; final y.
5. Determine Homonyms and homophones correctly spell the appropriate word when confronted with words that sound alike. Correctly spell words that look alike but sound differently.
6. Select and correct mispronounced words.
7. Use apostrophes to: adding k; final e; final consonant; final y.
Student will be able to: 1. Organize, (exclude or include) information in a paragraph or document. 2. Be able to demonstrate effective and accurate sentence structure. 3. Be able to demonstrate and identify sentence parts and usage. 4. Be able to identify and utilize correct mechanics of a sentence. 5. Write cohesive and coherent 5 paragraph essays with thesis, topic sentences, and supporting details.

LRNSKL 066 GED PREPARATION: SOCIAL STUDIES (1) NDA RPT2
(fall 2012 only)
Lab: 3 hour(s)
This course is designed to assist students prepare for the Social Studies component of the General Education Development(GED) examination. This course enhances student's ability to read, understand, and use information in the context of social studies. Students will focus on the five basic social studies content areas: United States history, civics and government, economics, and geography. Grades are based on a credit/no credit basis.

Student Learning Outcomes:
The student will be able to comprehend Social Studies concepts in the areas of United States history, world history, civics and government, economics, and geography. The student will be able to analyze Social Studies concepts in the areas of United States history, world history, civics and government, economics, and geography. The student will be able to evaluate Social Studies concepts in the areas of: United States history, world history, civics and government, economics, and geography. Students will be able to achieve Social Studies a basic GED preparedness of 410 on a simulated GED Social Studies tests.

LRNSKL 068 STUDY SKILLS (1) NDA RPT2
Lecture: 0.5 hour(s)
Lab: 1 hour(s)
This course helps students develop basic study skills needed for college success. Study skills covered include but are not limited to: time management, organization skills, vocabulary building, reading, note taking, and listening strategies.

Student Learning Outcomes:
The student will be able to demonstrate the ability to: 1. Identify class requirements and how they apply to them as a learner. 2. Identify their personal learning strengths and weaknesses. 3. Identify and utilize strategies toward improvement. 4. Set up an effective time management tool. 5. Identify and utilize at least 3 organizational strategies appropriate to meet their personal and academic needs. 6. Identify and apply vocabulary building strategies based on reading level. 7. Identify and use appropriate reading strategies based on the type of reading material. 8. Identify and use appropriate and effective note taking strategies based on the given context. 9. Identify and use appropriate listening strategies.

LEARNING SKILLS LAB

LRNSK 001A READING (1) NDA
(starting spring 2013)
Lab: 3 hour(s)
This course covers the foundational reading skills that develop oral and silent reading fluency. Emphasis is placed on understanding beginning level reading material with the development of vocabulary, reading rate, fluency, and comprehension. This is the first in a sequence of three progressive courses that prepare students for academic and vocational success.

Student Learning Outcomes:
1. Demonstrate ability to select and use vocabulary in context while increasing comprehension, reading rate, and fluency. 2. Demonstrate the ability to recall information and details, identify the sequence of ideas and events, and identify the speaker. 3. Distinguish between main ideas and supporting details.

LRNSK 001B READING (1) NDA RPT2
(starting spring 2013)
Lab: 3 hour(s)
This course is an intermediate reading course which focuses on developing reading comprehension, analysis, and interpretation skills. Students develop strategies that assist them in understanding and responding to intermediate level reading material. Students will learn reading skills including: inferring, predicting outcome, drawing conclusions, comparing and contrasting, recognizing cause and effect, and paraphrasing. This course is the second in a sequence of three progressive modules and prepares students for academic and vocational success.

Student Learning Outcomes:
Upon successful completion of this course, students will be able to: 1. Identify main idea and supporting details. 2. Assess context clues to determine meaning, make inferences, and draw conclusions. 3. Demonstrate the ability to compare and contrast reading prose while determining cause and effect. 4. Demonstrate the ability to paraphrase and summarize reading prose.

LRNSK 001C READING (1) NDA RPT2
(starting spring 2013)
Lab: 3 hour(s)
This course focuses on developing advanced reading skills including interpretation, analysis, and evaluation of fictional and non-fictional prose. Students utilize strategies to improve their understanding of the structural features of expository and narrative texts. This course is the third in a sequence of three progressive modules and prepares students for academic and vocational success.

Student Learning Outcomes:
1. Interpretation Students will demonstrate the ability to utilize interpretation when reading various types of prose. 2. Analysis Students will be able to analyze and synthesize reading prose. 3. Evaluation Students will be able to critically evaluate and distinguish fact and opinion in reading prose.

LRNSK 002A ENGLISH FUNDAMENTALS (1) NDA RPT3
(starting spring 2013)
Lab: 3 hour(s)
This course covers standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple sentences.

Student Learning Outcomes:
1. Write 10 sentences on given topics using complete simple sentences with correct word order, subject verb agreement, and correct punctuation and spelling. 2. Pass grammar test based on language structures, mechanics, and spelling (pre test administered on entry to class).

LRNSK 002B ENGLISH FUNDAMENTALS (1) NDA RPT3
(starting spring 2013)
Lab: 3 hour(s)
This course covers the standard English writing conventions and language structure including grammar, punctuation, capitalization, spelling mechanics, and sentence structure. Students learn how to write simple, compound, and complex sentences. Students also learn to recognize and correct sentence fragments, run on sentences, and demonstrate proofreading skills. Students are introduced to paragraph structures and learn to identify topic sentences, supporting details, and concluding sentences.

Student Learning Outcomes:
1. Final writing test: Write a basic (5 6 sentence) paragraph with a topic sentence, supporting details, and a concluding sentence. 2. Final Grammar test: Use grammar and structural knowledge to successfully complete a post grammar test.
LRNSK 023  LEARNING SKILLS FOR CAREER DEVELOPMENT (1)  
NDA RPT2  
(starting spring 2013)  
Lab:  3 hour(s)  
This course focuses on career development skills. Specific skills addressed include career readiness and interpersonal competencies for developing effective workplace and personal relationships.  
Student Learning Outcomes:  
1. Develop a personal plan of action for systematically monitoring the relationship between self and academic/career goals using multiple self assessment and self discovery tools. 2. Identify their needs, values, and beliefs in relationship to career and job preparation. 3. Increase their self awareness of interests, aptitudes, abilities and values in relationship to the world of work. 4. Clarify career goals and choices. 5. Construct a portfolio for the collection and organization of critical academic documents and materials for future reference.

LRNSK 062  GED PREPARATION: LITERATURE AND THE ARTS (1)  
NDA RPT2  
(starting spring 2013)  
Lab:  3 hour(s)  
This course is designed to prepare students for the General Educational Development (GED) Literature and the Arts Test. The class will include critical thinking skills reading comprehension skills, interpreting graphs, analyzing literature and the arts including tone and style/prose fiction, interpreting poetry, drama, plays, non fiction and commentaries. Grading is on a pass/no pass basis.  
Student Learning Outcomes:  
Students will be able to: Analyze readings in the areas of Prose Fiction, Prose Non fiction, Poetry, and Drama. Demonstrate preparedness for the GED test through simulated testing and receiving a passing score of 410.

LRNSK 063  GED PREPARATION: WRITING SKILLS (1)  
NDA RPT2  
(starting spring 2013)  
Lab:  3 hour(s)  
This course is designed to prepare students for the Language, Writing Skills component of the General Educational Development (GED) examination. It will include sentence structure, English usage, mechanics, and writing 5 paragraph essays. Grades are based on a credit/no credit basis.  
Student Learning Outcomes:  
Students will be able to: 1. demonstrate effective and accurate sentence structure. 2. identify and utilize correct mechanics of a sentence. 3. write cohesive and coherent 5 paragraph essays with thesis, topic sentences, and supporting details.

LRNSK 065  GED PREPARATION: MATHEMATICS (1)  
NDA RPT2  
(starting spring 2013)  
Lab:  3 hour(s)  
This course will prepare students for the mathematics components of the GED test. The course will cover number operations and number sense, measurement and geometry, data analysis, statistics, and probability, algebra, functions, and patterns. This is a credit/no credit course.  
Student Learning Outcomes:  
1. Students will solve mathematical equations and demonstrate competency in the following areas: a) Number operations and number sense (20% 30%) b) Measurement and geometry (20% 30%) c) Data analysis, statistics, and probability (20% 30%) d) Algebra, functions, and patterns (20% 30%).

LRNSK 066  GED PREPARATION: SOCIAL STUDIES (1)  
NDA RPT2  
(starting spring 2013)  
Lab:  3 hour(s)  
This course is designed to assist students prepare for the Social Studies component of the General Education Development(GED) examination. This course enhances students' ability to read, understand, and use information.
in the context of social studies. Students will focus on the five basic social studies content areas: United States history, civics and government, economics, and geography. Grades are based on a credit/no credit basis.

**Student Learning Outcomes:**

Students will: 1. Apply reading comprehension skills to prose of practical and historic documents. 2. Analyze reading of graphic text: cartoons, photos, timelines, and, graphs, and charts. 3. Demonstrate preparedness of GED Social Studies test and be able to successfully obtain 410 on the Social Studies GED component.

---

**LIBRARY SCIENCE**

**LIB SCI 101  LIBRARY RESEARCH METHODS (1) CSU**

*Lecture:* 1 hour(s)

This is an introductory course designed to teach students basic library research methods. This course will provide students with a broad knowledge of the use of libraries utilizing both print and electronic information sources. Information search techniques and specialized information tools are examined with an emphasis on finding research resources, writing research papers, citation styles, and plagiarism.

**Student Learning Outcomes:**

1. Access books and articles electronically. 2. Gather, identify, and analyze library resources. 3. Appraise a Web site for its currency, accuracy, and authority. 4. Evaluate sample paraphrases to detect plagiarism and explain how a paraphrase is or is not plagiarized. 5. Construct MLA and APA citations and a Works Cited List.

---

**MACHINE SHOP CNC**

**MSCNC 111  PRINCIPLES OF MACHINE TOOLS I (2) CSU**

*Lecture:* 1.5 hour(s)  
*Lab:* 1.5 hour(s)

MSCNC 111 (Principles of Machine Tools I) is a course that will engage students with Machine Shop specific topics including; safety practices, hand tools, precision measuring tools, set up and operation of band saws, drill presses, lathes, mills, pedestal grinders, power saws as well as computer numerical control (CNC) machine tools. Theoretical and manipulative exercises will challenge students' understanding of practical subject matter.

**Student Learning Outcomes:**

Students will utilize applied machine shop theory to identify and know the safe use of various basic hand and machine tools.

**MSCNC 112A  TECHNOLOGY AND APPLICATION OF MACHINING IA (3) CSU**

*Lab:* 9 hour(s)

MSCNC 112A (Technology and Application of Machining IA) is a lab course that will engage students with machine shop specific topics including: shop safety, speeds, feeds, set up, operation and technology of basic machine tools. Band saws, drill presses, lathes, mills, pedestal grinders, power saws as well as computer numerical control (CNC) machine tools will be introduced and used by the students. Along with the machine tools, students will be expected to identify, manipulate and properly use and read basic hand tools and precision measuring instruments.

**Student Learning Outcomes:**

Students will demonstrate knowledge of safety practices in the shop.

**MSCNC 112B  TECHNOLOGY AND APPLICATION OF MACHINING (CAD) IB (1) CSU**

*Lecture:* 3 hour(s)

MSCNC 112B (Technology and Application of Machining (CAD) IB) is a course that will engage students with Machine Shop specific topics related to computer aided design (CAD). Topics will include solid model creation, blueprint creation, dimensioning, product development and assembling individual parts into completed assemblies.

**Student Learning Outcomes:**

Students will utilize the computer aided design (CAD) software to create a solid model and generate a blueprint.

**MSCNC 114  PRINT INTERPRETATION & SKETCHING (BLUEPRINT) I (3) CSU**

*Lecture:* 3 hour(s)

MSCNC 114 (Print Interpretation & Sketching (Blueprint I)) is a course that will engage students in Machine Shop topics that are related to blueprint reading, interpretation and sketching techniques. Mechanical drawings of multiple views, different drawing standards, dimensioning techniques, as well as sketching techniques for free hand drawings will also be covered.

**Student Learning Outcomes:**

Students will utilize industry specific blueprint reading skills to visualize and communicate part shape, form and function.

**MSCNC 115  BASIC APPLIED MATHEMATICAL CALCULATIONS (3) CSU**

*Lecture:* 3 hour(s)

MSCNC 115 (Basic Applied Mathematical Calculations) is a course that will engage students with machine shop specific topics related to calculations and calculator manipulation. Number theory, inch & metric calculations, algebra, ratios & proportions and fractions will all be covered in this course.

**Student Learning Outcomes:**

Students will utilize applied machine shop calculations to perform addition, subtraction, multiplication & division of whole numbers, decimals, fractions & mixed numbers.

**MSCNC 121  PRINCIPLES OF MACHINE TOOLS II (2) CSU**

*Lecture:* 1.5 hour(s)  
*Lab:* 1.5 hour(s)

MSCNC 121 (Principles of Machine Tools II) is a course that will engage students with Machine Shop specific topics including; safety practices, Principles of lathes, milling machines, attachments, and special lathes and milling operations. Introduction to other special machinery and basic CNC programming will also be covered.

**Student Learning Outcomes:**

Students will utilize applied machine shop theory to identify and know the safe use of various milling and turning machines as well as their accessories.

**MSCNC 122A  TECHNOLOGY AND APPLICATION OF MACHINING IIA (3) CSU**

*Lab:* 9 hour(s)

MSCNC 122A (Technology and Application of Machining IIA) is a course that will engage students with Machine Shop specific topics, such as implementation of safety, speeds, feeds, form tools, setups including related attachments and accessories for lathe and milling machine operations. Inspection techniques and CNC machine set up and operations will also be covered.

**Student Learning Outcomes:**

Students will utilize CNC programming techniques to write and run part programs.
### MSCNC 122B  TECHNOLOGY AND APPLICATION OF MACHINING
**IIB (1) CSU**

**Lab:** 3 hour(s)  
MSCNC 122B (Technology and Application of Machining IIB) is a course that will engage students with Machine Shop specific topics related to computer aided design (CAD). Topics will include geometric dimensioning and tolerancing (GD&T), section views, auxiliary views and advanced modeling and assembling techniques.  
**Student Learning Outcomes:**  
Students will utilize a computer aided design (CAD) program to create intermediate part models, product assemblies and related blueprints.

### MSCNC 124  PRINT INTERPRETATION AND INSPECTION
**(BLUEPRINT II) (3) CSU**

**Lecture:** 3 hour(s)  
MSCNC 124 (Print Interpretation and Inspection (Blueprint II)) is a course that will engage students in Machine Shop specific topics regarding: advanced interpretation of machine shop CNC related drawings with introduction to inspection, geometric tolerancing, and SPC.  
**Student Learning Outcomes:**  
Students will utilize industry accepted standards for reading, form, fit and function of parts described on MSCNC related blueprints.

### MSCNC 125  INTERMEDIATE APPLIED MATHEMATICAL CALCULATIONS (3) CSU

**Lecture:** 3 hour(s)  
MSCNC 125 (Intermediate Applied Mathematical Calculations) is a class that will engage students with Machine Shop specific topics such as: algebraic formulas related to good machining practices and geometric relationships and formulas are used to get correct cutting positions and programming code.  
**Student Learning Outcomes:**  
Students will utilize applied machine shop calculations to perform machine shop related algebraic & geometric calculations.

### MSCNC 131A  PRINCIPLES OF MACHINE TOOLS IIIA (2)

**Lecture:** 1.5 hour(s)  
**Lab:** 1.5 hour(s)  
MSCNC 131A (Principles of Machine Tools IIIA) is a course that will engage students with Machine Shop specific topics including: shop safety, engine lathe, milling machine, vertical milling machine, grinders as well as materials, inspection techniques and machining topics. Theoretical and manipulative exercises will challenge students understanding of practical subject matter.  
**Student Learning Outcomes:**  
Students will utilize applied machine shop theory to identify and know the safe use of various materials, sawing machines, grinding machines & specialized tools and equipment.

### MSCNC 131B  PRINCIPLES OF MACHINE TOOLS (CNC) IIIB (3)

**Lecture:** 3 hour(s)  
MSCNC 131B (Principles of Machine Tools (CNC) IIIB) is a course that will engage students with Machine Shop specific topics related to machine tool programming. Both numerical control (NC) and computer numerical control (CNC) machine tools must have ‘part programs’ written for them to perform their intended function and create parts that are correct in fit, form and function.  
**Student Learning Outcomes:**  
Students will utilize CNC programming knowledge to draw a picture that represents the ‘part’ that the machine tool program would make.

### MSCNC 132A  TECHNOLOGY AND APPLICATION OF MACHINING
**IIIA (3) CSU**

**Lab:** 9 hour(s)  
MSCNC 132A (Technology and Application of Machining IIIA) is a course that will engage students with Machine Shop specific topics related to the set up, operation, and/or programming of grinding machines, milling machines, engine lathes, CNC machining centers, CNC turning centers and EDM machines. Assigned projects will allow students to continue to build their skills on previously encountered machine tools as well as being introduced to new technologies, including unconventional machining techniques.  
**Student Learning Outcomes:**  
Students will utilize industry accepted procedures to create shop projects.

### MSCNC 132B  TECHNOLOGY AND APPLICATION OF MACHINING
**(CAM) IIIB (1) CSU**

**Lab:** 3 hour(s)  
MSCNC 132B (Technology and Application of Machining (CAM) IIIB) is a course that will engage students with Machine Shop specific topics regarding computer aided manufacturing (CAM) computer programs. Students will create geometry, cutting tools, process information in order for the CAM program to create cutter paths that will create the correct fit, form and function on the part.  
**Student Learning Outcomes:**  
Students will utilize the computer aided manufacturing (CAM) program to create simple geometry, cutting tools and processes and then have the CAM program write a part program.

### MSCNC 135  ADVANCED APPLIED MATHEMATICAL CALCULATIONS (3) CSU

**Lecture:** 3 hour(s)  
MSCNC 135 (Advanced Applied Mathematical Calculations) is a course that will engage students with Machine Shop specific topics as they relate to trigonometric and compound angular calculations.  
**Student Learning Outcomes:**  
Students will utilize applied machine shop calculation problems related to machine shop trigonometric problems and programming related problems.

### MSCNC 141  PRINCIPLES OF MACHINE TOOLS (CNC) IV (2) CSU

**Lecture:** 1.5 hour(s)  
**Lab:** 1.5 hour(s)  
MSCNC 141 (Principles of Machine Tools (CNC) IV) is a course that will engage students with Machine Shop specific topics: Advanced theory related to safety, programming, set up and operation of CNC machine tools. Introduction to specialized machining for intricate parts and/or tool and die and/or mold making will also be covered.  
**Student Learning Outcomes:**  
Students will utilize applied machine shop theory to program various computer numerical control machine tools.

### MSCNC 142A  TECHNOLOGY AND APPLICATION OF MACHINING
**IV A (3)**

**Lab:** 9 hour(s)  
MSCNC 142A (Technology and Application of Machining IV A) is a course that will engage students with Machine Shop specific topics: advanced safety, application, programming, set up and operation of CNC lathes and milling machines. Set up and operation of precision machine tools for intricate parts and/or tool and die and/or plastic mold fabrication will also be covered.  
**Student Learning Outcomes:**  
Students will utilize industry approved techniques and procedures to program, set up and machine several parts to create a multiple part assembly.
MSCNC 142B  TECHNOLOGY AND APPLICATION OF MACHINING IV B (1)
Lab: 3 hour(s)
MSCNC 142B (Technology and Application of Machining IV B) is a course that will engage students with Machine Shop specific topics: shop safety, advanced manufacturing techniques, CNC operations, advanced inspection techniques and manufacturing economy.

Student Learning Outcomes:
Students will utilize knowledge of computer aided design (CAD) and computer aided manufacturing (CAM) programs to model, generate a part program and then cut the part on a CNC machine tool

MSCNC 161A  COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) IA (3) CSU
Lecture: 3 hour(s)
MSCNC 161A (Computer Assisted Machining Programming (CAM) IA) is a course that will engage students with Machine Shop specific topics: application of Computer Aided Manufacturing (CAM) systems for development of computer numerical control (CNC) programs for complex two and three axis machined parts. Use of 3 D graphics and part verification software systems will also be explored.

Student Learning Outcomes:
Students will utilize the computer aided manufacturing (CAM) program to generate a part program for a specified machine tool control

MSCNC 161B  COMPUTER ASSISTED MACHINE PROGRAMMING (CAM) IB (3) CSU
Lecture: 3 hour(s)
MSCNC 161B (Computer Assisted Machine Programming (CAM) IB) is a course that will engage students with Machine Shop specific topics: advanced topics of computer aided design (CAD), computer aided manufacturing (CAM) and computer numerical control (CNC) and the integration of these three technologies in modern manufacturing.

Student Learning Outcomes:
Students will utilize the computer aided manufacturing (CAM) program to generate a part program to run a CNC machine with a specified control

MGMT 002  ORGANIZATION AND MANAGEMENT THEORY (3) CSU
Lecture: 3 hour(s)
As part of the study of industrial organization, this course covers such topics as financing enterprise, building the internal organization, and plant layout. The study of industrial operations includes production planning and control, inventory and materials handling, quality control, and methods analysis and work simplification. In addition, this course includes a consideration of the principles of industrial relations and personnel management, office management, and internal coordination and environmental issues.

Student Learning Outcomes:
1. Students will understand the overview of organization development. 2. Students will understand the nature of planned change in organizations. 3. Students will be able to diagnose organizations along with groups and jobs. 4. Students will understand individual, interpersonal and group process approaches in organizations. 5. Students will be able to evaluate the restructuring of an organization. 6. Students will understand work design and performance management. 7. Students will understand organizational transformation that includes change, organization learning and knowledge management. 8. Students will understand organizational development in global settings. 9. Students will be able to examine future trends in organizational development.

MARKETING

MARKET 001  PRINCIPLES OF SELLING (3) CSU
Lecture: 3 hour(s)
This course includes the development of the fundamental principles of wholesale and specialty selling, including such phases as developing the sales plan, securing prospects, effective goods and service presentation, product analysis, closing the sale, and service after the sale.

Student Learning Outcomes:
Students will be able to determine appropriate technique to suit the sale of a product or service.
Mathematics

Math 101: The World of Numbers (3) NDA
Lecture: 3 hour(s)
This is the first course in the sequence of courses in mathematics. Reading and writing whole numbers; addition, subtraction, multiplication, division and order of operations with whole numbers; divisibility tests, factorization, finding greatest common factor and least common multiple; solving simple application problems with whole numbers.
Student Learning Outcomes:
1. Perform the four basic operations on whole numbers. 2. Apply and follow the mathematical principles and order of operations to evaluate numerical expressions. 3. Apply divisibility tests and prime factorization to find the greatest common factor (GCF) and the least common multiple (LCM). 4. Solve application problems by using critical thinking skills Apply divisibility tests and prime factorization to find the greatest common factor and least common multiple, SLO TESTED Apply divisibility tests and prime factorization to find the greatest common factor and least common multiple.

Math 105: Arithmetic (3) NDA
Lecture: 3 hour(s)
Prerequisite: Mathematics 101; Corequisite: Mathematics 100
This course reviews fundamentals of arithmetic in college and business. Topics include basic operations with fractions, decimals, percents, and measurement. The course emphasizes problem solving techniques that are useful in practical situations.
Student Learning Outcomes:
Upon completion of the course, students will be able to perform the four basic operations on rational numbers. Apply and follow the mathematical principles and order of operations to evaluate numerical expressions involving rational number problems. Solve application problems by using critical thinking skills.

Math 112: Pre-Algebra (3) NDA
Lecture: 3 hour(s)
Prerequisite: Mathematics 105
This course prepares students for their first course in Algebra. Topics include brief review of arithmetic, operations with signed numbers, variables, expressions, linear equations and word problems.

Student Learning Outcomes:
1. Perform operations on real numbers and basic algebraic expressions without the use of a calculator. 2. Apply and follow the mathematical principles and operations to solve linear equations. 3. Model and solve real world applications involving math principles, operations, and strategies.

Math 113: Elementary Algebra (3)
Lecture: 3 hour(s)
Prerequisite: Mathematics 112; Corequisite: Mathematics 100
Topics include review of signed numbers, variables, the order of operations; addition and subtraction of polynomials; solve and graph linear equations, solve inequalities; solve systems of equations.
Student Learning Outcomes:
1. Perform operations on real numbers and algebraic expressions. 2. Apply and follow the mathematical principles, operations and strategies to solve inequalities. 3. Solve systems of linear equations in two variables. 4. Perform operations on polynomials. 5. Solve application problems by using critical thinking skills.

Math 114: Elementary Algebra B (3)
Lecture: 3 hour(s)
Prerequisite: Mathematics 113; Corequisite: Mathematics 100
The course covers multiplication and division of polynomials, factoring, rational expressions, radicals, quadratic, rational, and radical equations, and application problems. This course is the second half of Math 115. Math 113 and 114 together are equivalent to Math 115. Credit is allowed in only one of Math 115 or the Math 113/114 combination. Concurrent enrollment in Math 113 and 114 is not permitted.
Student Learning Outcomes:
Perform operation on real numbers and algebraic expressions. Perform factoring on polynomial expressions. Apply and follow the mathematical principles, operations and strategies to solve nonlinear equations such as rational, radical, and quadratic. Solve application problems by using critical thinking skills.

Math 115: Elementary Algebra (5)
Lecture: 5 hour(s)
Prerequisite: Mathematics 112; Corequisite: Mathematics 100
Topics include signed numbers, variables, the order of operations; addition, subtraction, multiplication, and division of signed numbers and polynomials. Solve linear equations, inequalities, factoring, graphs Solve word problems, systems of equations, rational equations, radicals and quadratic equations.
Student Learning Outcomes:
1. Perform operations on real numbers and algebraic expressions. 2. Apply and follow the mathematical principles, operations, and strategies to solve nonlinear equations such as rational, radical, and quadratic equations. 4. Solve application problems by using critical thinking skills.

Math 121: Essentials of Plane Geometry (3)
Lecture: 3 hour(s)
Prerequisite: Mathematics 115; Corequisite: Mathematics 100
This course is an introduction to Euclidean geometry and it is equivalent to one year of high school geometry. This course reviews the basic geometric construction, definitions, postulates, theorems and their proofs for triangles, parallel lines and circles.
Student Learning Outcomes:
SLOs: Determine angle measures in different geometric figures. Construct geometric figures using a straightedge and compass. Write direct and indirect proofs of theorems and corollaries. Solve problems involving geometric figures using definitions, postulates, and theorems.
MATH 125  INTERMEDIATE ALGEBRA (5)  
Lecture:  5 hour(s)  
Prerequisite:  Mathematics 114 or Mathematics 115; Corequisite:  Mathematics 100
This course is a study of the properties of real numbers, laws of exponents, radicals, equations & inequalities in linear and quadratic form, system of equations, matrices, graphing in two variables, rational expressions & equations, complex numbers, conic sections & their graphs, exponential and logarithmic functions.
Student Learning Outcomes:
1. Solve Linear and nonlinear equations and inequalities by performing mathematical operations on complex numbers, algebraic, exponential and logarithmic expressions. 2. Solve systems of linear equations using graphical and algebraic methods. 3. Describe and analyze the characteristics of different types of functions. 4. Solve mathematical application problems by applying critical thinking skills.

MATH 225  INTRODUCTORY STATISTICS (3) UC:CSU
Lecture:  3 hour(s)  
Prerequisite:  Mathematics 125
The course discusses basic concepts and techniques of descriptive and inferential statistics including sampling, probability, statistical distributions, tables and graphs, central limit theory, hypothesis testing, confidence interval estimation, correlation and regression. Most analysis will be done using Excel spreadsheet program.
Student Learning Outcomes:
Test hypothesis for sample proportion, mean and standard deviation. Given a distribution, determine the probability of an event. Perform correlation and linear regression analysis.

MATH 227  STATISTICS (4) UC:CSU
Lecture:  4 hour(s)  
Prerequisite:  Mathematics 125
Discusses basic concepts and techniques of descriptive and inferential statistics including sampling, probability, statistical distributions, tables and graphs, central limit theory, hypothesis testing, confidence interval estimation, correlation and regression. Most analysis will be done using Excel spreadsheet program.
Student Learning Outcomes:
Test hypothesis for sample proportion, mean and standard deviation. Given a distribution, determine the probability of an event. Perform correlation and linear regression analysis. Quiz or test.

MATH 235  FINITE MATHEMATICS (5) UC:CSU
Lecture:  5 hour(s)  
Prerequisite:  Mathematics 125
This course consists of the basic concepts and operations of algebra essential to business, life and social science majors. The course includes the study of rational exponents, quadratic equations, graphs, logarithms, mathematics of finance, linear programming and an introduction to probability and statistics.
Student Learning Outcomes:
1. Analyze a wide range of applications from many disciplines and graphically solve these optimization problems in two variables with linear constraints. 2. Solve the above applications in more than two variables using the simplex method. 3. Understand the principles of borrowing and saving to compare different financial opportunities and make informed decisions. 4. Use some of the principles from probability and statistics to extract useful information from raw data.

MATH 236  CALCULUS FOR BUSINESS AND SOCIAL SCIENCE (5) UC:CSU
Lecture:  5 hour(s)  
Prerequisite:  Mathematics 125
This course is an introduction to one and two variable calculus as applied to business, economics, and social sciences, included are applications of partial derivatives and multiple integrals to extrema problems.
Student Learning Outcomes:
1. Students will be able to apply the first and second derivatives to analyze Business and Economics applications, as well as Life and Physical Science applications. 2. Students will demonstrate how to find the absolute maximum or minimum value of some varying quantity, Q, and the point at which that maximum or minimum occurs. 3. Students will be able to analyze a rational function using the first and second derivatives; find intercepts, vertical asymptotes and horizontal or oblique asymptotes. 4. Students will be able to use regression analysis to predict outcomes.

MATH 240  TRIGONOMETRY (3) UC:CSU
Lecture:  3 hour(s)  
Prerequisite:  Mathematics 125, Mathematics 121
Topics include trigonometric functions, circular functions; trigonometric equations; trigonometric identities; solutions of right and oblique triangles; inverse trigonometric functions, graphing; complex numbers and DeMoivre’s Theorem; polar coordinates; vectors and applications.
Student Learning Outcomes:
1. Develop reciprocal, quotient and Pythagorean identities from the definitions of the trigonometric functions. 2. Solve application problems that are right triangle based. 3. Graph the trigonometric functions; define and graph the inverse circular functions. 4. Use the Law of Sines and Law of Cosines to solve vector applications. 5. Solve such application problems as length of an arc, area of a sector, velocity and angular speed.

MATH 245  COLLEGE ALGEBRA (3) UC:CSU
Lecture:  3 hour(s)  
Prerequisite:  Mathematics 125
Upon successful completion of this course, students will reinforce the concept of functions and their graphs important in later courses of mathematics, science, business, nursing, or computer science. Polynomial, rational, radical, exponential, and logarithmic equations, both linear and nonlinear systems, sequences and series, and basics of probability are covered to allow students to solve a wide variety of real life applications.
Student Learning Outcomes:
1. Use functions and graphing concepts to analyze and solve scientific application problems. 2. Solve polynomial, rational, exponential and logarithmic equations. 3. Solve linear and nonlinear system of equations and their applications. 4. Write and analyze conic sections involving parabola, ellipse and hyperbola.

MATH 260  PRE CALCULUS (5) UC:CSU
Lecture:  5 hour(s)  
Prerequisite:  Mathematics 240
After a brief review of algebra with real and complex numbers, this course will cover the following topics: polynomial and rational functions with informal limits; exponential, logarithmic and trigonometric functions; systems of equations and matrices; sequences, series and the binomial theorem; conics and polar coordinates.
Student Learning Outcomes:
1. Analyze and graph higher degree polynomial functions and rational functions. 2. Analyze and graph exponential and logarithmic functions; solve exponential and logarithmic equations. 3. Analyze and graph trigonometric functions; solve trigonometric equations; verify and use trigonometric identities and formulas. 4. Write recursive and explicit formulas for sequences; evaluate partial sums and infinite series; apply the Binomial Theorem. 5. Write equations of conics, and graph conics; convert equations from rectangular to polar coordinates, and vice versa.

MATH 265  CALCULUS WITH ANALYTIC GEOMETRY I (5) UC:CSU
Lecture:  5 hour(s)  
Prerequisite:  Mathematics 260
Introduction to real analysis with analytic geometry; functions, limits and continuity; derivatives and integrals of algebraic and transcendental functions; applications of the derivative to graphing and optimization; the Fundamental Theorem of Calculus and applications of the definite integral.
MATH 266  CALCULUS WITH ANALYTIC GEOMETRY II (5) UC:CSU
Lecture:  5 hour(s)
Prerequisite:  Mathematics 265
This course includes differentiation and integration of trigonometric, exponential, logarithmic functions, and hyperbolic functions; conic sections with translations and rotations, techniques of integration; improper integrals, infinite series and polar coordinates.
Student Learning Outcomes:
1. Differentiate and integrate algebraic and transcendental functions. 2. Select and use the appropriate technique to correctly perform a specific integration. 3. Solve application problems involving the definite integral. 4. Test for the convergence of an infinite series and apply the theory of power series to application problems. 5. Graph, differentiate and integrate functions in polar and parametric form.

MATH 267  CALCULUS WITH ANALYTIC GEOMETRY III (5) UC:CSU
Lecture:  5 hour(s)
Prerequisite:  Mathematics 26
This course reviews operations with vectors in two and three dimensional spaces as well as vector valued functions with their applications. Topics include partial derivatives, Lagrange multiplier, Line integrals, multiple integrals in polar, cylindrical and spherical coordinates, Green’s theorem, Surface integrals, Divergence and Stokes’ theorems.
Student Learning Outcomes:
1. Apply vector operations to derive equations of lines and planes; analyze the motion of a particle in space. 2. Find limits and partial derivatives of functions of two or more variables; use differentials to find local linear approximations; find directional derivatives and gradient. 3. Locate relative and absolute extrema of functions of two variables. 4. Evaluate integrals over a region, along a curve, and over a surface in both scalar and vector fields; solve associated application problems. 5. Apply the Fundamental Theorem of Line Integrals, Green’s Theorem, Stokes’ Theorem, and the Divergence Theorem.

MATH 270  LINEAR ALGEBRA (3) UC:CSU
Lecture:  3 hour(s)
Prerequisite:  Mathematics 267
Introduction to linear algebra and matrix theory. Topics include: linear systems, matrices and determinants; vector spaces and linear transformations; eigenvectors and eigenvalues; inner product spaces and canonical forms.
Student Learning Outcomes:
1. Solve systems of linear equations using matrices. 2. Prove or disprove if a set, together with addition and scalar multiplication defined, satisfies the ten axioms of a vector space. 3. Graph and geometrically describe the action of a linear transformation in two and three dimensions. 4. Find the eigenvalues and the corresponding eigenvectors as well as the characteristic equation of a linear transformation.

MATH 275  ORDINARY DIFFERENTIAL EQUATIONS (3) UC:CSU
Lecture:  3 hour(s)
Prerequisite:  Mathematics 267
Topics include ordinary differential equations with concentration on first and higher order, homogeneous and non homogeneous linear differential equations with or without initial value conditions; system of linear first order differential equations; Cauchy Euler equation; series solutions; Laplace transform; numerical solutions.
MICROTK 078  CISCO NETWORKING ACADEMY  SEMESTER II (3)
CSU  RPT1

Lecture:  2 hour(s)
Lab:  3 hour(s)
Prerequisite:  Microcomputer Technician 77

This is the second course in a four course sequence that qualifies the student to take the Cisco CCNA Certification Test; and covers router fundamentals, beginning router setup and configuration, routed and routing protocols, WAN fundamentals, network troubleshooting and network management.

Student Learning Outcomes:
The student will understand beginning router setup and configuration, routed and routing protocols, wide area inter networking fundamentals, network troubleshooting, and network management.

MICROTK 079  CISCO NETWORKING ACADEMY  SEMESTER III (3)

Lab:
Lecture:
Prerequisite:  Microcomputer Technician 78

This is the third course in a four course sequence that qualifies the student to take the Cisco CCNA Certification Test; and covers advanced router setup and configurations, LAN switching theory and VLANs, advanced LAN and LAN switched design, Novell IPX, and Threaded case studies.

Student Learning Outcomes:
The student will demonstrate an understanding of the following: Single Area OSPF, EIGRP, Switching Concepts, Switches and Switch Configuration, the Spanning Tree Protocol, Virtual LANs, Trunking Protocols, and Scaling IP Addresses. The WAN technologies PPP, ISDN and DDR, and Frame Relay are introduced. The student will also become familiar with Network Administration.

MICROTK 080  CISCO NETWORKING ACADEMY  SEMESTER IV (3)

Lab:
Lecture:
Prerequisite:  Microcomputer Technician 79

This is the fourth course in a four course sequence that qualifies the student to take the Cisco CCNA Certification Exam; and covers advanced WAN theory and design; WAN Technology, PPP, Frame Relay, ISDN; Application of National SCANS skills in managing a network and network threaded case studies.

Student Learning Outcomes:
The student will demonstrate an understanding of the following: advanced WAN theory, design, WAN technologies PPP, Frame Relay, ISDN, applications of national SCAN skills in managing a network, and Network Threaded case studies.

MICROTK 160  IT ESSENTIALS APPLICATION SOFTWARE

FUNDAMENTALS (2)  CSU

Lecture:  1 hour(s)
Lab:  3 hour(s)

Instruction and demonstrations are provided on the application, set up, configuration and operation of a wide range of computer programs.

Student Learning Outcomes:
The student will demonstrate the ability to install a computer Operating System with all its driver devices.

MICROTK 162  IT ESSENTIALS NETWORKING PERSONAL

COMPUTERS (4)  CSU

Lecture:  2 hour(s)
Lab:  6 hour(s)

The course will assist students in designing, selecting, configuring and installing local area networks. System administration and troubleshooting is also covered in detail.

MICROTK 164  IT ESSENTIALS MICROCOMPUTER THEORY AND SERVICING (5)

Lecture:  2 hour(s)
Lab:  6 hour(s)

The course provides servicing techniques for microcomputers and their related peripherals. Hands-on instruction is provided in diagnosing a range of microcomputers malfunctions.

Student Learning Outcomes:
The students will assemble a computer system and troubleshoot the system using appropriate tools and diagnostic software.

MICROTK 165  LINUX SURVIVAL COURSE (3)

Lecture:  2 hour(s)
Lab:  3 hour(s)

This course provides an introduction to the world of Linux (considered the success story of Open Source Software development), Linux and Open Source fundamentals will be taught as well as configuration and basic troubleshooting.

Student Learning Outcomes:
The students will be able to deploy and troubleshoot a Linux installation.

MICROTK 166  CCNA SECURITY (3)  NDA

Lecture:  2 hour(s)
Lab:  3 hour(s)

This course provides knowledge and skills to administer network devices and applications in a security infrastructure, recognize network vulnerabilities, and detect security threat. This course offers an overview of security challenges and solutions, and installing, monitoring, and troubleshooting Cisco security solutions to secure a network.

Student Learning Outcomes:
The students will be able to control administrative access to network devices using ssh and configure administrative roles on network devices for network security.

MOTORCYCLE REPAIR MECHANIC

MCYCMK 210  INTERNAL COMBUSTION ENGINE THEORY AND REPAIR (4)

Lecture:  3 hour(s)
Lab:  3 hour(s)

A study is made of engine types, construction operating principles and performance. Shop practice is given on engine disassembly and inspection, valve reconditioning, bearing replacement, piston and ring service and engine reassembly.

Student Learning Outcomes:
1. Students will be able to disassemble and reassemble two and four stroke engines.

MCYCMK 212  MOTORCYCLE SERVICE AND TUNE UP THEORY AND REPAIR (4)

Lecture:  3 hour(s)
Lab:  3 hour(s)

Lecture and laboratory experiences are given on routine motorcycle service
and tune up as well as troubleshooting and repairing engine performance problems.

Student Learning Outcomes:
1. Students will use diagnostic equipment to troubleshoot and repair tires, drive trains, ignitions, and carburetors.

MCYCMK 214 MULTI CYLINDER ELECTRICAL PRINCIPLES AND REPAIR (4)
Lecture: 3 hour(s)
Lab: 3 hour(s)

Instruction is offered in electrical theory, diagnosis, and repair as applied to the electrical systems of multi cylinder motorcycles. Shop practices are given on testing procedures and test equipment, and repair.

Student Learning Outcomes:
1. Students will use electrical test equipment to troubleshoot ignitions, charging systems and starting systems.

MCYCMK 216 MULTI CYLINDER DIAGNOSIS AND OVERHAUL (4)
Lecture: 3 hour(s)
Lab: 3 hour(s)

Multi cylinder engine principles, operation and overhaul methods are stressed. Shop instruction on diagnosis, disassembly, repair, overhaul and assembly of multi cylinder engines is offered.

Student Learning Outcomes:
1. Students shall learn the extra steps required for multi cylinder engines.
2. Special emphasis will be placed on the fuel systems with respect to troubleshooting and synchronizing carburetors, or troubleshooting fuel injection systems for multi cylinder engines.

MUSIC 111 MUSIC APPRECIATION I (3) UC:CSU
Lecture: 3 hour(s)

An introductory survey course designed to develop an understanding of the literature of Western art music from the Middle Ages through the present day. Emphasis is given to music heard in concert, motion pictures, radio and television and to techniques of perceptive listening.

Student Learning Outcomes:
1. Students will be able to distinguish among various musical styles as they relate to the major historical periods. 2. Students will be able to identify, describe, and analyze music characteristics and identify the significant composers of representative songs from the major historical periods. 3. Students will match historical events and works of art and literature of each era to the significant works of Western art music.

MUSIC 141 JAZZ APPRECIATION (3) UC:CSU
Lecture: 3 hour(s)

A survey of twentieth century ragtime, blues, New Orleans and Chicago jazz, stride piano, swing, bebop, cool jazz, hard bop, modal jazz, third stream, avant garde and free jazz, fusion, and experimental jazz styles. Emphasis is placed on the music and personalities of those artists who made original contributions and whose work influenced that of other important jazz figures.

Student Learning Outcomes:
1. Students will do in depth research on an artist of their choosing by reading a biography of the artist and writing a critical review of the book.

MUSIC 650 BEGINNING GUITAR (2) UC:CSU
Lecture: 1 hour(s)
Lab: 2 hour(s)

Learning the basics of guitar with emphasis on right and left hand techniques, tuning, chords, strumming and notation. Students will learn to read and play simple melodies and accompaniments to gain a firm grasp of the instrument. Student must possess a guitar.

Student Learning Outcomes:
1. Students will demonstrate the understanding of the fundamentals of left and right hand technique for both finger style and pick style guitar playing.
2. Students will be able to identify major, minor, and seventh chords. 4. Students will use the skills they have learned to perform melodies and songs. 5. Students will be able to perform a song demonstrating proper left hand and right hand technique.

MUSIC 931 COOPERATIVE EDUCATION MUSIC (3) RPT3
Lecture: 3 hour(s)

Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

NURSING

NURSING 941 COOPERATIVE EDUCATION NURSING (4) RPT3
Lecture: 4 hour(s)

Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
1. The student will develop at least three learning objectives to be accomplished on the job. 2. The objectives will be related to the educational/occupational goals of the student.
**NURSING, REGISTERED**

**REGNRSG 121  INTRODUCTION TO NURSING (3) CSU**

Lecture: 1 hour(s)
Lab: 6 hour(s)

This course is an introduction to the philosophy of nursing, nursing history, Maslow’s Hierarchy of needs, and legal and ethical issues in nursing. Concurrent with the theory, the nursing student will have basic client care experience in the skills lab and hospital setting.

**Student Learning Outcomes:**

1. The student will be able to describe the development of nursing as a profession.
2. The student will be able to provide basic nursing care to a hospitalized patient using principles of nursing process and Maslow’s Hierarchy of Needs.

**REGNRSG 122  FUNDAMENTALS OF NURSING (3) CSU**

Lecture: 1 hour(s)
Lab: 6 hour(s)

Prerequisite: Registered Nursing 123 and Registered Nursing 121

This course is designed to introduce the student to the concept of medical surgical nursing using Maslow’s Hierarchy of Needs as a framework.

**Student Learning Outcomes:**

- The student will be able to utilize the nursing process and Maslow’s Hierarchy of Needs to assess and plan how to meet the basic needs of medical surgical clients.

**REGNRSG 123  NURSING PROCESS (1) CSU**

Lecture: 1 hour(s)

This course is designed to acquaint the students with the components of Nursing Process: assessment, nursing diagnosis, planning, implementation and evaluation. Students will use Nursing Process in conjunction with Maslow’s Hierarchy of Needs to make appropriate nursing judgments.

**Student Learning Outcomes:**

- The student will be able to describe the development of nursing as a profession.
- The student will be able to provide basic nursing care to a hospitalized patient using principles of nursing process and Maslow’s Hierarchy of Needs.

**REGNRSG 124  NURSING COMMUNICATION (1) CSU**

Lecture: 1 hour(s)

Prerequisite: Registered Nursing 121 and Registered Nursing 123

The course is designed to acquaint the student to the elements of communication process and how communication is affected by culture and variations in health and illness. Included in the course is a discussion on how the student can meet the client’s communication needs, which will require the application of nursing process and critical thinking.

**Student Learning Outcomes:**

- The student will be able to describe the development of nursing as a profession.
- The student will be able to provide basic nursing care to a hospitalized patient using principles of nursing process and Maslow’s Hierarchy of Needs.

**REGNRSG 125  NURSING PHARMACOLOGY (2) CSU**

Lecture: 1.5 hour(s)
Lab: 1.5 hour(s)

This course focuses on the effects of drug therapy on human body systems. The body systems include: the central nervous system, autonomic nervous, cardiovascular, renal, endocrine, respiratory and Gastro intestinal systems. Also included are anti infective, anti inflammatory, immune and biological modifiers, chemotherapeutic, hematological, dermatologic, ophthalmic and otic agents. The students will learn and practice principles of medication administration.

**Student Learning Outcomes:**

1. Students will be able to identify uses, actions, side effects, and adverse reactions to commonly used medications.
2. Students will demonstrate administration of oral, enteral, and parenteral medications.

**REGNRSG 126  MEDICAL SURGICAL NURSING I (5) CSU**

Lecture: 3 hour(s)
Lab: 6 hour(s)

Prerequisite: Registered Nursing 122 and Registered Nursing 124 and Registered Nursing 125 and Registered Nursing 134; Nursing 125 and Registered Nursing 134; Nursing 122 and Registered Nursing 124

This basic course focuses on the nursing care of the adult client with moderate stress posed by common endocrine, gastrointestinal, cardiac and respiratory disorders. The student will function as a member of the health care team and beginning leadership skills will be presented. Emphasis will be placed on classroom and clinical application of critical thinking and therapeutic nursing interventions in acute, chronic and community health care settings.

**Student Learning Outcomes:**

- Students will be able to care for clients with fluid and electrolyte imbalances, acid base imbalances, infections, endocrine disorders, gastrointestinal disorders, cardiovascular disorders, and respiratory disorders in the acute healthcare setting.

**REGNRSG 127  MEDICAL SURGICAL NURSING II (5) CSU**

Lecture: 3 hour(s)
Lab: 6 hour(s)

Prerequisite: Registered Nursing 126 and Registered Nursing 129 and Registered Nursing 130 and Registered Nursing 134

This intermediate level medical/surgical nursing course focuses on nursing care of adult clients with high acuity problems within hospital and community settings. Students will use nursing process and Maslow’s Hierarchy of needs to plan and implement nursing care. The course builds on the theory and skills presented in REGNRSG 126. Leadership role will be expanded.

**Student Learning Outcomes:**

- Students will be able to formulate a comprehensive plan of care, organize and prioritize the needs of high acuity clients based upon Maslow’s Hierarchy of Needs and nursing process for clients with intermediate high acuity problems, and multi system illnesses in the acute healthcare environment.

**REGNRSG 128  MEDICAL SURGICAL NURSING III (3) CSU**

Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)

Prerequisite: Registered Nursing 127 and Registered Nursing 131 and Registered Nursing 134

This course focuses on the nursing care of medical surgical clients in a variety of setting. Emphasis will be on classroom and clinical application of critical thinking and caring interventions in chronic, acute, critical care and community health care settings.

**Student Learning Outcomes:**

- Students will demonstrate classroom and clinical application of critical thinking and caring interventions for medical surgical clients in chronic, acute, critical care and community health care settings.

**REGNRSG 129  GERONTOLOGY & COMMUNITY BASED NURSING (2) CSU**

Lecture: 1 hour(s)

Prerequisite: Registered Nursing 122; Registered Nursing 124; Registered Nursing 125 and Registered Nursing 134

This course focuses on nursing care of the older adult client with common health and illness needs. Emphasis will be on classroom and clinical application of critical thinking and caring therapeutic nursing interventions in acute, chronic and community health care settings for the older adult population.

**Student Learning Outcomes:**

- Students will be able to assess and provide care for elderly clients in acute and community settings.
REGNRSG 130  PSYCHIATRIC MENTAL HEALTH NURSING (3) CSU
Lecture:  1.5 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Registered Nursing 122 and Registered Nursing 124 and Registered Nursing 125 and Registered Nursing 134
This course focuses on nursing care of clients with common psychiatric mental health needs/disorders across the lifespan. Students will apply the nursing process, critical thinking, psychosocial theory and Maslow’s Hierarchy of Needs to care of clients in acute, chronic and community based psychiatric mental health settings.
Student Learning Outcomes:
- Students will be able to use the nursing process in providing psychiatric and mental health care to patients.
- Students will be able to use therapeutic communication techniques to form therapeutic alliances with psych mental health patients.

REGNRSG 131  REPRODUCTIVE NURSING AND WOMENS HEALTH (4) CSU
Lecture:  2 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Registered Nursing 126 and Registered Nursing 129 and Registered Nursing 130 and Registered Nursing 134
This course focuses on the nurse as a provider of care, manager of care and a member of the profession in a variety of maternal/newborn and women’s health settings.
Student Learning Outcomes:
The student will demonstrate an understanding of the reproductive system and the characteristics of normal pregnancy, physiological and psychological elements, processes of labor and delivery, post partum care, and care of the newborn.

REGNRSG 132  CARE OF CHILDREN AND FAMILY (4) CSU
Lecture:  2 hour(s)
Lab:  4.5 hour(s)
Prerequisite:  Registered Nursing 127 and Registered Nursing 131 and Registered Nursing 134
This course focuses on the nurse as a provider of care, manager of care and member of the profession in a variety of settings involving children and families. Course content includes physiological, psychological, developmental and socio cultural needs of children and families. Course content in Pediatric Nursing will be presented within the framework of the wellness/illness continuum of the client and family from birth through adolescence.
Student Learning Outcomes:
- Utilize biopsychosocial concepts and theories, communication skills, and principles of critical thinking to apply the nursing process when caring for children and their families.

REGNRSG 133  NURSING LEADERSHIP & MANAGEMENT (3) CSU
Lecture:  0.5 hour(s)
Lab:  7.5 hour(s)
Prerequisite:  Registered Nursing 128 and Registered Nursing 132 and Registered Nursing 134
This course focuses on the transitioning role of the graduating Associate Degree nurse as a provider of care, manager of care and member of the profession. Concepts and issues to be examined include effective leadership styles, advanced therapeutic communication, delegation, conflict resolution, time management, nursing ethics and professional issues. Clinical experience is in the form of a preceptorship.
Student Learning Outcomes:
- Demonstrate leadership skills and ability to practice as entry level registered nurse.

REGNRSG 134  NURSING SIMULATION LAB (1) CSU
Lab:  3 hour(s)
This course is designed to allow students to practice nursing skills in a structured setting. It will make use of patient care scenarios in which evidence based practice will be emphasized. It must be taken in semesters 1, 2 and 3. It is optional in semester 4. The class will be individualized to meet students needs.
Student Learning Outcomes:
- Demonstrate proficiency in applying patient care skills to simulated clinical setting.

REGNRSG 135  TRANSITION FROM LVN TO RN (2) CSU
Lecture:  2 hour(s)
This is a bridge course for students who have a valid current California Vocational Nursing License. It focuses on content necessary to make the role transition from LVN to RN. Content will include Professional Nursing, Nursing Process, Maslow’s Hierarchy of Needs, communication skills, ethical and legal issues affecting nursing practice, cultural assessment techniques and pharmacology and dosage calculation review.
Student Learning Outcomes:
- Student will compare and contrast current LVN role with RN role.
- Student will demonstrate competence in applying Nursing Process and Maslow’s Hierarchy of needs to RN Nursing Care Plans.
- Student will demonstrate understanding of basic concepts in pharmacology and dosage calculation.

OFFICE MACHINES

OFF MCH 002  ADDING AND CALCULATING MACHINES (1) CSU
RPT3
Lab:  2 hour(s)
Advisory: Mathematics 105
This course demonstrates the 10 key touch method and explains the various computerized calculator function keys. The methods used help develop the proper skills needed to use computerized 10 key calculators in the workplace. The review of basic math functions, with emphasis on practical business problems.
Student Learning Outcomes:
1. Understand calculator functions. 2. Calculate complex functions used in business. Calculations will include interest, discounts, investments in stocks and bonds, and converting fractions to percentages. 3. Understand touch method addition, subtraction, decimal point key, percents, constant multiplication, division rounding, mixed operations, and decimals.

PARALEGAL

PALEGAL 003  CIVIL RIGHTS AND THE LAW (3) CSU
Lecture:  3 hour(s)
This course will analyze United States Supreme Court decisions as they relate to civil rights in the context of their historical periods. Its ultimate purpose is to give the student an understanding of how the United States Supreme Court has had to respond to social movements within the United States, including but not limited to movements relating to racial equality, gender equality, religious expression, and sexual orientation, and how its interpretations of associated laws have impacted those movements as to their objectives, carriage, and reach.
Student Learning Outcomes:
1. Student will be able to analyze the sociopolitical impact of Court decisions upon specific societal groups as those groups perceive protections guaranteed them by the United States Constitution. 2. Student will be able to assess conflicts between U.S. Supreme Court mandates and Congressional prescriptions.
PALEGAL 004 LEGAL INTERNSHIP (3) RPT1
Lecture: 1 hour(s)
Lab: 14 hour(s)
Prerequisite: Paralegal 10
Advisory: English 101
Under the instructor’s direction and according to guidelines the paralegal student will be assigned to a law related institution; a local court, district attorney’s office, city attorney’s office, private law firm, or law library to demonstrate their vocational skills and abilities.
Student Learning Outcomes:
1. Student will gain an intimate understanding of how a legal institution operates. 2. Student will experience first hand the demands of a legal institution such as those of a law office. 3. Student will experience first hand how to interact with office personnel and clients/customers of diverse interests and socioethnic backgrounds.

PALEGAL 010 INTRODUCTION TO LAW AND LEGAL PROFESSION (3) CSU
Lecture: 3 hour(s)
Prerequisite: English 28
This introductory course provides an introduction to legal terminology, research of legal problems, law and ethics, and the role of the paralegal as a legal assistant.
Student Learning Outcomes:
1. Comprehend and use legal terminology. 2. Access and utilize traditional and electronically formatted resources related to legal research. 3. Draft documents outling and/or summarizing their research findings and conclusions based on those findings.

PALEGAL 011 INTRODUCTION TO CIVIL LITIGATION (3) CSU
Lecture: 3 hour(s)
Prerequisite: Paralegal 10; Corequisite: Paralegal 10; Continuation of Paralegal I with the study of composition, location, and jurisdiction of all courts including an introduction to legal drafting and writing with continued study of document production and administration within the judiciary and a detailed examination of civil and criminal litigation.
Student Learning Outcomes:
1. Student will be able to differentiate between the various areas of civil law and apply the appropriate rules relevant to each specific area.

PALEGAL 012 TORT LAW (3)
Lecture: 3 hour(s)
This course provides an overview of the fundamentals of Tort Law including intentional torts to the person and to property, negligence, and strict liability. Additionally students will study personal injury investigation, preparation of legal pleadings, preparation and analysis of discovery materials, and how to prepare for tort litigation.
Student Learning Outcomes:
1. Comprehend when and under what circumstances another owes them a legal duty to prevent harm to their person and/or property. 2. Initiate and engage an appropriate course of lawful action toward realizing a commensurate remedy for the harm or harms suffered to themselves and/or their property.

PALEGAL 013 WILLS, TRUSTS, AND PROBATE ADMINISTRATION (3)
Lecture: 3 hour(s)
Study of the fundamental principles of the law of wills, trusts, and probate including an examination of the organization and jurisdiction of the California Probate Court and the administration of estates through that court.
Student Learning Outcomes:
1. Student will be able to analyze the sociopolitical impact of the United States Supreme Court decisions.

PALEGAL 016 CIVIL AND CRIMINAL EVIDENCE (3)
Lecture: 3 hour(s) S
Students will examine the rules of court including deposition and interrogatory preparations and how each affects the admissibility of evidence in a civil or criminal proceeding.
Student Learning Outcomes:
1. Students will utilize resource materials in determining application rules of law and rules of state and federal evidence.

PALEGAL 017 LEGAL WRITING (3)
Lecture: 3 hour(s)
Students will be introduced to traditional sources of law related information. Students will also be introduced to electronically formatted sources of law related information. Students will utilize both source types in researching legal issues and preparing documents related to their findings.
Student Learning Outcomes:
1. Perform legal research utilizing traditional and electronically formatted resources. 2. Draft legal documents including memorandi, briefs, and opinion letters.

PALEGAL 019 PROPERTY AND CREDITOR RIGHTS (3)
Lecture: 3 hour(s)
Students will be introduced to the study of the different classifications of property interests including community property, tenancies, leases and other property interests. Students will also be introduced to the study of systems of recording those interests and how to search those databases. Students will examine secured transactions and bankruptcy laws.
Student Learning Outcomes:
1. Demonstrate a comprehension of terminology associated with various classifications of property and property interests. 2. Property assess and evaluate the legal ramifications and attendant rights related to the acquisition and distribution of property interests as an individual possessor or as co possessor of that interest. 3. Demonstrate a comprehension of and properly evaluate their rights as a creditor or debtor toward resolution of a debt issue.

PALEGAL 020 PROBATE PROCEDURES (3)
Lecture: 3 hour(s)
A comprehensive study of methods for fact gathering, office procedures, and required court work involved in the processing of probates for testate and intestate decedents.
Student Learning Outcomes:
1. Student will be able to differentiate between the various areas of civil law and apply the appropriate rules relevant to each specific area.

PALEGAL 051 LEGAL RESEARCH (3) RPT1
Lecture: 3 hour(s)
Corequisite: Paralegal 10
Advisory: English 101
Student will learn to acquire information from traditional and electronic resources. Student will perform research in law libraries and through computer based catalogs. Student will be taught to access and utilize primary, secondary, and CALPR research resources to resolve legal problems. Resources will include federal and state statutes, federal and state cases, federal and state regulations, digests, law reviews, treatises, opinions, and other practice works.
Student Learning Outcomes:
1. Student will be able to conduct legal research using primary and secondary authorities. Student will be able to utilize traditional and electronically formatted resources.
PERSONAL DEVELOPMENT

PERSDEV 002 INTERPERSONAL RELATIONSHIPS (1) CSU RPT3
Lecture: 1 hour(s)
This course enhances interpersonal skills for building effective communication for personal and professional growth. It utilizes group dynamics by enhancing self-esteem through self-awareness, acceptance, ability to listen and workplace habits. An honest appraisal of individual strengths and weaknesses is made in an effort to help remove barriers to social and academic growth.
Student Learning Outcomes:
1. Students will identify their personality preference and communication patterns based on the Myers Briggs Test Inventory (MBTI).
2. Students will identify social barriers (e.g., cultural, economical) to effective interpersonal relationship as well as strategies to overcome those barriers.
3. Students learn to achieve and maintain a balance in their work, school, and personal time.

PERSDEV 004 CAREER PLANNING (1) CSU
Lecture: 1 hour(s)
This is a career planning course designed to assist the student in selecting an appropriate career goal by introducing critical strategies, and information which is essential in selecting a career. The main areas covered in this course are self-assessment, problem solving, discovering your strengths and weaknesses, and understanding your personality style. Some tools which will be used to help identify the areas of concern are the Myers-Briggs and the COPES. Students will also learn how to prepare a functional and chronological resume, as well as a standard cover letter.
Student Learning Outcomes:
1. Students will be able to explain specific characteristics of at least one career they are interested in.
2. Students will be able to prepare a resume which is appropriate to their skills, education level, abilities, and work history.
3. Students will be able to identify the appropriate courses required for his or her career goal.

PERSDEV 020 POST SECONDARY EDUCATION: THE SCOPE OF CAREER PLANNING (3) UC:CSU
Lecture: 3 hour(s)
This course introduces students to the role of higher education in society and their role as students. Students explore personal attributes needed for college success, critical thinking and effective study strategies, relating to others in a diverse world, the career planning and decision making process, and transfer and educational planning. This course will also provide students with an overview of campus resources and policies.
Student Learning Outcomes:
1. Students will explore and match college resources to their educational needs.
2. Students will define personal attributes needed for college success.
3. Students will examine requirements for Associate degree, certificate and transfer to four year college/university.
4. Students will compare personality attributes with chosen career.

PERSDEV 020E POST SECONDARY EDUCATION: THE SCOPE OF CAREER PLANNING (1) CSU
Lecture: 1 hour(s)
This course is designed to build self-esteem, self-confidence, strengthen study skills and develop a healthy lifestyle. Lectures will discuss how these areas affect college success.
Student Learning Outcomes:
1. The students will be able to evaluate self in relation to qualities of a successful college student.

PHILOS 001 INTRODUCTION TO PHILOSOPHY (3) UC:CSU
Lecture: 3 hour(s)
This course introduces students to philosophy, covering the topics of ethics, logic and language, metaphysics, theory of knowledge, philosophy of religion, and political philosophy. Some of the questions examined include: ‘What is the good life?’ ‘What is right and wrong, and how do we know?’ ‘What is knowledge and what are its sources? Is it possible that we know nothing at all?’ ‘Does God exist?’ ‘Could we ever know?’ ‘What is the mind?’ ‘What is justice?’ ‘What is the basic nature of reality?’ An emphasis is placed on developing critical reasoning skills, and relating the topics to larger cultural issues and debates.
Student Learning Outcomes:
1. Students will be able to describe the impact of philosophy on past and present society and to begin to critically examine their own ideas about truth, methods of thinking, and the nature of reality.

PHILOS 008 DEDUCTIVE LOGIC (3) UC:CSU
Lecture: 3 hour(s)
This is an introductory course in logic. The student is introduced to the standards and techniques of correct thought with regular practice with short specimens of correct and incorrect reasoning taken from daily life. Consistency, thoroughness, and other aspects of rational thought are fostered.
Student Learning Outcomes:
1. Identify parts of simple arguments (premises and conclusions).
2. Identify basic logical fallacies in short passages.
3. Test categorical syllogisms for validity.
4. Translate simple English sentences into categorical logic.

PHYS ED 101 SWIMMING NON/SWIMMER (1) RPT3
Lab: 3 hour(s)
This course introduces students to basic aquatic skills to assure confidence and mobility in aquatic activities as well as the development of confidence in deep water. Physical and psychological preparation and values of participation in the activity are included.
Student Learning Outcomes:
Students will be able to successfully swim Freestyle without flotation.
support in deep water: Student will be able to successfully perform a streamline glide in a prone position. Student will be able to successfully float on back unassisted in deep water. Student will be able to successfully swim under water.

PHYS ED 102 SWIMMING SKILLS (1) RPT3
Lab: 3 hour(s)
This course is designed to teach the skills of swimming: crawl stroke, backstroke, breaststroke, butterfly, flip turns, starts and finishes. The course will introduce the principles and strategies of endurance and interval training. Upon completion of this course the student will be able to perform the basic strokes, know the rules that govern the different strokes, understand the nutrition and injury prevention strategies for swimming.
Student Learning Outcomes:
- Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

PHYS ED 131 AQUA AEROBICS (1) RPT3
Lab: 3 hour(s)
Instruction and practice in water exercise to increase knowledge and levels of cardiovascular fitness, muscular strength and endurance, and flexibility. No swimming skills required.
Student Learning Outcomes:
- Students will engage in and assess their performance in a variety of water exercises that promote overall health and fitness.

PHYS ED 170 WALKING FOR FITNESS (1) RPT3
Lab: 3 hour(s)
Walking for Fitness focuses on achieving cardiovascular fitness and a healthy lifestyle through walking. Includes such topics as shoe selection, posture, gait, walking styles, flexibility, clothing, creating a walking program and assessing fitness level.
Student Learning Outcomes:
- Students will demonstrate an optimal healthy flexibility range.

PHYS ED 462 MODERN DANCE (1) RPT3
Lab: 3 hour(s)
This course teaches technique, principles, terminology and the practice of modern (contemporary) dance. The course will emphasize not only the correct placement and execution of a wide variety of modern dance movements, but will also teach the history of the movements, and focus on the elements of space, time, and energy through improvisational and choreographic exercises. Students will develop coordination, flexibility, and cardiovascular strength using various movement combinations.
Student Learning Outcomes:
- Be able to learn and perform a dance routine.

PHYS ED 465 AEROBICS FOR DANCE (1) RPT3
Lab: 3 hour(s)
This course introduces students to standardized basic steps to include locomotor and axial movement performed to musical accompaniment. A warm up, basic footwork integrating fundamental rhythmic skill, will create cardiovascular development and strengthening exercises for major muscle groups.
Student Learning Outcomes:
- Students will demonstrate knowledge of basic dance aerobic footwork in rhythm and improved cardiovascular conditioning techniques.

PHYS ED 500 BASKETBALL THEORY (3) RPT1
Lecture: 2 hour(s)
Lab: 2 hour(s)
This course will help the advanced basketball student acquire a more in depth understanding of the various offensive and defensive theories in the sport of basketball. Analysis of strategies and outcomes will be emphasized.
Student Learning Outcomes:
- At the conclusion of this course, students will be able to diagram offensive and defensive plays.

PHYS ED 504 INTERCOLLEGIATE SPORTS BASKETBALL (3) RPT2
Lab: 10 hour(s)
Fundamental, intermediate and advanced principles/theories and skills of Basketball. Instruction, demonstration and practice of basic basketball skills, include passing, dribbling, shooting, rebounding, individual and team offense/defense and basketball intercollegiate competition.
Student Learning Outcomes:
- Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

PHYS ED 506 INTERCOLLEGIATE SPORTS CROSS COUNTRY (3) RPT2
Lab: 10 hour(s)
This course concentrates on the theory, technique and practice of intercollegiate competition associated with running Cross Country. Conditioning and preparing for competition in regularly scheduled meets are integral parts of the daily class meetings. This course is designed to develop an understanding of advanced theory and technique of Intercolligate Cross Country competition.
Student Learning Outcomes:
- Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

PHYS ED 513 INTERCOLLEGIATE SPORTS SWIMMING (3) RPT1
Lab: 10 hour(s)
Intercollegiate Athletic competitive swimming and diving team course. Instruction, demonstration and practice of fundamental and advanced swimming and diving techniques, including starts, turns, stroke technique, breathing, interval training and intercollegiate competition.
Student Learning Outcomes:
- Students will compete in Intercolligate Athletics.

PHYS ED 515 INTERCOLLEGIATE SPORTS TRACK AND FIELD (3) RPT2
Lab: 10 hour(s)
This course is Intercolligate Athletic competitive Track and Field team course designed for members of the Intercolligate Track & Field program. Instruction, demonstration and practice of sprinting, hurdles, throwing, jumping (vertical and horizontal), pole vaulting, middle and long distance skills will all be emphasized. Students must get permission of the Instructor to participate and must have a physical exam prior to beginning the course.
Student Learning Outcomes:
- Students will compete in an intercollegiate competition.

PHYS ED 516 INTERCOLLEGIATE SPORTS VOLLEYBALL (3) RPT3
Lab: 10 hour(s)
This course provides the skills, training and allows for participation in the intercollegiate volleyball team. Students who take this class must meet eligibility requirements as requested by the conference and/or CCCAA.
Student Learning Outcomes:
- Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.
PHYS ED 517 INTERCOLLEGATE SPORTS WATER POLO (3)  
RPT2  
Lab:  10 hour(s)  
Intercollegiate Athletic competitive Water Polo team course. Fundamental and advanced principles/theories of water polo techniques. Instruction, demonstration and practice of swimming, eggbeater, offense, defense, counter attack, man up and man down situations.  
Student Learning Outcomes:  
Students will demonstrate the skills and strategies necessary to succeed in a game, meet or match.

PHYS ED 552 ATHLETICS PRE SEASON CONDITIONING (1)  RPT3  
Lab:  3 hour(s)  
This course is designed for the student athlete. The following areas are emphasized: the analysis and training of athletic skills, the analysis of offensive and defensive systems, physical conditioning, strength training and aerobic conditioning.

PHYS ED 555 INTERCOLLEGE SPORTS STRENGTH & FITNESS TRG  
FOR CROSS COUNTRY (1)  RPT3  
Lab:  3 hour(s)  
This course is designed for students athletes planning on competing in intercollegiate cross country. Training will include various forms of Aerobic and Anaerobic conditioning and strength training in order to prepare for the intercollegiate season. Students are recommended to have a physical exam prior to enrolling in the class.

PHYS ED 561 INTERCOLLEGE SPORTS STRENGTH & FITNESS  
TRAINING FOR WATER POLO (1)  RPT3  
Lab:  3 hour(s)  
The course is a designed to provide strength and fitness training for current or perspective intercollegiate athletes in the sport. The class provides conditioning for an upcoming season, the rules and regulations of the sport as well as provides information on the requirements of being a competitive player.

PHYS ED 562 SWIM AND RUN FOR FITNESS (1)  RPT3  
Lab:  3 hour(s)  
This course develops cardiovascular conditioning and fitness through running and swimming laps. It enables students to gain awareness of the importance of proper running techniques/postural alignment, including progressive resistance training and conditioning for the purpose of training for a triathlon. Nutrition and concepts of fitness are also covered.

PHYS ED 565 BASKETBALL (1)  RPT3  
Lab:  3 hour(s)  
This course is designed to teach all levels of basketball skills. It not only emphasizes fundamental basketball skills such as dribbling, passing and shooting but it also includes the selection and care of equipment, rules, offense and defense strategy, etiquette, terminology and the components of fitness.

PHYS ED 566 BODY CONDITIONING (1)  RPT3  
Lab:  3 hour(s)  
This course teaches body fitness. It emphasizes aerobics, proper nutrition, weight control and strength training in accordance with the American College of Sports Medicine Guidelines. A variety of exercises and techniques will be used, based on personal needs, to establish programs that will achieve these goals.

PHYS ED 690 WEIGHT TRAINING (1)  RPT3  
Lab:  3 hour(s)  
Weight Training includes an emphasis in the knowledge, understanding and values of building muscle strength and endurance. The course includes instruction in the five health related components of fitness (body composition, muscle strength, muscle endurance, flexibility and cardiovascular fitness). The objective is to develop the student’s ability to develop his/her own physical fitness program at any time in life based upon sound physiological principles.

PHYS ED 742 CARDIO KICKBOXING (1)  RPT3  
Lab:  3 hour(s)  
A non contact aerobic activity course designed to use basic kicking and punching techniques to improve overall fitness including: cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition. Weights, steps, and calisthetic exercises may also be utilized.

PHYS ED 850 ANTI-DOPING (3)  
Lecture:  3 hour(s)  
Identify of performance substances used in sports and the impact they have had to the game.
PHYSICS 001  MECHANICS OF SOLIDS (4) UC:CSU
Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Physics 11 or Physics 12
Corequisite: Mathematics 266
This course covers elements of classical mechanics, including motion in three dimensions, vectors, laws of motion, circular motion, energy and energy transfer, linear momentum, rigid body rotation, angular momentum, static equilibrium and elasticity.
Student Learning Outcomes: To deduce the value and its uncertainty of physical observables based on empirical values. To deduce the value of the density of a liquid based on measurements of the mass and the volume of the liquid. Use the experimental uncertainties in the measurements of the mass and the volume to determine the uncertainty in the deduced value of the density of the liquid. A level of performance of 80% is expected as a minimum.

PHYSICS 002  MECHANICS OF FLUIDS, HEAT, AND SOUND (4) UC:CSU
Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Physics 1
Corequisite: Mathematics 266
This course covers elements of classical mechanics, thermodynamics, fluid dynamics, mechanical waves and geometrical optics, including universal gravitation, hydrostatics, hydrodynamics, oscillations, wave motion, sound, superposition of waves, temperature, first and second laws of thermodynamics, kinetic theory, entropy, nature of light and lenses. Differential and integral calculus are often needed. Student Learning Outcomes: To deduce the mass of the Moon from data taken by the NASA Explorer satellite. Using the experimental uncertainties of the satellite orbit parameters and the orbital period, one should determine the uncertainty in the deduced value of the Moon mass.

PHYSICS 003  ELECTRICITY AND MAGNETISM (4) UC:CSU
Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Physics 1; Mathematics 266
This course covers the elements of electricity and magnetism, including electric and magnetic fields and circuits and their application as well as inductance. Capacitance, Gauss's law, Ampere's law, Faraday's law, and resonance. Student Learning Outcomes: 1. Be able to demonstrate the understanding of theoretical and experimental concept of Coulomb's law, electrical and magnetic forces, electrical circuits and Ohm's law. 2. Be able to describe the Gauss's law, batteries, generators, motors and electrical circuits. 3. Be able to discuss the Faraday's law of Induction, properties of electromagnetic waves, and electromagnetic spectrum. 4. Be able to describe the Maxwell's equations of Electromagnetism and the principles of optics.

PHYSICS 004  OPTICS AND MODERN PHYSICS (4) UC:CSU
Lecture: 3 hour(s)
Lab: 3 hour(s)
Prerequisite: Mathematics 267
This course covers the fundamentals of physical optics including radiation, spectra, wave mechanics, uncertainty principle, radioactivity and nuclear physics. Student Learning Outcomes: 1. Be able to describe Young's double slit experiment using the Michelson Interferometer, and demonstrate the understanding of diffraction of light from narrow slits and diffraction gratings. 2. Be able to discuss the nature of light as an electromagnetic wave, and how it is expressed in Maxwell's equations. 3. Be able to discuss Einstein's Special Theory of Relativity, especially in terms of time dilation, length contraction and relativistic energy and momentum. 4. Be able to describe Quantum Physics, including the photoelectric and Compton effects, the dual nature of matter and Heisenberg's Uncertainty Principle, Schrodinger's wave equation and different particle scenarios. 5. Be able to discuss atomic spectra and Bohr's Model of the atom, the wave function of hydrogen, the Pauli Exclusion Principle and the Periodic Table. 6. Be able to describe the molecular bonds in solids, energy states and spectra of molecules, electrical conduction in metals, insulators and semiconductors. 7. Be able to discuss the nature of atomic nuclei, different forms of radioactivity, nuclear fission and fusion, and Elementary Particle Physics. For the lab course content: 1. Be able to use a red Helium/Neon laser shining through a double slit plate and analyze the separation of the bright fringes and calculate the average wavelength of the laser. 2. Be able to use the Michelson Interferometer and demonstrate that if the path distance changes, the fringe pattern changes also, and calculate the number of fringes that travel for a given change in path difference. 3. Be able to use known spectra of Helium and calibrate the spectrometer, and measure the wavelength of the incoming light and compare to the standard value. 4. Be able to use a prism spectrometer to calculate the group velocity of packets of waves based on the Quantum Mechanics theory. 5. Be able to use the Hall Effect apparatus and measure the Hall voltage of two different metal strips, and compare to their actual Hall voltage. 6. Be able to use the Frank Hertz apparatus and analyze the quantization of atomic energy levels, and measure/calculate the amount of energy absorbed by an electron in the mercury atom in the gas. 7. Be able to plot a graph of radioactivity and examine the half life of radioactive decay.
solving in the areas described in 2 below. 2. The student will have a basic understanding of Elasticity, Oscillations and Waves, Electricity, Magnetism, Optics. Theory of Relativity and Modern Physics. 3. The student will be able to perform simple experiments that demonstrate the laws and principles of Physics.

PHYSICS 029B    BASIC PHYSICS FOR TECHNICIANS (1)
Lecture:  3 hour(s)
Lab:     3 hour(s)
Corequisite: Mathematics 114 or Mathematics 115 or Physics 11
This course covers basic mechanical, fluid, thermal, electrical, magnetic, and optical topics at an introductory level.
Student Learning Outcomes:
The student will be able to analyze a problem in the area of mechanics.

PHYSICS 012    PHYSICS FUNDAMENTALS (3) UC:CSU
Lecture:  3 hour(s)
Corequisite: Mathematics 113 or Mathematics 115 or Chemical Technology 113 and Chemical Technology 111
This is a survey course describing the major areas of physics: mechanics, heat, wave motion, electricity and magnetism, electromagnetic radiation and optics. Mathematical solution of simple problems are covered. This course is not open to students receiving credit for Physics 12.
Student Learning Outcomes:
The student will be able to convert measurements into metric or US units.

PLUMBING

PLUMBING 026   PLUMBING LAYOUT AND ESTIMATING I (3)
Lecture:  3 hour(s)
This course covers fundamentals of blueprint reading for residential plumbing with an introduction to piping layout and design and basic estimating procedures. An overview of piping and fitting nomenclature, measurements and related calculations, as well as techniques in sketching, along with orthographic and isometric drawing creation are included.
Student Learning Outcomes:
1. Student will be able to read a basic blueprint for plumbing symbols and requirements. 2. The student will take information from a set of plumbing plans.

PLUMBING 027   PLUMBING LAYOUT AND ESTIMATING II (3)
Lecture:  3 hour(s)
This course is a study of blueprints and specifications as related to plumbing layout and estimating. Knowledge and experience of students, including the application of codes and standards, are utilized in the creation of estimates. Principles of estimating, including materials, labor, overhead, and profit are reviewed. Layout procedures for one and two story residential, commercial and industrial units are examined as well as estimating procedures for each of these units. Pricing methods and bidding practices are included.
Student Learning Outcomes:
Plumbing SLO# 1 Water Distribution Design and Material Take off: Student will create an isometric plumbing plan for the water distribution system from a set of blueprints and determine pipe and fittings required to perform job.

PLUMBING 028   PLUMBING CODE I (3) RPT1
Lecture:  3 hour(s)
Introduction is given in plumbing codes and ordinances that affect rough in work, in city and county areas. Installation of wastes, vents, clean outs, traps, gas fittings, gas vents and water pipe requirements are reviewed.
Student Learning Outcomes:
SLO 1: Apply plumbing trade calculations and measurements. 2: Calculate fixture unit values for DWV. 3: Design a basic residential drainage system

PLUMBING 029   PLUMBING CODE II (3) RPT1
Lecture:  3 hour(s)
Instruction is given in the uniform plumbing code that involves the current regulations of water and gas systems, fixture installation, water heaters, joints and connections, introduction to appendix A and reference standards.
Student Learning Outcomes:
1. Calculate building and available pressure. 2. Calculate fixture load values. 3. Apply plumbing trade math.

PLUMBING 031   BACKFLOW PREVENTION DEVICES (3)
Lecture:  1.5 hour(s)
Lab:     4.5 hour(s)
This course is designed to prepare student for Backflow Prevention Assembly Tester Certification. Instruction is given in fundamentals of cross connection control including State, County, County Health Department, and Municipal codes. Water Purveyor rules and regulations are also reviewed in this course. Emphasis is given to laboratory work in installing, operating, testing, troubleshooting, and maintaining Pressure, Spill Resistant Pressure, and Two Check Type Pressure, Vacuum Breakers as well as Double Check Valve, Double Check Valve Detector, Reduced Pressure Principle, and Reduced Pressure Principle Detector Backflow prevention Assemblies.
Course Descriptions

PLUMBING 113  BASIC PLUMBING PRINCIPLES AND PRACTICES (6)

Lecture: 3 hour(s)
Lab: 1 hour(s)

This course introduces fundamentals of plumbing principals and practices. Topics include installation, repair, and nomenclature of pipes, fittings, and fixtures. Instruction is given on elementary drawings, plan reading, general specifications, and trade calculations as related to construction documents.

Student Learning Outcomes:
1. The student will be able to scale drawings using an architect's scale or a rule. 2. The student will take measurements off a scaled floor plan using the architects scale. 3. The student will use an architect scale and a floor plan to: a) Measure how far apart, center to center, the stub outs are for the water closets in the Girl's Restroom. b) Measure and calculate number of feet of 2" type L copper tubing required for job plus/minus 20ft. c) Measure how far apart, center to center, the urinals are in the Boys Restroom. d) Measure distance from exterior of South Wall West side of building to center line of Plumbing Wall behind water closets on South Side of Girls Restroom.

PLUMBING 033  PLUMBING CODE III (3)

Lecture: 3 hour(s)
Lab: 1 hour(s)

This course studies fundamentals of plumbing calculations and elementary methods, procedures, and practices as adopted by the upc.

Student Learning Outcomes:
1. Read, calculate, and apply formulas, fixture unit values and capacities for fixtures and pipes. 2. Calculate aggregate cross sectional areas for vents, using inch square calculations. 3. Read, calculate, and apply footnotes, fixture unit values and load capacities for fixtures and pipes using sizing charts from the upc. 4. Apply current and legal installation methods, procedures, and practices as adopted by the upc.

PLUMBING 121  WORKING DRAWINGS AND LAYOUT I (3)

Lecture: 3 hour(s)
Lab: 1.5 hour(s)

This course offers instruction in basic blueprints, estimating and drafting related to the plumbing industry. Proper methods and procedures of plan interpretation and application. This course also offers exposure to the plumbing code, manufacturer's data sheets, and plumbing specifications.

Student Learning Outcomes:
Utilize basic drawing tools Create and design basic isometric plumbing systems according to the current UPC Identify and list load values and pipe sizes according to the current UPC

PLUMBING 111  INTRODUCTION TO PLUMBING (3)

Lecture: 1 hour(s)
Lab: 6 hour(s)

This course surveys the history of the Plumbing Industry, Highlights occupational information, Evokes job ethics and instructs on career information; The course also covers occupational health and safety hazards, provides an overview of Plumbing systems, and introduces the tools of the trade.

Student Learning Outcomes:
1. Student will use common power tools to perform basic plumbing operations by drilling holes through wood framing members using the Milwaukee Hole Hawg. 2. Skill #1 The student will measure and mark stud bay and calculate to locate center of drilled hole in stud bay. 3. Drill hole in center of bay and plumb using Hole Hawg and self feeding bit safely without binding drill bit. 4. Mark fireblock plum and centered under first hole in top plat. 5. Drill second hole centered and plumb through top plate using auger bit safely without binding bit.

PLUMBING MATHEMATICS AND PROCEDURES II (3)

Lecture: 3 hour(s)
Lab: 13.5 hour(s)

This course offers instructions in measuring, material purchases and return procedures, capacity loading, pressure calculations and gas conversions related to the plumbing industry, with emphasis on formulas calculations peculiar to the industry.

Student Learning Outcomes:
1. Identify basic materials and agencies. 2. Convert heat calculations of fixtures.

PLUMBING 122  PLUMBING MATHEMATICS AND PROCEDURES II (3)

Lecture: 1.5 hour(s)
Lab: 3 hour(s)

This course offers the study and practice of the proper methods and procedures used in installing plumbing fixtures and accessories. Installing, fabricating and testing fixtures applicable to residential and commercial plumbing are covered.

Student Learning Outcomes:
1. It is expected that students will be able to properly design and size a functioning drainage system complete with venting and in compliance with the current uniform plumbing codes. 2. Recognize various plumbing occupations, their knowledge and proficiency. 3. Identify and calculate fixture unit values and capacities for fixtures and pipes. 4. Calculate aggregate cross sectional areas for vents, using inch square calculations. 5. Read, calculate, and apply footnotes, fixture unit values and load capacities for fixtures and pipes using sizing charts from the upc. 6. Apply current and legal installation methods, procedures, and practices as adopted by the upc.

PLUMBING 112  FUNDAMENTALS OF PLUMBING (3)

Lecture: 3 hour(s)
Lab: 7.5 hour(s)

This course studies fundamentals of plumbing calculations and elementary drawings for beginners. Topics include pipe sizes and calculations, flow in pipe, friction design application. Instruction is given in the principles and design of water supply, fuel gas distribution, and D.W.V. (Drain, Waste and Vent).

Student Learning Outcomes:
1. The student will be able to calculate grade and fall of drainage and building drain to sewer.

PLUMBING 123  WORKING DRAWINGS AND LAYOUT II (3)

Lecture: 3 hour(s)
Lab: 6 hour(s)

This course is a study of blueprints, plans, and drawings as related to the plumbing trade. Skills, including the interpretation of applicable code and standards. Basic principles of estimating, including materials and their quantities are reviewed.

Student Learning Outcomes:
1. Students will be able to demonstrate knowledge of and proficiency in the study blueprints, plans and drawings including the interpretation of applicable plumbing codes and standards. 2. The student will locate and properly mark the centerline of water closet. 3. The student will locate and properly mark the centerline of the closet flange. 4. The student will locate and properly mark the height and distance for the center of the water closet for the water supply stub out.

PLUMBING 131  WORKING DRAWINGS AND LAYOUT II (3)

Lecture: 1 hour(s)
Lab: 6 hour(s)

Instruction is given in layout procedures involving applied calculations concerning the plumbing trades. Instruction is also given in layout and design criteria with hands-on laboratory procedures.

Student Learning Outcomes:
Students will be able to demonstrate knowledge and proficiency in using plumbing manuals to find area and volume for roof drainage. The student will be able to calculate square footage. The student will be able to calculate a percentage of sidewalls added to total roof area. The student will be able to calculate the roof drain size and piping by finding the proper table in the plumbing manual. The student will be able to find the formulas and tables to size the minimum scupper opening.

PLUMBING 132  PLUMBING CALCULATIONS AND PROCEDURES II (3)

Lecture: 3 hour(s)
Lab: 3 hour(s)

This course presents in depth coverage of plumbing standards, including acceptable installation practices and acceptable materials. All standards are based on the current IAPMO uniform plumbing code.

Student Learning Outcomes:
1. Calculate load values for fuel gas systems. 2. Design a fuel gas system. 3. Identify basic materials and agencies. 4. Convert heat calculations of buts and com.

PLUMBING 130  PLUMBING CALCULATIONS AND PROCEDURES II (3)

Lecture: 3 hour(s)
Lab: 3 hour(s)

This course introduces fundamentals of plumbing operations by drilling holes through wood framing members using the Milwaukee Hole Hawg. 2. Skill #1 The student will measure and mark stud bay and calculate to locate center of drilled hole in stud bay. 3. Drill hole in center of bay and plumb using Hole Hawg and self feeding bit safely without binding drill bit. 4. Mark fireblock plum and centered under first hole in top plat. 5. Drill second hole centered and plumb through top plate using auger bit safely without binding bit.

PLUMBING 022  PLUMBING CODE III (3)

Lecture: 3 hour(s)
Lab: 1 hour(s)

This course surveys the history of the Plumbing Industry, Highlights occupational information, Evokes job ethics and instructs on career information; The course also covers occupational health and safety hazards, provides an overview of Plumbing systems, and introduces the tools of the trade.

Student Learning Outcomes:
1. Calculate load values for fuel gas systems. 2. Design a fuel gas system. 3. Identify basic materials and agencies. 4. Convert heat calculations of buts and com.

PLUMBING 132  PLUMBING CALCULATIONS AND PROCEDURES II (3)

Lecture: 3 hour(s)
Lab: 3 hour(s)

This course presents in depth coverage of plumbing standards, including acceptable installation practices and acceptable materials. All standards are based on the current IAPMO uniform plumbing code.

Student Learning Outcomes:
1. Calculate load values for fuel gas systems. 2. Design a fuel gas system. 3. Identify basic materials and agencies. 4. Convert heat calculations of buts and com.
PLUMBNG 133 INSTALLATION AND PLUMBING FIXTURES (6)
Lecture: 3.5 hour(s)
Lab:  7.5 hour(s)
This course covers fabrication, erection of piping, layout methods, process piping, blueprint installations and testing of plumbing fixtures and appliances.
Student Learning Outcomes:
1. The student will be able to use technical documents and manuals to calculate pipe sized in a gas system. 2. The student will be able to find developed lengths on branch lines and calculate pipe size. 3. The student will be able to use technical manuals to choose the correct size of water heater. 4. The student will be able to correctly read fittings from technical documents - on a gas system.

PLUMBNG 141 ADVANCE LAYOUT AND PROCEDURES (3)
Lecture:  3 hour(s)
This course covers proper methods of layout and installation procedures, fabrication, and erection of piping in commercial buildings in compliance with local and national codes.
Student Learning Outcomes:
1. Students will be able to apply information in Plumbing manual to calculate adequate size DWV piping. Student will be able to find the correct table to find adequate pipe size.

PLUMBNG 142 SERVICING OF PLUMBING FIXTURES AND APPLIANCES (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course covers proper methods of repairing plumbing fixtures and appliances, preparing for the repair job, and estimating the job.
Student Learning Outcomes:
1. Finding information in manufacturer’s manuals to repair basic parts of a water closet. 2. Student will correctly identify different parts in a water closet. 3. Student will correctly find replacement parts in manufacture manual. Student will correctly find and total price of replacement parts.

PLUMBNG 143 PLUMBING CODE (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course covers building codes as they relate to plumbing, with emphasis on the effective use of applicable codes and hands-on laboratory projects.
Student Learning Outcomes:
1. Students will be able to use Technical Plumbing Manual to calculate support systems for piping systems. 2. Students will be able to correctly calculate support of ABS DWV piping systems. 3. Students will be able to correctly calculate support for copper potable water piping. 4. Students will be able to correctly calculate support for PEX potable water piping.

PLUMBNG 144 SPECIAL PURPOSES INSTALLATION (3)
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course covers fabrication and erection of piping for the proper installation of special appliances and fixtures and special methods used in the construction of these fixtures, as well as testing procedures.
Student Learning Outcomes:
1. Students will be able to demonstrate knowledge and proficiency in finding and applying information from technical plumbing manuals. 2. The student will be able to identify wet vented sections. 3. The student will be able to determine correct fixture unit values. 4. The student will be able to determine proper pipe size.

PLUMBNG 185 DIRECTED STUDY PLUMBING (1)  RPT2
Lecture: 1 hour(s)
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

PLUMBNG 185L DIRECTED STUDY, PLUMBING TECHNOLOGY
(LAB) (1)
Lab: 3 hour(s)
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in plumbing technology.

PLUMBNG 246 PRINCIPLES AND PRACTICES OF PLUMBING DESIGN (4)
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
Students are trained on skills such as measuring with an architect’s scale, construction drawings that include piping layout, fixture layout, disability requirements, orthographic drawings and basic isometric drawings
Student Learning Outcomes:
1. Apply basic plumbing calculations Utilize basic drafting tools. 2. Name basic plumbing tools.

PLUMBNG 285 DIRECTED STUDY PLUMBING (2)
Lecture: 2 hour(s)
This course allows students to pursue a directed study in Plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

PLUMBNG 285L DIRECTED STUDY, PLUMBING TECHNOLOGY
(LAB) (2)
Lab: 6 hour(s)
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in plumbing technology.

PLUMBNG 385 DIRECTED STUDY PLUMBING (3)
Lecture: 3 hour(s)
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.
PLUMBNG 385L  DIRECTED STUDY, PLUMBING TECHNOLOGY
(LAB) (3)
Lab: 9 hour(s)
This course allows students to pursue a directed study in plumbing technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will design and construct a lab project based on a topic in plumbing technology.

PLUMBNG 941  COOPERATIVE EDUCATION PLUMBING (4) RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.
Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

POLITICAL SCIENCE

POL SCI 001  THE GOVERNMENT OF THE UNITED STATES (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
Political Science 1 is an introductory course in the principles, institutions and policy processes of the American Political System and an examination of major tenets in Federalism, Representative Government and the scope of the Executive, Legislative and Judicial powers. It offers an overview of local, state and national governance.
Student Learning Outcomes:
Students will be able to evaluate current political situations and develop defensible positions on the events.

POL SCI 002  MODERN WORLD GOVERNMENTS (3) UC:CSU
Lecture: 3 hour(s)
This course will explore a selected variety of major nation states to develop a comparative overview of political philosophies, constitutions, political processes, systems and institutions. Emphasis is placed on geographic, cultural, historic, economic, and demographic factors that contribute to differences in the development and establishment of nation states.
Student Learning Outcomes:
To increase knowledge of diverse political systems around the world, including empirical area based knowledge; broader theoretical understanding of different political systems, institutions and processes; and the changing domestic and global contexts within which they operate.

POL SCI 007  CONTEMPORARY WORLD AFFAIRS (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course will focus on the relationships of nations in modern times emphasizing the nation state system, diplomacy, international law, and international organizations. Students will explore the causes, consequences, and methods of resolving international conflicts, and the impact of internal economic, political, and military factors on foreign policy.
Student Learning Outcomes:
Students will demonstrate an ability to analyze relations between nations, international government and non governmental organizations, and global actors, organize ideas and synthesize the critical overall objectives of the assignment or presentation.

POWER LINE MECHANIC TRAINEE

ELECL 601  POWER LINE MECHANIC TRAINEE (600 HOURS) (15)
Lecture: 6 hour(s)
Lab: 27 hour(s)
Prerequisites: Electrical Construction and Maintenance 119 or Electrical Construction and Maintenance 173 or Electrical Construction and Maintenance 1 and Building Construction Techniques 4 or Electrical Construction and Maintenance 116
The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered.
Student Learning Outcomes:
Students will complete pole climbing certificate including successful completion of three climbs: Climb 1: Free climb, circle, adjust belt Climb 2: Combination free climb and belted climb over obstructions Climb 3: 55 foot pole climb with maximum reach left and right

ELECL 601A  POWER LINE MECHANIC TRAINEE (600 HOURS) PART A (6)
Lecture: 6 hour(s)
Prerequisites: Electrical Construction and Maintenance 1 or Electrical Construction and Maintenance 119
The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include: overall safety considerations, power pole and tower climbing skills, knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part A is the lecture module of the standard 601 class, allows for offering the program over an extended period.
Student Learning Outcomes:
SLO 1: Solving Series Circuits using Ohm’s Law and the Power Equation.
SLO 2: Solving Parallel Circuits using Ohm’s Law and the Power Equation.
SLO 3: Solving Combination Circuits using Ohm’s Law and the Power Equation.
ELEC 601B  POWER LINE MECHANIC TRAINEE (600 HOURS)

PART B (3)

Lab: 9 hour(s)  
Prerequisite: Electrical Construction and Maintenance 116 or Building Construction Techniques 4

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include:

- Overall safety considerations
- Power pole and tower climbing skills
- Knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part B is first of 3 laboratory modules of the standard 601 class, allows for offering the program over an extended period.

Student Learning Outcomes:
- Students will complete first 1/3 of pole climbing certificate including successful completion of one climb: Climbing Free climb, circle, adjust belt

ELEC 601C  POWER LINE MECHANIC TRAINEE (600 HOURS)

PART C (3)

Lab: 9 hour(s)  
Prerequisite: Electrical Construction and Maintenance 116 or Building Construction Techniques 4

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include:

- Overall safety considerations
- Power pole and tower climbing skills
- Knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part C is the second of 3 laboratory modules of the standard 601 class, allows for offering the program over an extended period.

Student Learning Outcomes:
- SLO: Students will complete second 1/3 of pole climbing certificate including successful completion of one climb: Climbing Free climb and belted climb over obstructions

ELEC 601D  POWER LINE MECHANIC TRAINEE (600 HOURS)

PART D (3)

Lab: 9 hour(s)  
Prerequisite: Electrical Construction and Maintenance 116 or Building Construction Techniques 4

The goal of this course is to produce qualified candidates for various Power Line Mechanic training programs. Development of basic pre-apprentice skills needed to be successful will be emphasized. These skills include:

- Overall safety considerations
- Power pole and tower climbing skills
- Knowledge of the basic tools and materials involved with the electrical line crafts, general construction standards, basic rigging principles, and basic electrical theory that is specific to this trade. A power pole climbing certificate of competencies is granted to students who successfully complete this course. This course meets or exceeds the equivalent industry recognized 600 hour programs. Special Note: Students during the course of instruction will be required to lift up to 60 lbs with repetition and will be required to climb and perform installation and maintenance operations at the top of 30 foot power poles. Physical or psychological impairments that might limit your abilities to succeed should be considered. Part D is the third of 3 laboratory modules of the standard 601 class, allows for offering the program over an extended period.

Student Learning Outcomes:
- SLO: Students will complete third 1/3 of pole climbing certificate including successful completion of one climb: Climbing 1 Combination free climb 55 foot pole climb with maximum reach left and right

PROCESS PLANT TECHNOLOGY

PRPTEK 100  INTRODUCTION TO INDUSTRIAL PROCESS (3)

Lecture: 3 hour(s)

The purpose of this course is to provide an overview or introduction into the field of Process Operations within the Chemical Process Industries, such as the oil refinery and wastewater industries. Students will be introduced to the roles and responsibilities of Process Technicians, the environment in which they work, and the equipment and systems in which they operate.

Student Learning Outcomes:
- 1. Define terms used in process technology
- 2. Explain the basic principles of safety, health, and environment in the process industry
- 3. Describe the basic hand tools, equipment and instruments used in industry
- 4. Describe various systems operated in industry
- 5. Describe the fundamental principles of chemistry and physics

PRPTEK 102  PROCESS MEASUREMENT AND CONTROL

FUNDAMENTALS (3)

Lecture: 3 hour(s)

The purpose of this course is to provide an introduction to the fundamentals of process variables and a variety of instruments used to sense, measure, transmit, and control process plant operations within chemical manufacturing, oil refineries and wastewater treatment industries.

Student Learning Outcomes:
- 1. Define terms associated with industrial instrumentation
- 2. Describe the major process variables controlled in the Process Industry
- 3. Explain the relationship between common process variables
- 4. Describe the components of control loops
- 5. Explain the function of process control loops
- 6. Define and describe the symbols used in Process and Instrumentation Diagrams and Process Flow diagrams

PRPTEK 103  PROCESS PLANT EQUIPMENT (3)

Lecture: 2 hour(s)
Lab: 3 hour(s)

This course introduces the student to the generic equipment used in the process plant industry. Students will learn the fundamental principles of operation, construction, and application of piping, pipefitting, steam traps, valves, pumps, compressors, steam turbines, electric motors, furnaces, heat exchangers, cooling towers, storage tanks, distillation towers, reactors and process instrumentation.

Student Learning Outcomes:
- 1. Define terms associated with process equipment
- 2. Explain the function of process equipment
- 3. Describe the internal components of the equipment
- 4. Explain the operating principles of the equipment
- 5. Explain the operator’s role in safe operation of equipment
- 6. Explain the operator’s role in troubleshooting equipment malfunction

Description of General Maintenance procedures that operators are expected to perform

PRPTEK 104  INTRODUCTION TO PROCESS PLANT SAFETY (3)

Lecture: 3 hour(s)

This course provides an introduction to the field of environmental, safety, and health within the chemical laboratory and process industry. Students will be introduced to various types of laboratory and plant safety techniques and hazards. In addition an overview of safety and environmental systems...
and equipment, and state and federal regulations under which laboratory testing, plant processes, bio and chemical manufacturing are governed.

Student Learning Outcomes:
1. Define terms associated with control systems.
2. Explain the function of process systems.
3. Describe the components and equipment in process systems.
4. Explain the operation principals of the process systems.
5. Explain the operator’s role in safe operation of process systems.
6. Explain the operator’s role in troubleshooting process system malfunction.
7. Identify the different equipment systems used to make up a distillation system.
8. Explain how the methods of heat transfer apply to the distillation process.

PRPLTEK 204 PTECH INSTRUMENTATION COMPUTER APPLICATIONS (2)

Lecture: 2 hour(s)

This advanced course introduces students to the computerized software used to manipulate process operations in chemical industries including petrochemical, wastewater, pharmaceutical and numerous other operations.

Student Learning Outcomes:
1. Define terms associated with industrial instrumentation.
2. Describe the major process variables controlled in the process industry.
3. Explain the relationship between common process variables.
4. Describe the components of control loops.
5. Explain the function of process control loops.
6. Define and describe the symbols used in process and instrument diagrams and process flow diagrams.
7. Define terms associated with process control.
8. Demonstrate the following Console Operator duties: change controller mode, change setpoint, change valve output, access process history.

PRPLTEK 206 PTEC ADVANCED INSTRUMENTATION II (3)

Lecture: 3 hour(s)

This course provides students with exposure to advanced process operation variables and a variety of instruments used to sense, measure, transmit, and control plant operations within the chemical manufacturing, biopharma/manufacturing, oil refinery, wastewater treatment and other chemical industries.

Student Learning Outcomes:
1. Define terms associated with control process and controllers.
2. Describe the relationship between measuring instruments and their role in control loops.
3. Explain the purpose and operation of transmitters and transducers.
4. Demonstrate the operation of local, remote, split range, cascade and ratio controllers.
5. Demonstrate how to switch between control modes.
6. Given a process control schematic, explain how the control loop functions.
7. Describe how the components of a control valve interact.
8. Explain fail Safe positions for various types of control schemes.
9. Describe and explain the operation of regulators.
10. Describe common switches and their function.
11. Explain how relays are used in process industries.
12. Describe methods for maintaining integrity and reliability of signal transmission.
13. Perform scaling calculations.
14. Identify and describe the various control schemes used in process industries.
15. Demonstrate bimetal transition between control modes.

PSYCHOLOGY

PSYCH 001 GENERAL PSYCHOLOGY I (3) UC:CSU

Lecture: 3 hour(s)
Advisory: English 28

This is an introductory course in psychology as the scientific study of behavior and mental processes. Topics treated include history and systems of psychology, biological bases of behavior, sensation and perception, states of consciousness, learning, memory, cognition, personality, human development, motivation and emotion, health and stress, psychological disorders, and therapies.

Student Learning Outcomes:
Students will learn and demonstrate their knowledge of the basic psychological principles of neuroscience, consciousness, lifespan, learning, memory, sensation, motivation, health/stress, personality theory, intelligence, disorders, and therapies. Specifically: Students will demonstrate their knowledge in the area of learning, including classical conditioning and operant conditioning.

PSYCH 002 BIOLOGICAL PSYCHOLOGY (3) UC:CSU

Lecture: 3 hour(s)
Prerequisite: Psychology 1
Advisory: English 28

The course is about the biological bases of human behavior and as such it deals with the scientific understanding of the relationship between the brain and behavior. The course focuses on how biological mechanisms and brain processes may help to explain behavior. Topics covered include the following: issues in biopsychology, nerve cells and nerve impulses, synapses, the nervous system, brain plasticity, sleep, internal regulation, reproductive behaviors, emotional behaviors, learning and memory, language, and psychological disorders.
Student Learning Outcomes:
1. Describe, explain, and evaluate the differences between psychological and biological bases of behavior.
2. Describe, explain, and evaluate the biological explanations of behavior.
3. Describe, explain, and evaluate the structure and function of the neuron.
4. Describe, explain, and evaluate the methods and approaches utilized in obtaining information about the brain.

PSYCH 014 ABNORMAL PSYCHOLOGY (3) CSU
Lecture: 3 hour(s)
Prerequisite: Psychology 1
Advisory: English 28
This course examines the definition, possible causes, signs and symptoms and treatment of psychological disorders. Topics such as anxiety, mood disorders, schizophrenia, substance related disorders, and personality disorders are emphasized. Additional topics will include cognitive disorders, disorder’s of childhood and adolescence, as well as sexual dysfunctions and substance related disorders.

Student Learning Outcomes:
Student presents a strong, detailed statement regarding the reasons that a particular behavior would meet DSM criteria for a disorder and student lists all four perspective view points regarding the possible cause of the behavior. Student develops a detailed treatment plan including prospective time length of intervention, follow up assessment procedures and a maintenance plan for increasing effective living skills.

PSYCH 032 PSYCHOLOGY OF WOMEN (3) UC:CSU
Lecture: 3 hour(s)
Advisory: English 28
This course explores the biological and cultural determinants of women’s personality development. Explores cultural stereotypes, sex role development, female sexuality, and women’s health issues in terms of the implications for personal and social change.

Student Learning Outcomes:
Students will demonstrate their knowledge of the biological and cultural determinants of women’s personality development, including cultural stereotypes, sex role development, female sexuality, and women’s health issues in terms of the implications for personal and social change.
Specifically: Students will be able to describe the cycle of abuse and domestic violence.

PSYCH 041 LIFE SPAN PSYCHOLOGY: FROM INFANCY TO OLD AGE (3) UC:CSU
Lecture: 3 hour(s)
Prerequisite: Psychology 1
Advisory: English 28
This course explores the interaction of physical, psychological, and social factors and their impact on human development and behavior from conception to death.

Student Learning Outcomes:
Students will be able to compare and contrast the developmental principles and theories and lifespan development. Specifically: Students will learn and demonstrate their knowledge in the theories of lifespan development, and theorists such as Piaget, Vygotsky, and Erikson.

PSYCH 069 PSYCHOLOGY IN FILM (3) CSU
Lecture: 3 hour(s)
Advisory: English 28 and Psychology 1
This course will survey a variety of films that portray specific human behaviors, characteristics, and disorders as discussed in General Psychology I. A lecture/discussion will accompany each film that provides a more in depth analysis of the relevant topic than is covered in General Psychology I. Topics covered will be drawn from research methods, biological psychology, sensation & perception, states of consciousness, learning, memory, intelligence, motivation, human development, personality, emotions & stress, human sexuality & gender, social psychology, abnormal psychology, and clinical psychology.

Student Learning Outcomes:
Students will demonstrate critical observational skills through a rubric designed to evaluate students’ ability to deconstruct and analyze films for accuracy in their depictions of the associated psychological topics discussed. Specifically: Students will analyze the portrayal of classical conditioning in film.

PUBLIC RELATIONS

PUBLIC REL 001 PRINCIPLES OF PUBLIC RELATIONS (3)
Lecture: 3 hour(s)
This course provides students an understanding of the broad aspects of relationships with the public as they apply to business, education, public agencies, and other organizations. It includes methods of either promoting favorable relations with various segments of the public or coping with situations involving adverse public opinion.

Student Learning Outcomes:
1. Apply public relations communication theory in order to create essential public relations tools including news releases and a strategic public relations plan for a client. 2. Formulate a publicity campaign using effective communication strategies.

PUBLIC REL 002 PUBLIC RELATIONS TECHNIQUES (3) CSU
Lecture: 3 hour(s)
Advisory: Public Relations 1
This course is a comprehensive study of various public relations techniques utilized in campaigns by businesses, educational institutions, public agencies, and other organizations. Case histories are used to stimulate student initiative in problem solving. The social impact of the various communications media and their role in public relations will also be stressed. The accompanying practicum gives students the opportunity to work with an on campus or non-profit organization to create and implement a public relations plan.

Student Learning Outcomes:
Students will be able to understand the broad aspects of relationships with the public as they apply to business, education, public agencies, and other organizations. It includes methods of either promoting favorable relations with various segments of the public or coping with situations involving adverse public opinion.

PUBLIC REL 003 WRITING FOR PUBLIC RELATIONS (3) RPT3
Lecture: 3 hour(s)
Advisory: Public Relations 1 and English 101
This course will provide students with the persuasive powers of the written and spoken words that are explored and utilized in creating viable communicative messages, such as, news releases, feature stories, interviews, public service announcements, speeches, and institutional advertising.

Student Learning Outcomes:
Students will be able to demonstrate excellent oral and written communication skills using print, broadcast, digital and social media.

REAL ESTATE

REAL ES 001 REAL ESTATE PRINCIPLES (3) CSU
Lecture: 3 hour(s)
This course covers the nature of real property, types of estates and tenancy, real estate and contract law, types of agency, title and title insurance, trust deeds/mortgages, liens/encumbrances, taxes, zoning, community property, financing and real estate math concepts. This course is one of three required
REAL ES 003 REAL ESTATE PRACTICES (3) CSU
Lecture: 3 hour(s)
This course covers office procedures and practices in listings, advertising, prospecting, financing, exchanges, property management, salesmanship, land utilization and public relations. This course also provides students necessary information and materials a real estate agent utilizes in the day to day operations of a real estate business.
Student Learning Outcomes:
Students will be able complete basic contracts used in residential real estate transactions. Students will learn the basics in conducting effective sales of lease transactions with clients. Students will construct a rent roll for commercial properties.

REAL ES 005 LEGAL ASPECTS OF REAL ESTATE I (3) CSU
Lecture: 3 hour(s)
This course covers the principles of property ownership and management with special emphasis on the law as it applies to community property, conveyances, deeds, trust deeds, leases, brokerage activities, liens, homesteads, wills, estates and taxes. Attention is given to logical reasoning and the application of rules of law to everyday affairs in business.
Student Learning Outcomes:
Students will understand the options for leasing and holding title in a real estate transaction. Students will understand the elements of contract formation. Students will be able to differentiate between single and dual agency.

REAL ES 007 REAL ESTATE FINANCE I (3) CSU
Lecture: 3 hour(s)
This course provides and explains the real estate lending process in detail from the initial loan application to the closing of the transaction. It provides a practical, step by step guide to the most popular real estate financing programs available in the country today. Subjects include: the loan application process, loan underwriting standards, conventional, FHA, and VA loans, seller financing, fair lending practices, and predatory lending.
Student Learning Outcomes:
Students will identify different types of mortgages available in the market and explain their characteristics. Students will understand how to calculate fixed rate mortgages (FRM) and adjustable rate mortgages (ARM) as monthly payments. Students will identify the major players in the United States secondary mortgage market and explain how the market is functioning.

REAL ES 009 REAL ESTATE APPRAISAL I (3) CSU
Lecture: 3 hour(s)
The principles and methods for the estimation of value and price of land and improvements, factors affecting income and values of real estate, and trends in real property values are covered in this course. The role of the appraiser in determining the highest and best use for a particular site is presented. The importance of appraisal to the lender, insurer, seller, and potential buyer are discussed as are appraisal of partial real estate interests.
Student Learning Outcomes:
1. Student will be able to identify various methods of appraising real property.

REAL ES 014 PROPERTY MANAGEMENT (3)
Lecture: 3 hour(s)
This course will give students an in depth view of practical issues facing practitioners, such as maintenance, accounting, administrative, and legal activities, and has up to date content on federal regulations, such as civil rights, fair housing, ADA issues, and environmental concerns.
Student Learning Outcomes:
Students completing this course will understand the legal relationship between a landlord and a tenant. Students completing this course will know what a trust fund is and the importance of maintaining records on trust fund receipts.

REFRIGERATION & AIR CONDITIONING MECHANICS

REF A/C 100 AIR CONDITIONING PROJECT MANAGEMENT (3)
Lecture: 3 hour(s)
Lab: 18 hour(s)
This course provides HVAC Industry Project Manager instruction. Topics covered will include blueprint reading, Microsoft spreadsheets, Microsoft Word documents, Microsoft Project, design build criteria, estimating, change orders, request for information, GANTT Charts, scheduling, schedule of values, purchase orders, submittals, transmittals, reading of air balance reports, warranty letters and close out packages.
Student Learning Outcomes:
1. The student will be able to use the Uniform Mechanical Code to locate standards in regards to the design, construction, installation, quality of materials, location, operation, and maintenance of heating, ventilating, cooling and refrigeration equipment.

REF A/C 101 AIR CONDITIONING AND REFRIGERATION
PRINCIPLES AND PRACTICES FIRST SEMESTER (9) RPT2
Lecture: 3 hour(s)
Lab: 18 hour(s)
This course covers Refrigeration and Air Conditioning Theory, Fundamentals, and practices for entry level students. Topics discussed include refrigeration and air conditioning system components, maintenance procedures, service procedures, and Thermodynamics.
Student Learning Outcomes:
1. Students properly identify the 4 major components of a refrigeration system. 2. Students will use technical manuals to select appropriate compression system components. 3. Students will identify the operating characteristics of the (5) major compressor types. 4. Students will identify appropriate maintenance procedures for air and water cooled condensers.

REF A/C 105 SOLAR WATER & POOL HEATING SYSTEM
PRINCIPLES (3)
Lecture: 3 hour(s)
This is an introductory lecture course on Solar Thermal. The need for renewable energies, along with planning and installing solar thermal systems will be covered. The solar heating of swimming pools, domestic hot water, and building air will be emphasized.
Student Learning Outcomes:
1. List the reasons for Solar and Green Technologies. 2. List the Components of a Solar Thermal System. 3. Recite the sequence of operation of a solar thermal system.

REF A/C 110 SOLAR WATER & POOL HEATING SYSTEM
PRACTICES (2)
Lab: 6 hour(s)
This course is designed for students interested in a career in the solar thermal industry. The fundamental practices and functions of the solar thermal industry will be introduced. This course covers the skills and practices for planning, installation, and maintenance of all the necessary
components for a solar thermal water system.

**Student Learning Outcomes:**
1. Discuss the history of solar thermal as a renewable energy and its development.
2. List the regions of the globe where solar thermal as a renewable option is most or least viable.
3. List the components needed for various solar thermal renewable energy sources and systems.

**REF A/C 111: FUNDAMENTALS OF REFRIGERATION (3)**

**Lecture:** 3 hour(s)
This course covers the basic principles of heating, ventilating, air conditioning, and refrigeration, including an in depth study of the refrigeration cycle. A brief history of refrigeration, basic orientation to the HVAC/R industry, and career opportunities are also discussed.

**Student Learning Outcomes:**
1. Students properly identify the 4 major components of a refrigeration system.
2. Students will use technical manuals to select appropriate compression system components.

**REF A/C 113: REFRIGERATION COMPONENT CONSTRUCTION (3)**

**Lab:** 3 hour(s)
This course provides an in depth study of the function of the four major components that make up a refrigeration system: compressor, condenser, evaporator and metering device.

**Student Learning Outcomes:**
1. Students will describe the operating characteristics of the (5) major compressor types.

**REF A/C 114: REFRIGERATION MAINTENANCE PROCEDURES (3)**

**Lab:** 3 hour(s)
This course covers general equipment maintenance procedures including filter replacement, lubrication, coil cleaning, safety inspections, control adjustments, and record keeping.

**Student Learning Outcomes:**
1. Students will identify appropriate maintenance procedures for air and water cooled condensers.

**REF A/C 123: PIPE AND TUBE JOINING PROCESSES (1)**

**Lab:** 3 hour(s)
This course assesses assembly of components into operating systems using techniques employed by the industry.

**Student Learning Outcomes:**
1. After students construct a copper form, called a "monster".

**REF A/C 124: REFRIGERATION ELECTRICAL CIRCUITS AND CONTROLS (5)**

**Lab:** 3 hour(s)
This course covers the application of electrical principles and practices, including safety and PPE, utilized in the performance of the duties required of a HVAC/R Technician.

**Student Learning Outcomes:**
1. The Student Learning Outcome consists of reading an electrical schematic that simulates the TV show “Jeopardy” and constructing a project board that functions properly.

**REF A/C 125: REFRIGERATION SYSTEM COMPONENTS (3)**

**Lecture:** 3 hour(s)
Instruction is given in basic electricity and electrical components as they relate to the HVAC/R industry. The use of electrical schematic diagrams is stressed throughout the semester.

**Student Learning Outcomes:**
1. List the types of copper tubing and appropriate applications, along with connection and leak detection techniques.
2. List refrigeration and A/C electrical systems, furnace ignition systems, and other related controls.
3. List the types of electric motors used in the HVAC/R industry and their applications.

**REF A/C 133: REFRIGERATION SERVICE PROCEDURES I (3)**

**Lab:** 3 hour(s)
**Prerequisite:** Refrigeration and A/C Mechanics 123; and Refrigeration and A/C Mechanics 124; and Refrigeration and A/C Mechanics 125;
**Corequisite:** Refrigeration and Air Conditioning Mechanics 134; and Refrigeration and Air Conditioning Mechanics 135

This course involves servicing procedures applied to commercial and domestic refrigeration systems including restaurants, supermarkets and industrial process cooling. Students are required to inspect and analyze coolers, freezers and ice makers.

**Student Learning Outcomes:**
1. The student will be able to use test equipment in order to diagnose a refrigeration and air conditioning system. 2. The student will use refrigerant gages and thermometers to calculate superheat subcooling, and air temperature readings, and interpret their meaning. 3. The student will use volt, ohm, and amperage readings to check the function of individual refrigeration system components.

**REF A/C 134: SERVICE FOR COMMERCIAL REFRIGERATION (3)**

**Lab:** 3 hour(s)
**Prerequisite:** Refrigeration and A/C Mechanics 123; Refrigeration and A/C Mechanics 124; Refrigeration and A/C Mechanics 125
**Corequisite:** Refrigeration and Air Conditioning Mechanics 133; and Refrigeration and Air Conditioning Mechanics 135

This course focuses on troubleshooting procedures in diagnosing and repairing malfunctions in commercial refrigeration systems. The lab work emphasizes the analyzing and repairing of mechanical and electrical components, with the proper use of tools and test equipment.

**Student Learning Outcomes:**
1. The student will gain mastery of Refrigeration and Air Conditioning Tools. 2. The student will use a torch safely. 3. The student will take amperage, voltage, and ohm readings. 4. The student will evacuate a system with a vacuum pump. 5. The student will utilize a gage manifold safely.

**REF A/C 135: AIR CONDITIONING AND REFRIGERATION (3)**

**Lecture:** 3 hour(s)
**Prerequisite:** Refrigeration and A/C Mechanics 123; Refrigeration and A/C Mechanics 124; Refrigeration and A/C Mechanics 125
**Corequisite:** Refrigeration and Air Conditioning Mechanics 133; and Refrigeration and Air Conditioning Mechanics 134

This course focuses on refrigeration principles including theory of heat, automatic controls, electric motors, and commercial refrigeration. This course gives an in-depth look at the refrigeration cycle and refrigeration components. This course discusses thermodynamics, including the pressure temperature chart, latent heat, and system efficiency.

**Student Learning Outcomes:**
The student will evaluate various air conditioning and refrigeration symptoms. The student will evaluate how different heat load conditions affect a refrigeration system. The student will utilize superheat and subcooling readings to determine system performance.

**REF A/C 141: APPLIED REFRIGERATION AND AIR CONDITIONING PRINCIPLES (3)**

**Lecture:** 3 hour(s)
**Prerequisite:** Refrigeration and A/C Mechanics 133; and Refrigeration and A/C Mechanics 134; and Refrigeration and A/C Mechanics 135
**Corequisite:** Refrigeration and Air Conditioning Mechanics 134

This course focuses on Chemistry as applied to the HVAC and R industry. Areas covered include Hydronics, heating and cooling load calculations,
Course Descriptions

REF A/C 143 REFRIGERATION SERVICING PROCEDURES II (3)
Lab: 9 hour(s)
Prerequisite: Refrigeration and A/C Mechanics 133; Refrigeration and A/C Mechanics 134; Refrigeration and A/C Mechanics 135
Corequisite: Refrigeration and Air Conditioning Mechanics 141; Refrigeration and Air Conditioning Mechanics 143
This is a study on diagnosis and repair of refrigeration, air conditioning, and gas heating systems with emphasis on the correct application of electrical theory.
Student Learning Outcomes:
1. The student will be able to state the locations of the suction line, discharge line, and controls, troubleshooting approaches, and employment. Student Learning Outcomes: Students will calibrate a direct acting thermostat

REF A/C 145 AIR CONDITIONING AND REFRIGERATION MECHANICS (3)
Lab: 9 hour(s)
Prerequisite: Refrigeration and A/C Mechanics 133; and Refrigeration and A/C Mechanics 134; and Refrigeration and A/C Mechanics 135
Corequisite: Refrigeration and Air Conditioning Mechanics 141; and Refrigeration and Air Conditioning Mechanics 143
This is a study on diagnosis and repair of refrigeration, air conditioning, and gas heating systems with emphasis on the correct application of electrical theory.
Student Learning Outcomes:
1. Plan, design, and construct working REF AC Circuit.

REF A/C 159 PRINCIPLES AND PRACTICES OF ELECTRICAL CIRCUITS AND CONTROLS (4)
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
This course covers basic electricity, magnetic starters, contactors, and relays. Pressure and temperature controls, millivolt and low voltage systems, modulating controls, time clocks, and defrost systems are studied.
Student Learning Outcomes:
1. Plan, design, and construct working REF AC Circuit.

REF A/C 160 REFRIGERATION SYSTEM PRINCIPLES AND PRACTICES (4)
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
Students learn the fundamental refrigeration system principles, including system components refrigerants, basic electricity, motors, controls, and test equipment in residential and commercial systems. Students get an introduction to air conditioning with an emphasis on the refrigeration cycle, and appropriate temperatures.
Student Learning Outcomes:
1. The student will be able to identify and describe the function of the compressor, metering device and evaporator. 2. The student will be able to identify the compressor, condenser, metering device, and evaporator. 3. The student will be able to state the locations of the suction line, discharge line.

REF A/C 161 AIR CONDITIONING SYSTEM PRINCIPLES AND PRACTICES (4)
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
This is a study of human comfort, psychometrics and heat loads. Air distribution and duct sizing, air conditioning equipment, test instruments and measurements and servicing are explored.

REF A/C 162 PIPING PRINCIPLES AND PRACTICES (4)
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
Instruction is given on refrigerant tubing and fittings, water piping and fittings, pipe sizing, soft soldering, silver brazing and schematic drawings.
Student Learning Outcomes:
1. After students construct a copper form, called a "monster".

REF A/C 164 GAS HEATING SYSTEMS (3) CSU
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course will provide the necessary skills needed for proper installation, servicing and troubleshooting of natural gas furnaces. Topics include principles of gas combustion, gas ignition, controls, installation, and ventilation.
Student Learning Outcomes:
Students will replace a defective gas valve.

REF A/C 165 THERMAL ENERGY STORAGE/HEAT RECOVERY (4)
Lecture: 2.5 hour(s)
Lab: 4.5 hour(s)
Thermal Energy Storage theory and component selection based on load profile and cost.
Student Learning Outcomes:
1. Discuss the types of piping, oil, copper tubing and appropriate application, along with connection and leak detection techniques. 2. Discuss for refrigeration and A/C electrical systems, furnace ignition systems, and other related controls.

REF A/C 166 WATER TOWERS, EVAPORATIVE CONDENSERS AND CHEMICAL TREATMENT (4)
Lecture: 4 hour(s)
Fundamentals of water towers and evaporative condensers used to obtain high efficiency performance of refrigeration and air conditioning systems. You will learn how to select the proper size depending on local humidity and desired operating conditions, proper maintenance, additives and procedures and techniques available to the technician.
Student Learning Outcomes:
Students will develop water treatment procedures for cooling towers and evaporative condensers.

REF A/C 167 HEATING AND AIR CONDITIONING I (3)
Lecture: 3 hour(s)
Instruction is given in heating for workers in the heating and air conditioning field. Fundamentals of fuels, heating, and heat transfer are covered. An introduction to natural gas furnaces, hot water systems and heating pumps are emphasized.
Student Learning Outcomes:
1. The student will be able to differentiate the main types of heating systems and explain their operation. 2. The student will state the sequence of operation of a residential furnace. 3. The student will define the major components of a heat pump.

REF A/C 177 HEATING AND AIR CONDITIONING II (3)
Lecture: 3 hour(s)
The cooling portion of the air conditioning field for employed mechanics is explored in this course. Types of systems, the refrigeration cycle, heat gain and heat loss calculations, air distribution equipment, selection of controls, and sales procedures are reviewed.
Student Learning Outcomes:
1. Perform heat gain and heat loss calculations. 2. Perform air duct sizing of air ducts in a residential A/C system.

REF A/C 185 DIRECTED STUDY AIR CONDITIONING/REFRIGERATION (1) RPT2
Lecture: 1 hour(s)
This course allows students to pursue a directed study in Air conditioning & Refrigeration on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in HVACR.

REF A/C 187 SERVICING I (3)
Lecture: 3 hour(s)
This course reviews servicing procedures, manufacturer’s recommendations, installation and servicing of commercial and industrial refrigeration and air conditioning systems.
Student Learning Outcomes:
Students will develop a checklist for leak checking vapor refrigeration systems.

REF A/C 188 SERVICING II (3)
Lecture: 3 hour(s)
Topics covered in this course include: electrical diagrams for testing control circuits; the total electrical system and protection devices on package units; analysis of failure and compressor motor burnout cleanup procedures.
Student Learning Outcomes:
1. Discuss soldering and brazing techniques as they relate to servicing. 2. Discuss refrigeration and A/C electrical schematics.

REF A/C 199 MECHANICAL CODE I HVACR (3)
Lecture: 3 hour(s)
An introduction to the California Mechanical Code for the installation and maintenance of heating, ventilating, cooling, and refrigeration systems.
Student Learning Outcomes:
1. The student will be able to use the Uniform Mechanical Code to locate standards in regards to the design, construction, installation, material, location, operation, and performance of heating, ventilating, cooling and refrigeration equipment.

REF A/C 202 REFRIGERATION FUNDAMENTALS (3) CSU
Lecture: 3 hour(s)
This course covers applied thermodynamics, types of energy, gas laws, sensible and latent heat transfer.
Student Learning Outcomes:
1. Students properly identify the 4 major components of a refrigeration system. 2. Students will use technical manuals to select appropriate compression system components.

REF A/C 203 COMPRESSION SYSTEMS OF REFRIGERATION (3) CSU
Lecture: 3 hour(s)
Instruction is given in the vapor cycle of refrigeration systems, including the study of refrigerants and their behavior in the system.
Student Learning Outcomes:
Students will develop a checklist for leak checking vapor refrigeration systems.

REF A/C 204 FUNCTIONS AND COMPRESSION SYSTEM COMPONENTS (3)
Lecture: 3 hour(s)
This course covers the technical aspects of all major refrigeration system components. Topics covered include the principles of operation of various types of compressors, refrigerant flow controls, and system designs.
Student Learning Outcomes:
1. Students will select the correct type of compressor for various applications. 2. Students will select the most appropriate metering device for various refrigeration systems.

REF A/C 208 REFRIGERENT MANAGEMENT EPA SECTION 608 CERTIFICATION (4) CSU
Lecture: 4 hour(s)
This course covers Refrigerant Management including the EPA Section 608 ruling, the Montreal Protocol, Ozone depletion and Global Warming. Preparatory course for the EPA section 608 technician certification. Type I, II, III, and Universal Certification. NOTE: Certification test will be available at the end of the semester for an additional fee.
Student Learning Outcomes:
1. Students will define the three, Recovery, Recycle and Reclaim. 2. Students will identify TYPE I, Type II, and TYPE III equipment. 3. Students will describe the EPA Section 608 ruling.

REF A/C 209 NORTH AMERICAN TECHNICIAN EXCELLENCE (NATE) AIR CONDITIONING SPECIALIST CERTIFICATION PREPARATION (4) RPT2
Lecture: 4 hour(s)
This course is a preparatory course for the industry standard NATE A/C Specialist certification examination. Topics covered in this course include safety, thermodynamics, electrical system diagnostics, airflow measurements, mechanical code, installation, service, tools, and more.
Student Learning Outcomes:
1. Students will identify refrigerant types and appropriate application. 2. Students will define recovery, recycle, reclaim. 3. Students will define high, medium, and low temperature ranges.

REF A/C 210 REFRIGERATION SYSTEM EFFICIENCY FACTORS (3) RPT2
Lecture: 3 hour(s)
This course will cover refrigerant, pressure enthalpy diagram, refrigeration piping, system evacuation, charging, and maintenance. The beginning of the class will include a review of terminology and the refrigeration cycle.
Student Learning Outcomes:
Students will develop a checklist for performing preventive maintenance on a packaged air conditioning unit.

REF A/C 250 INDOOR AIR QUALITY (3)
Lecture: 3 hour(s)
This course emphasizes operation of systems to provide quality air to indoor environments. AQMD requirements and pending regulations are reviewed. Organizing and implementing maintenance programs that include indoor air quality assessment and air balancing HVAC systems are covered.
Student Learning Outcomes:
SLO 1. Discuss the health aspects of IAQ. SLO 2. Discuss airflow as it relates to IAQ. SLO 3. Discuss chemicals that can have a negative impact on IAQ.

REF A/C 255 ENERGY MANAGEMENT (4)
Lecture: 4 hour(s)
The course covers the use of computers in the HVACR industry and the application of energy management technology in the improvement of

Los Angeles Trade-Technical College 2012-2013 GENERAL CATALOG
energy efficiencies. The goal is to prepare the HVACR Technician in the use of modern technology, including computers in the continuing quest for improved energy management.

Student Learning Outcomes:
SLO #1 The student will gather information on the various components of an energy management system. SLO #2 The student will critically analyze and then organize information on the application of an energy management system. SLO #3 The student will properly apply the English language to write an explanatory paper about rationals for using various energy management systems or practices.

REF A/C 285 DIRECTED STUDY AIR CONDITIONING/REFRIGERATION (2)
Lecture: 2 hour(s)
This course allows students to pursue a directed study in the HVACR industry on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in HVACR.

REF A/C 385 DIRECTED STUDY AIR CONDITIONING/REFRIGERATION (3)
Lecture: 3 hour(s)
This course allows students to pursue a directed study in HVACR on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in HVACR.

REF A/C 941 COOPERATIVE EDUCATION REFRIGERATION & AIR CONDITIONING MECH (4) RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.
Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

SIGN GRAPHICS

SGNGRPH 101 INDIVIDUAL LETTERING (10)
Lecture: 5 hour(s)
Lab: 15 hour(s)
Instruction covers identification of materials, tools, and brushes. Training is offered in drawing and brush lettering Gothic, Roman, Script, and casual letter styles. This course also includes training in techniques of layout, letter spacing, color mixing in reference to the production and sale of temporary signs. Students prepare showcards, paper signs, and other temporary display saleable items.
Student Learning Outcomes:
Students will be able to design and execute a show card using basic layout and design techniques using industry standard tools to produce a finished product. Students will be able to design and execute a paper banner using basic layout and design techniques and employing the proper materials and tools to complete a finished product.

SGNGRPH 102 EXTERIOR DISPLAY SIGNS (10)
Lecture: 5 hour(s)
Lab: 15 hour(s)
Prerequisite: Sign Graphics 101
This course covers the tools and materials used to produce outdoor signs. In addition, students design, paint, and letter signs inside and outside the classroom. Students will work on a variety of materials including; canvas, plywood, aluminum, and plastic substrates, Introduction to computer generated lettering and application techniques for vinyl letters. Instruction will emphasize sign layout and design. Students will produce a 4’X8’ plywood sign and an exterior wall sign.
Student Learning Outcomes:
Student will design, layout and create a 4’ X 8’ plywood sign. Students will produce a plaque and gift with 24 karat gold.

SGNGRPH 103 WINDOW SIGNS (10)
Lecture: 5 hour(s)
Lab: 15 hour(s)
Prerequisite: Sign Graphics 102
Instruction covers the use of specialized tools and materials used to produce window signs. Training includes painting on exterior and reverse windows, stippling techniques, and applications of vinyl letters on glass, both exterior and reverse. In addition, students will paint a temporary splash window and apply 23K gold leaf (water gilding). Intermediate computer design including the use of plotters and application techniques.
Student Learning Outcomes:
Students will produce an exterior window sign using computer generated vinyl letters. Students will hand paint a reverse window sign.

SGNGRPH 104 ADVANCE COMPUTER & DESIGN (10)
Lecture: 5 hour(s)
Lab: 15 hour(s)
Prerequisite: Sign Graphics 103
Students will learn advanced design techniques, backgrounds, and color theory. Practical experience will be gained on advanced computer study, applications, and a variety of computer sign software. In addition, information will be given on small business practices including management and pricing. Students will produce a sandblasted sign, a custom contour cut sign, and an antique sign.
Student Learning Outcomes:
Students will design and layout a sandblasted dimensional sign. Students will research design and hand paint an antique sign. Students will design and print a digital ink jet sticker or decal.
SOC 001  INTRODUCTION TO SOCIOLOGY (3) UC:CSU  
Lecture: 3 hour(s)  
This course is designed to acquaint students with the major principles of sociology as they are applied to contemporary social issues. With the use of several theoretical perspectives it examines social structures within American society and other cultures from macro and micro perspectives. There are extensive references to contemporary research findings on social structure, group dynamics, social stratification, and social institutions.  
Student Learning Outcomes:  
1. Students will identify basic concepts and ideologies in the field of sociology. 2. Students will develop and apply the research methodologies to social behaviors. 3. Students will analyze and apply the relationships between theory and research to social behaviors. 4. Students will utilize basic theoretical perspectives and identify their strengths and weaknesses.

SOC 002  AMERICAN SOCIAL PROBLEMS (3) UC:CSU  
Lecture: 3 hour(s)  
This course provides identification and analysis of contemporary social problems in the United States with an attempt to establish criteria by which an individual can judge the probable effectiveness of various schemes for social betterment.  
Student Learning Outcomes:  
Students should be able to answer the following questions: 1. What is a Social Problem and discuss the objectives and subjective elements of social problems. 2. Be able to define and give examples of the following elements of social structure and culture (institutions, social groups, status, roles, beliefs, values, norms, sanctions and symbols). 3. Be able to explain "social imagination" and discuss its relevance to the study of social problems.

SOC 028  THE FAMILY: A SOCIOLOGICAL APPROACH (3) UC:CSU  
Lecture: 3 hour(s)  
This course provides a sociological analysis which contributes to an understanding of the origin, structure, and functions of marriage and family life. This course includes, but is not limited to, studies of gender roles, legal controls, religious attitudes, mixed marriages and financial and family planning.  
Student Learning Outcomes:  
Students should be able to do the following: 1. Understand family trends from the past sixty years and analyze the changes in family dynamics.

SOLID WASTE MANAGEMENT TECHNOLOGY

SWM TEK 101  INTRODUCTION TO SOLID WASTE MANAGEMENT (3)  
Lecture: 3 hour(s)  
This course offers instruction in the fundamentals of solid waste management including characteristics of solid wastes, refuse storage, collection, transportation, disposal methods, financing methods, and solid waste-planning.  
Student Learning Outcomes:  
1. Be able to describe the characteristics of solid waste 2. Be able to describe different solid waste disposal methods 3. Be able to discuss the proper collection, transportation, and storage of refuse 4. Be able to discuss the accepted financing and planning methods in solid waste management
organized refuse collection through efficient routing techniques. 4. Be able to demonstrate the knowledge of different types of collection systems and vehicles. 5. Be able to demonstrate the understanding of how to measure productivity and routing and how to specify equipment to maximize route productivity.

**SWM TEK 107  WASTE REDUCTION AND RECYCLING (3)**

**Lecture:** 3 hour(s)

This course is an introduction to the science of solid resource recovery. It presents a broad overview of the methods and techniques, equipment and facilities required in recovery processes. Emphasis is placed on costs and management of the recovery process. Nuclear and non nuclear types of resource recoveries are studied.

**Student Learning Outcomes:**

1. Be able to demonstrate an understanding of solid waste characteristics as it pertains to resource recovery 2. Be able to differentiate various methods of collection, handling and disposal of a multi faceted municipal solid waste stream 3. Be able to demonstrate the understanding of increasing prominence of recycling programs along with resultant regulatory developments in the solid waste field.

**SWM TEK 108  SOLID WASTE FACILITIES (3)**

**Lecture:** 3 hour(s)

This course covers history and legislation of solid waste generation, and the need for effective transfer stations and landfills. It contains an overview of the handling of materials for both resource recovery and disposition of hazardous and non hazardous waste. The future needs of the public and private sectors are studied.

**Student Learning Outcomes:**

1. Be able to demonstrate an understanding of the history, concept, and development of landfills 2. Be able to discuss the concept, importance, and design of transfer stations 3. Be able to describe the concept of materials recovery facilities 4. Be able to demonstrate an understanding of compost and mulch processing facilities 5. Be able to discuss the concept of waste to energy and conversion technology.

---

**SPANISH**

**SPANISH 001  ELEMENTARY SPANISH I (5) UC:CSU**

**Lecture:** 5 hour(s)

This course stresses the fundamentals of pronunciation and grammar, practical vocabulary, useful phrases, and the ability to understand, read, write and speak simple Spanish. It includes basic facts on geography, customs, and culture of Spain and Latin America.

**Student Learning Outcomes:**

Students will communicate in Spanish, orally and in writing, at a novice high level (see ACTFL), using the present tense, the present progressive, the periphrastic future tense and the preterite tense. 1) Students will be able to hold a conversation at a novice high level. 2) Students will be able to read a graded paragraph containing elementary vocabulary, and 3) Students will be able to write sentences in Spanish dealing with daily life.

**SPANISH 002  ELEMENTARY SPANISH II (5) UC:CSU**

**Lecture:** 5 hour(s)  
**Prerequisites:** Spanish 1; Spanish 22

This course is a continuation of Spanish 1. It stresses further aspects of pronunciation and grammar, practical vocabulary, useful phrases, and the ability to understand, read, write and speak Spanish. It includes further facts on geography, customs, and culture of Spain and Latin America.

**Student Learning Outcomes:**

1. Students will be able to describe their childhood in the imperfect tense of the indicative mood.

**SPANISH 021  FUNDAMENTALS OF SPANISH I (3) UC:CSU**

**Lecture:** 3 hour(s)

This course introduces the fundamentals of pronunciation and grammar structures, stresses speaking, reading and writing, and offers practical vocabulary and idiomatic expressions. Spanish 21 and 22 together equal Spanish 1. UC:CSU UC limits credit for Spanish 21 and 22 to 5 units.

**Student Learning Outcomes:**

1. Students will be able to write sentences describing other people.

**SPANISH 022  FUNDAMENTALS OF SPANISH II (3) UC:CSU**

**Lecture:** 3 hour(s)

**Prerequisites:** Spanish 21

This course completes the fundamentals of pronunciation and grammar structures, presented in Spanish 21. Practical material is provided for simple conversations based on everyday activities, utilizing practical vocabulary and idiomatic expressions. Spanish 21 and 22 together equal Spanish 1. UC: CSU UC limits credits for Spanish 21 and 22 to 5 units.

**Student Learning Outcomes:**

1. Students will be able to describe their family members in the present tense.

**SPANISH 035  SPANISH FOR SPANISH SPEAKERS I (5) UC:CSU**

**Lecture:** 5 hour(s)

This course addresses the needs of the native Spanish speaking student. It focuses on the acquisition of a solid grammar base, vocabulary enrichment, spelling, reading, and writing skills. Also included is a study of linguistic variants in the Spanish language and of Spanish and Latin American literature, culture, and civilization.

**Student Learning Outcomes:**

The student will write a short essay in Spanish about a cultural tradition or a family celebration that is personally meaningful.

**SPANISH 036  SPANISH FOR SPANISH SPEAKERS II (5) UC:CSU**

**Lecture:** 5 hour(s)

This course is a continuation of Spanish 35 and it completes the study of grammar and continues the development of reading and writing skills.

**Student Learning Outcomes:**

The student will write a 3 page essay analyzing a short story in Spanish.

---

**SPEECH**

**SPEECH 101  ORAL COMMUNICATION I (3)**

**Lecture:** 3 hour(s)

This introductory speech course emphasizes techniques of public speaking including writing and delivery of speeches to inform and persuade. Students refine critical thinking, research, organizational, and time management skills. They learn to adapt a message to any audience and occasion.

**Student Learning Outcomes:**

1. Students will be able to write a well organized speech upon completion of this course. 2. Students will be able to speak informatively and persuasively upon completion of this course. 3. Students will be able to identify, and evaluate evidence to support claims used both in informative and persuasive speeches.

**SPEECH 121  THE PROCESS OF INTERPERSONAL COMMUNICATION (3) UC:CSU**

**Lecture:** 3 hour(s)

This lecture/activity/discussion course examines the theory, scope and
ST MAIN 103  STREET MAINTENANCE (APPLIED CALCULATIONS IN PUBLIC WORKS) (3)
Lecture:  3 hour(s)
This course is a practical mathematics exploration with an emphasis on application problems encountered in 'Street Maintenance', 'Street Services', and other areas of 'Public Works'.

Student Learning Outcomes:
1. Apply appropriate mathematical rules to solving electrical calculations such as, whole numbers, fractions, percentages, ratios and proportions, basic algebra, order of operations, multiplication, division, addition, and subtraction, etc. 2. Apply appropriate units of measure such as; percentages, vol, ohms, amperes, watts, sq ft, cubic volume, etc. 3. Select situational appropriate formula and or apply proper measurements and calculations to solve various word problems such as: inventories, material estimates, volume, area, size, etc.

ST MAIN 200  SURVEY OF STREET SERVICES (3)
Lecture:  3 hour(s)
This course provides an introduction to all common functions of Street Services, as an element of 'Public Works'. The history current practices in Street Services, trends, and programs will be covered.

Student Learning Outcomes:
1. Discuss the history and development of the Bureau of Street Services. 2. Identify the principles and practices of Urban Forestry. 3. Describe resurfacing operations.

ST MAIN 201  STREET MAINTENANCE I (3)
Lecture:  3 hour(s)
This course covers the history and current practices in street maintenance techniques and programs. This is a basic course in the general theory of street maintenance as applied to concrete and asphalt.

Student Learning Outcomes:
1. Discuss principle and practices for asphalt and concrete usage as a road material. 2. Describe the cleaning and sanitation of roadwork equipment. 3. Describe the laws and ordinances pertaining to resurfacing operations.

ST MAIN 202  STREET MAINTENANCE II (3)
Lecture:  3 hour(s)
This course provides an in-depth study of asphalt, preventative maintenance of asphalt and of concrete pavements, and applicable codes for improvement and repair. Also included is the introduction of estimating and calculations for materials usage.

Student Learning Outcomes:
1. Discuss the history and development of asphalt and concrete pavements. 2. Identify tool & techniques for preventative maintenance on asphalt and concrete pavements. 3. Identify appropriate codes related to asphalt and concrete maintenance work.

ST MAIN 203  STREET MAINTENANCE III (3) RPT1
Lecture:  3 hour(s)
This course covers engineering plan reading and math concepts necessary for the calculation of amounts of material required for public works maintenance operations. Emphasis on solving practical math problems in estimating concrete, asphalt, and other materials necessary for the completion of street, sidewalk and other types of maintenance work.

Student Learning Outcomes:
1. Discuss the principles and practices of estimating. 2. Demonstrate estimating for a classroom defined job requirement.

ST MAIN 204  REPORT WRITING FOR PUBLIC WORKS (3)
Lecture:  3 hour(s)
This course covers report writing in the public works arena. The basic mechanics of the English language and analysis and preparation of reports for public works will be covered.

Student Learning Outcomes:
1. Write clear and concise public works reports. 2. Improve basic grammar and apply the grammar rules to writing public works reports.

ST MAIN 205  ISSUES AND PRACTICES IN PUBLIC WORKS (3)
Lecture:  3 hour(s)
This course covers street use, street lighting, street trees, lot cleaning, sanitation, engineering and personnel management. State and Municipal Codes, property descriptions and public relations will also be covered.

Student Learning Outcomes:
1. Using a map, locate several locations for calls of service. 2. Drive to various predetermined map locations.

ST MAIN 206  STREET MAINTENANCE VI (3)
Lecture:  3 hour(s)
This course provides an overview along with hands-on experiences with heavy equipment used in street maintenance. Safety and preventative maintenance included.

Student Learning Outcomes:
1. Discuss the principles and practices of heavy equipment operations. 2. List safety concerns and discuss mitigation when operating heavy equipment.

ST MAIN 207  STREET MAINTENANCE VII (HAZARDOUS MATERIALS EMERGENCY MANAGE (3)
Lecture:  3 hour(s)
This course covers the prescribed responses in the first hour of a hazardous materials incident. This course satisfies OSHA Standards in Hazardous Waste Operations Code 29 CFR 1910.120. The course includes specific training requirements of hazardous waste workers and emergency responders.

Student Learning Outcomes:
1. List hazardous materials and describe how to identify and limits exposure. 2. Describe how to mitigate various hazardous material under normal and emergency situations.
ST MAIN 208  STREET MAINTENANCE TECHNOLOGY (3)

Lecture: 3 hour(s)
The basic concepts of management and supervision in the area of public works are introduced. Topics include motivating employees, effective communication, problem solving, leadership skills and current practices.

Student Learning Outcomes:
1. Discuss the principles and practices of organizational management. 2. List the pros and cons of various management approaches.

ST MAIN 209  DRIVERS LICENSE PREPARATION (CLASS “B”) (2) RPT1

Lecture: 1.5 hour(s)
Lab: 1.5 hour(s)
This class prepares the student to successfully obtain a California Class B Drivers License. Information is provided to prepare the student for the written portion of the exam. Driving/field instruction is provided to prepare the student for the driving portion of the exam.

Student Learning Outcomes:
1. Obtain a Class “B” Drivers License.

ST MAIN 210  MOTOR SWEEPER OPERATOR (3)

Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
Prerequisite: Street Maintenance 209
Motor Sweeper Operator School is to serve as the focal point for the development and training of Street Services personnel to enhance the capability and effectiveness of street cleaning operations. This course spans the entire spectrum of safety, maintenance, and operations.

Student Learning Outcomes:
1. Discuss the safety aspects of sweeper operation. 2. Discuss maintenance aspects of sweeper operation. 3. Demonstrate proper set up, operation, and shut down of a motor sweeper unit.

SUPV 001  ELEMENTS OF SUPERVISION (3) CSU

Lecture: 3 hour(s)
This course covers the theory and principles of supervision, as well as the supervisor's responsibilities for organization, human relations, training, rating, quality control, and management of employee relations.

Student Learning Outcomes:
Student will identify and address key issues in supervision.

SUPV 003  HUMAN RELATIONS (DEVELOPING SUPERVISORY LEADERSHIP) (3)

Lecture: 3 hour(s)
Instruction will focus on those human relation skills the supervisory student needs to be well rounded and thoroughly prepared for a work environment characterized by economic volatility, constant change and a new level of competitiveness. This interpersonal skills approach places greater emphasis on the application of knowledge through practice, followed by feedback and reinforcement.

Student Learning Outcomes:
Students will demonstrate an understanding of the impact of human relations from a supervisory and personal perspective in the workplace. Students will be able to describe and apply the major themes in human relations. Students will be able to assess and develop techniques for managing interpersonal relationships in the workplace. Students will understand and implement the elements of Emotional Intelligence and create a plan for continual improvement.

SUPV 004  SUPERVISOR’S RESPONSIBILITY FOR MANAGEMENT OF PERSONNEL (3)

Lecture: 3 hour(s)
This course teaches personnel techniques for the supervisor. Selection, placement, orientation, training, counseling, promotion, evaluation, discipline, grievance handling, and affirmative action are topics included in this course.

Student Learning Outcomes:
1. Students will be able to apply supervision principles and skills in a variety of situational settings. 2. Students will be able to identify the skills and examine the roles and responsibilities of a supervisor. 3. Students will demonstrate problem solving and appropriate decision making skills.

SUPV 011  ORAL COMMUNICATIONS (3)

Lecture: 3 hour(s)
This course will focus on the basics of the oral communication process and how it is intertwined with the work of a supervisor. Students will plan, compose, and deliver oral presentations designed to strengthen verbal and nonverbal skills. Finally, the student will be exposed to the basic principles of management and supervision and how successful communication is fundamental to the success of supervisors.

Student Learning Outcomes:
Students will use critical thinking skills to gather, identify, analyze, synthesize information, and evaluate problems. Students will demonstrate effective communication and comprehension skills.

SUPV 941  COOPERATIVE EDUCATION SUPERVISION (4) RPT3

Lecture: 4 hour(s)
Cooperative Education is a work-experience program involving the employer, the student employee and the college to ensure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.

SUPPLY WATER TECHNOLOGY

WATER 001  MODERN WATER WORKS I (3)

Lecture: 3 hour(s)
This course provides instructions to water works design and operation for operators and others involved in the operation and design of water distribution systems. All major components of the distribution system including wells, storage reservoirs, pumps, water mains, valves, meters and fire hydrants are fully discussed.

Student Learning Outcomes:
1. Be able to discuss the components of the drinking water distribution system and their functions. 2. Be able to describe the hydraulics, reservoirs, water wells, water mains, valves, and pumps of the distribution system. 3. Be able to discuss the causes of cross connection in the distribution system. 4. Be able to describe the safety rules and record keeping of the distribution system. 5. Be able to compare and contrast different methods of disinfection and the use of chlorine in the distribution system.

WATER 002  MODERN WATER WORKS II (3)

Lecture: 3 hour(s)
This is an advanced course in water distribution systems. Included are
special considerations of pipe types and uses, reservoirs, maps, records applied hydraulics as applied to Distribution Systems. Emphasis will be placed on the practical layout, operation and maintenance of a water distribution system. Students are prepared for a Grade 2 Distribution Operation Certification of the AWWA.

Student Learning Outcomes:
1. Be able to discuss the drinking water regulations related to the Surface Water Treatment Rule (SWTR). 2. Be able to discuss the Total Coliform Rule (TCR) and its application to water treatment. 3. Be able to describe the Water Treatment Plant (WTP) processes, and its basic design and operation. 4. Be able to discuss the WTP filtration process, its function and characteristics. 5. Be able to describe the chlorination process, use of chlorine and its capabilities, limitations and different forms of chlorine products. 6. Be able to discuss WTP mathematics, specifically the application of chlorination dose. 7. Be able to differentiate treatment processes such as blending, iron and manganese removal, and organic chemical treatment.

WATER 003 WATER SYSTEMS CONTROLS (3)
Lecture: 3 hour(s)

The purpose of this course is to introduce the basics of water supply, sources of water supply, water chemistry, drinking water regulations, water microbiology, water quality control, and some basic arithmetic related to water distribution and water treatment problems.

Student Learning Outcomes:
1. Be able to discuss the importance of water, water supply components, the process of developing water projects, and sources of water. 2. Be able to describe basic water chemistry and microbiology of water. 3. Be able to list different contaminants in the different sources of water and explain drinking water regulations. 4. Be able to describe water sampling for examination and coliform bacteria tests. 5. Be able to discuss basic hydraulics. 6. Be able to discuss units used in components of water supply, and basic arithmetic related to water supply.

WATER 004 WATER PURIFICATION I (POTABLE WATER) (3)
Lecture: 3 hour(s)

This beginning course in water treatment covers public health, water quality control, and operation and maintenance. The student is prepared for the Grade 1 and 2 Treatment Certification by the State Department of Health.

Student Learning Outcomes:
1. Be able to describe drinking water regulations related to Surface Water Treatment Rule (SWTR) and Total Coliform Rule (TCR). 2. Be able to discuss the basic design and operation of the Water Treatment Plant (WTP) including coagulation, flocculation, and sedimentation. 3. Be able to differentiate methods of disinfection, especially the chlorination process. 4. Be able to practice WTP mathematics, specifically the application of chlorination does and its relation to the concentration of the chlorine dose.

WATER 005 WATER PURIFICATION II (POTABLE WATER) (3)
Lecture: 3 hour(s)

This is an advanced course in water treatment covering public health, water quality control and operation and maintenance. The student is prepared for the Grade 3 Treatment Certification by the State Department of Health.

Student Learning Outcomes:
1. Be able to discuss the elements and hydraulics of the distribution system. 2. Be able to differentiate storage reservoirs and drinking water wells, and their purposes and function. 3. Be able to describe the distribution system mains, valves, pumps and pump stations. 4. Be able to discuss the cross connection in the distribution system. 5. Be able to discuss record keeping and maps of the distribution system. 6. Be able to discuss distribution system arithmetic.

WATER 941 COOPERATIVE EDUCATION SUPPLY WATER TECHNOLOGY (4) RPT3
Lecture: 4 hour(s)

Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
1. The student will develop at least three learning objectives to be accomplished on the job. 1. The objectives will be related to the educational/occupational goals of the student.

TAILORING

TAILRNG 250 TAILORING TECHNIQUES I (2)
Lab: 6 hour(s)
Advisory: Fashion Design 222 or Fashion Design 111

Training is offered in basic tailoring techniques. Students be instructed in welt pockets, hand tailored stitching, and finishing techniques. This course will consist of a basic tailored vest and trousers.

Student Learning Outcomes:
Students will be able to construct a basic tailored vest. Students will be able to construct a pair of men’s style pants with fly front, slash pockets, tailored waistband.

TAILRNG 251 TAILORING TECHNIQUES II (2)
Lab: 6 hour(s)
Prerequisite: Tailoring 226 or Tailoring 250

Students will receive training on basic tailored jackets. Instruction will include yokes, vents, pockets, and tailored techniques as applied to jacket styles.

Student Learning Outcomes:
Students will be able to construct a basic man’s style shirt. Students will be able to construct a basic man’s style jacket

TAILRNG 252 TAILORING TECHNIQUES III (2)
Lab: 6 hour(s)
Prerequisite: Tailoring 227 or Tailoring 251

Students receive training in men’s or women’s suits. Instruction on advanced techniques as applied to suits including 2 piece sleeves with vents, back vents, and hand stitched buttonholes.

Student Learning Outcomes:
Students will be able to construct a man’s style suit.

TAILRNG 253 TAILORING TECHNIQUES IV (2)
Lab: 6 hour(s)
Prerequisite: Tailoring 228 or Tailoring 252

Students receive training in tailored coats, men’s style shirts and blouses. Instruction will include styled seams, cold weather techniques.

Student Learning Outcomes:
Students will be able to construct a basic tailored coat. Students will be able to construct a tailored man’s style shirt or a woman’s blouse.

TAILRNG 255 MEN’S PATTERN DRAFTING I (2)
Lab: 6 hour(s)

In this course students will learn the fundamentals of taking and using men’s measurements for pattern making. Students will draft patterns for basic trousers, men’s sport shirts, and a basic man’s vest. Each pattern will be tested for fit.

Student Learning Outcomes:
Students will draft trousers including fly front and other required elements. Students will draft a shirt to personal or standard measurements.
COURSE DESCRIPTIONS

TAILRNG 256 MEN'S PATTERN DRAFTING II (2)
Lab: 6 hour(s)
This course in men's pattern making will introduce students to advanced styling including, jackets, and stylized pants. Students will make complete patterns for each element of a three piece suit.
Student Learning Outcomes:
Students will draft a classic or contemporary lined vest incorporating required elements.

VISCOM 100 GRAPHIC DESIGN I (2) CSU
Lecture: 3 hour(s)
This course introduces the student to the field of graphic design. Projects will stress design basics, typography, the computer as a design tool, the basics of visual problem solving, and art production and advertising.
Student Learning Outcomes:
1. Students will apply color systems to their graphic design solutions that
provide color harmony. 2. Students will be able to utilize typography for the purpose of effective visual communication. 3. Students will create a self mailer for a current MOCA exhibition. This mailer must incorporate the Principles and Elements of Design.

THEATER

THEATER 100 INTRODUCTION TO THE THEATER (3) UC:CSU
Lecture: 3 hour(s)
This course surveys the history of theater from the ancient Greek to modern times. Stage vocabulary, production crafts and acting techniques are introduced. Students will analyze how theater relates to motion pictures, television, and radio in contemporary American life, as well as compare themes in literature, compare and contrast adaptations of famous plays to their original written form and apply critical analysis to live dramatic productions.
Student Learning Outcomes:
1. Students will understand the various types of theatre as determined by historical period or style. 2. They will understand what a variety of theatre artists do to create a play, including the actor, playwright, director and technical personnel. 3. They will know how to find a play to their liking how to make reservations and the proper etiquette for attending a performance.

THEATER 270 BEGINNING ACTING (3) UC:CSU
Lecture: 3 hour(s)
This course introduces students to performing in front of a live audience. Exercises for the body and voice are demonstrated and sensory identification is used to explore and reenact situations. Students will perform readings from a variety of published plays and practice the technical skill of "cold" reading without rehearsal. They will practice psychological interpretation of characters with the help of character analysis, memorize scenes and monologues, and learn to improvise on stage.
Student Learning Outcomes:
1. Develop self expression through performance. 2. Acquire communication and social skills. 3. Create theatre through individual effort, group interaction, and artistic collaboration. 4. Experience theatre in its multicultural, social, and historical contexts. 5. Form aesthetic judgment of acting theory. 6. Understand and demonstrate knowledge of Acting Theory. 7. Enhance reading comprehension, writing and vocabulary proficiency.

VISUAL COMMUNICATIONS

VISCOM 100 GRAPHIC DESIGN I (2) CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An introduction to the profession of Graphic Design. Projects will stress design basics, typography, the computer as a design tool, the basics of visual problem solving, and art production and advertising.
Student Learning Outcomes:
1. Students will apply color systems to their graphic design solutions that
provide color harmony. 2. Students will be able to utilize typography for the purpose of effective visual communication. 3. Students will create a self mailer for a current MOCA exhibition. This mailer must incorporate the Principles and Elements of Design.
VISCOM 114  DIGITAL TYPESetting (2)  CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
Introduction of the principles of computer typesetting as a career. The course will cover the standards and guidelines used to set type for ads, brochures, and stationary. Proofreading and setting copy in multiple computer programs will be stressed.
Student Learning Outcomes:
1. Students will study, identify and examine the principles, techniques, factors and aesthetics that make a clear and powerful ad. 2. Students will develop, design and create two industry projects that demonstrate a confident and dynamic use of text and image by using principles. 3. Students will examine and apply the use of text, their submenus in the Adobe Illustrator application

VISCOM 115  GRAPHIC DESIGN II (2)  CSU RPT1
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
Intermediate level course that will stress Graphic Design as a profession. Problems will emphasize the development of creativity, typography as communication, art production and the computer, and methods for developing brochures, ads and web pages.
Student Learning Outcomes:
1. Student will assess textual information and then apply the principles of gestalt to organize and present the information typographically in a visual hierarchy that is clear and consistent and helps the reader to understand how the different elements of the text relate to one another and so to navigate and more easily access the information he seeks.

VISCOM 116  THREE DIMENSIONAL PACKAGE DESIGN (2)  CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
Introduction to the development of advertising concepts for magazines, television, and the internet. Use research, brainstorming and standard advertising methodology to plan, design and produce an advertising campaign.
Student Learning Outcomes:
1. Students will compare and assess both the editorial and advertising content of a cross section of retail magazines and then prepare a written summary of their findings and write a general description of the magazines’ readership based on those findings. The student will then present this information orally to the class and answer spontaneous questions from the teacher and class members.

VISCOM 118  DIGITAL DRAWING (2)  CSU
Lecture: 0.5 hour(s)
Lab: 3.75 hour(s)
Advisory: Visual Communications 103
Basic training in computer illustration using the Adobe software application Illustrator. Toolbox familiarity and manipulation, menus items, and general skill application will constitute this beginning level course.
Student Learning Outcomes:
1. Students will utilize Toolbox Tools to create images and typography. 2. Students will utilize Menus to alter and manipulate images and typography. 3. Students will create a poster design for a local entertainment venue.

VISCOM 119  DIGITAL PAGE LAYOUT (2)  CSU
Lecture: 2 hour(s)
Prerequisite: Visual Communications 103
A hands-on course in the use of the relevant industry pagination software. These applications are used for designing brochures, ads, flyers, stationery, magazines, and books. Students will learn how to work seamlessly with other applications. Students will learn to set up and construct page layouts and how to use software applications as design tools. Students will learn how to specify type, set type for columns, work with spreads and long copy documents using fonts and photos. In addition, students will create spot illustrations and graphics. Preflight and final preparation of finished art work for printing.
Student Learning Outcomes:
Students will understand typesetting terms. Students will comprehend layout and design of magazine articles in relation to advertising and graphic design.

VISCOM 120  DRAWING II (2)  CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An advanced drawing course in which indoor and outdoor observational drawing concepts are linked with magazine and book publishing for the creation of cover art and feature article page layouts.
Student Learning Outcomes:
1. Students will be able to draw from observation with correct proportions, value variations in their line applications, and with an overall understanding of composition including positive and negative space.

VISCOM 124  COMPUTER ILLUSTRATION I (2)  CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An intermediate level course in digital picture making techniques. It combines the Adobe software applications “Illustrator” and “PhotoShop” for the creation of digital illustrations that include drawing, photo manipulations, and typography stylizations for advertising and editorial purposes.
Student Learning Outcomes:
1. Students will redesign the packaging graphics for a consumer food product, or the #10 brochure for a socal theme park. 2. Students will create photography and illustration for container packaging. 3. Students will create digital files for all packaging components.

VISCOM 126  PORTFOLIO DEVELOPMENT I (2)  CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
This is a course in the production of a finished portfolio; all course projects will be reviewed for portfolio consideration. Some projects will require reworking. Preparation of 10 completed works with preliminary developmental books culminates in a simulated job interview with Advisory Board members.
Student Learning Outcomes:
1. Students will apply organizational and design systems to a multi page portfolio book document. 2. Students will create original digital files in Photoshop, Illustrator, Indesign, and other visual digital software applications and format each as PDFs for the purpose of printing. 3. Students will build the first half of a marketable portfolio.

VISCOM 127  DIGITAL PREPRESS III (2)  CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An advanced course in digital prepress. Students will utilize photographic images, typography, and original artwork to create printing files for advertising and graphic design. Advanced Macintosh based theories will be covered to include Adobe Illustrator and Photosop, and QuarkXPress.
Student Learning Outcomes:
1. Students will create and design a presentation ebook including; personal identity (logo, business cards, envelopes and letterhead), research, thumbnails.

VISCOM 128  DESIGNING LOGOS AND TRADEMARKS (2)  CSU
Lecture: 2 hour(s)
Introduction to the principles of trademark design and computer stationary production. Research, marketing, color theory, and corporate identity principles will be stressed. Logos, letterheads, business cards and envelopes will be designed for a variety of clients.
Course Descriptions

VISCOM 129 DIGITAL PHOTO MANIPULATION (2) CSU
Lecture: 1 hour(s)
Lab: 3 hour(s)
An introductory course that concentrates on the software application Adobe Photoshop. Students will be instructed on how to use this application to create original art and graphics by manipulating scanned photography and other imagery.
Student Learning Outcomes:
1. Students will utilize Toolbox Tools to manipulate images and typography.
2. Students will utilize Menus to alter and manipulate color and transformations.
3. Students will utilize default Photoshop Brushes and create new brushes.
4. Students will create a DVD box design.

VISCOM 130 DRAWING III (2) CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An advanced drawing course in which quick observational drawings are refined in black and white and color mediums. Renderings, or more highly refined tonal work, will be performed in dry and wet mediums from indoor and outdoor locations.
Student Learning Outcomes:
1. Students will be able to compose and design a multiple image montage illustration. The incorporation of scale change, strong positive and negative shapes and line variations will provide depth to the illustration content and suggest a strong graphic composition.

VISCOM 131 COMPUTER ILLUSTRATION II (2) CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An advanced course in digital picture making techniques. It combines the Adobe software applications "Illustrator" and "Photoshop" for the creation of digital illustrations that include drawing, photo manipulations, and typography stylizations for advertising and editorial purposes.
Student Learning Outcomes:
1. Students will redesign the packaging graphics for a consumer food product, or the #10 brochure for a social theme park.
2. Students will create typography and illustration for container packaging.
3. Students will create digital files for all packaging components.

VISCOM 132 PORTFOLIO DEVELOPMENT II (2) CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
An advanced course in the production of a finished portfolio. Preparation of 10 completed works with preliminary developmental books culminates in a simulated job interview with Advisory Board members.
Student Learning Outcomes:
1. Students will apply organizational and design systems to a multi-page portfolio book document.
2. Students will create original digital files in Photoshop, Illustrator, InDesign, and other visual digital software applications and format each as PDFs for the purpose of printing.
3. Students will complete the production files of all finished, marketable portfolio book.

VISCOM 133 DIGITAL PORTFOLIO PREPARATION (2) CSU
Lecture: 0.5 hour(s)
Lab: 4.25 hour(s)
Preparation of the digital portfolio required for employment as a Graphic Designer or as an Art Director. Theories of resume preparation, job interview techniques and the development of the students’ personal stationary will be stressed. The digital portfolio will show advanced Adobe Illustrator, Photoshop and QuarkXPress files needed for review by prospective employers.
Student Learning Outcomes:
1. Students will produce a Digital portfolio including a resume and reevaluation of past designs. Portfolio will include photographs, illustrations and new creative projects.

VISCOM 134 GRAPHIC DESIGN BUSINESS PRACTICES (2) CSU
Lecture: 2 hour(s)
Introduction to the financial aspects of running a Graphic Design business. Lecture and projects will include billing procedures, business overhead costs, taxes and retirement planning. Taxes, small business legal issues and understanding business ethics are stressed.
Student Learning Outcomes:
1. Students will study, learn, identify and examine the legal and changing world of Graphic Art. Studio and alternative careers and strategies are examined and explored.
2. Students will develop, design and create contracts, business models and a campaign that analyzes project costs, supply and art negotiations and bargaining agreements that make a structured and practical business.

VISCOM 135 WEB PAGE GRAPHICS ON THE MACINTOSH (2) CSU
Lecture: 1 hour(s)
Lab: 4 hour(s)
An introductory course in the use of the Macintosh computer to construct web page graphics for the internet. Macromedia Dreamweaver is utilized and particular emphasis is placed on the construction process, design, art and photographic images, typography, RGB Color, HTML and DHTML.
Student Learning Outcomes:
1. Students will design and create a website for portfolio presentation using Adobe Dreamweaver, and Fireworks.

VISCOM 204 FLASH MOTION GRAPHICS (BEGINNING LEVEL) (2) CSU
Lecture: 1 hour(s)
Lab: 3 hour(s)
This course concentrates on the software application Macromedia Flash MX. It teaches beginning Flash users principles and techniques for designing web sites with motion graphics: how to layout pages, use color and text effectively, work with multiple image types, build navigation, and incorporate sound and video.
Student Learning Outcomes:
1. Students will create animated movie for web advertisement using Flash Motion Graphics.

WASTEWATER TECHNOLOGY

WASTE 012 WASTEWATER OPERATIONS I (3)
Lecture: 3 hour(s)
This course is a survey and introductory course into wastewater systems for operations and maintenance personnel. Administrative, engineering and laboratory personnel may benefit from this course.
Student Learning Outcomes:
1. Be able to discuss the origin, chemical and biological compositions, and treatment methods of wastewater.
2. Be able to describe laboratory analysis of wastewater including the methods, materials, and procedures.
3. Be able to compare and contrast primary, chemical, secondary, and tertiary treatments of wastewater.
4. Be able to discuss disinfection and odor control of wastewater.
5. Be able to describe ponds in terms of the origin, chemical and biological compositions, and relations to wastewater.
6. Be able to discuss sludge handling and disposal, and reclamation and reuse of wastewater.
WASTE 013 WASTEWATER OPERATIONS II (3)
Lecture: 3 hour(s)
A comprehensive study is made of preliminary, primary, and secondary treatment systems and operations including selected field studies.
Student Learning Outcomes:
1. Be able to describe the origins, composition and characteristics of wastewater. 2. Be able to discuss the technique, analysis, calculations and data evaluation of laboratory examination of wastewater. 3. Be able to compare and contrast primary, secondary, chemical, and secondary treatments. 4. Be able to discuss the theory, history, chlorination, ozonation, and chemical and biological aspects of odor control.

WASTE 014 WASTEWATER OPERATIONS III (3)
Lecture: 3 hour(s)
This is a comprehensive study of disinfection methods, tertiary treatment, water reclamation, solids treatment, solids and effluent disposal practices.
Student Learning Outcomes:
1. The student will be able to convert measurements from U.S. units to metric. 2. Students will diagnose the health of the digester. 3. Students will take the proper steps to correct and remedy a sick digester.

WASTE 015 WASTEWATER OPERATIONS IV (4)
Lecture: 3 hour(s)
Lab: 3 hour(s)
This is an introduction into the fundamentals of chemistry and laboratory techniques used to monitor wastewater treatment operations.
Student Learning Outcomes:
1. Be able to describe the techniques, location, and times of sampling wastewater. 2. Be able to compare and contrast atoms, molecules, elements, and compounds. 3. Be able to discuss units, conversions, stoichiometric relationships, and problem solving in laboratory measurements and calculations. 4. Be able to discuss nomenclature and purpose of laboratory equipment and material. 5. Be able to describe the laboratory techniques in measuring liquid and weight, and analyzing samples using gravimetric, coulometric, colorimetric, electrometric, and instrumental analysis. 6. Be able to compare and contrast settleable solids, suspended solids, volatile solids, pH, DO, BOD, and chlorine demand.

WASTE 016 WASTEWATER OPERATIONS V (3)
Lecture: 3 hour(s)
This course is a comprehensive study of the practical application of engineering fundamentals, such as hydraulics, mechanics, electricity and instruments as practiced in wastewater treatment.
Student Learning Outcomes:
1. Be able to discuss pressure, buoyancy, force, statics, definitions, terms, units, and basic calculations in elementary hydraulics. 2. Be able to discuss the definitions, fluid friction, head loss, open channel flow, hydraulic equation problem units, and basic calculations in fluid dynamics. 3. Be able to describe symbols, dimensions, sections, views, and units in interpreting plans and specifications. 4. Be able to describe conduits, valves, wet wells storage tanks, and ponds in hydraulic appurtenances. 5. Be able to discuss units, weirs, venturis, other meters, and flow calculations in fluid measurements. 6. Be able to discuss forces, tension, compressions, shear, friction, stress, strain, factor of safety, typproblems, and mechanical advantage in elementary mechanics. 7. Be able to describe pump, pump characteristics, energy requirements, energy and flow calculations in fluid mechanics. 8. Be able to discuss direct and alternating current, terms, definitions, power, and motors in elementary electricity.

WASTE 017 WASTEWATER OPERATIONS VI (3)
Lecture: 3 hour(s)
Public health, the environment, regulations, management/supervision and report writing as practiced in wastewater and water reclamation plants safety are covered.

Student Learning Outcomes:
1. Be able to describe pre treatment, collection system, public treatment system, and disposal system in a wastewater system. 2. Be able to discuss energy levels for various treatment methods, the costs involved, and social impacts of the effects on energy and natural resources. 3. Be able to describe the different levels of operator certification including the educational and experience requirements. 4. Be able to discuss public relations and professional organizations. 5. Be able to describe oral and written forms of communications, and the importance of record keeping. 6. Be able to discuss the administrative methods, human relations, Cal OSHA, and labor relations in plant management. 7. Be able to describe how to fill out job applications, what to do in job interviews and discuss personnel practices.

WASTE 018 WATER AND WASTEWATER MATHEMATICS (3)
Lecture: 3 hour(s)
This is a review and practice of basic mathematical concepts required to solve wastewater treatment problems. (Note: this is not a remedial math class).
Student Learning Outcomes:
1. Be able to discuss basic mathematics concepts such as fractions, decimals, exponents, percentages, averages, ratios, proportions, unit conversions, areas, volumes graphs, charts, velocity, weights, flow, equations, solving for an unknown, and combination calculations. 2. Be able to discuss preliminary treatment calculations in pumping, horsepower, detention time, volume, and surface loading rate, weir overflow rate, hydraulic detention time, and removal efficiency in primary treatment. 4. Be able to describe oxidation ponds trickling filters activated sludge, detention time, solid loading rate, recirculation ratios, sludge age, air rates, WAS rate, RAS rate, and F to M ratio in secondary treatment. 5. Be able to describe loading rate, gas production, volatile solid reduction, and detention time in solids handling. 6. Be able to discuss Seattle ability, suspended solids, total solids, BOD, DO, SVI, and dosage rate in laboratory and disinfection.

WELDING GAS AND ELECTRIC

WELDG/E 002 MANUAL FLAME CUTTING AND PLASMA ARC CUTTING (1) RPT2
Lecture: 1 hour(s)
Lab: 3 hour(s)
This is introductory course to oxyacetlylene flame cutting, plasma arc cutting and related cutting process.
Student Learning Outcomes:
1. Compute with very large and very small numbers, decimals, and fractions and understand the relationship between decimals, fractions, and percents. 2. Express the relative magnitudes of numbers. 3. Perform calculations and solve problems involving addition, subtraction, and simple multiplication and division of fractions, decimals, and scientific notation. 4. Solve problems involving addition, subtraction, multiplication, and division of whole numbers and understand the relationships among the operations. 5. Determine how to factor small whole numbers. 6. Use and interpret, mathematical symbols, and properties to write and simplify expressions and sentences. 7. Organize, represent, and interpret numerical and categorical data and clearly communicate their findings. 8. Make decisions about how to approach problems. 9. Use strategies, skills, and concepts in finding solutions. 10. Apply knowledge from particular problems to more generalized problems/situations.

WELDG/E 100 METAL SCULPTURE I (3) CSU RPT1
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
Expand beginning welding skills and metal working techniques into an
Course Descriptions

WELDG/E 101 FLUX CORED ARC WELDING (6) RPT3
Lecture: 1.5 hour(s)
Lab: 12.5 hour(s)
This course provides instructions on the principles, equipment, welding techniques, mode of operations, and safety for flux cored arc welding used for structural steel. The course content follows the FCAW competencies published in American Welding Society Guide for the Training of Welding Personnel: Level 4. Entry: This course prepares student for the performance portion of the Los Angeles Department of Building and Safety, Structural Steel Certified Field Welder Examination.

Student Learning Outcomes:
2. Preflow/ prior external repairs on FCAW equipment and accessories.
3. Perform assigned weldments using the FCAW G and FCAW S processes to detailed specifications of American Welding Society Structural Steel D1.1 Section 4.

WELDG/E 102 SHIELDED METAL ARC WELDING PIPE HORIZONTAL(2G) AND UPHILL(5G) (3) NDA RPT3
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course provide instruction on welding carbon steel pipe to requirements of the American Society of Manufacturing Engineers Boiler and Pressure Vessel Code Section 9 Welding and Brazing Qualification using the shielded metal arc welding process. The course objective requires proficiency in producing high-quality welds on 6-inch diameter schedule 80 pipe in the 2G and 5G welding positions. Student Learning Outcomes:
1. Students will be able to produce a high-quality weld on carbon steel 6-inch schedule 80 pipe using the SMAW in the 2G and 5G welding positions.

WELDG/E 103 OCCUPATIONAL ORIENTATION FOR WELDERS (1) NDA RPT3
Lecture: 1 hour(s)
This course introduce the employability skills outlined in the American Welding Society Guide for the Training and Qualification of Welding Personnel, AWS/ESG.09.06. Topics includes: problem solving, identifying resources, effective time management, evaluating information sources and ethical issues relating to the welding field.

Student Learning Outcomes:
Students will be aware of the campus resources, interpersonal skills and employability skill needed for successful completion of the welding program and entry level employment in the welding field.

WELDG/E 104 GAS TUNGSTEN ARC/SHIELDED METAL ARC WELDING (3) NDA RPT3
Lecture: 1.5 hour(s)
Lab: 4.5 hour(s)
This course provide instruction on welding carbon steel pipe to requirements of the American Society of Manufacturing Engineers Boiler and Pressure Vessel Code Section 9 Welding and Brazing Qualification using the Gas Tungsten Arc and the Shielded Metal Arc welding processes. The course objective requires proficiency in producing high-quality welds on 6-inch diameter schedule 80 pipe in the 6G welding positions.

Student Learning Outcomes:
Students will be able to produce a high quality weld on carbon steel 6 inch, schedule 80 pipe using the GTAW process for the root pass, and SMAW process for the fill and cover passes in the 6G welding position. Students will be able to produce a high quality weld on carbon steel 6 inch schedule 80 pipe using the GTAW process in the 5G welding process.

WELDG/E 112 WELDING RELATED TECHNICAL INSTRUCTIONS I (3)
Lecture: 3 hour(s)
This course will cover the principles of oxy acetylene welding, brazing and cutting; safety, material selection, equipment assembly, fuels torch adjustments, and movements.

Student Learning Outcomes:
Students will describe how to safely light and adjust an oxyacetylene flame.

WELDG/E 113 APPLIED MATHEMATICS I (3)
Lecture: 3 hour(s)
Elementary arithmetic problems related to welding technology and solutions of whole numbers, fractions, and decimals.

Student Learning Outcomes:
1. Add, Subtract, Multiply, Divide Whole Numbers, Fractions, Mixed Numbers and Decimals.
2. Round off decimals in one or more places. Use measuring devices to determine size, Length, Angle or Distance. Use a calculator to perform basic arithmetic operations.
3. Convert mixed numbers fraction to decimals and vice versa.

WELDG/E 115 STRUCTURAL STEEL AND BOLTING SPECIAL INSPECTION (3)
Lecture: 3 hour(s)
This course provides instructions on obtaining a certification as a Structural Bolting Special Inspector by the International Code Council. This course includes a review of the technical aspects of structural bolting inspection and quality assurance activities. Topics include: duties and responsibilities, safety practices, materials sampling, testing verification, high strength bolting, frame welding observation, referencing appropriate building codes and standards structural steel plan reading, and report writing.

Student Learning Outcomes:
1. Upon the completion of this course all students will obtain the skill required to pass the Structural Steel and Bolting Special Inspector Examination.
2. Students will be able to produce high quality welds on carbon steel 6-inch schedule 80 pipe using the SMAW in the 2G and 5G welding positions.

WELDG/E 120 STRUCTURAL WELDING SPECIAL INSPECTION (3)
Lecture: 3 hour(s)
This course provides instructions on obtaining a certification as a Structural Welding Special Inspector by the International Code Council. This course includes a review of the technical aspects of structural welding inspection and quality assurance activities. Topics include: duties and responsibilities, safety practices, metal joining and cutting process, welding joint geometry and welding symbols, weld and base metal discontinuities, visual inspection, nondestructive testing referencing appropriate building codes and standards, materials identification and sampling, high strength bolting procedures, structural steel plan reading, and report writing.

WELDG/E 121 ELECTRIC WELDING I (6)
Lecture: 1.5 hour(s)
Lab: 13.5 hour(s)
Students perform basic manipulative exercises in electric welding using low alloy and mild steel materials in all positions, safety precautions, and fire prevention.

Student Learning Outcomes:
Students set up and safely light and adjust oxyacetylene flame.
WELDG/E 124  BLUEPRINT READING I (3)
Lecture:  3 hour(s)
This course covers the principles of reading and interpreting basic industrial blueprints as applied to the welding trade.
Student Learning Outcomes:
Outcome: Students will sketch oblique, isometric and pictorial views.

WELDG/E 125  APPLIED MATHEMATICS II (3)
Lecture:  3 hour(s)
Prerequisite:  Welding 111; Welding 112; Welding 113
Related mathematical problems in welding in project design and construction using the fundamental principles of algebra.
Student Learning Outcomes:
1. Convert SI(Metric) to U.S. (Customary) Units, and vice versa. 2. Identify geometric shapes. 3. Understand the function of angles and parts of a circle. 4. Prepare parts using the principles of geometry. 5. Read and use a U.S (Customary)/SI(Metric) Tape, Rule and Square.

WELDG/E 131  ELECTRIC WELDING II (6)
Lecture:  1.5 hour(s)
Lab:  13.5 hour(s)
This course will offer students an opportunity to prepare for certification testing in SMAW. There will be opportunities for improvement through supervised practice and individual coaching in SMAW technique.
Student Learning Outcomes:
Students use shielded metal arc welding (SMAW) techniques to weld in vertical position using a 7018 electrode.

WELDG/E 132  BLUEPRINT READING II (3)
Lecture:  3 hour(s)
Prerequisite:  Welding 113
The course covers the principles of lines, view, size, description, print formats, fasteners, and different types of fabrication drawings; review of industrial welding prints.
Student Learning Outcomes:
Students will sketch oblique, isometric and pictorial views.

WELDG/E 133  WELDING RELATED TECHNICAL INSTRUCTION III (3)
Lecture:  3 hour(s)
The course places an emphasis on materials, design, assembly procedures, electrodes selection, equipment, welding joints, terminology, welding metallurgy, and preparation for AWS and ASME welding examination.
Student Learning Outcomes:
SLO: Identify five types of welding joints and seven common structural steel shapes used in industry.

WELDG/E 141  ELECTRIC WELDING III (6)
Lecture:  1.5 hour(s)
Lab:  13.5 hour(s)
Students complete activities in sheet metal welding, cast iron welding, inert gas welding (MIG and TIG) and semi automatic gas shielded welding.
Student Learning Outcomes:
Weld a lap joint in flat position on aluminum using GTA welding process.

WELDG/E 142  INERT GAS WELDING (TIG & MIG) (3)
Lecture:  3 hour(s)
The course covers principles in welding aluminum, stainless steel, carbon steel and the maintenance and operation of welding equipment.
Student Learning Outcomes:
1. Identify three types of shielding gases used in GMAW and explain the functions of the shielding gasses.

WELDG/E 143  WELDING RELATED TECHNICAL INSTRUCTION IV (3)
Lecture:  3 hour(s)
The course covers the principles and theory of operating semi automatic gas shielded welding equipment and the metallurgy of metals.
Student Learning Outcomes:
1. Identify three types of shielding gases used in GMAW and explain the functions of the shielding gasses.

WELDG/E 151  SHIELD METAL,FLUX CORE & GAS TUNGSTEN ARC WELDING LABORATORY (2) RPT3
Lab:  6 hour(s)
Practical laboratory exercises to improve one’s welding techniques in SMAW, FCAW & GTAW and to prepare for certification testing.
Student Learning Outcomes:
1. At the completion of this course all students will select an electric arc welding process covered in the course and demonstrate a common knowledge of basic operating principles, component identification, equipment setup and performance.

WELDG/E 185  DIRECTED STUDY WELDING GAS AND ELECTRIC (1) RPT2
Lecture:  1 hour(s)
This course allows students to pursue a directed study in welding technology on a contract basis under the direction of a supervising instructor.
Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

WELDG/E 201  WELDING GAS AND ELECTRIC I (2)
Lab:  6 hour(s)
This course covers applications in oxy acetylene welding, brazing, and cutting processes, in all positions. Topics include practical methods of identifying, welding characteristics, safety and metal stress.
Student Learning Outcomes:
1. At the completion of the course all students will demonstrate general and operating knowledge in oxy acetylene welding, oxy acetylene cutting and braze welding.

WELDG/E 201A  WELDING GAS AND ELECTRIC I (1)
Lab:  3 hour(s)
This course covers part one applications in oxy acetylene welding, brazing, and cutting processes, in all positions. Topics include practical methods of identifying, welding characteristics, safety and metal stress.
Student Learning Outcomes:
1. At the completion of the course all students will demonstrate general and operating knowledge in oxy acetylene welding, oxy acetylene cutting and braze welding.

WELDG/E 201B  WELDING GAS AND ELECTRIC I (1)
Lab:  3 hour(s)
This course covers part two applications in oxy acetylene welding, brazing, and cutting processes, in all positions. Topics include practical methods of identifying, welding characteristics, safety and metal stress.
Student Learning Outcomes:
1. Students will weld a Vee Groove in the Flat position using 1” steel plate with 100% joint penetration.
WELDG/E 202  WELDING GAS AND ELECTRIC II (2)
Lab: 6 hour(s)
This course will offer students an opportunity to prepare for certification testing in SMAW. There will be opportunities for improvement through supervised practice and individual coaching in SMAW technique.

Student Learning Outcomes:
Students use shielded metal arc welding (SMAW) techniques to weld in vertical position using a 7018 electrode.

WELDG/E 210  METAL SCULPTING LABORATORY (2) CSU RPT2
Lab: 6 hour(s)
Prerequisite: Welding 100; Expand beginning welding skills and metal working techniques into an exploration of metal sculpture.

Student Learning Outcomes:
1. All students will be able to produce sound multi pass fillet welds using both the E6010 and E7018 in all welding positions.

WELDG/E 251  TUNGSTEN INERT GAS WELDING (2)
Lab: 6 hour(s)
Students will learn Inert Gas Welding. Gas Tungsten Arc Welding (TIG) and Gas Metal arc welding. (MIG) Distinguish among manual , semiautomatic, and automatic modes of operation and Safety.

Student Learning Outcomes:
Weld a lap joint in flat position on aluminum using GTA process.

WELDG/E 285  DIRECTED STUDY  WELDING GAS AND ELECTRIC (2)
Lecture: 2 hour(s)
This course allows students to pursue a directed study in welding technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

WELDG/E 385  DIRECTED STUDY  WELDING GAS AND ELECTRIC (3)
Lecture: 3 hour(s)
This course allows students to pursue a directed study in welding technology on a contract basis under the direction of a supervising instructor.

Student Learning Outcomes:
The outcome will vary depending on the contract with the instructor. The student will formulate a research paper based on a topic in plumbing technology.

WELDG/E 941  COOPERATIVE EDUCATION  WELDING GAS AND ELECTRIC (4) RPT3
Lecture: 4 hour(s)
Cooperative Education is a work experience program involving the employer, the student employee and the college to insure that the student receives on the job training and the unit credit for work experience or volunteer work/internship. Completion of at least seven units, including Cooperative Education, at the end of the semester is required. Students must be employed or volunteering/interning in order to participate in program.

Student Learning Outcomes:
The student will develop at least three learning objectives to be accomplished on the job. The objectives will be related to the educational/occupational goals of the student.
Glossary of Terms

Academic Probation
After attempting 12 units, a student whose cumulative grade-point average falls below 2.0 is placed on academic probation. A student whose cumulative grade point average falls below 2.0 for three consecutive semesters is subject to dismissal from the College.

Academic Renewal
A student may initiate a petition to have his/her record reviewed for the removal of grade(s) from their permanent record for the purpose of computing the grade-point average. A student must meet specific conditions and may have a maximum of 18 units removed.

Add Permit
A form issued by an instructor which permits the student to add the class if the instructor determines that there is room. Enrollment in the class is official only if the add permit is processed by the office of Admissions and Records.

Advisory
An advisory is condition of enrollment that a student is advised (but not required) to meet before, or in conjunction with, enrollment in a course.

Appeal
A student request for reconsideration of a decision made affecting disciplinary action, grade change, prerequisite challenge, etc.

Application for Admission
A form provided by the office of Admissions and Records on which the student enters identifying data and requests admittance for a specific semester.

Articulation Agreement
An agreement with another institution that certifies that courses will be accepted for credit upon transfer.

ASSIST
An online student-transfer information system that shows how course credits earned at one public California college or university can be applied when transferred to another. ASSIST is the official repository of articulation for California’s public colleges and universities and provides the most accurate and up-to-date information about student transfer in California (assist.org).

Assessment
Assessment is the process the college uses to evaluate student skills in areas such as Reading, English and English as a Second Language (ESL), and Mathematics.

ASO (Associated Student Organization)
An organization which all enrolled students are eligible to join.

Associate Degree
A degree (Associate in Arts, A.A., or Associate in Science, A.S.), granted by a community college which recognizes a student’s satisfactory completion of an organized program of study consisting of a minimum of 60 degree applicable semester units.

Audit
A student’s attendance in a class with permission of the instructor and payment of a fee. No college credit nor grade is given.

CalWORKS Program
CalWORKs (California Work Opportunity and Responsibility to Kids) program offers training and support services to students receiving TANF (Temporary Assistance to Needy Families), previously AFDC.

Catalog Rights
Catalog rights refer to the right of every continuing student to choose one, and only one, catalog under whose course requirements the student is to be evaluated for the purpose of determining whether the student meets the requirements for graduation or for certification to transfer to UC or CSU. The continuing student may select the catalog which was in effect when the student initially enrolled at LATTC, or the catalog in effect when the student petitions for graduation or transfer certification.

Certificate of Achievement
Programs designed for students who are looking for instruction with a high degree of specialization. Certificates of Achievement vary in length and may require less than two years of full-time study, and may be pursued on a part-time basis. At the point of completion, students may request the issuance of a Certificate of Achievement.

Certificate of Completion
A document confirming that a student has completed a program or sequence of noncredit courses that prepares him or her to progress in a career path or to undertake degree-applicable or nondegree-applicable credit courses.

Certification of CSU General Education Requirements
Completion of a body of transfer courses which meet the general education requirements of the California State University system (CSU).

Concurrent Enrollment
A student may enroll in two mutually dependent courses within the same semester and/or may be simultaneously enrolled at both LATTC and a K-12 or another college.

Continuing Student
A student who maintains continuous attendance which is defined as no more than one semester absence within a school year, excluding Summer Sessions and Winter Intersessions.
Cooperative Education
An instructional program that is designed to complement the student’s academic training with on-the-job experiences.

Corequisite
A condition of enrollment consisting of what course a student is required to simultaneously take in order to enroll in another course.

Counseling
Guidance provided by professional counselors in academic, vocational, and personal matters.

Course
A subject of study identified by Title and Number; for example: Art 101.

Credit by Examination
Credit granted for proficiency accomplished through testing.

Dismissal
A student on academic or progress probation for three semesters may be dismissed from the College. Once dismissed, the student may not attend any college within the Los Angeles Community College District for a period of one year and must petition for re-admittance at the end of that period of time.

Drop
A student’s official withdrawal from a class.

Elective
Courses recommended for a given major in addition to prescribed requirements.

Full-Time Student
A student enrolled and active in 12 or more units during the Fall or Spring Semester.

General Education Requirements
A group of courses from several subject areas which are required for graduation by state law.

Grade Point
The numerical value of a college letter grade. A=4, B=3, C=2, D=1, F=0, times the number of units of the course: An “A” in a 5 unit course equals 20 points.

Grade-Point Average (GPA)
The GPA is determined by dividing the total grade point earned by the number of attempted units.

IGETC (Intersegmental General Education Transfer Curriculum)
Completion of all the requirements in the Intersegmental General Education Transfer Curriculum (IGETC) will permit a student to transfer from a community college to a campus in either the California State University or the University of California system.

INC (Incomplete)
The administrative symbol “INC” is recorded on the student’s permanent record in special situations in which the student has not been able to complete a course due to circumstances beyond the student’s control.

IP (In Progress)
A symbol which indicates a course which continues over parts or all of two semesters.

Lower Division
College courses at the freshman and sophomore levels.

Major (Program of Study)
A concentration of study in a specified discipline.

MW (Military Withdrawal)
This occurs when a student who is a member of an active or reserve United States military service receives orders compelling a withdrawal from courses. Upon verification of such orders, a withdrawal symbol may be assigned at any time after the last day of the fourteenth week of instruction or 75% of the time the class is scheduled to meet, whichever is less.

NDA (Non-Degree Applicable)
Credit courses that do not apply toward a degree and are not transferable.

Non-Penalty Drop Period
The first two weeks of a regular Fall or Spring semester during which a student’s enrollment in a class is not recorded on the student’s permanent record if the student drops by the deadline. This deadline will be different for short term and summer session courses.

Pass/No-Pass
A form of grading whereby a student receives a grade of Pass (P) or No Pass (NP) instead of an A, B, C, D, or F. A grade of “P” is assigned for class work equivalent to a “C” or above. “NP” denotes work below a grade of “C.”

Prerequisite
A condition of enrollment that a student is required to meet in order to demonstrate current readiness for enrollment in a course or educational program.

Progress Probation
A student will be placed on progress probation if, after enrolling in 12 units, the total number of units for which a W, NP or INC has been assigned equals 50 percent or more of the units enrolled.

RD (Report Delayed)
This temporary administrative symbol is recorded on the student’s
permanent record when a course grade has not been received from the instructor. It is changed to a letter grade when the grade report is received.

**Returning Student**
A previously enrolled student who did not attend the College during the previous two semesters. Attendance during the summer session is not included in this determination.

**Satisfactory Completion**
Completion of a course with a grade of “C” or better.

**Schedule of Classes**
A schedule giving directions for enrollment and detailed information about the times, locations, and instructors of the classes to be offered. It is issued before the beginning of each semester and summer session.

**Section Number**
A four-digit class identification number which appears in the first column in the class schedule before the time of day or evening the class meets.

**Semester**
One-half of the academic year, usually 16 weeks.

**Substandard Grade**
An earned grade of “D” or “F”.

**Transcripts**
A student’s permanent record and an official list of all courses taken at a college or university showing the final grade received for each course.

**Transfer**
A student may change from one collegiate institution to another after having met the requirements for admission to the second institution.

**Transfer Courses**
Courses designed to match lower-division courses of a four-year institution and for which credit may be transferred to that institution.

**Transferable Units**
College units earned through satisfactory completion of courses acceptable for credit at a four-year college or university (e.g. UC – University of California, CSU – California State University)

**Units**
The amount of college credit earned by satisfactory completion of a specific course taken for one semester. Each unit represents one hour per week of lecture or recitation, or a longer time in laboratory or other exercises not requiring outside preparation.

**Units Attempted**
Total number of units in courses for which a student was ever actively enrolled.

**Units Completed**
Total number of units in courses for which a student received a grade of A, B, C, D, or P.

**Units Enrolled**
Total number of units in which the student is enrolled at the end of the non-penalty drop period, which is the total number of units for all courses appearing on the student’s transcripts.

**W**
An administrative symbol assigned to a student’s permanent record for all classes which a student has dropped or has been excluded from by the instructor after the end of the non-penalty drop date, but by the last day to drop.

**Withdrawal**
The action a student takes in dropping all classes during any one semester and discontinuing coursework at the College.

Full Time Faculty and Administration

Abraham, Angeles (2005)
Assistant Professor, Counseling
Counselor, EOPS
Coordinator - Student Support Program
B.A., CSU, Dominguez Hills
M.A., Loyola Marymount University

Ahmad, Jamil (2000)
Associate Professor, Business & Economics
B.A., Panjab University, Lahore
M.A., Dhaka University, Dhaka, Bangladesh
M.B.A., University of Texas Pan-American, Edinburg, Texas

Ahn, Inhae (2007)
Associate Professor, Counseling
B.S., SUNY at Buffalo
M.S., CSU, Northridge
MBA, University of Nevada, Las Vegas
Licensed MFT

Alicia, Carlos (2010)
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College

Almada, Christina (2006)
Assistant Professor, Counseling
M.S.W., UCLA
B.A., CSU Los Angeles

Anderson-Houlihan, Carole (1994)
Department Chair, Design & Media Arts, Co-op
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.V.E., CSU Los Angeles

Anketell, Christina (2006)
Department Chair, Learning Skills/Noncredit
Assistant Professor, Learning Skills
B.A., University of Sri Lanka
M.A., CSU Los Angeles
M.Ed., Point Loma Nazarene University

Armstrong, Maria (2006)
Assistant Professor, Learning Skills
B.A., M.S., CSU Long Beach

Ashby, Cynthia (2007)
Assistant Professor, Nursing
B.S.N., St. Mary’s College
M.S.N., University of Phoenix

Avila, Luis (2009)
Assistant Professor, Math
B.S (physics), M.S. (Mathematics), CSU Los Angeles

Babb, Dr. Jing (2004)
Associate Professor, Child Development
B.A., Chinese Cultural University, Taiwan
M.Ed., University of Arizona, Arizona
Ph.D., Claremont Graduate University, California

Badalyan, Dr. Anna (2010)
Dean, Institutional Effectiveness
Institutional Research and Planning
MBA, American University of Armenia
MS, Computer Science, Yerevan State University
Ed.D., CSU Northridge

Bailey, Paulette (2000)
Department Chair, Business/CAOT
Professor, CAOT-Business
B.S., Grambling State University
M.S., CSU, Dominguez Hills
MOUS Certified

Bakman, Dr. Anna A (1999)
Professor, Mathematics
M.S., Ph.D., Moscow University of Railing Transport

Barajas, Leticia (2005)
Vice President, Academic Affairs & Workforce Development
B.A., UC Irvine
M.P.A., CSU Dominguez Hills

Blanchard, LeRoy (1992)
Instructor, Culinary Arts
AOS, Culinary Institute of America (CIA)
CEC Certification – ACF

Brent, Lourdes M (1996)
Immediate Past President, Academic Senate
Professor, Counseling
Counselor, EOPS
Coordinator/Volunteer Program
B.A., Immaculate Heart College
M.S., Mount St. Mary’s College

Bentley, Mara (2012)
Assistant Professor, Psychology
B.A., CSU Long Beach
M.A., Pepperdine University

Brown, Stephen (2010)
Instructor, Nursing
ADN, Santa Ana College
BSN, MSN, UC Fullerton

Brown, James G.
Professor, Health & Physical Education (Kinesiology)
A.S., Los Angeles Trade-Technical College
B.S., M.A. CSU, Long Beach

Associate Professor, Health & Physical Education (Kinesiology)
B.A., Duke University
M.A., University of Florida

Professor, Counseling
Counselor, CARE
EOPS Coordinator
B.S., CSU Dominguez Hills
M.A., National University

Burke, Dennis C.
Professor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractors License C-10

Burnett, Maurice L. (2006)
Department Chair, Counseling
Associate Professor, Counseling
AA., El Camino College
B.A., CSU Dominguez Hills
M.S.W., Howard University

Buscaglia, Renatta (2003)
Instructor, Spanish
A.A., Rio Hondo College
B.A., M.A., CSU Los Angeles

Campbell, Deborah N. (2007)
Counselor, Counseling
Assistant Professor, Counseling
B.A., Whittier College
M.A., San Diego State University

Campbell, Dr. Robert W. (1978)
Associate Professor, Electronics
B.S.E.E., Heald Engineering College
M.S.S.M., Ed.D USC

Castillo, Ramon (2005)
Vice President, Student Services
A.A., East Los Angeles College
B.A., M.A., CSU Los Angeles

Chancy, Che’ (2005)
Associate Professor, Welding, Construction Technology
B.S., M.A., CSU, Long Beach.
A.S. Welding-, Los Angeles Trade-Technical College

Chandler, Christine C. (2007)
Assistant Professor, Nursing
B.S.N., CSULA
M.S.N., CSULB

Chapdelaine, Dr. Roland “Chip” (2006)
President
B.A Providence College
M.S., Ed.D, Ball State University

Chavez, Eric (1984)
Department Chair, Electronics Technology/CIS
Professor, Electronics
A.S., East Los Angeles College
B.S., M.A., CSU Los Angeles
Counselor, CARE

Chavira, Jacqueline (2002)
Child Development Center Teacher
A.A. East Los Angeles College
Chen, Lina (1988)
Professor, Cosmetology
B.A., University of Taiwan
Certificate, Pomona Valley Vocational College

Cioffi, Gabriel (1996)
Associate Professor, Refrigeration & Air Conditioning
A.S., Los Angeles Valley College
B.S., CSU, Los Angeles
M.P.A., CSU, Northridge
Contractor’s License, C20 & C38

Cole, Linda Eva (1994)
Counselor, GAIN/CalWORKs Program
Professor, Counseling
B.A., Douglass College, Rutgers University
M.A., P.D., New Jersey City University

Coreas, Madeline B. (1995)
Instructor, Fashion Design
B.A., UCLA

Cyrus, Shawn (1998)
Associate Professor, Electronics
B.S., CSU Northridge
M.S., West Coast University

Damaso, Stacy (2008)
Professor, Culinary Arts
A.A., Diablo Valley College
B.S., Cal Poly Pomona
CECP Certification ACF

Davis-Kendrick, Maggie (2007)
Assistant Professor, Nursing
B.S.N., CSUDH
M.N., Regis University

Dawkins, Thomas (1988)
Counselor, Counseling
B.A., Ripon College, Wisconsin
M.S., CSU, Los Angeles

Delzeit, Linda D (1995)
Instructor, Health & Physical Education (Kinesiology)
B.A., M.A., CSU, Long Beach

Denton, Dr. Timothy (2000)
Professor, Biology
B.A., M.S., CSU Northridge
Ph.D., UCLA

Diaz, Dr. Martin (2007)
Professor, Chemistry
B.A., M.S., CSULA
Ph.D., UCLA

Dolan, Theresa (2001)
Instructor, English
B.A., University of Massachusetts
M.A., Boston College

Dorado, Luis (2010)
Dean, Student Services
B.A., University of La Verne
M.P.A., Cal Poly Pomona

Dozier, Kelly (2007)
Instructor, Refrigeration & Air Conditioning Mechanics

Drebskaya, Finna (1999)
Professor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.A., Academy of Light Industry, Ukraine

Drummond, Marcy J. (2004)
Professor, Institutional Effectiveness & Innovation
B.A., B.S., M.S., Eastern Washington University
Dunn, Roger W. (1992)
Instructor, Carpentry
A.S., Los Angeles Trade-Technical College

Department Chair, Construction, Design & Manufacturing
Apprenticeship Coordinator, LATTC
Professor, Electrical Construction & Maintenance
B.S., Southern Illinois University
M.A., CSU Dominguez Hills

Encinas, Dan A. (2001)
Professor, Automotive Technology
A.A., East Los Angeles College
B.A. M.A., CSU Los Angeles
ASE, ST3, SAE, MACS Licensed

Esparza, David (1996)
Instructor, University Transfer Center
Honors Counselor
Associate Professor, Counseling
B.A., UCLA
M.A., CSU, Dominguez Hills

Evans, George (1997)
Instructor, Visual Communications
B.F.A., California Institute of the Arts

Instructor, Culinary Arts
A.A., Paul Smith’s College

Ferre, Brian (2005)
Instructor, Automotive Technology
A.A., Cerroitos College
ASE, ST3, SAE, MACS Certified

Gallagher, Dr. Mary P. (2008)
Instructor, Administrative Services
B.S., Cal Poly Pomona
M.B.A., Pepperdine University
Ph.D., Claremont Graduate University

Gangel-Vasquez, Janice (2000)
Instructor, English/ESL
Associate Professor, English
B.S., CSU Long Beach
M.A., CSU Dominguez Hills

Galvan, Willie (2010)
Instructor, Plumbing
A.S., Los Angeles Trade-Technical College
Certified Green Plumbing Trainer

Gary, Dr. Karl L. (2002)
Professor, Business
B.A., Occidental College
M.B.A., J.D., Willamette University
Licensed Attorney, State of California

Gee, Dr. Angela (2012)
Instructor, Biological Sciences
B.A. UC Berkeley
Ph.D., Columbia University

Glass-Villalobos, Nurit (2005)
Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College

Glavan, Dr. John (2006)
Professor, Speech
B.A., University of San Francisco
M.A., Pepperdine University
Ph.D., Oregon State University

Goluza, Brano (2008)
Instructor, Electrical Construction & Maintenance
A.S., Los Angeles Trade-Technical College
Electrical Contractor’s License C-10

Gonzalez, Dr. Michael A. (1982)
Professor, English
B.A., CSU, Los Angeles
M.A., University of California, Irvine
Ph.D., UCLA

Guerra, Jesus (2005)
Professor, Transportation
Associate Professor, Transportation
A.S., Los Angeles Trade-Technical College

Guerrieri, Joseph (2007)
Acting Dean, Academic Affairs & Workforce Development
B.A., University of Virginia
M.F.A., University of Southern California

Guerrero-Cantón, Jamila
Counselor, General Counseling
B.A., U.C. Santa Cruz
M.A., Gallaudet University

Guthrie, Ralph T. (1993)
Instructor, Sign Language
A.A., Los Angeles Trade-Technical College

Professor, Computer Information Systems
B.A., El Camino College
B.A., CSU, Los Angeles
M.S., USC
Microsoft Certified Trainer

Hanley, Wallace (2008)
Instructor, Fine Arts
B.A., Antioch University

Harutunian, Dr. Vahak (2000)
Instructor, Chemical Technology
B.T., Brunel University, London
M.S., Loughboro University, England
Ph.D., USC

Herbert, Pamela Jo (1980)
Instructor, Fine Arts
B.F.A., M.F.A., USC

Associate Professor, English
B.A., Spelman College
M.A., Michigan State University

Sharma, Roxanne (2006)
Instructor, English
B.A. U.C.L.A.
M.A. Howard University

Shibuya, Steven T. (1999)
Associate Professor, Manufacturing Technology
A.A., Ventura College
B.S., CSU, Long Beach

Simpson-Rodgers, Nii (2008)
Instructor, Mathematics
B.S., M.S., CSULB

Counselor, EOPS
Instructor, Counseling
B.A., U.C.S.C.
M.A., Loyola Marymount University

Smith, Dorothy (1977)
Dean, Student Success
B.A., M.A., North Carolina A&T State University

Soles, Barbara (2006)
Associate Professor, Nursing
A.A. LA Southwest College
BSN, MSN, University of Phoenix

Sonnier, Dr. Greta D. (2012)
Instructor, Business
B.S., University of La Verne
M.B.A., CSU Pomona
J.D., University of La Verne
Licensed Attorney, State Bar of California
Certified Mediator

Spear, George (1976)
Assistant Professor, Automotive Technology
A.S., Los Angeles Trade-Technical College

Spence Roslyn (2008)
Instructor Culinary Arts
Grand Diplome: Cordon Bleu Culinary School, Paris
B.A., California State University, Long Beach

Sullivan, Dr. Sally, (1997)
Associate Professor, Health & Physical Education (Kinesiology)
A.A., Santa Monica College
B.A., M.A., Ph.D., USC

Szymanski, Gary J (1999)
Instructor, Art
B.A., UC Santa Cruz
M.F.A., UC Irvine

Taylor, Melvin (1994)
Associate Professor, Real Estate
Professor, Graphics Communications
B.S.M., Pepperdine University
M.A., CSU, Los Angeles

Thompson, Deborah (1989)
Professor, Baking
A.A., Los Angeles Trade-Technical College
B.A., CSU, Dominguez Hills
Lifetime Teaching Credential UCLA

Associate Professor, Fashion Design
B.A., Regents College of New York

Tishler, Sheila D. (1992)
Professor, Counseling
B.A., University of California, Los Angeles
M.A., Azusa Pacific University

Tom-Miura, Dr. Allison (2004)
Instructor, Noncredit Basic Skills
B.A., UC Santa Barbara
M.P.L., D.P.D.S., University of Southern California

Uchida, Hiroshi (1985)
Professor, Electrical, Construction & Maintenance
B.A., Claremont McKenna College

Urine, John (1998)
Instructor, Automotive Technology
A.S., Los Angeles Trade-Technical College

Vachon, Jerry (2008)
Instructor Culinary Arts
AS Culinary Institute of America
BS Ohio Dominican
CEC Certification ACF

Vaden, Dr. Bradley D. (2001)
Professor Political Science
B.A., Brigham Young University
Ph.D., University of Hawaii

Vega, Cecilia (2004)
Assistant Professor, Child Development
B.A., M.A., CSUN

Vessella, Tom (2006)
Associate Professor, Carpentry
B.A., CalPoly San Luis Obispo
M.A., CSU Los Angeles

Viliesid, Carmen (2012)
Instructor, English
B.A., M.F.A., CSU Long Beach

Villora, Rosalie (2007)
Assistant Professor, Nursing
Vice Chair, Allied Health
B.S.N., M.N., UCLA

Associate Professor, Nursing
B.S.N., CSUDH
M.S., CSUDH

Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.A., San Diego State University

Weingourt, Dr. Rita (2004)
Department Chair, Allied Health
Associate Professor, Nursing
Director, RN Program
B.S. CSULA
M.N., UCLA
Ph.D, Greenwich University

Wells, Richard L. (1979)
Associate Professor, Health & Physical Education (Kinesiology)
B.A., Whittier College
M.A., Azusa Pacific College

Wemischner, Robert B. (1992)
Instructor, Culinary Arts
B.A., University of Pennsylvania

Wilson-Aus, Aileen (2012)
Instructor, Business/CAOT
B.A., Loyola Marymount
M.B.A., Azusa Pacific University

Wong, Ricky K. (1992)
Department Chair, Sciences
Professor, Biology & Microbiology
B.S., University of Hawaii at Manoa
M.S., CSU, Los Angeles

Associate Professor, Automotive Technology
A.A., East Los Angeles College

Yasuda, Kathleen (2003)
Consulting Instructor - Labor Studies
B.S., UC Irvine
M.A., Harvard University

Associate Professor, Nursing
B.S.N., CSUDH
M.S., CSUDH

Instructor, Fashion Design
A.A., Los Angeles Trade-Technical College
B.A., San Diego State University

Adams, Earl—Counseling
Adams, Esther—Nursing
Albrecht, Don—Drafting Technology
Alerich, Walter—Electrical-Mechanical Technology
Ambers, Billie—Counseling
Arens, Wayne—Electronics
Armstrong, Helen—Fashions Design
Armstrong, Kenneth—Electronics
Amsheim, Nancy—GAIN
Arnold, Evan—Automotive Technology
Ashton, Lillian—Cosmetology
Austin, Brenda—Nursing Education
Avazian, Dorothy—Fashions Design
Azat, Issa—Psychology
Bailey, George—Offset Presswork
Bailey, Melboume E.—Elect Const & Maint
Baklayan, Shoushan—CAOT
Banda, Paula—Counseling
Barbarossa, Fred—Diesel & Truck Technology
Barbero, Tony—Dance/Health
Barham, Edna R.—Counseling
Barilier, Bill—Asst Dean of Students
Barrett, Branche—Cosmetology
Bartlett, Steve—Automotive Technology
Bastone, John—English
Baumgardner, Betty—Apparel Arts
Beck, Julius—Culinary Arts
Becker, Richard—Machine Shop - CNC
Bercseny, Alice—Nursing
Bisi, Roger—Auto Mechanics
Biggs, Burcott D.—Printing Technology
Billings, George—Photography
Bliss, Rolly—Business & Industrial Supervision
Bonzo, Al—Asst Dean Culinary Arts
Borio, Courtney—Physical Education
Buonauro, John M.—Refrigeration/Air Conditioning
Bowe, Harry L.—Refrigeration/Air Conditioning
Bragg, Arland—Visual Merchandising & Display
Brand-Njoku, Mary—Fashion Design
Brassine, George—Drafting Technology
Bright, Marie—Nursing
Brinkman, Fred—President
Broulard, Inge—Fashion Design
Brown, Mel—English
Brown, Pete—Physical Education
Buhler, William—Building Construction Technology
Burnham, Doris—Nursing
Burns, Howard—Sociology
Cardoza, Raul—Dean, Enrollment Management
Carlson, Ralph—Printing Technology
Carr, Eleanor—Nursing
Camilo, Pauline—Director—Child Development Center
Cavanaugh, John M.—Diesel & Related Technology
Chambers, Marion—Automotive Technology
Chase, Don—Coor. Aircraft Trades
Childers, Richard—Construction Technology
Chodas, Judith—English
Chu, Eleanor—Office Administration
Cloud, Dorothy—Business
Coates, Rissa—Cosmetology
Corwin, Harold—Automotive Technology
Coulter, Kitty—Fashion Design
Crane, Lloyd—Coor. Culinary Arts
Crawford, Margaret—Dean Evening Division
Creech, James—Printing
Cunningham, Terry—Electrical
DaSilva, Nadia—Spanish Language Arts
Davar, Saeed—Mathematics
David, Oscar A.—Cabinet Making & Millwork
Davidson, Jack—Baking
Davis, Charles—Coor. Research & Development
DeFranco-Browne, Diane—Dance
De Long, Verna—Counseling
De Mers, Lowell—Business
De Page, Mike—Aircraft Mechanics
Denard, Bernice—Fashion Design
Deritis, Vincent,
Desmond, Eileen—Vocational Nursing
Devlin, David—Restaurant Management
Diggins, Bernie—Plastics
Dismukes, Tom—Architectural Technology
Dobrian, Ed—Business
Douglas, Theda S.—Dean—Student Services
Dunn, Bob—Carpentry
Earnst, Richard—Sign Graphics
Eister, Estelle—Fashion Design
El-Tawansy, Mohamed—Mathematics, Physics, & Engineering
Elder, Alice—Fashion Design
Erickson, Ed—Coor. Electronics Technology
Escobeda, Eduardo—Counseling
Essex, Robert—Psychology/Child Development
Estrup, Hans—Fashion Design
Exum, Doris—Fashion Design
Ferraro, Richard, Political Science
Fimbres, Frederick—Physical Education
Florio, Pete—Printing
Florio, Valerie—Nursing
Frederick, Ted—Metals Technology
Freeland Dave—Drafting Technology
Friedel, Philip—Electrical Technology
Gale, Joyce—Art Trades/Fashion
Garay, Reynaldo—Dean, Academic Affairs
Garstka, Polly, Acting VP, Academic Affairs
Gentry, James—Counselor
Gerdes, Joe—Air Conditioning Technology
Giblin, Roger—Electrical Technology
Gilreath, Woody—Registrar
Gindraux, Jim—Commercial Art
Glennan, Pete—Asst’s Dean Admissions
Gobin, Grace—Nursing
Goetz, Geraldine—Fashion Design
Gonzalez, Raymond—Accounting
Gonzalez, Rob—Cosmetology
Goodie, John—Air Cooled Engine Repair
Gordon, Alice—Business
Goss, Joseph—Printing
Grater, Vincent—Electronics Technology
Gray, jr., Elliot C.—Elect Const & Maint
Green, Ernest—Director—Culinary Arts
Grigsby, Leah—Speech
Gruntbaum, Dorien—ESL
Halsey, Frank—Automotive
Harmetz, Richard—English
Harris, Margie—Speech
Hartwig, Betty J.—President

LATTC is a tax-exempt non-profit 501(c)(3) corporation.
Student Parking Guidelines

You are responsible for knowing LATTC parking rules and regulations. This information is intended to provide students with basic guidelines on parking at the college. The complete text of the college’s parking rules and regulations is printed in the College Catalog and may also be obtained from the Sheriff’s Department, D-150, the Administrative Services Office, or the College Website: (www.lattc.ca.us.htm).

- Student parking regulations are enforced from the first day of classes each semester through final examinations. A student parking permit is valid for the current academic term only and must be displayed at all times a vehicle is parked on college property. Saturday and Sunday parking permit use is enforced in the same manner as weekdays.
- Parking permits are made of removable Mylar and should be affixed to the inside rear window, (lower right side, facing outward.) Vehicles displaying a permit which is expired, altered, reported lost or stolen, or not completely visible are subject to a citation.
- A valid college parking permit and a DMV placard must be displayed on any vehicle parked in a designated handicapped stall. Students with a verified disability should go to the Disabled Students Program and Services Office, E-110, to arrange for an accommodation.
- Regulations governing handicapped parking, red curbs, no-parking zones, fire lanes, special permit areas, and areas that have parking time limitations are enforced 24 hours a day, including weekends and holidays. Failure to display a parking permit or parking in an area not authorized for student parking, including metered spaces, will result in the issuance of a citation. Illegally parked vehicles may be towed away at owner's expense.
- All traffic laws must be obeyed. Vehicles must be parked in stalls within the designated lines. The college speed limit is 7 miles per hour.
- The purchase of a parking permit does not guarantee a parking space; it is only a license to park one vehicle with a Student Parking Permit for all time periods in any of the designated areas specified below:

Preferred Student Parking ($27.00 for Fall & Spring Semesters and includes $7.00 ASO membership) - as available:
- Olive Street Parking Facility - Entrance from Olive St., between Washington Blvd. and 21st St.
- Roof Lot (F-Bldg) - Entrance from Flower St. (Southbound ONLY), between 22 St. and 23rd St.
- 22nd Street Lots 8 - Entrance from 2200 St., between Grand and Olive

General Student Parking ($20.00 for Fall & Spring Semesters):
- 18th and Grand Lot - Entrance: Northbound from Olive St. or westbound from 17th St.
- Glory Church - Entrance: Southbound from Grand Ave.

General Student Parking ($10.00 for Summer & Winter Sessions):
- For Summer & Winter Sessions, $10.00 General Student Parking Permits are accepted in Preferred Student Parking areas above.

OVERFLOW PARKING: LATTC makes every effort to provide adequate parking for all students, staff and visitors. However, since parking becomes extremely impacted during the first three weeks of the Fall and Spring semesters, we have made arrangements with our neighbor and community partner, The LA Mart, at 1933 S. Broadway, to provide overflow parking for LATTC in their East lot. The lot is accessible from Broadway St., or Main St., just south of Washington Bl., and will be available to students and staff with a valid parking permit for the first three weeks of the Fall and Spring semesters ONLY.

LATTC assumes no responsibility or liability for your car or its contents while parked in the lots.

- Escort service is provided upon availability for students with physical or other limitations. Note: This is not a shuttle service. Call the College Sheriff's Department and an officer will be dispatched to your location.
- Inquiries regarding the college’s parking permit program should be directed to the offices listed below during normal business hours. College Sheriff's Department personnel are, however, on duty 24 hours a day, seven days a week to assist with permit use and enforcement issues.
- Parking Rules, Regulations, Permit Use and Enforcement: College Sheriff’s Department, D-150, (213) 763-3600. Individuals who believe a citation was issued to them in error must appeal it immediately by completing an Administrative Review form (available at the Sheriff’s Department, D-150) or the LATTC Sheriff’s Department website under Parking Citations and Appeals). Appeals must be mailed to: Los Angeles Trade Technical College, c/o Parking Citation Service Center, P.O. Box 11923, Santa Ana, CA 92711. Failure to immediately pay or appeal a citation may result in substantial penalties and a Department of Motor Vehicle (DMV) hold on your vehicle registration.
- Permit Sales, Refunds, and Exchanges: Business Office, ST-113, (213) 763-7225. For further information regarding parking policy: Administrative Services, ST-532, (213) 763-7040. The parking information shown above is subject to change without notice.
Trade Bridge Academy is a new commitment at Trade Tech, not just a new program. TBA focuses our resources, support services, instructional strategies and energy into a one-stop academy approach.

There are many talented faculty, staff and administration committed to your educational goals, but that commitment needs to translate into successful outcomes. The campus leadership has embarked on a new, sustainable, college-wide strategy of specific and intense student support strategies, as well as instructional processes that will lead to improved retention and accomplishment.

Trade Bridge Academy Commitments

- Enhanced Enrollment Procedures for EVERY student
- Persistent Counseling for EVERY student
- Vigorous and inclusive Orientations for EVERY student
- Aggressive Student Services for EVERY student
- Solving issues for EVERY student
- Creating a Pathway to Success for EVERY student

Visit the TBA homepage at: http://college.lattc.edu/tradebridgeacademy/
